Mr. President, the Finance Committee included several provisions in its portion of the reconciliation bill that should have the effect of countermanding HCFA's regulations. But more must be done. We need to assess the implications of allowing States the option of providing these services. Therefore, I included a provision in the bill to require the Secretary to conduct demonstrations in four States to determine whether and to what extent State controlled home and community-based services programs for elderly, disabled and developmentally disabled Medicaid recipients would reduce expenditures for the society as a whole, for the Federal Government, and for the States. While the Secretary would be required to select programmatically and demographically disparate States, I would certainly hope that New Jersey is selected as one of the States.

Mr. President, I want to point out that we are not proposing to cap Medicaid in these four States. We are trying to give four States more flexibility to provide these services at their option to determine the economic feasibility of expanding this to other States.

Mr. President, there are many among us who have ignored the growing demand for long-term care services in this country, hoping that if the Federal Government does as little as possible that the problem will somehow go away.

The problem won't go away. It is only going to get bigger. In the next 15 years, the over-age-85 population will grow by 60 percent and the number of persons who suffer from a chronic disease that limits their daily activities will grow by 50 percent.

We have to come to grips with the fact that long-term care is going to cost this Nation a lot of money as the population ages. I believe that more home care—as an alternative to nursing home care services—is a humane and cost-effective approach. This provision allows four States much greater flexibility to test out ways to provide affordable long-term care services at home.

The Federal and State governments have a responsibility to develop innovative ways to help meet the long-term care needs of this Nation's elderly and disabled populations. I ask you—for cost reasons and for humanitarian reasons—aren't we better off living in a society that tries to find ways to keep the elderly and the disabled in their homes with their family members rather than in institutions?

In summary, Mr. President, this amendment would apply a four-State test to determine its viability for a national program, I believe we will find home care to be cheaper than any other institutional mechanism available to the State. Mr. President, this is one of the programs that the distinguished Senator from New Mexico mentioned. It is needed and it is a very small program. It was approved by the Finance Committee during the committee's deliberations on the reconciliation bill. It is within the Finance Committee's budget target and I hope the Senate will accept it.

The PRESIDING OFFICER. The question is on the motion of the Senator from New Mexico to table the amendment proposed by the Senator from Pennsylvania. The yeas and nays have been ordered. The clerk will call the roll.

The bill clerk called the roll.

Mr. SIMPSON. I announce that the Senator from Florida [Mr. HAWKINS], is necessarily absent.

Mr. CRANSTON. I announce that the Senator from Oklahoma [Mr. BOREN], is necessarily absent.

The PRESIDING OFFICER. Are there any other Senators in the Chamber who desire to vote?

The result was announced—yeas 25, nays 73, as follows:

[Rollcall Vote No. 297 Leg.]

YEAS—25

Armstrong	Gramm	Pressler
Boschwitz	Helms	Proxmire
Chiles	Hollings	Quayle
Dole	Humphrey	Rudman
Domenici	Johnston	Simpson
East	Lugar	Wallop
Evans	McClure	Zorinsky
Garn	McConnell	
Goldwater	Nunn	

NAYS—73

Abdnor	Gore	Mitchell
Andrews	Gorton	Moynihan
Baucus	Grassley	Murkowski
Bentsen	Harkin	Nickles
Biden	Hart	Packwood
Bingaman	Hatch	Pell
Bradley	Hatfield	Pryor
Bumpers	Hecht	Riegle
Burdick	Heflin	Rockefeller
Byrd	Heinz	Roth
Chafee	Inouye	Sarbanes
Cochran	Kassebaum	Sasser
Cohen	Kasten	Simon
Cranston	Kennedy	Specter
D'Amato	Kerry	Stafford
Danforth	Lautenberg	Stennis
DeConcini	Laxalt	Stevens
Denton	Leahy	Symms
Dixon	Levin	Thurmond
Dodd	Long	Trible
Durenberger	Mathias	Warner
Eagleton	Matsunaga	Weicker
Exon	Mattingly	Wilson
Ford	Melcher	
Glenn	Metzenbaum	

NOT VOTING—2

Boren	Hawkins

So the motion to table the amendment was rejected.

Mr. MATTINGLY. Mr. President, I move to reconsider the vote by which the motion to lay on the table was rejected.

Mr. BRADLEY. Mr. President, I move to lay that motion on the table.

The motion to lay on the table was agreed to.

The PRESIDING OFFICER. The question is on agreeing to the amendment of the Senator from Pennsylvania.

Mr. DOMENICI. Mr. President, I ask unanimous consent that the yeas and nays be vitiated on the amendment.

The PRESIDING OFFICER. Without objection, it is so ordered.

The question is on agreeing to the amendment of the Senator from Pennsylvania.

The amendment (No. 1012) was agreed to.

Mr. DOMENICI. Mr. President, I move to reconsider the vote by which the amendment was agreed to.

Mr. HEINZ. Mr. President, I move to lay that motion on the table.

The motion to lay on the table was agree to.

AMENDMENT NO. 1013

(Purpose: To make a technical correction to section 707)

AMENDMENT NO. 1014

(Purpose: To make technical corrections relating to medicaid provisions)

Mr. HEINZ. Mr. President, I have been asked by Senator PACKWOOD, who is being engaged by the debt ceiling conference, to offer two technical amenedments, and I am assured that they are technical, and I am assured that they have been cleared by both sides to the finance reconciliation provisions.

They are so technical that I will not even try to explain them, and I am not sure I can.

I send them to the desk and ask that they be considered in bloc.

The PRESIDING OFFICER. The amendments will be stated.

The assistant legislative clerk read as follows:

The Senator from Pennsylvania [Mr. HEINZ], for Mr. PACKWOOD, proposes amendments numbered 1013 and 1014, in bloc.

Mr. HEINZ. Mr. President, I ask unanimous consent that the reading of the amendments be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendments are as follows:

AMENDMENT NO. 1013

On page 161, line 23, after "1972" insert the following: ", or under section 402 of the Social Security Amendments of 1967 (as amended by section 222(b) of the Social Security Amendments of 1972),".

AMENDMENT NO. 1014

On page 174, line 14, before the semicolon insert "payment for which would be made under the State plan".

Beginning on page 218, line 24, strike out "but shall not be subject to any other monitoring, quality control, audit, or penalty provision" and insert in lieu thereof "but shall not be subject to any other financial penalty as a result of any other monitoring, quality control, or auditing requirement".

Mr. HEINZ. Mr. President, I move the amendments.

The PRESIDING OFFICER. The question is on agreeing to the amendments.

The amendments (No. 1013 and No. 1014) were agreed to.

Mr. HEINZ. Mr. President, I move to reconsider the vote by which the amendments were agreed to.

Mr. JOHNSON. Mr. President, I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. DOLE. Mr. President, I am advised there are still 26 amendments outstanding. I would hope we could have one offered here and have another quick vote. Maybe some of these amendments will not be offered. But the tally here shows 26 amendments remaining.

We are advised 16 of them would require a rollcall. So this is a good time to bring one of those up.

Mr. President, some of our principals are involved in the debt limit extension conference and they need to go back at 4:15. I hope we might have one additional amendment and then they could depart with some assurance they would not be called back every 15 or 20 minutes for an amendment.

Are there any amendments on that side, I might ask the minority manager?

Mr. JOHNSTON. I believe Senator METZENBAUM has three of four, but he is not here, and there are two others that we are trying to find.

Mr. DOLE. Mr. President, we have been trying to scour up a couple of additional amendments on reconciliation. I am advised that some of those who thought they might offer amendments may not now do so and in the few cases there are amendments they are not prepared.

I am prepared to indicate at this time there will be no more rollcall votes.

Under the previous order, tomorrow morning at 10 o'clock there will be a cloture vote on the textile and apparel bill. Between 9 and 10 in the morning we hope to settle the health care proposal.

I believe Senators MURKOWSKI, HAWKINS, CHILES, and others may have resolved that.

I am advised from a distance that may be correct.

ROUTINE MORNING BUSINESS

Mr. DOLE. Mr. President, I ask unanimous consent that there now be a period for the transaction of routine morning business not to extend beyond the hour of 4:45 p.m. with statements therein limited to 5 minutes each.

The PRESIDING OFFICER. Without objection, it is so ordered.

DEBT LIMIT DEADLINE

Mr. DOLE. Mr. President, over the last month and a half, the Treasury Department has repeatedly warned us of the consequences of failing to pass an increase in the debt limit. We have faced two debt limit deadlines, but in both instances the Treasury has found ways to avoid default without any change in the debt limit. First, beginning on October 9, the Treasury utilized the independent borrowing authority of the Federal financing bank to obtain $15 billion of additional cash to operate the Federal Government. Once that cash was exhausted Treasury obtained additional borrowing authority within the existing debt ceiling by accelerating the redemption of Federal securities held in the Social Security and other trust funds.

Now we face yet another debt limit crisis if a debt limit increase is not enacted by Thursday, November 14. For many Members the Treasury Department's latest warning may seem like the shepherd boy who repeatedly cried "wolf!" when there was no wolf. But one must remember that the shepherd boy in the fable was eventually consumed by the wolf after all the villagers ignored the boy's final warning when it was for real.

The wolf may really be at our door this week. The Treasury indicates that unless we act by midnight on November 14, the Treasury will default on between $25 and $30 billion of its obligations on Friday, November 15. Beginning at 8:30 a.m. on Friday, the Federal Reserve will be notified to no longer honor Federal checks. This will mean failure to meet about $16 billion of interest payments due on Treasury bills and on almost $9½ billion in principal due on Treasury bills that are maturing on Friday. This default would mean the full faith and credit of the U.S. Government is not adequate security for holders of our obligations. If this occurs, obviously it will have a destabilizing effect on financial markets and certainly result in long-term higher interest costs for the Federal Government as investors seek a hedge against the risk of similar occurrences in the future.

I hope we can all agree that this result must be avoided. That is why I am urging my colleagues who are negotiating over the debt limit bill and the Gramm-Rudman-Hollings budget reform to move swiftly to agree on a package that we can all support. Our conferees are doing an outstanding job, and I know that Chairman BOB PACKWOOD is determined to get a satisfactory and timely solution of this matter.

Mr. President, I would just indicate that this would be the first time in history, I am advised, that the U.S. Government has defaulted, so it is a matter of some importance. We trust that there can be a resolution—not another little extension but a resolution—of the basic problem which appears to be on the House side, the implementation of the Gramm-Rudman amendment. I urge my colleagues in both the House and the Senate to help us resolve this matter before it is too late.

THE AGRICULTURE COMMITTEE SUBPOENA IN THE MEDVID CASE

Mr. HELMS. Mr. President, this morning the Agriculture Committee was scheduled to hear testimony from Mr. Miroslav Medvid, the Ukrainian sailor sought to defect to the United States. As everyone now knows, the executive branch conspired to flout the subpoena which was issued by the committee. I invited Secretary of State Shultz to testify on this matter in Mr. Medvid's place, but the Secretary pleaded other engagements more pressing than elucidating the truth on this shameful episode. Further opportunities will be provided for Mr. Shultz' testimony.

For it is now clear that the State Department ordered the return of Mr. Medvid even though reasonable medical opinion should have concluded that Mr. Medvid was under the influence of powerful drugs. The so-called free choice attributed to Mr. Medvid by the Secretary and other administration spokesman was actually a choice induced by powerful psychiatric drugs of the sort used to quell political

and intellectual dissent in the Soviet Union.

Astonishingly, the State Department itself released the medical records pertaining to Mr. Medvid, apparently under the impression that they somehow justified the human sacrifice they were about to make. At the request of the Agriculture Committee, a very distinguished neuropsychiatrist and pharmacologist, Dr. William E. O'Malley, agreed to examine these records by professional standards. Despite the very short notice we were able to give—the State Department did not release the records until Friday afternoon—Dr. O'Malley agreed to review the records and share his conclusions with us this morning.

We have seldom had testimony before the committee which met such high standards. Dr. O'Malley is a medical doctor, board qualified in psychiatry and neurology, who also has a Ph.D. in pharmacology. He happens to be expert in the very drugs which the State Department report stated were given by the Soviets to Mr. Medvid.

Dr. O'Malley stated that Mr. Medvid did not act in an impulsive manner, but in a very considered and deliberate manner, indicating his intention to seek political asylum on at least four occasions. From an analysis of the medical record, Dr. O'Malley found evidence that Mr. Medvid had symptoms that matched the known side effects of the neuroleptic drugs which the Soviets said that they gave to the sailor. Dr. O'Malley stated that the powerful effects of the drug were known to persist for weeks. Finally, he explained that these drugs profoundly alter the brain chemistry with regard to emotions such as aggression, even though the patient—or victim, in this case—might appear to be normal to the casual visitor.

This analysis is an indictment of the State Department's action in returning a drugged yound man to Soviet terror, while maintaining that he made a free choice. Such an inexplicable action leads us to search for more extensive motivations for the State Department action. It should be noted that the recent court case of Ukrainian Bar Association against Shultz contains references to high-level negotiations and threast of force, all made under the injunction—since removed—of secrecy. Further, the Agriculture Committee staff who served the subpoena in New Orleans have reported that the Soviet diplomats claimed extraterritoriality after telephone conversations with Ambassador Dobrynin. This leads us to inquire whether the State Department was protecting the Soviet claim.

Mr. President, I wish to assure my colleagues that the Medvid matter is not closed, whatever the State Department thinks. Secretary Shultz has a standing invitation to come before the Agriculture Committee to explain why he thinks foreign policy considerations made it necessary to ignore our subpoena and give up on a young man who sought the protections of liberty.

Mr. President, I ask unanimous consent that text of Dr. O'Malley's testimony be printed in the RECORD, along with the statement of my staff member, Mr. Dave Sullivan, and the opening statement of the chairman.

There being no objection, the statements were ordered to be printed in the RECORD, and follows:

STATEMENT OF WILLIAM E. O'MALLEY, M.D., PH.D., BEFORE THE U.S. SENATE COMMITTEE ON AGRICULTURE IN THE MATTER OF MIROSLAV MEDVID

Mr. Chairman, and members of the Committee. My name is Dr. William Edward O'Malley. I currently live in Virginia, near Leesburg, a suburb of Washington, D.C. My professional medical training is in the general areas of neurology, psychiatry, and pharmacology. I have two doctorate degrees, an M.D. and a Ph.D., and I am Board-qualified in neurology and psychiatry.

I have spent most of my professional life studying the effect of drugs on the brain and the nervous system. I attended medical school at the University of Maryland and Georgetown University, here in Washington, D.C. I left Georgetown after spending six years there in training, and after spending an additional four years as a teacher, researcher, and medical practitioner. I also spent three years at the National Institutes of Health. For the past 15 years, I have held various positions in the U.S. pharmaceutical industry, mainly at Parke-Davis & Co., and at the pharmaceutical division of Dow Chemical Company. Currently I work as a consultant in matters involving pharmaceuticals.

The work which gave me the most satisfaction in my research career was as an independent researcher in studying the effect of the drug 1-dopa on Parkinson's disease. The use of 1-dopa changes the chemical composition of the brain by increasing the concentration of the chemical compound dopamine, a nonAL1 constituent of the brain. Sufferers from Parkinson's disease do not have the normal complement of dopamine in certain parts of the brain. Those of us who were studying 1-dopa at that time discovered that it actually altered the content of dopamine in the brain, and enabled sufferers to function normally. The drug 1-dopa is now the standard treatment for Parkinson's disease and is a classic example of how medicine has benefited humanity.

I mention this work because the concept of creating changes in the composition of the brain is relevant to the inquiry of this Committee. My work with 1-dopa was preceded by basic laboratory studies on the effects of a drug called chlorpromazine on brain tissue. This is the generic name for one of the two drugs which we now know the Soviets used on Mr. Medvid. In my clinical and laboratory experience, I have found that these drugs profoundly alter emotions and thought processes by making changes in the actual chemical composition of the human brain. For this reason, these drugs are never used in the United States in the manner in which they were used on Mr. Medvid.

Several days ago I was asked to review thoroughly and critically the report of the U.S. Air Force psychiatrist who examined Mr. Miroslav four days after he sought asylum in the U.S.A. This document was released by the U.S. Department of State. The psychiatrist who did the examination is not named. Rather I should say that his name, along with several other items, was censored from the report. A U.S. Navy physicial also carried out a routine, but very limited, physical examination.

I am here today to give to you my clinical impressions of this report. I must say at the outset that I was appalled by what I found when I carefully studied this document. In my judgment, it did not meet the minimal professional standards that one would expect of this kind of examination. However, I shall do my very best, as objectively as possible, simply to supply the facts, and my opinions as to the unfortunate circumstances surrounding this case.

Let me begin at the end of this case. The Air Force psychiatrist, who apparently was called in by the U.S. Department of State to examine Mr. Medvid, made the bottom line conclusions after his examination that:

1. The reason this 25-year-old sailor defected from the ship and sought political asylum was "based primarily on a rather impulsive decision, 'Grabbing for the glitter and gusto', rather than any deep-rooted political or moral beliefs."

2. Mr. Medvid showed "No evidence suggestive of any ongoing significant organic mental disorder, including substance-induced intoxication, that would have impaired his competency." He thereby indicates that there was no evidence that Miroslav Medvid was under the influence of drugs.

3. Mr. Medvid was "clearly competent" in making his decision to return to the Soviet Union.

All of these three conclusions must be strongly challenged, because the data in the reports show that they are obviously in error.

CONCLUSION NO. 1

Conclusion No. 1 is in error in asserting that Mr. Medvid acted impulsively. To the contrary, just the opposite is true, since Mr. Medvid premeditated his defection. According to eye-witness accounts, Mr. Medvid brought with him his watch and papers carefully sealed in a water-tight jar, obviously prepared before his jump from the ship.

Also, Mr. Medvid made not one impulsive decision to seek asylum, but rather four separate and consecutive decisions. The second decision was when he told the Ukranian interpreter in New York via telephone that he did indeed want asylum. The third decision was when he jumped from the launch returning him to the Soviet ship. The fourth was when he strongly resisted the ship security personnel who beat him up and tied him after he had swam the second time to the shore.

These actions are characteristic of a highly-determined, purposive personality, fulfilling a premeditated pattern.

CONCLUSION NO. 2

Conclusion No. 2, that Medvid was not under the influence of drugs, is in error because the Soviet doctor admitted that two neuroleptic-type drugs had been recently administered. He volunteered the names of these drugs as Seduczine and Amonizine. The first name is equivalent to the U.S. drug, Haldol. The second, more properly spelled Aminazin, is equivalent to chlorpromazine, or the U.S. drug, Thorazine. I have checked their chemical structures. Both are

strong, mind-controlling neuroleptics. The authoritative textbook by Goodman and Gilman goes further and describes Haldol as an "extremely potent" major tranquilizer.

These drugs are known as major tranquilizers to distinguish them from the better known and weaker minor tranquilizers such as Valium. The minor tranquilizers do not act in the same fashion. They are relatively mild in their effects. The major tranquilizers, are known to have potent action and to remain present in the body for weeks.

They exert a strong effect, diminishing the will power, and making the patient more susceptible to conditioning. They have an extremely potent taming effect; they even tame wild animals. In the human, they take away aggression and combativeness, and they produce a mental state of serenity and indifference, without simultaneously clouding consciousness. One of their benefits, in U.S. practice, is that to the casual observer, the personality of the patient appears unimpaired or normal, but the actual situation is that emotional and thought processes are profoundly altered. Thus a psychotic or violent individual can live in ordinary society. Nevertheless, neurologically speaking, transmission between brain cells for large areas of the brain are effectively blocked or profoundly depressed.

Brain cells, or more correctly, neurons, have processes extending from the cell body called dendrites and axons. Dendrites carry nerve impulses to the cell body; axons carry nerve impulses away from the cell body and to the dendrites of other neurons. The junction of the axon of one cell with the dendrite of another is known as a synapse. It is at the synapse that the two drugs in question act to depress neurotransmission. In other words, the drugs act to block normal brain function. For reasons we do not fully understand, the drugs act selectively in those areas of the brain which control the affective functions.

It is a characteristic of these drugs that, to the untutored observer, the patient under their influence can appear normal, and act normally. A manic patient who is doing violence to himself or his surroundings can be subdued fairly quickly when these drugs are administered. But when unscrupulous Soviet practioners give them to a person who is normal to begin with, the drugs can have a devastating effect on the personality.

It should be noted that the medical reports indicated that Mr. Medvid appeared "sedated" while still on the Soviet ship. However, the neuroleptic drugs are not, strictly speaking, sedatives. What happened, in all probability, was that he had been given massive doses to subdue his will and his captors had not yet adjusted the dosage so that he could appear "normal." We may therefore hypothesize that by the time of the full examination on the U.S. ship and Naval Hospital, the dosage had been adjusted.

I find it significant that when Mr. Medvid spent the night at the Naval Hospital, the Soviet doctor stayed with him. It would be very easy to continue administering medication under those circumstances. It would not be surprising that U.S. diplomats and other officials without medical training would be misled, but it is unforgiveable for medical profesionals to have been misled.

It is well-known that Soviet psychiatry has misused these drugs to control political dissent. There have been many reports of the use of such drugs by Soviet doctors in prison and re-education camps, as Alexander Solzhenitsyn has described in popular fashion. The use of drugs to control political behavior derives from the Soviet reliance on Pavlovian theories of conditioning.

Standard pharmacological texts, such as Goodman and Gilman, describe the side effects of these drugs. These include nasal congestion and dry mouth. Blood pressure and temperature can be profoundly altered in either direction. The pulse is usually elevated.

In reviewing the medical reports of Mr. Medvid, it should be noted that the patient "admits to nasal congestion . . . and slight sore throat" for the two or three days preceeding the October 28 psychiatric examination. At one point, he is described as taking a long drink of water before answering a question. His temperature is recorded as 100.4 degrees (1.8 degrees above normal). His blood pressure was 130/88; for a young, athletic man, this is rather on the high side. The pulse was 96 on one physician's examination, and 84 on the other; this is again high in a young, athletic man, where one might expect a pulse of 65—or at least 72, the norm for the population at large.

Taken together, these indices are highly suggestive that a drug was present in the patient's body, and having an effect upon him. Yet for some unknown, but seemingly inexcusable reason, neither urine nor blood samples were taken. These undoubtedly would have established beyond doubt that Mr. Medvid's body contained these highly potent drugs and their metabolites. Such tests are routinely done, even on race horses.

Moreover, neuroleptics slow down the brain waves, producing a higher quantity of alpha and theta waves. Yet no electroencephalograph (EEG) was taken. There is not even any indication in the record that an observation for nystagmus was taken. This is a simple, visual test of eye movements, which, when positive, almost always indicates the presence of drugs. It takes about 20 seconds. Of the twelve cranial nerves, three are involved in eye movement; yet the only observation recorded that the cranial nerves were "grossly normal." In medical terms, this means an over-all, superficial observation was made, without tests. This is positive evidence that these simple tests were skimmed over, and not performed.

In short, once the Soviet doctor admitted that neuroleptics had been administered, all of these tests should have been done on a high priority basis.

CONCLUSION NO. 3

Conclusion No. 3, that Mr. Medvid was "clearly competent" is certainly in error. The psychiatrist himself notes that Mr. Medvid was under mental duress as a result of threats to his parents, his "Mama and Papa." Moreover, a correct interpretation of the observations of the traumatized tissues strongly suggests that physical torture had been administered to Mr. Medvid.

First of all, we know that Mr. Medvid was said to have been beaten badly by a group of Soviet security people while on shore. Second, one of the U.S. physicians notes that the left arm was bandaged from the base of the fingers to, roughly, the armpit, and that there were "several superficial, clean lacerations on exposed fingers." Translated into plain English, this means that cuts were made on the fingers with a sharp instrument, perhaps either a very sharp knife or a razor blade. The tips of the fingers contain an extremely high concentration of pain fiber nerve endings. It is highly unlikely that a person would repeated inflict such a wound on himself because of the intense pain resulting from the first cut.

There is strong probability, then, that such incisions were the result of intentional torture. I find it very curious that none of the doctors examining Mr. Medvid attempted to remove this bandage, which covered most of the left arm, especially since the exposed fingers were so badly traumatized. Indeed, a note is made that no attempt was made to test the left arm reflexes because of the presence of the bandage.

However, the Air Force psychiatrist does note that a cut on the left wrist that was large enough and deep enough to require three sutures. The Soviet physician asserted that it represented a self-inflicted wound, hinting that Medvid tried to cuts his own wrists in a suicide attempt. Surprisingly, the Air Force psychiatrist appears to accept this without question, despite the more reasonable hypothesis that the left arm had been involved in torture.

Finally, the U.S. psychiatrist noted "several ecchymotic areas on the right arm in various stages of resolution." "Ecchymosis" is the medical term for severe subcutaneous bruising. Thus, not only the left arm, but the right arm also was involved in severe trauma—the result, perhaps, of a severe fall or a beating. However, the fact that the ecchymotic areas were "in various stages of resolution" suggests that the trauma occurred not at the same moment, as in a fall, but as the result of repeated blows. This could be evidence that Mr. Medvid was beaten on the arm with a blunt instrument, or else that he was subdued during his initial escapes and capture with brutal force.

In conclusion, the above evidence that massively potent drugs were given presumably along with physical torture and mental duress permits one to conclude that Mr. Medvid was not a free agent acting by his own free will. The normal concept of personal responsibility, both as developed in our political and medical traditions, does not permit us to conclude that a person suffering the mental and physical abuse to which Mr. Medvid was subjected can be described as competent.

CONCLUSION

If we may summarize the conclusion of the U.S. psychiatrist, it appears that he believed Mr. Medvid was incompetent when he jumped ship, but competent when he returned. Carried to its logical conclusion, he seems to be saying that Mr. Medvid was obviously "insane" when he wished to defect to the United States from the Soviet Union, but regained his sanity when he made his decision to return. This is a conclusion that is more worthy of the KGB than of the U.S. psychiatric profession.

I draw the final and inescapable conclusion that Miroslav Medvid desperately wished to stay in the United States of America, but as a result of threats, maltreatment with potent neurolepteics, and probably torture, he bowed to the wishes of the Soviets that he return with them. He then, following instructions which he had received from the Soviets attempted to misguide the U.S. medical doctors who examined him. It distresses me as a member of the medical profession to report that he succeeded in this deception. A very grave injustice has been done.

NOVEMBER 12, 1985.

From: David S. Sullivan, Legislative Assistant to Senator Helms.

Subject: The Issue of Extra-Territoriality in the Subpoena to Seaman Medvid.

1. On Friday, November 8, 1985, the Soviet Diplomat, Yevgeniy G. Vtyurin stated that the Soviet ship Marshal Konev, was "Soviet territory" and as such was "totally immune" from U.S. jurisdiction. At the time, I thought he was merely saying this for rhetorical effect to try to explain his attempts to deny that the subpeona for Seaman Medvid had in fact been legally served. I now believe, however, Diplomat Yevgeniy G. Vtyurin may have had some reason for believing this to be true.

2. It is possible that there was a secret agreement between the State Department and the Soviet Embassy in Washington at some point to grant the Marshal Konev extra-territorial status. If this is true, it could also explain why the Konev's captain was reportedly reprimanded for allowing American officials to board, and why I was refused permission to board the ship the second time by the diplomat.

3. It was reported to me that President Reagan told the Congressional Ledership on Friday, November 8, 1985 that he wanted Seaman Medvid to have a second interview by US authorities, and that he would not sacrifice Seaman Medvid for the Summit. On the morning of Saturday, November 9, 1985, Deputy National Security Advisor Admiral Poindexter ordered US Department of Agriculture grain inspectors off the Marshal Konev, in order to expedite its departure. I tried to contact Admiral Poindexter twice Monday in order to determine why he helped the Soviets and thwarted the President's wishes, but he would not return my calls.

4. Vice President George Bush, in New Orleans yesterday, said he was concerned that the Reagan Administration had changed its position on the Medvid case. He stated "It doesn't look good. My heart is troubled by it." This is a good summary of this case.

DAVID S. SULLIVAN.

STATEMENT OF SENATOR JESSE HELMS OF NORTH CAROLINA, CHAIRMAN, COMMITTEE ON AGRICULTURE, NUTRITION, AND FORESTRY

Today we will have two sets of witnesses. This hearing was originally scheduled to hear testimony by Miroslav Medvid, the Ukrainian sailor who sought several times to defect from the tyranny of the Soviet Union, only to be thwarted by a failure of the officials of the State Department, and others, who refused to cooperate with this Committee. Instead we will hear for the purposes of the record the testimony of staff who served the subpoena for the Committee.

We will also hear the testimony of an expert witness, Dr. William E. O'Malley, a distinguished neuropsychiatrist and pharmacologist, who, on very short notice, agreed to analyze the medical reports on Mr. Medvid released by the State Department late this past Friday. I am confident that Dr. O'Malley's testimony will raise significant questions about the State Department's assertion that Mr. Medvid's decision to return was a freely chosen decision.

A STATE DEPARTMENT DECISION

Once again, the State Department clearly decided that it is more important to appease the Soviet Union than to allow a young man to have an unfettered chance for freedom.

I was dismayed by the statements of Secretary of State Shultz on Face the Nation on Sunday, when he admitted that Mr. Medvid had faced threats and—as the Secretary put it—"whatever he was subjected to aboard that ship." It is clear that Mr. Medvid was under incredible duress, and I believe that after the testimony here this morning we will understand that his so-called free choice was made under the influence of mind-smashing drugs.

Immediately after Secretary Shultz's statements on Sunday, a formal invitation was extended to the Secretary to appear before this Committee in place of Mr. Medvid. The Secretary declined to come, pleading other engagements. Of course, Mr. Medvid also has other engagements. Nevertheless, further opportunities will be offered to the Secretary to appear here.

IMPLICATIONS OF EXTRATERRITORIALITY

The implications of this event appear to go far beyond the visible requirements of our foreign policy. The Soviets, in their discussions with our staff, in effect asserted that their ship had the status of extraterritoriality, as though it were an embassy or an enclave. These assertions were made after several telephone calls to Ambassador Dobrynin, so they appear to be a reflection of the official and high-level Soviet position. Indeed, the NSA should have intercepts of these calls from New Orleans to the Soviet Embassy.

Moreover, the State Department curiously appears to have acted in accordance with that view. According to the recently released in camera proceedings in the D.C. District Court on November 4 [Ukranian-American Bar Association, et al., v. George P. Shultz, et al.], the government lawyers argued that all proceedings in the Medvid case should be held in secret, without the lawyers for Mr. Medvid present. They argued that the case was "highly sensitive" and the State Department was worried about cross examination of government witnesses in public and was very reluctant to let them testify even on camera.

Furthermore, they stated that the government witness "did not directly negotiate with the Soviets," but that "negotiations of the ground rules were negotiated at the highest levels." There were suggestions that certain "actions were planned by the U.S." and that "the President had indicated that if the Soviets had not backed down, we were prepared to use force."

These were references of the fact that the Soviets initially refused to return Mr. Medvid for questioning after he had been sent back to the ship illegally on the evening of October 24/25.

Why would force have been necessary? This was an unarmed merchant ship. The U.S. Government had the authority to board it at any time, and the power to quarantine it, and to prevent it from moving. What was the Soviet threat? Did Moscow actually rattle sabres over the defection of one seaman?

The notion that a ship has extraterritoriality while in the jurisdiction of another country is not an idea to be condoned. As a practical matter, it is not the custom to interfere with the discipline on a foreign ship, unless crimes have been committed. It is evident that the allegations that Mr. Medvid had been beaten and kidnapped from U.S. soil were crimes. Why was the U.S. government so protective of the Soviets at this time? Why negotiations? Why ground rules? Why did we accept the proposal that a Soviet KGB officer should be present at all times to intimidate Mr. Medvid during our questioning?

One must ask the question whether these so-calied "ground rules" were drawn according to some pre-existing secret agreement. Did we accept extraterritorially of Soviet ships as a condition of the grain trade? Is it possible to set aside the constitutional rights of aliens, even Soviet citizens, to appease the Soviet Union?

We do know that the Soviets cannot trust their own citizens outside of Soviet borders without massive intimidation and the use of torture and mind-bending chemicals. The Soviets cannot transport grain without sending their citizens abroad. Is there a secret agreement that we will send defectors back?

It should be noted that the European countries which adjoin Communist nations—West Germany, Sweden, Norway, Italy, and so forth, appear to have a policy of not returning defectors at all. Why is the U.S. policy so different?

SERVICE OF THE SUBPOENA

These were questions which Mr. Medvid's presence would have helped to answer.

On November 9, the subpoena was duly served on the captain of the Soviet grain ship, *Marshal Konev*, and on a representative of the Soviet embassy, both persons who had control of Mr. Medvid's whereabouts. Legal counsel has advised the Committee that such service is equivalent to service on Mr. Medvid himself. Copies of the subpoenas were also provided immediately to the U.S. Customs Service and the U.S. Department of Justice, of which the Immigration and Naturalization Service is a division.

In response to my enquiries after the subpoena was issued, the Commissioner of Customs informed me that the Tariff and Trade Act of 1799 prohibited the departure of vessels from U.S. waters without clearance from Customs, and that it was the opinion of counsel to Customs that the law would not permit the departure of a foreign vessel so long as an unfulfilled subpoena to appear before Congress was outstanding.

Furthermore, it should also be pointed out that the Code of Federal Regulations forbids the departure of aliens whose departure is deemed prejudicial to the interests of the United States. Among such aliens, according to CFR 215.3(j), is "any alien who is needed in the United States in connection with any investigation or proceeding being, or soon to be conducted by any official executive, legislative, or judicial agency in the United States or by any governmental committee, board, bureau, commission, or body in the United States, whether national, state, or local."

Once such an alien has been identified, INS has an affirmative obligation to prevent his departure. In CFR 215.2, the regulations say: "Any departure-control officer who knows or has reason to believe that the case of an alien in the United States comes within the provisions of 215.3 shall temporarily prevent the departure of such alien from the United States and shall serve him with a written temporary order directing him not to depart or attempt to depart from the United States until notified of the revocation of the order."

As the distinguished members of this Committee are well aware, the Commissioner of Customs was apparently overruled by higher authority, and the *Marshal Konev* was cleared to depart on Saturday, November 9, and did depart from Reserve, Louisiana, at approximately 12:15 pm CST on that date.

Not only was it cleared to depart, but the news reports indicate that the U.S. Coast Guard conducted harassment operations against small vessels nearby who were attempting to exercise their First Amendment rights of free speech, and gave the *Marshal Konev* an honor guard out to the open seas.

I have also been informed that an officer of the National Security Council contacted the Department of Agriculture to inquire if the inspectors of the Federal Grain Inspection Service had finished their work as expeditiously as possible so that the ship could get underway at the earliest possible moment. [This Committee will be conducting an investigation to ascertain whether all the requirements of the U.S. Grains Standards Act were fully complied with.]

EXECUTIVE BRANCH FAILED TO USE ITS AUTHORITY

It is clear that the Executive Branch had full authority to take whatever action was necessary to allow Mr. Medvid to be present here this morning, but that it willfully and consciously refused to do so. Customs was overruled in its desire to enforce the law impartially. The Immigration and Naturalization Service was on official notice that Mr. Medvid was wanted for an official hearing in this Committee, yet no departure control officer attempted to prevent his departure or to serve notice on him.

By obstructing the legitimate actions of the Legislative Branch, the President's advisors have failed to perform their Constitutional responsibilities.

Mr. HELMS. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The Clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

Mr. THURMOND. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER (Mr. COCHRAN). Without objection, it is so ordered.

MILITARY CONSTRUCTION AUTHORIZATION ACT, 1986—CONFERENCE REPORT

Mr. THURMOND. Mr. President, there is a conference report at the desk to accompany S. 1042, the military construction authorization bill, and I ask for its immediate consideration.

The PRESIDING OFFICER. The report will be stated.

The legislative clerk read as follows:

The committee of conference on the disagreeing votes of the two Houses on the amendment of the House to the bill (S. 1042) to authorize certain construction at military installations for fiscal year 1986, and for other purposes, having met, after full and free conference, have agreed to recommend and do recommend to their respective Houses this report, signed by all of the conferees.

The PRESIDING OFFICER. Without objection, the Senate will proceed to the consideration of the conference report.

(The conference report will be printed in the House proceedings of the RECORD.)

Mr. THURMOND. Mr. President, the matter before the Senate is the conference report on S. 1042, the military construction authorization bill for fiscal year 1986.

The report authorizes new funding authority for military construction and military family housing projects in the amount of $9,199,824,000. The conference is an increase of $368,812,000 from the amount authorized by the Senate earlier this year.

The final bill provides authority to proceed with approximately 1,700 different projects at more than 700 different locations in the United States and overseas. Funding authority is also provided for the operation and maintenance of the 400,000 units of military family housing currently in the defense inventory.

There were about 300 items in dispute which were resolved by the conference committee. The details of the actions by the conferees are included in the conference report and, while I do not intend to discuss them in depth, I would be pleased to respond to questions by any Member.

I want to acknowledge the efforts of the junior Senator from New Mexico [Senator BINGAMAN] during deliberations on this bill. He has worked diligently throughout the consideration of this bill and he has left his mark on the final bill. We clearly present you a better product as a result of his efforts.

Let me also take this opportunity to thank the members of our staff, Mr. Russel Milnes, Mr. Alan Chvotkin, Mr. Hugh Evans, and Ms. Marie Dickinson for their able counsel in preparing this bill.

I think the conference report provides the Defense Department with adequate funding authority to meet its most urgent construction needs and I urge my colleagues to support this bill.

Mr. President, I yield to my able colleague, the ranking member on the Military Construction Subcommittee.

Mr. BINGAMAN addressed the Chair.

The PRESIDING OFFICER. The Senator from New Mexico.

Mr. BINGAMAN. Mr. President, I rise in support of the conference report on S. 1042, the fiscal year 1986 Military Construction Authorization Act. I urge my colleagues to approve this conference report.

Mr. President, the conference report includes an authorization of $9.2 billion for military construction for fiscal year 1986, $1.1 billion below the President's budget request. The $9.2 billion is also on the mark for the allocation to military construction which the overall DOD authorization bill provided for when it was adopted by the Senate in July.

The conference report maintains most of the priorities which the Senate Armed Services Committee and the full Senate adopted when we approved the bill last June 5. I regret the delay in getting to this stage of the legislative process, but while the Senate completed its version of this bill in June, the House did not pass its version of the legislation until October 16.

The Chairman of the Senate Armed Services Committee's Military Construction Subcommittee, the President pro tempore of the Senate, Senator THURMOND, has already described the highlights of this bill. Greater detail on the legislation, including a State-by-State listing of approved projects, is included in the statement of managers accompanying the conference report.

But I did want to highlight a few items that were of particular concern to me during the consideration of this bill throughout this year.

"NOTIONAL" BASE CLOSING LIST

In March of this year, Senator GOLDWATER and Secretary of Defense Weinberger released a "notional" list of installations in the United States that could be closed. For the next several months, through special hearings, letters, staff inquiries, and meetings, I tried to identify the reasons why certain installations were put on the list, the concerns the Department had with the current legal procedures for closing bases, and what functions were being undertaken at the installations that could be transferred or eliminated, if any. I concluded that the list was nothing more than notional. Even the Secretary of Defense disavowed the installations on the list as anything more than illustrative of the types of bases that could be closed if he had certain legal authority, and certain funds.

Mr. President, I will not recount the debate on the underlying legislative provisions which the Congress has adopted to streamline the statutory requirements for closing bases. These were contained in the conference report on the DOD authorization bill. Suffice it to say we have changed the law to make it easier for the Secretary to take base closure actions. Such actions may become increasingly necessary in light of the overall trend in defense spending and the Gramm-Rudman deficit reduction proposal. I fully supported these streamlining provisions, which were almost identical to a proposal which Senator NUNN and I offered on the Senate floor in May.

In the context of this bill, however, my colleagues will recall that the Armed Services Committee and the full Senate deleted all funds for military construction for the 22 installations that were on that notional list. With the enactment of the reforms to the underlying statutory provisions on base closures, the conferees then ad-

dressed each of the projects on their merits. I am pleased that we were able to lift the cloud of base closings hanging over those installations. Some projects were approved, others were not; but I can assure my colleagues that the decision on each and every one of these project was based on merits and on need.

MEDICAL FACILITIES

Mr. President, since becoming the ranking minority member of the Military Construction Subcommittee, I have been concerned about the Department of Defense's medical facilities construction program. Construction in this area alone is expected to require almost $4 billion over the next 5 years.

Last year, at my request, the Department established a blue ribbon panel on sizing Department of Defense medical facilities. That panel, chaired by Dr. Theodore Cooper, provided a generally excellent report on the sizing of military medical facilities and on whether greater use could be made of civilian health care facilities, where appropriate. That panel submitted its report this past June 28, and I intend to ensure a careful review of its recommendations and the Department's implementation. Let me say at the outset here that I have been pleased with the support I have received from, and the commitment of, Dr. Mayer, the Assistant Secretary of Defense for Health Affairs, and the Services' Surgeons General in this regard.

During this authorization process, I challenged one military medical facility in the United States that failed to meet the criteria suggested by the blue ribbon panel. This was the 20-bed hospital at Annapolis, MD. Within 20 miles of that hospital there is a 96-bed hospital at Fort Meade, with a less than 50 percent occupancy rate. Unfortunately, both Houses made the decision to go ahead as planned. For other medical projects, particularly two overseas medical facilities at Camp Carrroll, Korea, and Torrejon Air Base, Spain, that are important to the wartime military readiness requirements of the United States, I am pleased that the conferees agreed to include the requested funds. These overseas facilities also have the strong support of our Armed Services Committee's Manpower Subcommittee which recently held extensive hearings on our wartime medical readiness.

Finally, I am pleased that the conferees showed the resolved to address the tough issues raised by the requested military construction funds for the Madigan Army Medical Center and agreed to limit the size of this facility to 400 beds. According to the Army's own estimates, this downsizing will have a minimal life cycle cost and cause only a short-time construction delay. I think that an independent analysis will show significant life cycle savings as a result of this decision. In my judgment, this downsizing action is well worth taking, for it sends a clear signal to the Services that Congress will not tolerate oversizing of CONUS medical facilities while our overseas facilities and our medical readiness suffer.

FORT RUCKER ARMY AVIATION MUSEUM

The conferees have included funds for certain initial military construction for an Army Aviation Museum at Fort Rucker, AL. Although the conferees have made it clear that Federal funds will be available on a matching basis only, I objected to the decision to include these dollars. My reservation was not because the museum is not worthwhile.

Rather, I would prefer to see such museums funded entirely out of private contributions and admission fees. This is especially true when we are forced to cut $1.1 billion out of the President's request, and this facility was not part of that request.

Last year, we had faced this issue in considering the Air Force Museum at Wright-Patterson Air Force Base, OH. In order to stem the tide of musem requests, the conferees on the military construction authorization bill agreed to fund only a single museum designated by each Service. The Army has not notified us that the Fort Rucker facility is their choice. Thus, our action this year reverses the policy we laid down last year. I am afraid that we can expect a continuing stream of these requests until we enumerate and stick to a clear policy on museum funding.

STRATEGIC HOMEPORTING

This year's budget included the first request for funds for the Navy's concept on strategic homeporting. Conferees did not approve some funds for Staten Island, NY and for Everett, WA, subject to a report by the Secretary of the Navy.

Mr. President, in my mind, the Navy has not yet made a case to the Congress for strategic homeporting. Given the huge sums that will be necessary for construction alone at these two Navy facilities, and unknown hundreds of millions more for the gulf coast, it is imperative that the Congress fully understand, and agree with, the Navy's plan. We have not yet done so. I, for one, will be carefully reviewing the Navy's, and the Department of Defense's, rationale for the proposal, its costs, and its benefits. Senator THURMOND requested the General Accounting Office to carefully study the entire background and supporting documentation for strategic homeporting. I look forward to the results of those reviews.

LAND TRANSFERS

During the course of our review of this year's budget, many members suggested a variety of land transfers from and between the military departments. While most of them have merit, I am concerned that they have come to us in all shapes and forms, and with all sorts of conditions. I found myself having to challenge many of these requests because we did not have time to make a serious study of the advantages and disadvantages of certain proposed transfers. Many of these proposals originated at the local installations. During the next several months, I hope the subcommittee will establish a clear plan for considering proposed land transfers.

SUMMARY

Mr. President, I believe we have a good conference report pending before the Senate. This bill balances the interest of the military departments with appropriate congressional priorities. We have funded meritorious projects, but more could be done if the funds were available. Regrettably, the decisions which will have to be made next year will be more difficult than we faced this year as we attempt to deal with the enormous Federal deficit. I urge my colleagues, and the services, to keep this in mind.

Before closing, I want to thank Senator THURMOND for his leadership on the Military Construction Subcommittee, and in producing this conference report. I also want to thank Senator STENNIS and Senator HART, my Democratic colleagues on the subcommittee, for their assistance and cooperation. Both have chaired this subcommittee in the past and I appreciate their wise counsel. Congressman DELLUMS, the chairman of the Subcommittee on the House side, and Congressman KRAMER, the ranking member on the House side, also deserve recognition.

I believe a great deal of credit should be given to Russ Milnes, the professional staff member for the majority on the Senate Armed Services Committee. Russ joined the committee staff in February and has served the subcommittee in a bipartisan and professional manner. I also want to personally thank Alan Chvotkin, the minority counsel to the subcommittee and Ed McGaffigan of my personal staff, who have assisted me so ably in carrying out my responsibilities on the subcommittee. A word of thanks also to Marie Dickinson who helped make this year's process function so well.

Mr. President, I urge my colleagues to approve this conference report on the fiscal year 1986 Military Construction Authorization Act.

Mr. THURMOND. Mr. President, I move the adoption of the conference report.

The PRESIDING OFFICER. The question is on agreeing to the conference report.

The conference report was agreed to.

Mr. THURMOND. Mr. President, I move to reconsider the vote by which the conference report was agreed to.

Mr. BINGAMAN. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. THURMOND. Thank you very much.

EXECUTIVE SESSION

Mr. DOLE. Mr. President, I ask unanimous consent that the Senate go into executive session to consider the nomination of Charles J. Cooper, of Virginia, to be Assistant Attoney General.

The PRESIDING OFFICER. Without objection, it is so ordered.

The nomination will be stated.

DEPARTMENT OF JUSTICE

The legislative clerk read the nomination of Charles J. Cooper, of Virginia, to be an Assistant Attorney General.

The PRESIDING OFFICER. The question is on the confirmation of the nomination.

The nomination was confirmed.

Mr. DOLE. Mr. President, I move to reconsider the vote by which the nomination was confirmed.

Mr. BYRD. Mr. President, I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. DOLE. Mr. President, I thank the distinguished Senator from Massachusetts [Mr. KENNEDY] for his courtesy in this matter.

I ask unanimous consent that the President be immediately notified that the Senate has given its consent to this nomination.

The PRESIDING OFFICER. Without objection, it is so ordered.

LEGISLATIVE SESSION

Mr. DOLE. Mr. President, I ask unanimous consent that the Senate resume legislative session.

The PRESIDING OFFICER. Without objection, it is so ordered.

PRINTING AS HOUSE DOCUMENT—"HOW OUR LAWS ARE MADE"

Mr. DOLE. Mr. President, I ask unanimous consent that the Senate turn to the consideration of House Concurrent Resolution 203, which calls for the printing of the document "How Our Laws are Made," which was received from the House of Representatives today.

The PRESIDING OFFICER. Without objection, it is so ordered.

The clerk will state the resolution.

The legislative clerk read as follows:

A House Concurrent Resolution (H. Con. Res. 203):

Resolved by the House of Representatives (the Senate concurring), That the revised edition of the brochure entitled "How Our Laws Are Made" shall be printed as a House document, with a suitable paper cover in the style selected by the chairman of the Committee on the Judiciary of the House of Representatives and with a foreword by the Honorable Peter W. Rodino, Junior. In addition to the usual number, there shall be printed two hundred and forty-six thousand copies of the brochure for the use of the House of Representatives (of which twenty-five thousand shall be for the use of the Committee on the Judiciary) and there shall be printed fifty-two thousand copies of the brochure for the use of the Senate.

The resolution (H.Con. Res. 203) was considered and agreed to.

Mr. DOLE. Mr. President, I move to reconsider the vote by which the resolution was agreed to.

Mr. BYRD. Mr. President, I move to lay that motion on the table.

The motion to lay on the table was agreed to.

THE CALENDAR

Mr. DOLE. Mr. President, I inquire of the distinguished minority leader if he is in a position to pass the following Calendar items: No. 381, 382, 389, 390, and No. 391.

Mr. BYRD. Mr. President, I am happy to respond to the distinguished majority leader's question that there is no objection on this side.

PRINTING OF A STAFF REPORT OF THE COMMITTEE ON ARMED SERVICES

The concurrent resolution (S. Con. Res. 80) to authorize the printing of 2,000 additional copies of the committee print of the Committee on Armed Services (99th Congress, 1st session) entitled "Defense Organization: The Need for Change," was considered, and agreed to; as follows:

S. CON. RES. 80

Resolved by the Senate (the House of Representatives concurring), That there shall be printed 2,000 additional copies of the Committee Print of the Committee on Armed Services (99th Congress, 1st Session) entitled "Defense Organization: The Need for Change", to be furnished to the Committee on Armed Services.

Mr. DOLE. Mr. President, I move to reconsider the vote by which the resolution was agreed to.

Mr. BYRD. Mr. President, I move to lay that motion on the table.

The motion to lay on the table was agreed to.

PRINTING OF BACKGROUND INFORMATION ON THE COMMITTEE ON FOREIGN RELATIONS AS A SENATE DOCUMENT

The resolution (S. Res. 244) authorizing the printing of background information on the Committee on Foreign Relations as a Senate document, was considered, and agreed to; as follows:

S. RES. 244

Resolved, That there be printed with illustrations as a Senate document background information relating to the history of the Senate Committee on Foreign Relations in connection with its one hundred and seventieth anniversary (1816–1986); and that there be printed for the use of the committee additional copies of such document not to exceed the cost of $1,200.

Mr. DOLE. Mr. President, I move to reconsider the vote by which the resolution was agreed to.

Mr. BYRD. Mr. President, I move to lay that motion on the table.

The motion to lay on the table was agreed to.

COOPER-HEWITT MUSEUM PLANNING AND CONSTRUCTION

The Senate proceeded to consider the bill (S. 583) to authorize the Smithsonian Institution to plan and construct facilities for the Cooper-Hewitt Museum, and for other purposes, which had been reported from the Committee on Rules and Administration, with amendments, as follows:

(The parts of the bill intended to be stricken are shown in boldface brackets, and the parts of the bill intended to be inserted are shown in italic.)

S. 583

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That the Board of Regents of the Smithsonian Institution is authorized to plan and construct facilities for the Cooper-Hewitt **[Museum]** *Museum also known as the National Museum of Design of the Smithsonian Institution.*

SEC. 2. Effective October 1, 1988, there is authorized to be appropriated to the Board of Regents of the Smithsonian Institution *a sum not to exceed* $11,500,000 to carry out the purposes of this Act. No funds appropriated pursuant to this section shall be obligated or expended until such time as there is available to such Board, from private donations or from other non-Federal sources, **[**a sum which, when combined with the funds so appropriated, is sufficient to carry out the purposes of this act.**]** *a sum which—*

(1) matches federally appropriated funds; and

(2) combined with federally appropriated funds is sufficient to carry out the purposes of this Act.

SEC. 3. Any portion of the sums appropriated to carry out the purposes of this Act may be transferred to the General Services Administration which, in consultation with the Smithsonian Institution, is authorized to enter into contracts and take such other action, to the extent of the sums so transferred to it, as may be necessary to carry out such purposes.

[SEC. 4. Effective on enactment of this Act the Cooper-Hewitt Museum also shall be known as the "National Museum of Design".**]**

SEC. 4. (a) In the event of the sale of the facilities comprising the Cooper-Hewitt Museum, the Board of Regents of the Smithsonian Institution shall reimburse the United States out of the proceeds of such sale an amount equal to the Federal interest in the facilities.

(b) For purposes of subsection (a), the Administrator of the General Services Administration shall determine the value of the Federal interest based on Federal appropriations used in the construction of Cooper-Hewitt Museum facilities.

The amendments were agreed to.

The bill was ordered to be engrossed for a third reading, was read the third time, and passed.

Mr. DOLE. I move to reconsider the vote by which the bill passed.

Mr. BYRD. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

TEMPORARY PLACEMENT OF A BUST OF DR. MARTIN LUTHER KING, JR., IN THE ROTUNDA OF THE CAPITOL FOR DEDICATION CEREMONIES

The concurrent resolution (S. Con. Res. 84) to authorize the temporary placement of a bust of the late Dr. Martin Luther King, Jr., in the Rotunda of the Capitol for dedication ceremonies, and for other purposes, was considered, and agreed to; as follows:

S. CON. RES. 84

Resolved by the Senate (the House of Representatives concurring), That (a) the Joint Committee on the Library is authorized to place temporarily in the Rotunda of the Capitol in January of 1986 the bust of the late Dr. Martin Luther King, Jr., as authorized by House Concurrent Resolution 153, 97th Congress, and to hold dedication ceremonies in the Rotunda at that time. This bust shall remain on display in the Rotunda for a period not to exceed one year, after which time the bust shall be moved to its permanent location. The Architect of the Capitol is authorized to make the necessary arrangement for the placement of the bust.

SEC. 2. (a) The proceedings of the dedication ceremony in the Rotunda of the Capitol at the presentation by the Joint Committee on the Library of the bust of the late Dr. Martin Luther King, Jr., together with appropriate illustrations and other pertinent matter, shall be printed as a Senate document. The copy for such document shall be prepared under the direction of the Joint Committee on the Library.

(b) The Joint Committee on Printing shall bind and print five thousand additional copies of the Senate document prepared pursuant to subsection (a), in such style as the Joint Committee on Printing shall direct, and shall make such copies available to the Joint Committee on the Library for further distribution.

Mr. DOLE. Mr. President, I move to reconsider the vote by which the resolution was agreed to.

Mr. BYRD. Mr. President, I move to lay that motion on the table.

The motion to lay on the table was agreed to.

PRINTING AND COMPILATION OF A BICENTENNIAL EDITION OF THE BIOGRAPHICAL DIRECTORY OF THE U.S. CONGRESS

The concurrent resolution (S. Con. Res. 85) to authorize the compilation and printing of the bicentennial edition of the Biographical Directory of the U.S. Congress, was considered, and agreed to; as follows:

S. CON. RES. 85

Resolved by the Senate (the House of Representatives concurring), That (a) the Joint Committee on Printing shall compile and print as a Senate document, with illustrations, and in such style and form as may be directed by the Joint Committee on Printing, a revised edition of the Biographical Directory of the American Congress up to and including the One Hundredth Congress (1774-1989).

(b) With respect to the compilation of the directory authorized by subsection (a)—

(1) the Historian of the Senate shall be responsible for providing to the Joint Committee on Printing the biographical data for Members of the Senate and for individuals who have served in both the House of Representatives and the Senate; and

(2) the Historian of the House of Representatives shall be responsible for providing to the Joint Committee on Printing the biographical data for Members of the House of Representatives and Delegates.

(c) The Joint Committee on Printing shall print seven thousand nine hundred and eighty-five copies of the directory, of which—

(1) two thousand and forty-five copies shall be for the use of the Senate;

(2) five thousand three hundred and ninety copies for the use of the House of Representatives; and

(3) five hundred and fifty copies for the use of the Joint Committee on Printing.

(d) The edition of the Biographical Directory of the Congress prepared pursuant to this resolution is prepared in celebration of the Bicentennial of the United States Congress and shall be known as the "Bicentennial Edition of the Directory of the United States Congress.".

SEC. 2. There is authorized to be appropriated to the Joint Committee on Printing such sums as may be necessary for the employment of personnel and the payment of expenses to carry out the provisions of this resolution.

Mr. DOLE. Mr. President, I move to reconsider the vote by which the resolution was agreed to.

Mr. BYRD. Mr. President, I move to lay that motion on the table.

The motion to lay on the table was agreed to.

REPORT ON ACTIVITIES UNDER THE OCCUPATIONAL SAFETY AND HEALTH ACT—MESSAGE FROM THE PRESIDENT RECEIVED DURING THE ADJOURNMENT—PM 92

Under the authority of the order of the Senate of January 3, 1985, the Secretary of the Senate, on November 8, 1985, during the adjournment of the Senate, received the following message from the President of the United States, together with accompanying reports; which was referred to the Committee on Labor and Human Resources:

To the Congress of the United States:

In accordance with Section 26 of the Occupational Safety and Health Act of 1970 (Public Law 91-596), I transmit herewith the 1984 annual reports on activities under that law of the Department of Labor, of the Department of Health and Human Services, and of the Occupational Safety and Health Review Commission.

RONALD REAGAN.

THE WHITE HOUSE, *November 8, 1985.*

REPORT ON MINE SAFETY AND HEALTH ACTIVITIES—MESSAGE FROM THE PRESIDENT RECEIVED DURING THE ADJOURNMENT—PM 93

Under the authority of the order of the Senate of January 3, 1985, the Secretary of the Senate, on November 8, 1985, during the adjournment of the Senate, received the following message from the President of the United States, together with accompanying reports; which was referred to the Committee on Labor and Human Resources:

To the Congress of the United States:

In accordance with Section 511(a) of the Federal Mine Safety and Health Act of 1977, as amended (30 U.S.C. 958(a)), I transmit herewith the annual reports for Fiscal Years 1983 and 1984 on mine safety and health activities as submitted by the Secretary of Labor.

RONALD REAGAN.

THE WHITE HOUSE, *November 8, 1985.*

MESSAGES FROM THE PRESIDENT

Messages from the President of the United States were communicated to the Senate by Mr. Saunders, one of his secretaries.

EXECUTIVE MESSAGES REFERRED

As in executive session, the Presiding Officer laid before the Senate messages from the President of the United States submitting sundry nominations which were referred to the appropriate committees.

(The nominations received today are printed at the end of the Senate proceedings.)

MESSAGES FROM THE HOUSE

ENROLLED BILL AND JOINT RESOLUTION

At 11:59 a.m., a message from the House of Representatives, delivered by Mr. Berry, one of its reading clerks, announced that the Speaker has signed the following enrolled bill and joint resolution:

S. 1570. An act to amend the Fair Labor Standards Act of 1938 to authorize the provision of compensatory time in lieu of overtime compensation for employees of States, political subdivisions of States, and interstate governmental agencies, to clarify the

application of the Act to volunteers, and for other purposes; and

S.J. Res. 47. Joint resolution designating the week beginning November 10, 1985, as "National Women Veterans Recognition Week."

The enrolled bill and joint resolution were subsequently signed by the President pro tempore [Mr. Thurmond].

At 2:46 p.m., a message from the House of Representatives, delivered by Mr. Berry, one of its reading clerks, announced that the House has agreed to the following concurrent resolution, in which it requests the concurrence of the Senate:

H. Con. Res. 203. Concurrent resolution authorizing printing of the brochure entitled "How Our Laws Are Made".

At 5:31 p.m., a message from the House of Representatives, delivered by Ms. Goetz, one of its reading clerks, announced that the House has passed the following joint resolution, without amendment:

S.J. Res. 228. Joint resolution relating to the proposed sale of arms to Jordan.

The message also announced that the House of Representatives having proceeded to reconsider the bill (H.R. 2409) entitled "An Act to amend the Public Health Service Act to revise and extend the authorities under that act relating to the National Institutes of Health and National Research Institutes, and for other purposes," returned by the President of the United States with his objections, to the House of Representatives, in which it originated, it was *Resolved*, That the said bill pass, two-thirds of the House of Representatives agreeing to pass the same.

ENROLLED BILL AND JOINT RESOLUTION PRESENTED

The Secretary of the Senate reported that on today, November 12, 1985, she had presented to the President of the United States the following enrolled bill and joint resolution:

S. 1570. An act to amend the Fair Labor Standards Act of 1938 to authorize the provision of compensatory time in lieu of overtime compensation for employees of States, political subdivisions of States, and interstate governmental agencies, to clarify the application of the act to volunteers, and for other purposes; and

S.J. Res. 47. Joint resolution designating the week beginning November 10, 1985, as "National Women Veterans Recognition Week."

EXECUTIVE AND OTHER COMMUNICATIONS

The following communications were laid before the Senate, together with accompanying papers, reports, and documents, which were referred as indicated:

EC-1981. A communication from the Assistant Secretary of State (Legislative and Intergovernmental Affairs), transmitting, pursuant to law, three fact sheets concerning recent events in Nicaragua; to the Committee on Foreign Relations.

REPORTS OF COMMITTEES

The following reports of committees were submitted:

By Mr. THURMOND, from the Committee on the Judiciary, without amendment:

S. 1660. A bill to grant a Federal charter to the Confederate Memorial Association (Rept. No. 99-178),

H.R. 1806. An act to recognize the organization known as the Daughters of Union Veterans of the Civil War 1961-1865 (Rept. No. 99-179).

INTRODUCTION OF BILLS AND JOINT RESOLUTIONS

The following bills and joint resolutions were introduced, read the first and second time by unanimous consent, and referred as indicated:

By Mr. BAUCUS:

S. 1845. A bill to impose Federal income tax sanctions on corporations of a foreign country which imposes sanctions on United States persons because of such persons' presence in a State which uses a worldwide unitary apportionment method of computing the State income of such person; to the Committee on Finance.

By Mr. TRIBLE:

S. 1846. A bill entitled the "Roanoke River Flood Control Act"; to the Committee on Environment and Public Works.

By Mr. MITCHELL (for himself and Mr. COHEN):

S. 1847. A bill to provide for a Samantha Smith Memorial Exchange Program to promote youth exchanges between the United States and the Soviet Union, and for other purposes; to the Committee on Foreign Relations.

By Mr. GORTON:

S.J. Res. 236. Joint resolution to authorize and request the President to issue a proclamation designating April 20 through April 26, 1986, as "National Organ and Tissue Donor Awareness Week"; to the Committee on the Judiciary.

STATEMENT ON INTRODUCED BILLS AND JOINT RESOLUTIONS

By Mr. BAUCUS:

S. 1845. A bill to impose Federal income tax sanctions on corporations of a foreign country which imposes sanctions on U.S. persons because of such persons' presence in a State which uses a worldwide unitary apportionment method of computing the State income of such person; to the Committee on Finance.

STATE TAXING POWERS

Mr. BAUCUS. Mr. President, I rise to address an issue that should concern all Senators, because it concerns all States.

When Ronald Reagan was Governor of California, he said that "Federal interference in State tax matters is objectionable in principle." Friday, Ronald Reagan proposed sweeping interference in State tax matters—interference that would be unwarranted, disruptive, and dangerous.

FEDERALISM

Our constitutional system is a federal system, which delicately balances national and State powers.

Over the years, the balance keeps shifting toward Washington. Each successive administration starts out by trumpeting its commitment to federalism. Then, as time goes on, it decides that achieving its political objectives is more important than maintaining that commitment. To prevent this tendency from overwhelming the States, we must zealously guard their powers.

The power to tax may be the most important power of all. It lies at the core of each States sovereignty. The Constitution imposes some basic limits on States power to tax, by preventing them from imposing unfair or discriminatory taxes. But beyond that, the States retain great discretion. As Alexander Hamilton wrote in the Federalist:

> The individual States should possess an independent and uncontrollable authority to raise their own revenues for the supply of their own wants . . . [and] retain that authority in the most absolute and unqualified sense; . . . an attempt on the part of the national government to abridge them in the exercise of it would be a violent assumption of power. . . .

MULTINATIONAL TAXATION

The State taxation of multinational corporations is complicated in controversial. As the Supreme Court has said, allocating a multinational corporation's income among taxing jurisdictions is like "slicing a shadow."

One approach is to use an arm's length method similar to the one embodied in section 482 of the Federal Tax Code. Under this method, the State uses hypothetical arm's-length transfer prices to try to figure out how much of the corporation's overall income was earned by its operations in the State. However, as the Supreme Court has also noted, this method—

> Is subject to manipulation and imprecision, and often ignores or captures inadequately the many subtle and largely unquantifiable transfers of value that take place among the components of a single enterprise.

To avoid these problems, Montana and several other States use the simpler worldwide unitary method. Under this method, the State looks at wages, property, and sales, to determine what proportion of the company's overall income should be allocated to that State. As Governor Ted Schwinden recently said:

> Main Street Montana businesses must report all their income for tax purposes. The [unitary method] assures that multinational enterprises likewise, report all their Montana income to Montana.

CONTAINER CORPORATION AND ITS AFTERMATH

Nevertheless, multinational corporation have insisted that the worldwide unitary method is unconstitutional. In

the 1983 Container Corp. decision, the Supreme Court firmly rejected their agrument, holding that California's application of the worldwide unitary method to the foreign operations of a U.S.-based company did not infringe the due process or commerce clauses.

Even so, some multinationals and foreign governments were not satisfied. They called for Federal restrictions.

In response, President Reagan established a working group, representing business, States, and the Federal Government, to resolve the controversy. The working group recommended several options, including that States limit their jurisdiction to the water's edge by applying the unitary method only to operations in other States, but not in other countries. However, the working group stressed that States should be urged to adopt a water's-edge approach voluntarily, not be forced to do so by Federal fiat. As an Assistant U.S. Trade Representative testified last year:

> We should allow forces in the direction of positive change in the states to develop and gather momentum, without federal interference.

The working group report ignited a serious, spirited debate all across the country. Six States—Oregon, Utah, Colorado, Florida, Indiana, and Massachusetts—quickly replaced worldwide unitary methods with water's-edge methods.

Several other States considered doing the same, but decided against it. Montana was one of these States.

The members of our 49th legislature considered a water's-edge bill. They debated the issues. They heard from proponents, who argued that enacting the water's-edge bill would encourage foreign investment. They heard from opponents who argued that no such foreign investment was on the horizon, that the bill would revive the income shifting that multinationals previously used to reduce their Montana taxes, and that the bill would cost about $10 million a year. After they had balanced the benefits and costs, our legislators decided to retain Montana's worldwide unitary method.

Mr. President, the 150 members of Montana's Legislature are intelligent, experienced people who understand their State. They've made their decision. Some people here in Washington may believe that the Montana Legislature made the wrong decision. They may wish to second guess the legislature, and substitute their own judgment about what's best for Montana. But they just aren't qualified to do so.

THE PRESIDENT'S PROPOSAL

What's more, preempting States use of the worldwide unitary method would be unwise, for several reasons.

First of all, Federal restrictions are unnecessary. The main argument against the unitary method is that it upsets foreign companies and governments, thereby reducing investment in the United States and complicating out international relations. However, the current system is self-correcting. States are competing fiercely among themselves for foreign investment. If potential investors believe that a States tax policy is hostile, the State will be handicapped in that competition. As a result, each State must balance the potential for foreign investment against the simplicity and efficiency of the worldwide unitary method.

This system may be inconvenient for multinationals, which would prefer to have the Federal Government announce a uniform rule. But it is a textbook example of how competition among States achieves an optimal balance of interests. And, as the saying goes, "If it ain't broke, don't fix it."

Second, Federal preemption sets a dangerous precedent. Only a handful of States use the worldwide unitary method. But all States have an interest in preserving basic State sovereignty, including the power to set State tax policy which lies at the core of this sovereignty. If enacted, the President's proposal to restrict the constitutional exercise of the unitary method sets the stage for further erosions of State taxing authority, until the Federal Government forces the States to march in lockstep.

In this regard, it is significant that the President has proposed preempting not only States use of the worldwide unitary method, but also State taxation of multinational dividends. Such restrictions would directly and immediately reduce revenue in 32 States.

Finally, the President's proposal is the direct result of foreign interference and intimidation, primarily by the British. A few months ago Parliament enacted legislation authorizing the British tax authorities to deny the existing ACT credit to U.S. corporations that have substantial operations in U.S. worldwide unitary method States.

> The object of the legislation, one expert wrote—is to provoke multinational companies into joining the U.K. lobbying effort to repeal worldwide unitary taxation.

Mr. President, the enactment of this law was an outrage. In 1978, the British sought a tax treaty provision preventing the United States from applying the unitary method to British corporations, but the Senate rejected it. Afterward, the British ratified a protocol deleting their provision—and got concessions from us in return. Given this background, Parliament's action is not only a gross interference in United States domestic affairs, but also a direct contravention of the principles embodied in the United States-United Kingdom Tax Treaty.

What's worse, the British have gotten away with it. Instead of howling in protest, the administration capitulated. The Wall Street Journal reported:

> The administration's decision to back legislation is largely in response to recent pressure from Britain.

In other words, the administration is sacrificing important State powers to quiet a noisy ally.

Unlike this administration, I see no reason to let Britain act with impunity. Britain's legislation, if implemented, clearly would constitute a "discriminatory tax" under Tax Code section 891, requiring the administration to double United States taxes on British corporations. However, I am skeptical about the administration's willingness to discharge its obligations in this area.

So today I am introducing legislation that would fight fire with fire. It provides that, if Britain violates the Tax Treaty by punishing United States unitary States, we will override the treaty and increase the withholding tax on British residents to the statutory 30-percent rate. I ask unanimous consent that a copy of the legislation be printed in the RECORD immediately following my remarks.

CONCLUSION

Mr. President, the administration's decision to support Federal preemption of the unitary method was a big mistake.

The administration has been intimidated into interfering in an area where the Federal Government just doesn't belong.

The worldwide unitary method has been found to be constitutional. That should be that. All of us in this Chamber should be concerned about Federal encroachments on the States. We should resist the temptation to second-guess States exercise of constitutional tax powers. Instead, we should let the States debate the issue, make their own decisions, and manage their own destinies.

There being no objection, the bill was orderded to be printed in the RECORD, as follows:

S. 1845

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That (a) if any foreign country imposes any sanction described in subsection (b) on any United States person, then, notwithstanding any provision of any treaty between the United States and such foreign country, the tax under section 881 of the Internal Revenue Code of 1954 on a corporation of such foreign country shall, during the sanction period, be imposed (and withheld under section 1442 of such Code) without regard to such treaty.

(b) For purposes of subsection (a), a foreign country shall be treated as imposing a sanction described in this subsection if such foreign country—

(1) denies or modifies any treaty benefit to,

(2) imposes or increases any tax or penalty on, or

(3) takes any other punitive action with respect to, a United States person because a State uses a worldwide unitary apportionment method of measuring State income of multinational corporations doing business within such State.

(c) For purposes of subsection (a), the term "sanction period" means any period with respect to which the Secretary of the Treasury determines that a sanction described in subsection (b) is in effect.

By Mr. TRIBLE:

S. 1846. A bill entitled the "Roanoke River Flood Control Act"; to the Committee on Environment and Public Works.

ROANOKE RIVER FLOOD CONTROL ACT

Mr. TRIBLE. Mr. President, in the last week floods have relentlessly pounded Virginia's Roanoke Valley. "A wild wall of water" paralyzed much of the area last Tuesday, killing at least 13 people and requiring the evacuation of thousands.

Though total figures are not yet available, estimates place damage in excess of $243 million. In Roanoke City alone, 5,500 homes have significant damage, 178 businesses have been affected, 10 of which are a total loss. The sewage treatment plant is entirely under water with damages to the facility exceeding $1 million, and 54 public buildings were damaged.

I am afraid the list is going to grow as reports are completed. The sad part is—it might well have been avoided. Since 1970 the U.S. Corps of Engineers have been studying the recurring flood problems of the Roanoke River and tributaries. On August 2, 1985, The Chief of Engineers issued a report recommending flood control measures for Roanoke City. The corps' plan includes the following changes:

First, 10 miles of channel construction along the river to contain runoff.

Second, installation of a flood warning system.

Third, replacement of low bridges.

Fourth, floodproofing Roanoke Memorial Hospital and the Roanoke sewage treatment plant.

It is essential that we act now. The bill I introduce today takes the approved report of the Army Corps of Engineers and directs the corps to begin work on the project. Timely action by Congress can avert such catastrophes in the future and I hope this legislation will be approved promptly.

By Mr. MITCHELL (for himself and Mr. COHEN):

S. 1847. A bill to provide for a Samantha Smith Memorial Exchange Program to promote youth exchanges between the United States and the Soviet Union, and for other purposes; to the Committee on Foreign Relations.

SAMANTHA SMITH MEMORIAL EXCHANGE PROGRAM

Mr. MITCHELL. Mr. President, I am introducing today, along with Senator COHEN, a bill to establish a Samantha Smith Memorial Exchange Program, to promote greater understanding between the United States and the Soviet Union.

Americans are looking with hope to next week's summit meeting between President Reagan and Soviet Premier Gorbachev.

Our hopes are for genuine progress in arms control and human rights. Our hopes are for a historic breakthrough that can lead to securing peace for the world.

We look forward to the summit. In doing so, we place our faith in the ability of individuals, through face-to-face communication and negotiation, to overcome differences which exist between nations.

Ultimately, only individuals can reach out to each other. They can start with a wary respect for one another. They can reach for mutual understanding. They can strive to build friendships across differences; to live in harmony, and ideally, in common purpose.

Individuals are the foundation of our hopes. Ultimately, they are both the means and end of world peace.

One such individual was Samantha Smith.

Samantha was a young girl from Maine who one morning when she was 10 years old woke up wondering if it was going to be the last day of the Earth. She was afraid of talk about the nuclear arms race on radio and television. She was afraid for her future, and afraid for the world.

However, she was unafraid to try to understand.

Samantha wrote a letter addressed simply to "the Soviet Leader at the Kremlin in Moscow." In it, she asked: "Are you going to vote to have a war or not? If you aren't, please tell me how you are going to help to not have a war."

She mailed the letter, and somehow it arrived at the Kremlin. Much to her surprise, Samantha received a response from then-Soviet Premier Yuri Andropov who tried to dissolve her fears, then said, "See for yourself," and invited her to visit the Soviet Union.

For 2 weeks in July 1983, Samantha did exactly that. And although she accomplished no single, great historic deed in her visit to the Soviet Union, her desire to travel, to inquire, and to learn for herself greatly inspired millions of people both in the United States and abroad.

Samantha's youth, her love of life, and innocence symbolized all that is at stake in the world today. Our desire for world peace is a desire for people like Samantha to be allowed to live.

Upon returning home to the United States from the Soviet Union, Samantha wrote:

> If we could be friends by just getting to know each other better, then what are our countries really arguing about? Nothing could be more important than not having a war if a war would kill everything.

When Samantha returned home, she was a celebrity. She appeared on television talk shows. She hosted interviews with 1984 Democratic Presidential candidates on the Disney channel. She joined the cast of the new television series, "Lime Street." Yet her sense of priorities remained simple. In May this year, she told a reporter, about her goals: "When I am 16 I want to get my driver's license. After that, who knows?"

Three months ago, Samantha died in a plane crash in Maine. Her father, Arthur Smith, and six others died with her. At her funeral, her school adviser recounted how he and a group of students had met to talk about her life and death. "We made a list of things we would want to do before we died," he said. "We decided we'd like to travel and that we'd like to meet many people. We would want to make some contribution."

Samantha Smith is still for many of us a source of hope and inspiration.

With 1 week to go before the Reagan-Gorbachev summit, we look with hope for steps to be taken toward world peace.

With that in mind, I am proposing this bill to establish "The Samantha Smith Memorial Exchange Program."

The bill would authorize the United States Information Agency to fund a joint exchange or interchange program between the United States and Soviet Union for youth under the age of 21. Additionally, it authorizes scholarships for American undergraduate students to study abroad in the Soviet Union.

The proposal fulfills two very real, current needs. No mutual youth exchange program currently exists between the two countries, and although several college and university programs do exist for study abroad in the Soviet Union, little financial aid is available for undergraduate students wishing to pursue such study. Most Federal Government assistance is for advanced, graduate-level, specialized studies.

Scholarships under the program would be as much as $5,000 per student. The current cost of study in the Soviet Union under existing programs runs from $2,500 for a 6-week summer session to $7,000 for a full year, plus airfare.

The proposal authorizes $2 million annually each year for such purposes over an initial 2-year period.

The proposal will allow Americans, and Soviets, "to see for themselves"

both the differences and shared concerns which exist between our nations. It will promote inquiry and learning, as well as personal friendships on which to build world peace. For Americans who participate on such exchange programs, I am confident that the proposal will help instill a profound appreciation of our own political democracy and economic system.

The Soviet Union has not always been receptive to proposals for youth exchange programs, in which Soviet youth would be allowed to visit the United States. Our hope is that this proposal will prove an exception. Samantha Smith was popularly loved and mourned in the Soviet Union. We believe the Soviet Government will recognize that a youth exchange program of this nature is an appropriate memorial to her.

An agreement to such a proposal would not be a major, historic accomplishment by any stretch of the imagination. But it would be an important symbolic gesture.

It is in small, personal gestures that hope for world peace lies. In life, Samantha Smith reminded us of that fact. As a memorial to her, the United States and the Soviet Union should encourage the friendship of our peoples, through small, simple, personal gestures and exchanges.

● Mr. COHEN. Mr. President, in his Saturday, November 9, 1985, address, the President expressed his strong desire to expand contacts between American and Soviet societies wherever there is mutual interest. The President stated his particular interest in increasing exchanges among our young people.

I share this view that exchanges of various types between the United States and the U.S.S.R. can be useful. For example, people-to-people projects by Maine citizens, such as the making of a friendship quilt and the establishment of sister cities, provide meaningful bridges for United States-Soviet understanding. Cultural exchanges, too, offer an important means for improving our understanding of each other's country and people. At the end of 1979, the General Agreement on Contacts, Exchanges and Cooperation between the United States and the Soviet Union expired. In 1983, the United States presented a draft cultural relations agreement to the U.S.S.R. and discussions began in Moscow in September of that year. I am hopeful that these discussions may be completed in the near future.

Exchanges among specialists are also important. In 1983, Congress passed the Soviet-East European Research and Tranining Act to promote such contacts by providing much needed funding and reciprocal exchanges. This legislation should serve as an impetus to advanced research in Soviet and East European affairs and be a significant factor in meeting our need for additional well-trained specialists in this critical field.

As the President noted, exchanges among our young people are especially important, for our children are our future. Such exchanges, however, have generally taken a back seat to exchanges among artists and specialists and citizen-to-citizen contacts among adults.

Two years ago, a young girl from Maine made manifest how productive contacts among our youth can be. Samantha Smith was warmly received in the U.S.S.R. as a messenger of goodwill and became a symbol of children's hope for peace. She brought her youth, imagination, and considerable energy to the vitally important task of seeking world peace, and captured the world's heart. I shared with many others the sense of loss at the tragic death of Samantha this past summer. Over the last 3 months, Maine citizens and others have suggested ideas for a suitable memorial to her. One such idea was to establish a memorial youth exchange program with the Soviet Union.

Accordingly, Senator MITCHELL and I are introducing today a bill to establish the Samantha Smith Memorial Exchange Program. This program would provide for United States-Soviet youth exchanges and undergraduate study in the U.S.S.R. by American students.

I believe that such a program would be a significant complement to the exchange programs already in existence or under negotiation, as well as a fitting tribute to Samantha Smith and the hope she represented. I urge my colleagues to join Senator MITCHELL and me in cosponsoring this legislation.●

By Mr. GORTON:

S.J. Res. 236. Joint resolution to authorize and request the President to issue a proclamation designating April 20 through April 26, 1986, as "National Organ and Tissue Donor Awareness Week"; to the Committee on the Judiciary.

NATIONAL ORGAN AND TISSUE DONOR AWARENESS WEEK

Mr. GORTON. Mr. President, today I have the privilege of introducing a Senate joint resolution calling on the President to proclaim April 20 through April 26, 1986, as "National Organ and Tissue Donor Awareness Week." Congressman SID MORRISON is introducing a companion measure today in the House of Representatives, and I ask my colleagues to join us in supporting this legislation.

Years of hard work by the dedicated men and women in our medical professions have given our society the tools to take truly miraculous steps in improving the quality of life for debilitated Americans. In 1984 alone, our medical community used organ transplants to bring sight to over 24,000 citizens. During the same period of time, 346 Americans were saved from heart disease by transplants. And our doctors were able to break the chains that tied 6,968 Americans to dialysis machines with kidney transplants last year. Organ and tissue transplant technology has alleviated the suffering of citizens afflicted with bone cancer, severe burns, liver disease, and pancreatic disorders. In addition, recent breakthroughs in medical science have improved the 1-year success rate for transplant operations to between 70 and 99 percent, depending upon the type of operation.

A necessary ingredient for these modern miracles, however, is a pledge by organ donors. In my home State of Washington, there are 20 to 30 potential heart donors each year whose hearts cannot be used because they died without having signed a donor card. As we speak today, there are 188 people in the Pacific Northwest waiting for kidney donations. And another 200 Washington State citizens presently are hoping that the generosity of others will allow cornea transplants before they permanently lose their sight. The National Kidney Foundation estimates that there are over 25,000 Americans that would benefit from kidney transplant operations—8,500 of them are in critical need of transplant surgery.

I am sure that all of my colleagues have heard stories of the pain, trauma, and frustration that families must endure as they wait for the uncertain receipt of suitable organs and tissues for loved ones. Much of this suffering could be avoided. In many cases, it is the simple lack of public awareness that complicates the search for donors. Despite the pressing need for transplant organs and tissues, only 2 percent of those who would like to donate have signed donor cards.

National Organ and Tissue Donor Awareness Week, as in years past, will help provide essential information to the public. National, State, and local groups will coordinate their efforts to show Americans how easy it is to sign and carry the uniform donor card. This year, our neighbors to the north in Canada also will be participating in a variety of programs to draw attention to the need for donors.

I anticipate that my colleagues will be hearing from these dedicated people in their own States in the next few weeks. I welcome my colleagues' support and their cosponsorship of the joint resolution.

Mr. President, I ask unanimous consent that the text of the Senate joint resolution be printed in the RECORD at this point.

There being no objection, the joint resolution was ordered to be printed in the RECORD, as follows:

H.J. RES. 236

Resolved by the Senate and House of Representatives of the United States of America in Congress assembled, That the President is authorized and requested to issue a proclamation designating April 20 through April 26, 1986, as "National Organ and Tissue Donor Awareness Week".

ADDITIONAL COSPONSORS

S. 571

At the request of Mr. D'AMATO, the name of the Senator from Alaska [Mr. STEVENS] was added as a cosponsor of S. 571, a bill to amend subchapter II of chapter 53 of title 31, United States Code, relating to currency reports.

S. 1214

At the request of Mr. DECONCINI, the name of the Senator from Texas [Mr. BENTSEN] was added as a cosponsor of S. 1214, a bill to amend section 215 of title 18, United States Code, to modify the state of mind requirements for certain bank bribery and related offenses.

S. 1223

At the request of Mr. ARMSTRONG, the names of the Senator from Oregon [Mr. PACKWOOD] and the Senator from Kansas [Mrs. KASSEBAUM] were added as cosponsors of S. 1223, a bill to authorize the erection of a memorial on Federal land in the District of Columbia or its environs to the honor members of the Armed Forces of the United States who served in the Korean war.

S. 1347

At the request of Mr. NUNN, the name of the Senator from Alabama [Mr. DENTON] was added as a cosponsor of S. 1347, a bill to provide access to criminal history record information for national security purposes for the Department of Defense, the Office of Personnel Management, or the Central Intelligence Agency.

S. 1679

At the request of Mr. GRASSLEY, the name of the Senator from New York [Mr. MOYNIHAN] was added as a cosponsor of S. 1679, a bill to strengthen provisions of the law that provide safeguards when imports threaten to impair the national security.

S. 1804

At the request of Mr. HATCH, the names of the Senator from Mississippi [Mr. COCHRAN] and the Senator from South Dakota [Mr. PRESSLER] were added as cosponsors of S. 1804, a bill to provide for Federal incentive grants to encourage State health care professional liability reform.

S. 1818

At the request of Mr. DENTON, the names of the Senator from Nevada [Mr. LAXALT], the Senator from Idaho [Mr. MCCLURE], the Senator from North Carolina [Mr. EAST], and the Senator from North Dakota [Mr. ANDREWS] were added as cosponsors of S. 1818, a bill to prevent sexual molestation of children in Indian country.

S. 1823

At the request of Mr. ROCKEFELLER, the name of the Senator from North Dakota [Mr. BURDICK] was added as a cosponsor of S. 1823, a bill to strengthen the technological literacy of the Nation through demonstration programs of technology education.

SENATE JOINT RESOLUTION 39

At the request of Mr. GORE, the names of the Senator from Alabama [Mr. HEFLIN] and the Senator from Alabama [Mr. DENTON] were added as cosponsors of Senate Joint Resolution 39, a joint resolution to designate October 26, 1985, as "Mule Appreciation Day."

SENATE JOINT RESOLUTION 102

At the request of Mr. ZORINSKY, the name of the Senator from Iowa [Mr. GRASSLEY] was added as a cosponsor of Senate Joint Resolution 102, a joint resolution to establish a National Commission on Illiteracy.

SENATE JOINT RESOLUTION 145

At the request of Mr. DURENBERGER, the name of the Senator from Vermont [Mr. LEAHY] was added as a cosponsor of Senate Joint Resolution 145, a joint resolution designating November 1985 as "National Diabetes Month."

SENATE JOINT RESOLUTION 202

At the request of Mr. HATCH, the names of the Senator from South Carolina [Mr. THURMOND], the Senator from Minnesota [Mr. BOSCHWITZ], the Senator from Michigan [Mr. RIEGLE], the Senator from Massachusetts [Mr. KERRY], the Senator from Florida [Mrs. HAWKINS], the Senator from Hawaii [Mr. MATSUNAGA], the Senator from Hawaii [Mr. INOUYE], the Senator from Vermont [Mr. STAFFORD], and the Senator from Ohio [Mr. GLENN] were added as cosponsors of Senate Joint Resolution 202, a joint resolution designating November 1985 as "American Liver Foundation National Liver Awareness Month."

SENATE JOINT RESOLUTION 235

At the request of Mr. DANFORTH, the names of the Senator from Kansas [Mrs. KASSEBAUM] and the Senator from South Dakota [Mr. ABDNOR] were added as cosponsors of Senate Joint Resolution 235, a joint resolution to designate the week of January 26, 1986, to February 1, 1986, as "Truck and Bus Safety Week."

SENATE CONCURRENT RESOLUTION 69

At request of Mr. DANFORTH, the names of the Senator from Montana [Mr. MELCHER] and the Senator from Kansas [Mr. DOLE] were added as cosponsors of Senate Concurrent Resolution 69, a concurrent resolution to recognize the National Camp Fire Organization for 75 years of service.

SENATE RESOLUTION 249

At the request of Mr. D'AMATO, the name of the Senator From Arizona [Mr. DECONCINI] was added as a cosponsor of Senate Resolution 249, a resolution to honor the achievements of Antonio Meucci.

AMENDMENTS SUBMITTED

OMNIBUS BUDGET RECONCILIATION ACT

METZENBAUM AMENDMENT NO. 995

Mr. METZENBAUM proposed an amendment to the bill (S. 1730) to provide for reconciliation pursuant to section 2 of the first concurrent resolution on the budget for fiscal year 1986 (S. Con. Res. 32, Ninetyninth Congress); as follows:

On page 334, strike out lines 1 through 5.

GRAMM (AND ARMSTRONG) AMENDMENT No. 996

Mr. GRAMM (for himself and Mr. ARMSTRONG) proposed an amendment to the bill S. 1730, supra; as follows:

On page 287, beginning with line 5, strike out all through page 306, line 17.

ROTH (AND MOYNIHAN) AMENDMENT No. 997

Mr. ROTH (for himself and Mr. MOYNIHAN) proposed an amendment to the bill S. 1730, supra; as follows:

On page 302, strike out lines 19 through 24, and insert in lieu thereof the following:

"(d) Amounts in the Trust Fund shall only be available—

"(1) for the payment of drawbacks and refunds of the duty imposed by section 287 that are allowable under any provision of Federal law, and

"(2) to the extent and in such amounts as may be provided by appropriation Acts, for making expenditures to carry out the provisions of chapters 2 and 3.

None of the amounts in the Trust Fund shall be available for the payment of loans guaranteed under chapter 3 or for any other expenses relating to financial assistance provided under chapter 3.".

On page 303, strike out lines 1 through 10.

On page 303, line 11, strike out "(d) and insert in lieu thereof "(c)".

On page 305, strike out lines 1 through 4, and insert in lieu thereof the following:

"(c)(1) Except as otherwise provided in this subsection, duty-free treatment provided with respect to any article under any other provision of law shall not prevent the imposition of duty with respect to such article by subsection (a).

"(2) No duty shall be imposed by subsection (a) with respect to any article that is treated as duty free under part 148 of title 19 of the Code of Federal Regulations.".

On page 305, line 23, strike out "(d)" and insert in lieu thereof "(c)".

On page 306, line 3, strike out "the date that is 30 days after".

On page 306, line 6, strike out "778D, and 778G(c)" and insert in lieu thereof "and 778D".

LAUTENBERG AMENDMENT NO. 998

Mr. LAUTENBERG (for himself, Mr. DANFORTH, Mr. BRADLEY, and Mr. BOSCHWITZ) proposed an amendment to the bill S. 1730, supra; as follows:

At the end of the bill, add the following:

SEC. . Section 158 of title 23, United States Code, is amended—

(1) in subsection (a)(2), by striking "the fiscal year" and inserting in lieu thereof "each fiscal year"; and

(2) in subsection (b), by striking "in fiscal year if in any succeeding fiscal year" and inserting in lieu thereof "in the fiscal year beginning after September 30, 1986, or the fiscal year beginning after September 30, 1987, if before the end of the period for which such funds would be available for expenditure under section 118(b) of this title".

PACKWOOD AMENDMENT NO. 999

Mr. GORTON (for Mr. PACKWOOD) proposed an amendment to the bill S. 1730, supra; as follows:

On page 306, beginning with line 18, strike out all through page 308, line 11, and insert in lieu thereof the following:

SUBTITLE G—REVENUE SHARING

SEC. 779. TERMINATION OF GENERAL REVENUE SHARING.

(a)(1) Except as otherwise provided in this section, the provisions of chapter 67 of title 31, United States Code, are hereby repealed.

(2) The Secretary of the Treasury shall continue to be the trustee of the Trust Fund, which shall remain in existence until amounts in the Trust Fund are expended for entitlement payments to local governments in accordance with the terms of the Revenue Sharing Act.

(3) The Secretary is authorized to take such necessary or appropriate actions, to carry out the requirements of this Act with respect to funds appropriated to the Trust Fund, as were authorized under the terms of the Revenue Sharing Act, including but not limited to enforcement of the regulatory provisions concerning nondiscrimination, audits, accounting procedures, public hearings, expenditures in accordance with State and local law, and cooperation with reasonable requests for information.

(4) The Secretary may increase or decrease a payment to a unit of general local government under the Revenue Sharing Act to account for a prior underpayment or overpayment only if the increase or decrease is demanded by the Secretary or such unit of general local government before March 1, 1986.

(5) Amounts paid to units of general local governments from the Trust Fund shall be used, obligated, or appropriated by the units of general local governments before April 1, 1987, and these funds shall continue to be subject to the terms of the Revenue Sharing Act.

(6) Subsection (a)(1) of this section shall not have the effect of releasing or extinguishing any fiscal sanction, finding, determination, compliance agreement, or other duly authorized action for the purpose of sustaining any proper action or prosecution for enforcement authorized under the terms of the Revenue Sharing Act.

(7) The Attorney General, and persons adversely affected by a practice of a local government, may bring a civil action in an appropriate district court of the United States against the applicable unit of general local government as was authorized under the Revenue Sharing Act. The court is authorized to grant such relief as was authorized under the terms of the Revenue Sharing Act.

(8) The Secretary shall report to Congress on the operation and status of the Trust Fund and the implementation of this section not later than December 1 of each year the Trust Fund remains on the books of the Department of the Treasury.

(b)(1) The table of chapters for subtitle V of title 31, United States Code, is amended by striking out the item relating to chapter 67.

(2) Paragraph (2) of section 1115(b) of the Social Security Act (42 U.S.C. 1315(b)(2)) is amended—

(A) by adding "and" at the end of subparagraph (A),

(B) by striking out "; and" at the end of subparagraph (B) and inserting in lieu thereof a period, and

(C) by striking out subparagraph (C).

(3) Section 501(b)(6) of the Housing Act of 1949 (42 U.S.C. 1471(b)(6)) and section 102(a)(17) of the Housing and Community Development Act of 1974 (42 U.S.C. 5302(a)(17)) are each amended by striking out "under the State and Local Fiscal Assistance Act of 1972 (Public Law 92-512)" and inserting in lieu thereof ", prior to October 1, 1986, under chapter 67 of title 31, United States Code".

(4) Section 302 of the Age Discrimination Act of 1975 (42 U.S.C. 6101) is amended by striking out ", including programs or activities receiving funds under the State and Local Fiscal Assistance Act of 1972 (31 U.S.C. 1221 et seq.)".

(5) Paragraph (3) of section 3 of the Coastal Barrier Resources Act (16 U.S.C. 3502(3)) is amended by striking out subparagraph (A) and redesignating subparagraphs (B), (C), (D), and (E) as subparagraphs (A), (B), (C), and (D), respectively.

(6) Subparagraph (B) of section 119(n)(2) of the Housing and Community Development Act of 1974 (42 U.S.C. 5318(n)(2)(B)) is amended by striking out "is an eligible recipient" and inserting in lieu thereof "was an eligible recipient, prior to October 1, 1986,".

(7) Paragraph (1) of section 248(h) of the National Housing Act (12 U.S.C. 1715z-13(h)(1)) is amended by striking out "is an eligible recipient" and inserting in lieu thereof "was an eligible recipient, prior to October 1, 1986,".

(c) For purposes of this section—

(1) The term "Trust Fund" means the State and Local Assistance Trust Fund established under the Revenue Sharing Act.

(2) The term "Revenue Sharing Act" means the provisions of chapter 67 of title 31, United States Code, as in effect on the day before the date of enactment of this Act and subject to the terms of any appropriation Act of fiscal year 1986.

(3) The term "Secretary" means the Secretary of the Treasury.

(d) There are hereby authorized to be appropriated for fiscal year 1987, such sums as may be necessary to administer the provisions of this section, and to provide for the orderly phaseout of the Revenue Sharing Program.

(e)(1) Except as otherwise provided in this subsection, the repeal and amendments made by this section, and the provisions of this section, shall take effect on October 1, 1986.

(2) The provisions of subsections (a)(4), (c), and (d) shall take effect on the date of enactment of this Act.

BAUCUS AMENDMENT NO. 1000

Mr. BAUCUS proposed an amendment to the bill S. 1730, supra; as follows:

On page 285, beginning with line 24, strike out all through page 286, line 13, and insert in lieu thereof the following

(f)(1) Notwithstanding section 524 of the Tariff Act of 1930 (19 U.S.C. 1524), all the fees collected under subsection (a) shall be deposited in a separate account within the general fund of the Treasury of the United States. Such account shall be known as the "Customs User Fee Account".

(2)(A) The Secretary of the Treasury is authorized and directed to refund out of the Customs User Fee Account expenses incurred by the Secretary of the Treasury in providing overtime customs inspectional services in an amount determined by the Secretary of the Treasury to be equivalent to the amount of such expenses.

(B) The amounts which are required to be refunded under subparagraph (A) shall be refunded at least quarterly on the basis of estimates made by the Secretary of the Treasury of the expenses referred to in subparagraph (A). Proper adjustments shall be made in the amounts subsequently refunded under subparagraph (A) to the extent prior estimates were in excess of, or less than, the amounts required to be refunded under subparagraph (A).

On page 286, strike out lines 17 and 18.

On page 286, line 19, strike out "(2)" and insert in lieu thereof "(h)(1)".

On page 286, line 22, strike out "(3)" and insert in lieu thereof "(2)".

DOLE AMENDMENT NO. 1001

Mr. DOLE proposed an amendment to the bill S. 1730, supra; as follows:

Beginning on page 441, line 22, strike out through line 14 on page 442.

KENNEDY (AND OTHERS) AMENDMENT NO. 1002

Mr. KENNEDY (for himself, Mr. BYRD, Mr. RIEGLE, Mr. MELCHER, Mr. KERRY, Mr. SARBANES, Mr. MATSUNAGA, Mr. CRANSTON, Mr. CHILES, and Mr. SIMON) proposed an amendment to the bill S. 1730, supra; as follows:

On page 164, after line 25, insert the following:

SEC. 711A. SENSE OF THE SENATE WITH RESPECT TO INPATIENT HOSPITAL DEDUCTIBLE.

In view of the $92 Medicare hospital deductible increase that will go into effect January 1, 1986, it is the sense of the Senate that the Committee on Finance should report legislation which will reform calculation of the annual increase in such deductible so that it is more consistent with annual increases in Medicare payments to hospitals.

STAFFORD (AND OTHERS) AMENDMENT NO. 1003

Mr. STAFFORD (for himself, Mr. KENNEDY, Mr. HEINZ, Mr. GLENN, Mr. DANFORTH, Mr. LEAHY, Mr. D'AMATO, Mr. EAGLETON, Mr. BURDICK, Mr. COHEN, Mr. HATFIELD, Mr. MOYNIHAN, Mr. HART, Mr. ANDREWS, Mr. LAUTENBERG, Mr. RIEGLE, Mrs. HAWKINS, Mr. PELL, and Mr. HARKIN) proposed an amendment to the bill S. 1730, supra; as follows:

Beginning on page 10, strike out the dash on line 23 and all that follows through "(2)" on line 4 of page 11.

On page 11, strike out "a" on line 6 and all that follows through "or" on line 10.

On page 11, strike out "In" on line 11 and all that follows through "Act." on line 15.

DECONCINI (AND OTHERS) AMENDMENT NO. 1004

Mr. DECONCINI (for himself, Mr. BENTSEN, and Mr. MOYNIHAN) proposed an amendment to the bill S. 1730, supra; as follows:

On page 283, after line 25, add the following:

(3) No fee shall be charged under subsection (a)(3) for the arrival of a commercial truck during any calendar year after a total of $100 in fees has been paid to the Secretary of the Treasury for the provision of customs services for all arrivals of such commercial truck during such calendar year.

(4) No fee shall be charged under subsection (a)(4) for the arrival of a railroad car whether passenger or freight during any calendar year after a total of $100 in fees has been paid to the Secretary of the Treasury for the provision of customs services for all arrivals of such passenger or freight rail car during such calendar year.

(5) No fee shall be charged under subsection (a)(5) for the arrival of a private vessel or private aircraft during any calendar year after a total of $500 in fees has been paid to the Secretary of the Treasury for the provision of customs services for all arrivals of such private vessel or private aircraft during such calendar year.

HECHT AMENDMENT NO. 1005

Mr. HECHT proposed an amendment to the bill S. 1730, supra; as follows:

On page 440, line 13, after the period, insert the following: The Commission's study shall also include former sections 4355 (a) and (b), former section 4358(d), and former sections 4554 (b) and (c).

HELMS AMENDMENT NO. 1006

Mr. HELMS proposed an amendment to the bill S. 1730, supra; as follows:

On page 372, after line 2, insert the following new section:

SEC. 789H. SENSE OF THE SENATE THAT THE VALUE ADDED TAX SHOULD BE DELETED IN CONFERENCE.

(a) FINDINGS.— The Senate finds that—

(1) the value added tax added by this part is a regressive tax which places the burden of paying for pollution on persons other than those responsible for it;

(2) such tax represents a dangerous shift toward the principle of a broad-basgd tax on sales;

(3) such tax has escalated rapidly in virtually every country in which it has been implemented;

(4) the Administration has stated, in a September 16, 1985, statement of Administration policy that "(t)he President's senior advisors will recommend disapproval of any legislation containing a value added or other broad-based tax.";

(5) the House of Representatives is expected to adopt a financing mechanism for the Superfund bill which will not include such tax;

(6) the Administration will not be prepared to release its alternative to such tax after the Senate has completed action on the reconciliation legislation; and

(7) prolonged debate on the floor of the Senate concerning an alternative to such tax would unduly delay consideration of this legislation.

(b) SENSE OF THE SENATE.—It is the sense of the Senate that—

(1) the committee on conference on H.R. 2005 or any comparable legislation should submit a conference report which contains a reliable financing mechanism for the Superfund program which does not include any value added tax, and

(2) that the committee on conference on this Act or any comparable legislation should submit a conference report which does not include any value added tax.

MOYNIHAN (AND OTHERS) AMENDMENT NO. 1007

Mr. MOYNIHAN (for himself, Mrs. HAWKINS, Mr. GORE, Mr. MITCHELL, Mr. BAUCUS, Mr. HEINZ, Mr. NICKLES, Mr. ZORINSKY, Mr. RIEGLE, Mr. KENNEDY, Mr. CHILES, Mr. SASSER, Mr. GRASSLEY, Mr. BYRD, Mr. HARKIN, Mr. BENTSEN, Mr. ROCKEFELLER, Mr. BRADLEY, Mr. KERRY, and Mr. BUMPERS) proposed an amendment to the bill S. 1730, supra; as follows:

On page 265, between line 7 and 8, insert the following:

SEC. 769G. RESTORATION OF TRUST FUND INVESTMENTS.

(a) REISSUANCE OF OBLIGATIONS.—The Secretary of the Treasury shall immediately reissue to the Social Security Trust Funds and other retirement funds (as defined in subsection (d)) obligations under chapter 31 of title 31, United States Code, identical in all terms to public debt obligations redeemed on or after September 1, 1985, and on or before the date of the enactment of this Act that as determined by the Secretary on the basis of standard investment procedures for such funds in effect on September 1, 1985, would not have been redeemed if H.J. Res. 372 (99th Congress, 1st Session), as deemed passed by the House of Representatives on August 1, 1985, had been enacted into law on August 1, 1985. The uninvested balances of such funds shall be debited for the principal amount of such reissued obligations.

(b) APPROPRIATION TO TRUST FUNDS OF LOST INTEREST.—(1) The Secretary of the Treasury shall pay to the Social Security Trust Funds and other retirement funds (as defined in subsection (d)), from amounts in the general fund of the Treasury not otherwise appropriated, amounts determined, in accordance with paragraph (2), to be equal to the net amount of interest that would have accrued to each such fund but for non-investments, redemptions, and disinvestments of such funds—

(A) on or after September 1, 1985, and on or before the date of the enactment of this Act that would not have occurred if H.J. Res. 372 (99th Congress, 1st Session), as deemed passed by the House of Representatives on August 1, 1985, had been enacted into law on August 1, 1985, taking into account the reissuance of obligations as required by subsection (a); and

(B) on or after September 1, 1984, and prior to September 1, 1985, that would not have occurred but for limitations on the public debt, based on the present value of the permanent loss of such interest.

(2)(A) The determination of the amount of interest which would have accured to the Federal Old-Age and Survivors Insurance Trust Fund, the Federal Disability Insurance Trust Fund, the Federal Hospital Insurance Trust Fund, and the Federal Supplementary Medical Insurance Trust Fund shall be made jointly by the Secretary of the Treasury and the Commissioner of Social Security, and must be certified as accurate by the two public members of the Board of Trustees of the Trust Fund and by the Comptroller General.

(B) The determination of the amount of interest which would have accrued to the Railroad Retirement Account shall be made jointly by the Secretary of the Treasury and the Chairman of the Railroad Retirement Board, and must be certified as accurate by the Comptroller General.

(C) The determination of the amount of interest which would have accrued to Civil Service Retirement and Disability Fund and the Department of Defense Military Retirement Fund shall be made by the Secretary of the Treasury, and must be certified as accurate by the Comptroller General.

(3) The payment required by paragraph (1) shall be made on June 30, 1986. Prior to April 1, 1986, the officials required to make all determinations under paragraph (2) shall do so, and shall report to the Congress any disagreements. The Comptroller General and the public members of the Board of Trustees of the Trust Funds shall report to the Congress any such determinations which they do not certify as being accurate, along with an explanation of why they do not certify such determination.

(c) NOTIFICATION OF DISINVESTMENT PLANS.—(1) The Secretary of the Treasury (as Managing Trustee of the Social Security Trust Funds) shall notify each member of the Board of Trustees of such Trust Funds, the Chairman of the House Committee on Ways and Means, and the Chairman of the Senate Committee on Finance, of any planned action, taken by reason of the limitation on the public debt, to—

(A) redeem or to disinvest any long-term bond held by the Trust Funds (specifying the amount, rate of interest, and date of redemption of each bond); or

(B) not make normalized tax transfers or not invest normalized tax transfers in interest bearing obligations, as required under sections 201, 1817, and 1841 of the Social Security Act.

(2) Notice under this subsection shall be made not less than 15 days prior to the planned action, and shall include an explanation of the necessity for the action.

(d) DEFINITION.—For purposes of this section, the term "Social Security Trust Funds and other retirement funds" means the Federal Old-Age and Survivors Insurance Trust Fund, the Federal Disability Insurance Trust Fund, the Federal Hospital Insurance

Trust Fund, the Federal Supplementary Medical Insurance Trust Fund, the Railroad Retirement Account, the Civil Service Retirement and Disability Fund, and the Department of Defense Military Retirement Fund.

PACKWOOD (AND OTHERS) AMENDMENT NO. 1008

Mr. HEINZ (for Mr. PACKWOOD, for himself, Mr. HEINZ, Mr. MOYNIHAN, and Mr. BRADLEY) proposed an amendment to the bill S. 1730, supra; as follows:

On page 174, strike out lines 18 through 20, and insert in lieu thereof the following:

(c) EFFECTIVE DATES.—(1) Except as otherwise provided in paragraph (2), the amendments made by this section shall apply to services furnished on or after the date of the enactment of this Act.

(2) In the case of a State plan for medical assistance under title XIX of the Social Security Act which the Secretary of Health and Human Services determines requires State legislation in order for the plan to meet the additional requirements imposed by the amendments made by subsection (b), the State plan shall not be regarded as failing to comply with the requirements of such title solely on the basis of its failure to meet these additional requirements before the first day of the first calendar quarter beginning after the close of the first regular session of the State Legislature that begins after the date of the enactment of this Act.

On page 239, line 3, strike out "$700,000" and insert "$85,000,000".

On page 239, line 4, strike out "$800,000" and insert "$88,000,000".

On page 239, line 18, strike out "$150,000" and insert "$1,500,000".

On page 239, line 19, strike out "$200,000" and insert "$2,000,000".

On page 275, line 25, strike out "$500,000" and insert "$45,000,000".

GRASSLEY AMENDMENT NO. 1009

Mr. GRASSLEY proposed an amendment to the bill S. 1730, supra; as follows:

On page 330, strike out lines 20 through 24, and insert in lieu thereof the following:

"(2) CERTAIN NETTING NOT PERMITTED AFTER SECTION 381 TRANSACTIONS.—If such an organization acquires the assets of another such organization in a transaction described in section 381(a) and exercises its option under paragraph (1), the acquiring organization may not, in computing its net earnings for taxable years ending after the date of acquisition, offset losses of 1 or more allocation units of the acquiring or acquired organization against earnings of the acquired or acquiring organization, respectively, to the extent that—

"(A) such earnings are not properly allocable to periods after the date of acquisition, and

"(B) such earnings could not have been offset by such losses if such earnings and losses had been derived from allocation units of the same organization.

On page 331, line 6, strike out "each patron" and insert in lieu thereof "its patrons".

On page 331, lines 10 and 11, strike out ", or would have been, distributed to such patron" and insert in lieu thereof "distributed to its patrons".

On page 331, line 15, strike out "such patron" and insert in lieu thereof "its patrons."

On page 332, lines 15 and 16, strike out "each patron" and insert in lieu thereof "its patrons".

On page 333, line 12, strike out "Date" and insert in lieu thereof "Dates".

On page 333, after line 21, insert the following:

(3) NO INFERENCE.—Nothing in the amendments made by this section shall be construed to infer that a change in law is intended as to whether any patronage earnings may or may not be offset by nonpatronage losses, and any determination of such issue shall be made as if such amendments had not been enacted.

QUAYLE (AND KENNEDY) AMENDMENT NO. 1010

Mr. QUAYLE (for himself and Mr. KENNEDY) proposed an amendment to the bill S. 1730, supra; as follows:

On page 295, line 3, strike out "a training program" and insert in lieu thereof "training an adversely affected worker".

On page 295, line 7, strike out "a training program" and insert in lieu thereof "training an adversely affected worker".

On page 295, between lines 12 and 13, insert the following:

"(C) The provisions of this paragraph shall not apply to, or take into account, any funds provided under any other provision of Federal law which are used for any purpose other than the direct payment of the costs incurred in training a particular adversely affected worker, even if such use has the effect of indirectly paying or reducing any portion of the costs involved in training the adversely affected worker.

On page 296, beginning with line 1, strike out all through page 297, line 9, and insert in lieu thereof the following:

"(c) The provisions of section 143(b) of the Job Training Partnership Act shall apply with respect to training provided under this chapter.

"(d) The Secretary may pay the costs of on-the-job training of an adversely affected worker under subsection (a)(1) only if—

"(1) such training is not for the same occupation from which the worker was separated and with respect to which such worker's group was certified pursuant to section 222,

"(2) the employer certifies to the Secretary that the employer will continue to employ such worker for at least 26 weeks after completion of such training if the worker desires to continue such employment and the employer does not have due cause to terminate such employment, and

"(3) the employer has not taken, at any time, any action which violated—

"(A) the provisions of section 143(b) of the Job Training Partnership Act, or

"(B) the terms of any certification described in paragraph (2) made by such employer,

with respect to any other on-the-job training provided by such employer for which the Secretary has made a payment under subsection (a)(1).".

On page 297, between lines 15 and 16, insert the following:

(c) Section 239 of the Trade Act of 1974 (19 U.S.C. 2311) is amended by adding at the end thereof the following new subsection:

"(e) Agreements entered into under this section may be made with one or more State or local agencies including—

"(1) the employment service agency of such State,

"(2) any State agency carrying out title III of the Job Training Partnership Act, or

"(3) any other State or local agency administering job training or related programs.".

QUAYLE (AND OTHERS) AMENDMENT NO. 1011

Mr. QUAYLE (for himself, Mr. DURENBERGER, Mr. HATCH, Mr. KENNEDY, Mr. DOLE, Mr. BAUCUS, and Mr. HEINZ) proposed an amendment to the bill S. 1730, supra; as follows:

Beginning on page 517, line 14, strike out through page 529, line 10, and insert in lieu thereof the following:

COUNCIL ON GRADUATE MEDICAL EDUCATION

SEC. 986. Title VII of the Public Health Service Act is amended by adding at the end thereof the following new part:

"PART H—GRADUATE MEDICAL EDUCATION

"COUNCIL ON GRADUATE MEDICAL EDUCATION

"SEC. 799. (a) ESTABLISHMENT OF COUNCIL.—There is established the Council on Graduate Medical Education (hereafter in this section referred to as the "Council"). Prior to July 1, 1988, and every three years thereafter, the Council shall provide advice and make recommendations to the Secretary with respect to—

"(1) the supply of physicians in the United States;

"(2) current and future needs for physicians to practice in primary care specialties and in medical specialties which the Council determines to have a relative shortage of physicians;

"(3) issues relating to foreign medical school graduates;

"(4) appropriate Federal policies with respect to the matters specified in paragraphs (1), (2), and (3), including policies concerning changes in the financing of undergraduate and graduate medical education programs and changes in the types of medical education training in graduate medical education programs; and

"(5) appropriate efforts to be carried out by hospitals, schools of medicine, and schools of osteopathy with respect to the matters specified in paragraphs (1), (2), and (3), including efforts for changes in undergraduate and graduate medical education programs.

"(b) MEMBERSHIP.—The Council shall be composed of—

"(1) the Assistant Secretary for Health or the designee of the Assistant Secretary;

"(2) the Administrator of the Health Care Financing Administration;

"(3) the Chief Medical Director of the Veterans' Administration;

"(4) ten members appointed by the Secretary from representatives of health care providers, national and specialty physician organizations, schools of medicine, organizations of graduates of foreign medical schools, and hospitals which provide graduate medical education; and

"(5) four members appointed by the Secretary from representatives of health insurers, business, and labor.

"(c) TERMS.—(1) Members of the Council appointed under paragraphs (4) and (5) of subsection (b) shall be appointed for a term of four years, except that the term of office of the members first appointed shall expire, as designated by the Secretary at the time

of appointment, four at the end of one year, four at the end of two years, three at the end of three years, and three at the end of four years.

"(2) The Secretary shall appoint the first members to the Council under paragraphs (4) and (5) of subsection (b) within 60 days after the date of enactment of this section.

"(d) CHAIRMAN.—The Council shall elect one of its members as Chairman of the Council.

"(e) QUORUM.—Nine members of the Council shall constitute a quorum, but a lesser number may hold hearings.

"(f) VACANCIES.—Any vacancy in the Council shall not affect its power to function.

"(g) COMPENSATION.—Each member of the Council who is not otherwise employed by the United States Government shall receive compensation at a rate equal to the daily rate prescribed by GS-18 under the General Schedule under section 5332 of title 5, United States Code, for each day, including traveltime, such member is engaged in the actual performance of duties as a member of the Council. A member of the Council who is an officer or employee of the United States Government shall serve without additional compensation. All members of the Council shall be reimbursed for travel, subsistence, and other necessary expenses incurred by them in the preformance or their duties.

"(h) POWERS.—In order to carry out the provisions of this section, the Council is authorized to—

"(1) collect such information, hold such hearings, and sit and act at such times and places, either as a whole or by subcommittee, and request the attendance and testimony of such witnesses and the production of such books, records, correspondence, memoranda, papers, and documents as the Council or such subcommittee may consider advisable; and

"(2) request the cooperation and assistance of Federal departments, agencies, and instrumentalities in carrying out the provisions of this section, and such departments, agencies, and instrumentalities are authorized to provide such cooperation and assistance.

"(i) REPORTS.—Prior to July 1, 1988, and every three years thereafter, the Council shall prepare and transmit a report to the Secretary and to Congress which specifies the activities of the Council during the period for which the report is made and contains advice and recommendations as required under subsection (a).".

On page 156, beginning on line 9, strike out "increases," and all that follows through the end of line 12, and insert in lieu thereof the following: "changes, the number of years which the Secretary may specifiy, after consultation with the Accreditation Council on Graduate Medical Education and after review of the recommendations of the Council on Graduate Medical Education established under section 799 of the Public Health Service Act; except that (1) if such change increases the required number of years, the revised number of years specified by the Secretary may not be greater than such increased required number of years nor less than the number of years specified in the 1985-1986 Directory, and (2) if such change decreases the required number of years, the revised number of years specified by the Secretary may not be greater than the number of years specified in the 1985-1986 Directory nor less than such decreased required number of years.".

HEINZ (AND OTHERS) AMENDMENT NO. 1012

Mr. HEINZ (for himself, Mr. PACKWOOD, Mr. MOYNIHAN, and Mr. BRADLEY) proposed an amendment to the bill S. 1730, supra; as follows:

On page 174, strike out lines 18 through 20, and insert in lieu thereof the following:

(c) EFFECTIVE DATES.—(1) Except as otherwise provided in paragraph (2), the amendments made by this section shall apply to services furnished on or after the date of the enactment of this Act.

On page 239, line 3, strike out "$700,000" and insert "$85,000,000".

On page 239, line 4, strike out "$800,000" and insert "$88,000,000".

On page 239, line 18, strike out "$150,000" and insert "$1,500,000".

On page 239, line 19, strike out "$200,000" and insert "$2,000,000".

On page 275, line 25, strike out "$500,000" and insert "$45,000,000".

PACKWOOD AMENDMENTS NOS. 1013 AND 1014

Mr. HEINZ (for Mr. PACKWOOD) proposed two amendments to the bill S. 1730, supra; as follows:

AMENDMENT No. 1013

On page 161, line 23, after "1972" insert the following: ", or under section 402 of the Social Security Amendments of 1967 (as amended by section 222(b) of the Social Security Amendments of 1972),".

AMENDMENT No. 1014

On page 174, line 14, before the semicolon insert "payment for which would be made under the State plan".

Beginning on page 218, line 24, strike out "but shall not be subject to any other monitoring, quality control, audit, or penalty provision" and insert in lieu thereof "but shall not be subject to any other financial penalty as a result of any other monitoring, quality control, or auditing requirement".

AUTHORITY FOR COMMITTEES TO MEET

COMMITTEE ON AGRICULTURE, NUTRITION, AND FORESTRY

Mr. GORTON. Mr. President, I ask unanimous consent that the Committee on Agriculture, Nutrition, and Forestry be authorized to meet during the session of the Senate on Tuesday, November 12, to hold a hearing to examine the marketing, transportation, handling procedures, and inspection of agricultural commodities in connection with grain purchases by foreign nations and to examine incidents pertaining to the loading, handling, and inspection of the Soviet vessel *Marshal Konev*.

The PRESIDING OFFICER. Without objection, it is so ordered.

SUBCOMMITTEE ON STRATEGIC AND THEATER NUCLEAR FORCES

Mr. GORTON. Mr. President, I ask unanimous consent that the Subcommittee on Strategic and Theater Nuclear Forces of the Committee on Armed Services be authorized to meet during the session of the Senate on Tuesday, November 12, in closed session to conduct a hearing on Soviet strategic defense programs.

The PRESIDING OFFICER. Without objection, it is so ordered.

COMMITTEE ON ENERGY AND NATURAL RESOURCES

Mr. GORTON. Mr. President, I ask unanimous consent that the Committee on Energy and Natural Resources be authorized to meet during the session of the Senate on Tuesday, November 12, 1985, in order to conduct a business meeting on S. 1517, a bill to amend the Low-Level Radioactive Waste Policy Act.

The PRESIDING OFFICER. Without objection, it is so ordered.

PERMANENT SUBCOMMITTEE ON INVESTIGATIONS

Mr. GORTON. Mr. President, I ask unanimous consent that the Subcommittee on Investigations, of the Committee on Governmental Affairs be authorized to meet during the session of the Senate on Tuesday, November 12, in order to conduct a hearing on the Foreign Missions Act.

The PRESIDING OFFICER. Without objection, it is so ordered.

ADDITIONAL STATEMENTS

MOTOR CARRIER SAFETY

● Mr. DANFORTH. Mr. President, motor carrier safety is an issue of vital importance. Major steps have been taken to improve motor carrier safety and to strengthen safety regulations by Congress, State and local governments, the Department of Transportation, and the truck and bus industries. Despite these positive actions, however, it is clear that we must continue to work to combat this major safety concern.

Last week, Secretary of Transportation Elizabeth Hanford Dole delivered a speech to the annual meeting of the Highway Users Federation for Safety and Mobility in which she outlined the Department's truck and bus safety initiatives

Mr. President, Secretary Dole's remarks describe the important work being undertaken by the Department and others to enhance motor carrier safety. I ask that the text of Secretary Dole's speech be printed in the RECORD.

The text follows:

REMARKS PREPARED FOR DELIVERY BY SECRETARY OF TRANSPORTATION ELIZABETH HANFORD DOLE AT THE 16TH ANNUAL MEETING OF THE HIGHWAY USERS FEDERATION FOR SAFETY AND MOBILITY

May I say how much I have looked forward to this occasion. It presents an opportunity to engage you who represent the millions of Americans who use and profit from the nation's highways in a dialogue about the future of those highways—and the commitment of my own Department of Transportation to exert leadership in solving the

problems and realizing the potential of these, our nation's lifelines.

The Highway Users Federation continually serves as a strong voice to promote highway safety, preservation and improvement. This group and its leaders have rendered outstanding service in past campaigns to encourage safety belt usage, combat the scourge of drunk drivers, and support a wide range of community-based safety programs. For all the membership of this organization has done, I am grateful. But today, my purpose is to look ahead, to what we must do together in the months to come. I am here to describe several initiatives on which I have been working with John Clements and others from your membership. John is a proven national transportation leader—especially in the area of highways and highway safety—and he was one of the individuals who was most helpful when we worked together to secure a clean "ICE" bill.

The initiatives I want to outline today are designed to make what is the finest system of highways in the world better yet. Most of all, I am here today to offer leadership in enhancing truck safety along four million miles of American roads.

It's been said that a journey of ten thousand miles must begin with a single step. The journey which we must travel together, now and in the months to come, will involve many steps, taken on many fronts. One such step was the introduction of legislation yesterday to designate the week of January 26 as National Truck and Bus Safety Week. I harbor no illusions about the long-range impact of such observances—but I *am* convinced that they can serve to educate, heighten public awareness, and promote legislative responsibility.

During the final week of September, the Department—in cooperation with the states participating in the Motor Carrier Safety Assistance Program and those member states of the Commercial Vehicle Safety Alliance—conducted a nationwide joint inspection effort of commercial trucks. For the first time, all inspectors—federal and state—used the same inspection procedures and vehicle safety criteria, providing nationwide uniformity, increased efficiency and a greater focus on important safety problems. What we found gives cause for concern. Some 41 percent of all vehicles inspected by state personnel were grounded by serious defects, another 15 percent of all drivers were put out of service due to improper documentation and log book problems. Such numbers are not final. Even so, they suggest the dimensions of a problem we can hardly ignore.

Meanwhile, there is another serious problem we must address, namely the fact that in 20 of our states, any person who is licensed to drive an automobile can also legally drive a tractor-trailer without first meeting any formal state training, testing or operator licensing requirements. Quite frankly, this is outrageous. It should worry any American who drives or rides as a passenger on the same roads shared with tractor-trailer vehicles.

Nor does this exhaust my concerns. What about the ease with which drivers can obtain multiple licenses and records to match? In fact, we have evidence that some drivers—including truck and bus drivers—may possess licenses in several states at the same time. Why? To hide accidents and traffic violations and avoid state enforcement action, such as license revocation. The National Transportation Safety Board has found that three separate levels of commercial driver screening notwithstanding, states continue to license problem drivers to operate heavy trucks.

Consider the case of the tractor-trailer which struck—from the rear—three parked vehicles. The truck driver had two driver's licneses in his possession: one from Colorado and one from New York. His Colorado license had two violations: one for failing to observe a traffic sign and one for speeding. His license issued from New York was under suspension. The co-driver also had two driver's licenses in her possession: one from the State of Louisiana, containing one speeding violation, and one from Kansas, currently suspended because of no fewer than six moving violations. The truck driver and three other people died in the accident. His co-driver and another person was injured.

In another case, no less tragic, a truck passed a stopped school bus displaying its flashing lights and struck and killed a child, who had just left the bus. The driver of this particular truck carried two licenses: one from Pennsylvania with a record of 10 violations, presently suspended, and another from Virginia, with no record of violations. These are but two examples of what can and does happen when unqualified or unsafe drivers are permitted to travel our highways. These are examples of what you and I must move vigorously to clear from the roads of America—now, before they kill or injure more innocent victims.

The Department has already begun acting to make trucks and buses safer. Recently, I gave the motor carrier safety program within the Federal Highway Administration a stronger internal voice by appointing Dick Landis—for many years a senior Highway Patrol Commander in Arizona's Department of Public Safety—to the newly created position of Associate Administrator for Motor Carriers. Our regional officers around the country will now report directly to Dick, who brings extensive experience in state truck safety issues to this new and vitally important position.

One of Dick's first priorities is to take necessary steps to increase safety enforcement activities at the state and local levels to identify unsafe drivers and vehicles. These day-to-day operations are more efficiently conducted at the community—rather than national—level. We are eager to provide the assistance—through federal funds and training—to local people who are out there every day conducting inspections, officials who are more knowledgeable about the conditions in their own communities, who make sure the work is done and who follow an historic American tradition of state control over state roads.

The states have a crucial role—in administering driver licensing programs, truck safety inspection and enforcement through the Motor Carrier Safety Assistance Program (MCSAP) and, of course, through normal safety activities entrusted to state police. At the same time, the federal government has its work cut out for it if we are to achieve more uniform enforcement nationwide. To Washington falls responsibility for better data collection and safety audits, which in turn can define broad patterns of violations. The federal government must provide the tools to help the states get the job done, such as civil penalty actions against persistent violators and effective federal safety regulations.

Another important tool to bolster state enforcement efforts is SAFETYNET, designed by DOT in 1983. SAFETYNET's data base system will make available to state enforcement agencies the BMCS's motor carrier census, safety ratings and enforcement history. It will also act as a repository for information gathered by the states. That information will be available to computer terminals in state agency offices. Even now, there are four states testing the system. And within this fiscal year, we expect to see funding eligibility for necessary hard and software—with SAFETYNET fully operational in all 50 states within the next three to five years.

In order to strengthen our nationwide truck safety program, the Administration called for a state Motor Carrier Safety Assistance Program as part of the milestone highway legislation of 1982. Rather than building a federal police force, we sought to expand state efforts. Under MCSAP, states that enforce federal or compatible state motor carrier and hazardous materials regulations may be reimbursed for up to 80 percent of the cost of expanding these programs. In turn, BMCS personnel and resources can be redirected to audit problem carriers identified by state terminal and roadside inspections, to train state inspectors and to bring civil enforcement penalties against persistent violators.

Since the program began last year, over 2,100 state inspectors have been trained and an additional 650 inspectors have completed courses in the safe transportation of hazardous materials. We expect to train another 500 state inspectors and 250 more hazardous materials inspectors—for a total of 3,500 new inspectors by the end of September 1986. In short, we're getting results. We are finding out what and where the problems are.

State officials are not just pinpointing the problems; they are fixing them. They are giving federal auditors help in identifying repeat offenders. And I will request a 150 percent increase in funding for the Motor Carrier Safety Assistant Program in fiscal year 1987. I am seeking an authorization of $50 million and will make all of this money available to the states, for I believe the states are now ready to put those funds to work. They have, overall, completed the development of programs and are ready for the more costly implementation stage. Equally important, I am asking that these funds be available on a contract authority basis. This will give MCSAP added stability by assuring multi-year funding. It will give states the assurance they need for long-term planning and hiring.

With this increased funding, starting in 1987 the focus will change from recruiting and training to increasing the states' presence on the highways. This will lead to two million additional roadside inspections and 10,000 safety compliance audits of intrastate motor carrier companies.

And there is a smaller, but extremely important, group of drivers and vehicles—those which carry hazardous materials. I have directed the Federal Highway Administration to step up the emphasis on hazardous materials transportation in its administration of the MCSAP program. While the safety record in this field generally has been excellent, there are no laurels to be rested upon—not while the potential remains for a single disastrous accident.

Fortunately, the Department has already taken a big first step by fostering state enforcement capability with our recent and highly successful State Hazardous Materials Enforcement Development Program. Today, through the efforts of some 25 state participants, we have been able to dedicate re-

sources, guidance, and training support toward enhanced safety and improved enforcement procedures. In the process, states have demonstrated their own capacity to more effectively enforce hazardous materials regulations, achieve a greater sharing of the data needed for enforcement purposes and move closer to regulatory uniformity.

To maintain and hopefully accelerate the momentum generated by this program, I have asked the Research and Special Programs Administration, its original sponsor, to hold a series of four regional workshops early next year. These workshops, held in conjunction with BMCS, will enable federal and state officials responsible for hazardous materials transportation to identify solutions to enforcement, training, routing and emergency response problems.

Meanwhile, I want to make sure we are organized to make the best possible use of newly allocated resources. My Safety Review Task Force, which has released reports on the Federal Aviation and Federal Railroad Administrations, is now reviewing the Federal Highway Administration, with a particular emphasis on motor carrier safety and report back to me on what, if any, further steps need to be taken. I am going to take a hard look at our method of auditing and whom we audit—and if additional resources are required we will use them.

Nor will I wait before tackling the issue of problem bus drivers. The Department is scheduling a series of strategy meetings, also in January, to plan a federal/state inspection of the nation's bus fleet. Those states in MCSAP, as well as those in the Commercial Vehicle Safety Alliance along with BMCS, are targeting the safety of commercial bus operations in an intensified inspection effort of passenger carriers. It will be nationwide in its scope.

To improve the Department's ability to enforce federal motor carrier laws, the Motor Carrier Safety act of 1984 provided for civil penalties of up to $10,000 for each truck safety violation which could lead to a serious injury or death. Thanks to the leadership of Senator Danforth—a pioneer in motor carrier safety—and Representative Bud Shuster and Glenn Anderson, Congress wisely provided the Department with this civil penalty authority. And I will not hesitate to use it to get deficient vehicles and negligent drivers off our roads. Already, the Department has begun to assess civil penalties. Such violations are not isolated human errors. Rather they are patterns of equipment violations or operating conduct that any responsible business could detect and correct if it were properly fulfilling its saftey responsibility to the public. I am pleased to note that this vital legislation was supported by many in the room today.

Another key element is a comprehensive review of BMCS regulations for trucks and commercial buses. And by mid-1986, I look forward to completion to these regulations, ranging from drivers' hours of service and general driving rules, to parts and accessories requirements, inspection, repair and maintenance of vehicles, safety fitness determinations that will comply to *all* carriers, and notification and reporting of all accidents. We are also considering more stringent qualifications for those who transport hazardous materials. I assure you this review will have my close scrutiny and I have asked the Chairman of my Safety Review Task Force to personally monitor its progress. It will not be "business as usual."

Just this past September, I proposed new rules to improve the safety of tank trucks that carry hazardous gases and liquids, including gasoline. These rules, which are now in the comment period, would require that a large segment of the nation's fleet of truck cargo tanks be retrofitted with stronger manhole cover assemblies and improved pressure relief valves. This will reduce substantially the risk of fire, major leakage and other hazards in overturn accidents. At the time, tighter requirements for maintenance, repair and inspection will further improve the quality and safety of cargo tanks. We will move expeditiously, upon the closing of the comment period, to analyze these comments and finalize the rules.

I have spoken of partnerships. Trucking companies also share responsibility for ensuring that their drivers are well trained. Therefore, the Department has just issued a proposed minimum federal standard for training tractor trailer drivers. Unfortunately, there has been no such standard until now. We believe that development of such standards is a major step toward instilling the basic knowledge and skills required to operate these large vehicles safely. And by mid-December, the Government Printing Office will have copies of the model curriculum—which contains a complete, ready to teach, 320-hour course.

The inspection and enforcement programs I have discussed this morning are crucial to our safety effort. They alone will not suffice, not so long as there is an inherent problem in the licensing system in this country. In truth, the state driver licensing systems are the only programs which reach all drivers routinely and, in most states, at regular intervals. These systems stand out for their potential to manage at least somewhat the general driving population, as well as identified problem and impaired drivers.

Currently, 31 states have some form of classified licensing system. Thirty states and the District of Columbia have joined the Driver License Compact, an association of states which have agreed to support the concept of one license and one record for each driver and to provide license records to member states. The compact is a major step forward, but each of us in this room committed to truck safety must tackle this problem. After all, offenses such as drunk or reckless driving, or deaths caused by accidents are no less serious for being committed in some jurisdiction other than the driver's home state.

This abuse signals a crucial need for all states to have single and classified licensing systems. This is appropriate as a state responsibility, but the Department and the private sector must join together to educate the public to encourage state governments to enact legislation to implement these systems—now.

Recently, we discussed this problem with representatives of the private sector, including the Highway Users Federation, the American Trucking Associations, the Private Truck Council of America and the Teamsters. I am pleased to report that they all are eager to join our efforts in support of single and classified licensing.

The next step in that process is the big one—development of a national coalition with affiliates in target states. With the resources of my office, and those of the entire Department solidly behind this effort, I call on you here today to join me in encouraging states to take seriously their responsibility to improve highway safety by acting now to ensure that only qualified drivers operate the nation's trucks and buses, and to guarantee that violators are taken off our highways and no longer permitted to hide behind multiple licenses. We can no longer sit by and allow needless deaths to occur at the hands of drivers who, by any standard, have forfeited their right to sit behind the wheel.

I am delighted that you have agreed to cosponsor, along with the American Association of Motor Vehicle Administrators (AAMVA), a one-day workshop devoted to licensing issues. During the workshop, private and public sector organizations across the board—such as the Department, the National Governors' Association, the National Conference of State Legislatures and trucking groups—will be working to create a more effective driver licensing system and to encourage full participation by the states in the Driver Licensing Compact. For my part, I am writing to every Governor in the nation, informing them of our efforts and urging them to strongly support the adoption of classified driver license systems. In a few days, I will also meet with the Executive Committee of AAMVA to discuss truck safety issues and urge that adoption of single and classified licenses systems. And I'll be meeting early next month with the Council of State Governments to talk with leaders of state governments to enlist their support in this important effort.

I want to point out that there is one group whose commitment and support to truck safety has been second to none—the trucking industry itself. Just last month, the American Trucking Associations launched an impressive—and comprehensive—driver safety program. I was delighted to welcome ATA's President, Tom Donohue, as a member of our National Motor Carrier Advisory Committee, and I appreciate the opportunity to work with Tom, whose dedication and determination are unquestioned.

Ladies and gentleman, we have a problem to address. And I want you to know how much I care about this and how dedicated I am to resolving it—with your input and your assistance. How often is it that any of us have the kind of opportunity before us now to make that positive difference for people?

There is no one easy answer to the problem of truck safety, and we can't fix it overnight. But what we do know is that *you* can't do it alone and *we* can't do it alone. I welcome your suggestions and ideas and I look forward to the opportunity to work with you. Only together can we comprehensively address the issue of truck safety and make our roads safer for all our citizens. An extensive, combined effort of federal involvement, state enforcement, private sector initiatives and public concern is sure to win results.

Together, we can convey the importance of our message to the users of our highways. From the bottom of my heart, I thank you for your hard work and your commitment. I rely on your support.

Thank you very much.

NATIONAL ALZHEIMER'S DISEASE AWARENESS MONTH AND COLORADO RETIRED FEDERAL EMPLOYEES

● Mr. ARMSTRONG. Mr. President, November has been officially designated as "National Alzheimer's Disease Awareness Month" and I would like to call the attention of my colleagues to the leadership and involvement by

Colorado's retired and active Federal employees on behalf of this most worthy cause.

Several months before the National Association of Retired Federal Employees [NARFE] voted to officially join the fight against Alzheimer's disease, the Colorado Association of NARFE, chaired by my friend John D'Arcangelis, pledged its support to this important effort.

Retired Federal employees in Colorado have committed its 29 chapters and over 5,200 members to raise funds for the Alzheimer's Disease and Related Disorders Association. In addition, Colorado retired Federal employees will be donating their time and energy to such worthwhile efforts as counseling families of victims of the disease, and other volunteer efforts.

Alzheimer's disease is the fourth leading cause of death among older Americans and is responsible for 50 percent of all nursing home admissions. Medical studies show that one-third of American families will have one parent suffer this horrible disease if present trends continue.

I bring this effort by Colorado retired Federal employees to the attention of my colleagues for a couple of reasons.

More awareness of this dreaded disease is needed because of its devastating effects on families. It robs older couples of their golden years as one spouse watches the other slowly lose their mind and ultimately their life. In the words of one man, "I am watching her die twice, first the mind and much later the body."

Our national consciousness on Alzheimer's disease is increasing but much more needs to be done and this month of national awareness will help in this cause.

Also, it is my intention over the coming months to focus on the contributions and services made by Federal employees and retired Federal employees to their neighbors and communities beyond the office. An unfortunate perception has risen at times that Federal employees do not have the same motivation and sense of community spirit that their private sector counterparts do. Nothing could be farther from the truth.

This effort by Colorado retired Federal employees is just one example of the kind of commitment and involvement that Federal employees, active and retired, give on behalf of others. I hope to bring outstanding examples of this to the attention of the Senate on a regular basis.

I am proud that the Colorado Association of NARFE under the leadership of John D'Arcangelis was the first State to formally join the Alzheimer's disease fight.

DELAYED FUNDS AVAILABILITY BILL

● Mr. GORTON. Mr. President, I am pleased to join with my colleague, the distinguished Senator from Connecticut, in sponsoring S. 1841, the measure to speed up the time within which people who deposit checks in banks can have access to those funds. That Senator has been a pioneer in this area for several years now, and I commend his reintroducing this bill.

Certainly one of the most annoying problems to which a consumer can be subjected is to take money to the bank in the form of a check, deposit that money in the bank, and then be told that he or she cannot get at that money for a period of time. The bank will refuse to credit the deposit to the individual's account until the bank is sure that the check is good—a process that sometimes takes several weeks. Often this problem arises when someone moves to a new community, and seeks to open an account at a new bank. In this case, the problem is not merely one of petty annoyance, but of a significant inconvenience, as consumers struggle to meet all of the expenses attendant to moving while their new bank won't let them have their money.

Sometimes the unlucky individual finds out about the bank's check hold policies only after he has subsequently bounced a check of his own—bounced a check because the funds on which he was relying to cover the check were not yet credited to his account. And then, to add insult to injury, the consumer will be charged a penalty for overdrawing his account.

Talk about frustrating and annoying. Consumers rightfully demand that we do something to put an end to unwarranted check holds. The situation is especially unsatisfactory because it is so unnecessary. Yes, it is true that banks have legitimate needs to protect themselves against bad checks, and we recognize those needs. But in this age of electronic wizardry we are still processing checks in a way which hasn't changed much since the horse and buggy days. We still rely on a system that requires the physical transfer of pieces of paper all around the country, among our thousands of financial institutions.

The proposed legislation does not mandate specific procedures for addressing the check clearing procedure. That procedure is complicated and arcane, and Congress rightly should avoid inserting itself into so technical an area. But the legislation does require the Federal Reserve Board of Governors to come up with regulations to expedite funds availability, and also requires the Treasury to come up with regulations enhancing funds availability on Government checks. Finally, the bill mandates disclosure of an institution's check hold policies.

Mr. President, this is a good bill, and clearly in the interest of consumers. I hope my colleagues will join in cosponsoring this measure, and that the Senate can pass S. 1841 this Congress.●

NATURAL GAS

● Mr. CHAFEE. Mr. President, recently, considerable national attention was devoted to analyzing the Federal Energy Regulatory Commission's Notice of Proposed Rulemaking for the natural gas transportation industry. This served to underline the important role natural gas plays for residential and industrial consumers.

Nowhere in this Nation are we more cognizant of the diverse contribution natural gas can make to energy and environmental efficiency than in my home State of Rhode Island. Mr. Edward Burke, the Rhode Island Public Utility Commission chairman, in a speech before the American Gas Association seminar, summarized the aggressive manner in which Rhode Island is continuing to exploit the advantages provided by natural gas.

I share Mr. Burke's enthusiasm about the new natural gas technologies, such as combined cycle, cogeneration, and natural gas air conditioning, which provide opportunities for improved energy cost efficiency and a cleaner environment. Natural gas emits virtually no pollutants thought to contribute to this Nation's acid rain problem. The select use of natural gas holds great potential for significantly reducing sulfur dioxide emissions in a cost-efficient and timely manner.

Chairman Burke's comments give us much to think about. I ask that it be printed in the RECORD.

The article follows:

THE FERC FINAL RULE: A STATE COMMISSION'S PERSPECTIVE

(Remarks by Chairman Edward F. Burke, Rhode Island Public Utilities Commission)

To be the last speaker, at the end of this information-packed day, is either a great privilege or the final sally in a "Let's Get Burke" campaign. I won't try to decide which, but will assure you that I intend to provide only a short rousing march to finish off this symphony, and will not attempt to reorchestrate all the various themes on which you have heard so many variations today.

My role is to provide the viewpoint of the state regulator to the FERC final rule. I should promptly say that I provide, of course, only my own view. A Kansas regulator will certainly have a very different perspective. My New England colleagues may share my opinions, but if they have commented on the rule, I have not seen their comments.

The Rhode Island Commission did send a statement to the FERC in July, summarizing our reaction to the NOPR to the extent we were able to analyze the proposed rules in the brief time span the FERC allows. We

expressed general support of the thrust of the proposed new regulations and agreed that change was needed to provide an efficient means of transmitting signals to and from producers and customers in order to properly match gas supply and demand and allocate this resource efficiently. We said that we expected, as a result of new rules, some redirection of the pipeline gas supply to our high-value winter-heating market, and that we also hoped to improve the load factor of the Rhode Island distribution companies to meet the needs of industrial customers and bring down the rates of all customers. Our comments were supportive—with some caution—of all four parts of FERC's proposals, including the now postponed block pricing system which I note our Providence "Journal" editorial staff opposes. We'll have to have a chat with them. Unlike the "Journal" I feel that a supply problem is not a necessary consequence of block billing as more opportunity is provided independent producers with the lifting of take or pay provisions. More volumes will move, and more drilling will follow. Meanwhile, existing markets, including our heating customers, will be protected.

What I want to leave you with today is not a rehash of each portion of rule but an optimistic, upbeat view of the future of natural gas in New England IF—a big IF—our distribution companies and our state regulations can and do take advantage of the new framework which the FERC has created.

The new rule is simply a continuation of what FERC has been doing in individual rate decisions in recent years. When the gas supply was tight, FERC increased the commodity charge in relation to the demand charge, thus reducing the attractiveness of gas, especially for the high-volume summer user. When the provisions of the NGPA worked to greatly increase the amount of gas available, FERC began to reverse the process and redesign rates to increase the demand charge and decrease the commodity rate so that more gas could move. The object is to increase the annual throughput and keep the pipes loaded all year round.

What are the implications of this philosophy to ratemaking? In my view, it makes our job easier. As a regulator, my goal is LEAST COST ENERGY (given the usual imperatives of reliability and diversity). Historically, distributors have paid about the same commodity cost year round. We move now to a pricing scheme that will more closely emulate a free market, with constraints based on cost of service. Flexible pricing will mean that for the first time it will be considerably cheaper to bring in gas in July. The cost of wellhead gas will be lower in the summer and the transportation rate can be brought down as well. Distribution companies, and indeed any buyer, will have access to wellhead gas and will be able to buy gas on the spot market. Immediately we see the possibility for far better, more efficient utilization of pipeline capacity and the distributor's facilities than ever before in the northeast.

Regulators talk about and worry about capacity for the electric utilities all the time—too much, too little, forecasting difficulties, and expensive marginal costs that, as capacity shortages develop, will drive the price of electricity much higher than at present everywhere in the country. We have not paid nearly as much attention to capacity considerations in the gas utilities because there has not been sufficient pipelines gas priced to develop a large dual fuel industrial market here to utilize available pipeline capacity in non peak periods. The load factor for our largest gas distributors is typical: firm customers use seven times the amount of gas on a peak day than in the summer—150 million cubic feet per day in winter, 15 million cubic feet per day in summer. A horrendous ratio for economic efficiency. Now the changed situation relative to supply and the new FERC rule have provided unprecedented opportunities for strong marketing programs to utilize available capacity efficiently. We regulators will be expecting our utilities to develop these programs.

We are excited about the potential. Years ago, early in the energy crisis, the New England Energy Congress recommended increasing New England's use of natural gas from the—at that time—9% of the region's energy supply to as much as 25%. The compelling rationale was to reduce dependence on expensive and uncertain supplies of foreign oil. Our Rhode Island Commission and Energy Coordinating Council (the state energy policy-making body) were fully supportive of increased reliance on natural gas for the same reason. But when supplies of pipeline gas were limited in the winter heating season so that increased demand meant increased use of supplemental supplies, our enthusiasm was tempered by the realization that in peak periods more gas use meant higher per mcf costs. The Rhode Island Commission has supported—and in one case ordered—pilot conservation programs to ensure that available volumes are used efficiently and not inefficiently and to measure the effects of various conservation increases on peak demand.

With increased supplies, however, both domestic and Canadian, and FERC's new regulations, we see the opportunity for a whole new growth market for gas which will bring down gas costs for everyone. Gas air conditioning and gas fired cogeneration are new options with tremendous advantages. A large cogenerator with dual fuel capacity can switch over to oil during peak periods, allowing residential customers the use of his pipeline gas supply instead of supplementals. The distribution company which buys large quantities of gas for these large customers has better leverage with producers and pipelines for all its gas purchases. Everybody is happy—the distributor who sells more and the customer who pays less. The beauty part for the regulator who is looking at the total energy picture is that gas marginal costs are going down at the same time that electricity marginal costs, with ensuing capacity shortages, are going up. The customer with the gas air conditioner, who is helping reduce gas costs, takes the pressure off the electric company's summer peak load, thus reducing the need to add electrical generating capacity. Best of all, is the prospect of 100% use of the gas system capacity every day of the year to the customer for whom the gas has the highest value—the ultimate in economic efficiency.

Where are the drawbacks? There are plenty, but with careful attention I believe we can avoid the kinds of problems which could otherwise mar this rosy picture. Small distribution companies should not be cast adrift but should be helped in the transition to the new, more volatile market. By banding together and functioning on a cooperative basis, they may be able to equal the sophistication of and capture the same benefits as larger companies. Regulators must be extremely alert to the problem of distributor bypass. It makes no economic sense to duplicate existing facilities. Bypass requires laying new pipe to the industrial customer and laying the costs of the existing pipe or the captured residential customer—clearly a disadvantageous situation all around. So gas costs to the potential bypasser must be set at a rate which will still provide a positive contribution to margin but will discourage or preclude his moving off the system. I understand that the New England Energy Group will soon be proposing a transportation tariff in Massachusetts and then Rhode Island which will allow industrial and other large gas users to purchase gas directly and utilize the pipeline with a separate tariff. We are most interested in this concept and will analyze it closely.

To our gas companies, we say we want to see you sell a lot of gas and sell it efficiently. We expect residential conservation programs and we also expect aggressive marketing to off peak customers. For our part, we will try to work with you to set rates that make sense in the new competitive environment.

It's a new world for all of us, and those who wake up and smell the coffee, at least in our part of the world, are going to find it a good new world indeed.

I must conclude by sharing with you some of the exitement that we in Rhode Island feel about the prospective new combined cycle Canadian gas-fired electric generating plant planned for Burrillville, Rhode Island. We have been such strong supporters of the Canadian option in both gas and electricity that it is with particular satisfaction that we look forward to this innovative project.

A waiver of the Fuel Use Act is necessary to make this project go, and while we do not expect this to be a stumbling block, it illustrates yet again the inappropriateness of this piece of legislation to today's conditions. The Rhode Island Energy Coordinating Council and the New England Conference of Public Utilities Commissioners have both called for repeal of the Fuel Use Act, and we hope and expect that the National Association of Regulatory Utility Commissioners will do the same at the annual conference next month.

I would love to talk about this new project further in the question period, but I want to take one other minute now to tell you another bit of gas-related news in Rhode Island—the planned conversion of New England Power Company's 145 megawatt South Street electrical generating plant to dual fuel capacity. The new availability of domestic gas supplies at reasonable price augur well for this project and will help reduce the bills of the electric company's customers and the customers of Providence Gas. It is a win-win situation, which is how we like them in Rhode Island. Bring us more—we promise understanding and cooperation with your efforts to make the late 1980's and 90's the best we've ever had.●

MR. MEESE AND A JURISPRUDENCE OF ORIGINAL INTENTION

● Mr. GOLDWATER. Mr. President, the Attorney General of the United States, Mr. Edwin Meese III, has made at least four important speeches this year in which he has attempted to breathe fresh life into the original concepts of the framers of the Constitution, particularly relative to the principles of limited governmental powers and federalism.

Mr. Meese has urged the U.S. Supreme Court to follow a constitutional jurisprudence of original intention. What the Attorney General seems to be asking the Court to do is no more than is inscribed on the National Archives Building: "Study the Past. What Is Past Is Prologue."

For doing this, Mr. Meese has been unfairly attacked by legal activists who fear any challenge to their favored practice of making constitutional doctrine by fiat. His speeches have been denounced, distorted, and dismissed as irrelevant. And, all this happened before most of his critics even read the speeches. I say this because it is obvious none of those who are carping the loudest have seen the outstanding Constitution Day address in which the Attorney General expounded the Civil War amendments and condemned the infamous Dred Scott case.

But let me return to the basic question posed by Mr. Meese: Is the "jurisprudence of original intention" a correct guide to the proper role of the courts? My answer, Mr. President, is, "yes."

With due regard for the denials of two sitting Justices, the original meaning of the Constitution is there for those who are willing to look for it. It may be distilled not only from the text itself, but also from records of the times indicating the sense of the framers who proposed it; or, as James Madison suggested, from "the voice of the people, speaking through the several State conventions * * * which accepted and ratified the Constitution"; or, as the Supreme Court itself has adopted in several cases, from the Constitution fixed by years of "practice and acquiescence under it."

For example, while the separation of powers is not spelled out by name in the Constitution, it permeates the document like the air we breathe. It is visible in the structure and organization of the Constitution and in the way functions and powers were distributed by the framers.

It is also true that certain words and phrases take on meaning only by judicial interpretation or historical practice. "Due process" is an obvious example. Fortunately, we have centuries of English-American heritage from Magna Carta to the 5th and 14th amendments, which lead us to certain fundamental answers.

In comparison, the words "necessary and proper" may seem clear enough. Yet, it was John Marshall, one of the original patriots, who served with General Washington at Valley Forge and argued for the Constitution at the Virginia Ratification Convention, who forever set the doctrine that "necessary" does not mean "essential" or "indispensable," as the dictionary defines it, but only "appropriate." "Proper" does not mean "clearly authorized" or "specifically enumerated," but only that the end is "not prohibited." Judicial activism did not begin with the Warren court.

No one is saying that consitutional interpretation is a simplistic exercise. The Constitution is not a lifeless document. It cannot be left to stagnate in the limitations of human experience and knowledge of those who lived 200 years ago. If the Constitution were to be literally tied to the text and the 18th century, the United States could not today possess an air force. The text mentions solely the "armies" and "navy." But we know the framers presupposed the survival of the Constitution and the preservation of the common defense upon which our freedom depends. It does no injury to the original intent to say that the Air Force is a constitutional branch of the Armed Forces.

The difference between a method of interpretation which accommodates and is consistent with the recognized principles of the Constitution, and the deliberate manipulation of the Constitution to suit the predilections of a 20th century judge is obvious. When John Marshall wrote that it is "the province and duty of the judicial department to say what the law is," he did not mean that judges have a license to make substantive constitutional rules and public policy at will.

The problem is that the Constitution by its nature cannot partake of the details of a legal code or compendium of laws, but must of necessity carry only the great outlines and objects of government and the important limitations of the powers granted in it. It is this character of the instrument which makes it susceptible to manipulation and revision in the hands of activist judges who have no sense of history.

In order to avoid an abuse of judicial discretion, the Attorney General has pointed the Court back to the original purpose of those who formed and adopted the Constitution. Anything less on the Court's part is a violation of the will of the people of America—from whom the Constitution stems, by whom the powers of Government were granted, and for whom those powers are to be exercised. For if judges can choose to deny or ignore the original design and first principles of the Constitution, then the rule of law and self Government have no meaning.

In this connection, a recent phenomenon, which was not discussed in Mr. Meese's earlier speeches, deserves closer attention. Trial courts are becoming increasingly immersed in the direct management and supervision of public institutions and services. They are reconstructing school districts, mental hospitals, prison systems, public housing authorities, and other public bodies.

The judicial role in these cases is not limited to telling parties what they legally can and cannot do, but rather is to prescribe a whole course of administrative conduct that is cumbersome to change and requires detailed Court supervision lasting several years. These Court decrees replace the authority of regulatory bodies and often provide for a reallotment of State revenues, normally a political decision.

The danger is that a court will become a partisan in the case and lose the detachment and neutrality required for public confidence in an independent judiciary. The potential impact of this development on the separation of powers is obvious.

Finally, the pursuit of original intention leads us to the principle of federalism. Here the need is to recognize the historic difficulty in reconciling a system of divided sovereignty in which two jurisdictions, each having a share in the supreme power of the people, are to exist and be compatible in the same nation.

As Bernard Bailyn has demonstrated in his Pulitzer Prize winning study of the origins of the American Revolution, the tradition of federalism was born in efforts to limit the supreme authority of parliament over independent minded colonial assemblies and has survived and remains today precisely because federalism is designed to keep the central government from amassing a concentration of power dangerous to the liberties of the people.

The task is a continuing one, never fully completed. What is important is that someone undertakes it. Far from attempting to create a new system of judicial methodology, the Attorney General is acting in the best traditions of American freedom when he seeks to build a stable system of Federal Government.●

MAINE VIETNAM VETERANS MEMORIAL

● Mr. MITCHELL. Mr. President, on October 20, I was honored to be able to participate in the dedication of the Maine Vietnam Veterans Memorial in Capitol Park in the city of Augusta.

About 2,000 people, including a great many of Maine's Vietnam-era veterans, attended the ceremony at which this most striking memorial was dedicated. The ceremony, like the memorial was simple, but elegant. Unpretentious but grand.

The Vietnam Veterans Leadership Program, under the able direction of Phil Vampatella, undertook the effort to build this memorial 2 years ago. This memorial, which was designed by Roger Richmond of Peakes Island, was made possible by a great many contributions large and small but a great many Maine citizens.

Their contributions were too numerous to mention at this time. But the

end result is a beautiful memorial to Maine's Vietnam-era veterans.

I ask that an editorial on the memorial that appeared in the Lewiston Journal be printed at this point in the RECORD.

The editorial follows:

[From the Lewiston Journal, Oct. 22, 1985]

VIETNAM VETS MEMORIAL

Congratulations are due the Vietnam Veterans' Leadership Program and all those others who contributed to the campaign which culminated Saturday under threatening sky with dedication of the Vietnam Veterans' Memorial at the Statehouse.

The memorial, a proper tribute to those who died in a far-away war their nation and its military made only a half-way effort to win—and to those who survived and returned without fanfare to a homeland which was divided in support of the warfare—and failed to publicly acknowledge their sacrifice—was surely long overdue.

That wrong has been rectified—in part at least.

Some of the thousands—including Vietnam veterans and members of their families, who attended the ceremony—described the solemn occasion as a "day of homecoming". It was that.

It was a day that most had been waiting for and appreciated. Wording on a sign near the memorial was appropriate.

It stated, simply: "For those who fought for it, freedom has a taste the protected will never know."

They are words which echo the sentiments of veterans of all of America's wars.

Only the combat soldier, sailor and Marine truly knows the horror of wartime. Only those who have been under fire know the fright.

Unsaid, but implicit in the ceremony was the clear message:

Our nation must never again send its youth to fight a war which it had no desire to win in a land which seems only vaguely, now, to have been in the interests of our nation.●

STEWART N. SMITH

● Mr. MITCHELL. Mr. President, on November 16, the State of Maine is going to lose the services of one of the most effective and talented government servants.

Stewart N. Smith, who serves with distinction as commissioner of agriculture, food, and rural resources, is resigning to accept the position of Henry Luce professor of agricultural production and society at the Tufts University School of Nutrition.

There is no question that Tufts University stands to gain greatly by the addition of Stew Smith to its faculty. I have come to count heavily on Stew's thoughts on issues relating to agriculture. His counsel is always well reasoned, intellectual, and sage.

Stew has been commissioner of agriculture for 6 years in the administration of Gov. Joseph E. Brennan. His tenure has been one of the great accomplishment, forward thinking, and strong leadership.

I ask that a column written by Commissioner Smith regarding his tenure as commissioner of agriculture in the publication Maine-ly Agriculture be printed in the RECORD at this point.

The column follows:

COMMISSIONER'S COMMENTS

(By Stewart N. Smith)

LOOKING BACK WITH AN EYE TO THE FUTURE

Six years ago I came home to Maine to join the administration of Governor Joseph E. Brennan as Commissioner of Agriculture. At that time, the Governor outlined his vision of an improved, more active Department of Agriculture; one better able to serve the changing needs of Maine's farmers and consumers. Now, having completed the task set before me, I am ready to move forward along my professional path to a career in academia.

I am resigning as Commissioner effective Nov. 16, to accept the position of Henry Luce Professor of Agricultural Production and Society at the Tufts University School of Nutrition. This position is an exciting one and represents an opportunity of great interest to me. I have been asked to create a new course of study on the social effects and implications of agricultural production.

During my six years as Commissioner, the Department has grown and changed in many significant respects. Our goal was to build an adaptable, performance-oriented Department of Agriculture that could respond to the current and future needs of Maine's farmers and also to encourage and support the rural culture that has been so important to this State since early times. This required a fundamental reorganization. What had been primarily a regulatory agency comprised of 17 autonomous units is now a unified whole. The focus has shifted from regulation to advocacy. As part of this evolution, we have developed and implemented over 40 new programs designed to enhance the long-term viability of our farm community. We also changed the name of the Department of Agriculture, adding "Food and Rural Resources", to reflect its expanded role. Throughout this sometimes difficult process, we were backed by the strong support of Governor Brennan.

While our redirection and new programs have significantly expanded and improved State support for agriculture, this has been accomplished without any increase in the total number of Department staff. We have been able to do this by the efficient restructuring of programs and because of the energetic dedication of our personnel. All this has resulted in a Maine agriculture and rural society that, although faced with challenge, has a much better opportunity to be strong and vigorous in the future.

Some examples:

We now have a market service program which collects, evaluates, and distributes essential market information to our farm constituency. There is a Potato Market Improvement Fund, which through a general obligation bond issue, provides a $5 million revolving loan program to upgrade potato storages and central packing sheds. A quality assurance program spot-checks the produce shipped from the State to ensure that it meets labeling and quality standards. Restructuring the Maine Blueberry Commission has led to a substantial increase in blueberry market promotion. Creation of the Milk Pool shared the benefits accruing to milk producers selling to the Maine market with all Maine dairy farmers, many of whom sell to the Boston market.

In the area of agricultural production we have helped some of our farmers reduce applications of chemical pesticides through an integrated Pest Management (IPM) program. We have vastly improved the potato seed program with rigorous standards including a limited generation "flush out" program which ensure that only good quality seed potatoes are planted, and a capital improvement program for our State Seed Farm which will provide for a constant upgrading of that important facility.

We have developed pesticides control programs that will help ensure that pesticides are properly used. We have upgraded the State's pesticide monitoring capability, our pesticide certification and training programs, and have introduced a program to collect and safely dispose of obsolete chemicals. We have also introduced exciting new programs in the area of resource management. Our agricultural energy program has resulted in farm audits that help producers reduce their energy consumption and costs. Our waste utilization program has resulted in the substitution of indigenous waste materials for chemical soil amendments. The Small Farm Management Program is helping farmers to manage their operations more efficiently and more profitably.

Looking into the future, the Department is, and will continue to be, very active in helping to meet the challenges and opportunities in store for Maine's agricultural community. Central to these efforts is the Agricultural Viability Program proposed by this Department and created by an act of Legislature in June of this year.

Through local lead agencies (ideally, the Soil and Water Conservation Districts) the Ag Viability Program will help ensure the future health of Maine agriculture in each region of the state. Beginning with an ongoing identification and evaluation of the particular programs and needs of producers in their districts, these lead agencies will report their findings to the Department. Based on these findings, the Department, working with the local agencies, will develop proposals to redirect its own resources and encourage other State and Federal agencies to address these clearly defined local needs. This program will help Maine's farmers to respond quickly, accurately and effectively to changing economic and marketplace conditions.

Closely associated with the Ag Viability Program is another recently approved program, the Technology Transfer Program.

The Technology Transfer Program is designed to speed the discovery, evaluation and adoption of new agricultural technology. By supporting research and demonstration projects, this program will encourage our farmers to experiment with new, possibly valuable, technologies and quickly implement those that prove to be successful.

The Department has just completed the development and testing of a new small farm management course. The curriculum will be made available to a number of educational organizations and will make efficient farm management techniques available to farmers throughout the State. A comprehensive Farm Management Assistance Program is a very desirable goal given this most promising beginning.

Certainly, there remain many untapped resources and many unexplored approaches to the never ending need for new ways in which the Department can promote and assist Maine's agricultural community. My successor will find a Department much better adapted to meeting the needs of Maine agriculture in the changing times ahead.●

WOMEN'S ACTION FOR NUCLEAR DISARMAMENT

● Mr. RIEGLE. Mr. President, the Washtenaw County Women's Action for Nuclear Disarmament, Inc. [WAND] forwarded me a copy of a petition they submitted to President Reagan. Signed by more than 5,000 individuals from around the country, this petiton calls on the President to take concrete steps to reduce the threat of nuclear war.

I strongly support the efforts of this Ann Arbor-based group to educate Americans about the terrible effects of a nuclear war. Let us take to heart their motto: "Children Ask the World of Us," and, in the spirit of the upcoming United States-Soviet summit, reflect upon the responsibility we have to ensure that the world we now enjoy is preserved for future generations.

Mr. President, I ask that the text of WAND's letter to the President be printed in the RECORD.

The letter follows:

WASHTENAW COUNTY WOMEN'S ACTION FOR NUCLEAR DISARMAMENT, INC.,
Ann Arbor, MI, October 5, 1985.

President RONALD REAGAN,
The White House,
Washington, D.C.

DEAR PRESIDENT REAGAN: These petitions were signed as a gesture of hope and extreme concern. They were circulated by the Washtenaw County chapter of the national organization of WAND, Women's Action for Nuclear Disarmament. Our group is made up of several hundred people, mainly women with children, all of us united in our concern for the lives of our children and the future of their world. Most are not what we could have called radicals in the 60's: Many have never done anything "political" in their lives until they found WAND and realized many people were sharing their fears.

Over the course of two and a half months more than 5,000 people signed this petition to send to you. People of all ages signed and, since Ann Arbor is a place where visitors come from all over, people from all over the country signed. We decided to make this a brief project. Otherwise we could have collected many thousands of signatures, but we felt the message would be the same either way. Almost everyone who was asked was very eager to sign. In addition, our children made a wonderful 40-foot long illustrated petition of their own. They are extremely concerned about nuclear war and wanted you to know. We can't bear to part with the banner but plan to make a book of photgraphs based on their drawings and will send you a copy when it is done.

Our group is fairly new and we have found that many people just do not realize the threat to us all that is posed by nuclear weapons. No one would be unaffected in a nuclear war, no one would be safe. Our food, our atmosphere, our way of life would not survive. Many millions would be killed. These are facts which we believe all Americans should understand and we feel our leaders should be the ones to explain them to us. It is so easy to listen to comforting messages, and so very dangerous. We will lull ourselves right into oblivion!

You have the most important job that any American president has ever had, and that is to save our planet. When you and Secretary General Gorbachev meet in November, we pray that your meeting will be the beginning of some concrete steps to reduce and finally eliminate nuclear weapons. We now have enough to destroy life on earth 67 times over. Just one Trident submarine has the firepower of 6 World War IIs. We don't need any more submarines or any more nuclear weapons.

WAND's motto is "Children Ask the World of Us". This world is shared by all of us, ours to use for as long as we are here, entrusted to our care to preserve for future generations. It is not ours to destroy just as life is not ours to destroy. We think again and again about our children, children of people we love, ALL those children who did not choose to be born into a world of nuclear weapons. American and Russian, man and woman, we must do what we can for them and for ourselves or we will surely all perish together.

We have sent copies of these petitions to our senators, Senator Riegle and Senator Levin, and our representative, Congressman Pursell. We have asked them to mention them in the Congressional Record. We have also contacted the press in Ann Arbor and Detroit so that people will know that in a very short time a group of Ann Arbor women collected the names of 5,000 people who whole-heartedly desire an end to our nuclear buildup. There are millions of people in our country who feel the same way. They vote, they raise families, they have not forgotten that President CAN affect history in a positive way by doing courageous things.

We look to you to do this for all of us.

Respectfully,
SHARRON SINGLETON,
President, Washtenaw County WAND.
SUSAN ELSE WYMAN,
Chairperson, Petition Campaign.●

MAKING BETTER USE OF OUR NATIONAL LABS

● Mr. RIEGLE. Mr. President, I should like to call my colleagues' attention to an article in High Technology magazine by Herb Brody, entitled "National Labs at Your Service."

This Nation's high standard of living depends in large part on our scientific and technological edge in international competition. The superiority of our high-technology industry is important not only to our exports of high-technology goods but also to the competitiveness of our basic industries.

This article highlights the contributions that Federal labs are making to the national wealth, and describes new policies that are helping the national labs contribute even more to our technological competitiveness in the years ahead.

The Federal Government spends nearly $18 billion annually on a wide array of advanced research projects across the country. But until a few years ago, restrictive patent and personnel policies discouraged national lab personnel from pursuing marketable research and often prohibited consulting with U.S. private firms. As a result, less than 5 percent of the patents granted to scientists in Federal labs were brought to commercial markets.

In recent years Congress has acted to help America get more of our money's worth from the national labs, beginning with the Bayh-Dole Act and the Stevenson-Wydler Innovation Act of 1980. The intense challenge of international competition makes advanced research and development ever more vital to the United States' long-term interests. By enabling Federal scientists to work more closely with the private sector, we can make limited Federal expenditures more productive.

The Federal labs have joined in public-private partnerships that have already helped import-afflicted industries. This new commitment to technology transfer has been of particular benefit to small start-up firms, which are the most innovative elements of our economy. Through these efforts, the Government can help create new opportunities and help improve the working of the market. I hope my colleagues will join me in applauding these new ventures as examples of Government policy at its best.

Mr. President, I ask that the text of the article be printed at this point in the RECORD.

The article follows:

NATIONAL LABS, AT YOUR SERVICE
(By Herb Brody)

Closer collaboration with the private sector is helping to spawn new firms and shore up tired industries.

Forty years ago, World War II came to an end with the use of a terrifying piece of technology from new, top-secret government laboratories. Those facilities, at Oak Ridge, Tenn., Los Alamos, N.M., and a few other sites, have since grown into multipurpose "national labs" that perform wide-ranging, R&D. While nuclear weapons still constitute much of their work, these labs are increasingly being enlisted to fight civilian battles. During the '70s the enemies were pollution and the energy shortage. The lastest crusade: moving lab technology into the private sector to help restore the country's industrial competitiveness.

The battle is being waged on several fronts. Patent policies, commonly cited as a major hindrance to commercialization of government technology, are loosening up. The labs now welcome private sponsorship for proprietary product development. A new exchange program lets companies send their technical people to work shoulder to shoulder with their colleagues at national labs, while the government picks up much of the tab. The labs are also being enlisted to apply their resources to aid struggling basic industries, like steel.

Until recently, the government took the position that the fruits of publicly funded R&D should be available equally to everyone. Thus any patent awarded for work at the labs became government property; the government then offered licenses to all interested U.S. companies for a small fee.

But these nonexclusive licenses discourage commercialization. Because the technology produced by the labs is unrefined—typically 90% of product development remains to be done when the government ceases its work—

it makes little sense for a company to embark on an expensive, risky product development effort using technology freely available to its competitors. Firms are "reluctant to invest the millions of dollars required to fine-tune inventions without the guarantee that a competitor could be precluded from receiving its own government license," explains Jon Soderstrom, director of research and technology applications at Oak Ridge National Laboratory.

As a result, "for decades, what we did here didn't matter very much" to the industrial world, says William Carpenter, vice-president for technology applications at Martin Marietta Energy Systems, which operates Oak Ridge for the Department of Energy (DOE). Technology that's available freely to everyone is "of value to no one," he contends.

A wave of patent-policy changes began with the passage of the Bayh-Dole Act of 1980. This act allows small businesses or nonprofit organizations to retain title to inventions conceived during government-sponsored R&D. An amendment to the act, signed last fall, broadens the government's waiver of patent ownership. The new law states that nonprofit institutions (such as universities) that operate government labs under contract can retain title to inventions coming out of these labs. In addition, former Energy Secretary Donald Hodel ordered last February that the patent waiver be extended to cover large, for-profit companies like Martin Marietta, but as of this writing the rule had not taken effect.

The attention recently given to patent policy symbolizes the new concern in Congress and the administration over getting our money's worth out of the national labs. Such concern first became prominent in the Stevenson-Wydler Technology Innovation Act of 1980. The law declares technology transfer to be an official mission of the labs and requires that each lab spend 0.5% of its budget on moving the results of its R&D into industry.

Perhaps more galvanizing than the Stevenson-Wydler Act, however, was the sharply critical 1983 report on the labs by a presidential commission. The panel, chaired by Hewlett-Packard co-founder David Packard, urged greatly increased interaction between government labs and industry in order to make the labs "more responsive to national needs." It accused the labs of working without clear purpose, and therefore contributing insufficiently to the national good. The Packard panel recommended that the size of each lab be "allowed to increase or decrease (to zero if necessary) depending on mission requirements," adding that "preservation of the laboratory is *not* a mission."

A direct outgrowth of the report, and a striking example of how the labs can be channeled to industry's service, is the "steel initiative." The plan is to use the potent scientific and engineering talents of the national labs to perform basic research that the ailing steel companies cannot fund themselves.

Because of financial hardships, steel company R&D is "typically geared for results in six months to a year," explains John Roberts, associate director of Argonne National Laboratory (Argonne, Ill.), which will do much of the work. The companies recognize the magnitude of their plight. The steel initiative will look 10-15 years into the future, says Roberts; it is to be a collaborative project in which steel companies like U.S. Steel, Bethlehem, National, Armco, the LTV will send their scientists to work in teams with the lab scientists to solve problems jointly agreed upon. "Incremental improvements aren't enough" to restore the industry's badly eroded competitive position, says Reginald Dietz, vice-president for research at National Steel (Weirton, W.V.). "We're going after 'leapfrog' technology that will put us a couple of steps ahead." The labs will work not in proprietary projects but on generic technologies that the entire industry should share.

One thrust of the program will be to find new ways to convert iron ore into liquid metal, bypassing the expensive coking ovens and blast furnaces now used. Another focus will be on casting the liquid metal into pieces close to the dimensions of the final product. One possibility is to use powerful, precisely shaped magnetic fields to confine the molten metal so it can be cast into thin sheets, obviating the need for strip mills to flatten thick billets. The technology loosely resembles that being developed to confine hot hydrogen gas for controlled nuclear fusion. Oak Ridge, which has a long-standing program in fusion, will contribute its magnet expertise to the problem of casting steel.

Shortly after the steel initiative was organized, George A. Keyworth II, Reagan's science advisor, asked the national labs to identify other industries that might benefit from a similar effort. The result was a proposed project for applied research on off-road machinery. In March, Argonne met with several manufacturers to determine which technical issues were appropriate for cooperative action. The resulting list included advanced engines, electronic controls, and continuously variable transmissions. The lab hopes to begin work in fiscal 1987.

Unlike the steel initiative, the off-road equipment project will aim to develop specific products rather than basic technology. To make this work, the labs will have the liberty—unusual for the government—to keep proprietary secrets. "We won't have to tell Deere what we're doing with Caterpillar," says Argonne's director of technology transfer, Brian Frost.

Increasingly, the national labs are becoming spawning grounds for technology-based start-ups. From Oak Ridge's inception during World War II until 1980, about 20 companies started up with technology developed at the lab, according to technology transfer manager Donald Jared; in the following four years, he says, there were more than 30 such spinoffs.

Some of these new companies are formed under arrangements that would have been unheard of a short time ago. Perhaps the most dramatic example comes from Los Alamos. Scientists there developed a way to identify viruses and bacteria in minutes, rather than the days or weeks needed with existing methods. A laser illuminates the sample with a beam that alternates between two kinds of polarization, and a detector senses the difference in how one polarization is scattered relative to the other. This difference, it turns out, correlates with certain features of the specimen's DNA molecule.

The procedure was invented at Los Alamos in a project funded by the National Institutes of Health. NIH had no interest in commercialization, though, and ceased its support while the device was still far from market readiness. The lab began looking for companies to acquire the technology. When David Silver, a Chicago venture capitalist, came to Los Alamos in 1983 in search of technologies ripe for commercial exploitation, the rapid analyzer stood out.

Silver raised $8.5 million through an R&D limited partnership with Prudential-Bache Securities (New York) and gave half the money to the lab to develop a commercial prototype. The partnership (a tax shelter to encourage investment in technology) acquired full ownership of the technology and then granted an exclusive license to a new company, Mesa Diagnostics (Los Alamos). Mesa is wholly owned by Silver's venture capital firm, the Santa Fe Private Equity Fund.

It is a curious reversal of conventional practice, with the big government lab working for the small company instead of the other way around. The partnership pays the lab for use of its staff during regular hours and hires lab scientists as consultants after hours. "It's cheaper than hiring our own staff," says John Lonergan, Mesa's chief financial officer and vice-president for marketing.

It took two years to put the radical deal together, according to Eugene Stark, the lab's industrial liasion officer. The main hang-up was the patent. DOE has to waive its title to the University of California (which operates the lab), and then the university had to waive its title to Silver's partnership. Eventually, 11 contracts were needed to cement the agreement, according to Silver.

While the Mesa deal is unusual in its magnitude, it is one of a growing number of cases in which a small company is launched with national lab technology that would have been available under old policies. For example, Kelsius (San Carlos, Cal.) bought into the sensor business with an exclusive license to the technology of remote fiber fluorimetry developed at Lawrence Livermore National Lab.

The sensor consists of an optical fiber whose tip is coated with a material that glows in the presence of certain other compounds. The light, which varies in brightness with the concentration of the substance being sensed, travels down the fiber to a detector. Kelsius plans to use the technique in a blood-gas monitor; a fiber will be inserted into the bloodstream, and the fluorescence will indicate, the levels of oxygen, carbon dioxide, and pH, says president Jay Schwalde.

Radtech (Albuquerque), a Los Alamos spinoff, is developing systems that use radio-frequency electrical current to heat and thus reshape the cornea, correcting visual defects. The company aims for a one-hour outpatient procedure that is simpler, cheaper, and less risky than the present surgical alternatives.

Consulting by lab staff is another important way to get know-how into industry. In the past, the national labs had discouraged—or prohibited—scientists from marketing the expertise they gained from government work. This restriction made it difficult, if not impossible, for would-be entrepreneurs to use laboratory scientists' skills. But more liberal policies have permitted the start-up of firms like Atom Sciences (Oak Ridge). The company aims to commercialize an ultrasensitive measurement system that uses precisely tuned lasers to ionize and then count that atoms in gaseous or solid samples. As little as 0.1 part per billion is detectable, and the system works on any element for which proper laser wavelengths are available, says cofounder Hal Schmidt.

The laser technique was invented several years ago by Oak Ridge scientist Samuel Hurst. While remaining on the lab staff, Hurst has been permitted to become a co-

founder and vice-president of Atom Sciences, as well as a consultant to the firm—all capacities that had been off limits for lab staff. "There aren't a lot of barriers now" to such involvement, says Schmidt, recalling the stiff opposition he met in 1960 when he and colleagues started Ortec, a maker of nuclear particle detectors. Hurst concurs: "There is no longer a perception that the entrepreneurial process is a conflict of interest."

The labs are also more willing now to grant leaves of absence. Amtech, for example, was started locally by five scientists on two-years leaves from the Los Alamos lab. The company has acquired a remote identification-tag technology that the lab had developed for the Department of Agriculture. The tags are read from a distance by microwaves; and electronic circuit in the tag alters the reflected microwave beam in an easily detected way. DOA's goal was a label for diseased cattle that would keep them out of the slaughterhouse. But the principal application Amtech sees, according to R&D vice-president Jerry Landt, is keeping tabs on the contents of railroad cars—for example, making sure that all the cars in a single-commodity "unit train" stay together.

Although each national lab is changing, none has pursued technology transfer as aggressively over the past year as Oak Ridge. The sprawling facility at the edge of the Smoky Mountains in eastern Tennessee is setting the pace for the others in the national lab archipelago. This leadership dates from April 1984, when the contract for running Oak Ridge went from Union Carbide to Martin Marietta; the aerospace company beat out competitors Rockwell and Westinghouse with a bid that heavily emphasized industrial participation and strengthening the local economy.

"We proposed doing business in a new and different way," says Carpenter at Martin Marietta Energy Systems, the subsidiary formed to handle the lab contract. For example, Martin Marietta has asked DOE for ownership of all patents the company deems to be of commercial potential—an "advance waiver of title" that would let Martin Marietta act with autonomy. As owner of the technologies devised at Oak Ridge, the company would grant other firms exclusive licenses to bring the inventions to market. Although DOE has not yet granted this waiver, Martin Marietta has begun negotiating license agreements with other companies in anticipation. "When the word comes, we'll be ready to go," says Carpenter. "We expect to have some home runs."

Martin Marietta also strongly encourages the Oak Ridge technical staff to serve as consultants—to "get our smarts out into the private sector," as Carpenter puts it. In contrast, Union Carbide had put a ceiling on how much a lab scientist was allowed to earn on the outside; some other national labs, particularly Sandia, continue to enforce tight restrictions on off-hours consulting.

In another shift, Oak Ridge now welcomes private sponsorship of proprietary R&D. A number of companies, including Cabot (Boston), Homogeneous Metals (Clayville, N.Y.), and Universal Cyclops (Bridgeville, Pa.), are paying the lab to develop a new class of alloys with a unique property. Unlike most metals, which get weaker as they heat up, these "ordered intermetallic alloys," such as nickel aluminides, get stronger. This property is especially useful for engines, which operate most efficiently at higher temperatures. Present nickel aluminides are barred from structural use by their brittleness. Oak Ridge is working on ways to increase ductility and has obtained dramatic improvements by adding small amounts of other materials, such as boron.

Martin Marietta has also made a significant commitment to accelerating the growth of the local economy, having allocated 10% of its annual contract fee (for running the lab) to launching new companies. (The fee ranges from $5 million to $20 million, depending on Martin Marietta's performance.) In addition, the company has promised to build a 290-acre industrial park near the lab. The first tenant will be the Tennessee Innovation Center, a new subsidiary that will invest in and "incubate" high tech start-ups. The center is co-owned by Tran Tech Systems (Salt Lake City), which runs the similar Utah Innovation Center.

The Tennessee Innovation Center, a for-profit organization, identifies promising technologies at the national lab and "does everything necessary to make them commercially successful," says vice-president, Melvin E. Koons. The center makes equity investments, typically of $50,000–$150,000, for start-ups that satisfy several key requirements—a product or service on the cutting edge of technology, potential for generating revenues of $7–10 million in 5–8 years, and a promise to locate in Oak Ridge.

The center tries to find commercial uses for inventions geared to specific government purposes. It turns out that the glass has some unusual properties that allow it to be poured as a liquid into precisely shaped molds. An exciting possibility is the direct casting of lenses, eliminating much of the expensive grinding and polishing needed for ordinary glass. The center hopes to invest in a start-up to explore further the material's commercial potential.

Despite all these efforts to make the national laboratories more relevant to industry, the labs are still largely cut off from industry scientists. DOE is seeking to remedy this isolation wiht a new lab/industry exchange program. Technical staff from interested companies—U.S. or foreign—will be able to spend a year working at a national lab, with the government paying part of their salaries and expenses. The program's $600,000 budget for this fiscal year should pay for 20–30 scientists, says Richard Stephens, director of university and industry programs in DOE's energy research office.

But whose agenda will the visiting scientist follow—the company's or the lab's? Stephens emphasizes that work should benefit both. "We don't want simply to augment a company's R&D," he says. "there should be a mutual interest."

The new industrial orientation of the national labs is not without its critics. The fostering of spinoff companies, for example, is seen by some as a potential distraction. Examples like Mesa Diagnostics at Los Alamos could tempt scientist to "think more of possible commercialization than of the value of their work to the government," says Everet Beckner, vice-president for energy programs at Sandia Corp., the AT&T subsidiary that runs Sandia National Labs (Albuquerque).

For instance, an entrepreneurially minded scientist may devote less attention to work on classified projects because there is less potential for commercial spinoff, says Frank Huband, head of technology policy at the National Science Foundation. And he warns that a "Russian farm" mentality could arise at the labs. In the Soviet Union, farmers are permitted to work a small private lot for profit; but a frequent result is that the farmers focus their energy and ingenuity on making the private lot more productive, while giving only minimal attention to the collective land.

In addition, some argue that spinning off new companies is an inefficient way for a lab to help the economy. "People hear that small companies are the biggest job producers, which is true, and they twist that into the false notion that *start-ups* are the biggest job producers," says Robert P. Stromberg, manager of technology transfer at Sandia. Most new companies don't survive long enough to provide many jobs, he says. Not surprisingly, then, much of Sandia's technology transfer involves established firms, such as large oil and gas companies.

One effective way to exploit national lab R&D arose informally, well before the current programs were conceived, with the Federal Laboratory Consortium (FLC). Over 100 labs, including the eight national labs, belong to what chairman Eugene Stark of Los Alamos calls an "organized old-boy network." A company in need of technical information or assistance contacts one of four regional coordinators, who check to see whether any federal lab is working on the topic. Legislation now pending would make FLC an officially recognized (and funded) organization, probably as an arm of NSF. Such a move would be a boon to technology transfer because "the FLC guys won't have to spend all their time begging for money," says one congressional staffer.

Thanks to the new programs and FLC's persistent efforts, industry is catching on that the national labs have turned a new leaf. "Companies are realizing that it's worth bothering" to do business with the labs, says Sandia's Stromberg. For many years, says Stark at Los Alamos, the labs turned down more requests for visits from the Japenese than they received from U.S. companies. That's no longer true. And "the companies involved now," he says, "are skimming the cream."●

WEEKLY BUDGET SCOREKEEPING REPORT

● Mr. DOMENICI. Mr. President, I hereby submit to the Senate the budget scorekeeping report for the week of November 4, 1985, prepared by the Congressional Budget Office in response to section 5 of the first budget resolution for fiscal year 1986. This report also serves as the scorekeeping report for the purposes of section 311 of the Congressional Budget Act. I ask that the report be printed in the RECORD.

The report follows:

U.S. CONGRESS,
CONGRESSIONAL BUDGET OFFICE,
Washington, DC, November 12, 1985.

Hon. PETE V. DOMENICI,
Chairman, Committee on the Budget,
U.S. Senate, Washington, DC.

DEAR MR. CHAIRMAN: The attached report shows the effects of Congressional action on the budget for fiscal year 1986. The estimated totals of budget authority, outlays, and revenues are compared to the appropriate or recommended levels contained in the most recent buget resolution, S. Con. Res. 32. This report meets the requirements for Senate scorekeeping of Section 5 of S. Con. Res. 32 and is current through November 8, 1985. The report is submitted under Section

308(b) and in aid of Section 311(b) of the Congressional Budget Act.

Since my last report the Congress has cleared for the President's signature the Treasury-Postal Service Appropriations for 1986, H.R. 3036, changing budget authority and outlay estimates. This report also includes an allowance for the recently authorized three-percent pay raise for military personnel.

With best wishes,

Sincerely,

RUDOLPH G. PENNER.

CBO WEEKLY SCOREKEEPING REPORT FOR THE U.S. SENATE, 99TH CONGRESS, 1ST SESSION, AS OF NOVEMBER 8, 1985

[Fiscal year 1986—in billions of dollars]

	Budget authority	Outlays	Revenues	Debt subject to limit
Current level [1]	1,068.9	981.0	793.0	1,823.8
Budget resolution, Senate Concurrent Resolution 32	1,069.7	967.6	795.7	[2] 2,078.7
Current level is:				
Over resolution by		13.4		
Under resolution by	.8		2.7	255.0

[1] The current level represents the estimated revenue and direct spending effects (budget authority and outlays) of all legislation that Congress has enacted in this or previous sessions or sent to the President for his approval. In addition, estimates are included of the direct spending effects for all entitlement or other programs requiring annual appropriations under current law even though the appropriations have not been made. The current level excludes the revenue and direct spending effects of legislation that is in earlier stages of completion, such as reported from a Senate Committee or passed by the Senate. Thus, savings from reconciliation action assumed in Senate Concurrent Resolution 32 will not be included until Congress sends the legislation to the President for his approval. The current level of debt subject to limit reflects the latest U.S. Treasury information on public debt transactions.

[2] The current statutory debt limit is $1,823.8 billion.

FISCAL YEAR 1986, SUPPORTING DETAILS FOR CBO WEEKLY SCOREKEEPING REPORT, U.S. SENATE, 99TH CONGRESS, 1ST SESSION, AS OF NOVEMBER 8, 1985

[In millions of dollars]

	Budget authority	Outlays	Revenues
I. Enacted in previous sessions:			
Revenues			792,800
Permanent appropriations and trust funds	717,617	631,009	
Other appropriations		185,348	
Offsetting receipts	−162,006	−162,006	
Total enacted in previous sessions	555,610	654,351	792,800
II. Enacted this session:			
Famine relief and recovery in Africa (Public Law 99–10)		421	
Federal supplemental compensation phaseout (Public Law 99–15)			10
Appropriations for the MX missile (Public Law 99–18)		368	
Contemporaneous recordkeeping repeal bill (Public Law 99–44)			13
United States-Israel Free Trade Act (Public Law 99–47)			−8
Statue of Liberty—Ellis Island Coin Act (Public Law 99–61)	−15	31	
International Security and Development Cooperation Act (Public Law 99–83)	−25	−25	
Supplemental appropriations bill (Public Law 99–88)	36	3,138	

FISCAL YEAR 1986, SUPPORTING DETAILS FOR CBO WEEKLY SCOREKEEPING REPORT, U.S. SENATE, 99TH CONGRESS, 1ST SESSION, AS OF NOVEMBER 8, 1985—Continued

[In millions of dollars]

	Budget authority	Outlays	Revenues
State Department authorization (Public Law 99–93)			2
Emergency Extension Act of 1985 (Public Law 99–107)	−49	−230	210
Simplification of imputed interest rules (Public Law 99–121)			−31
Health professions educational assistance (Public Law 99–129)		−8	
Amendments—Special Defense Acquisition Fund (Public Law 99–139)	100		
Energy and water appropriations, 1986 (Public Law 99–141)	15,252	8,245	
Total enacted this session	15,299	11,939	195
III. Continuing resolution authority:			
Continuing appropriations, 1986 (Public Law 99–103)	506,634	325,180	
Offsetting receipts	−22,826	−22,826	
Total continuing resolution authority	483,808	302,354	
IV. Conference agreements ratified by both Houses:			
Legislative branch appropriations, 1986 (H.R. 2942)	1,599	1,385	
Department of Defense Authorization Act, 1986 (S. 1160)	280	−5	
Treasury-Postal Service appropriations, 1986 (H.R. 3036)	13,162	12,233	
Offsetting receipts	−4,407	−4,407	
Total conference agreements	10,634	9,206	
V. Entitlement authority and other mandatory items requiring further appropriation action:			
Payment to the CIA retirement fund	10	10	
Claims, defense	7	3	
Payment to the Foreign Service retirement trust fund [1]	(7)	(7)	
Range improvements	1		
BLM: Miscellaneous trust fund	(*)		
Payment to air carriers, DOT	18	17	
Retired pay—Coast Guard	21	19	
Maritime, Operating-differential subsidies		3	
BIA: Miscellaneous trust funds	(*)	(*)	
Higher education facilities loans and insurance	4		
Retirement pay for PHS officers	12	6	
Medicaid	1,617	1,285	
Payment to health care trust funds [1]	(1,011)	(1,011)	
Child nutrition programs	254	234	
Advances to unemployment trust fund [1]	(516)	(516)	
Special benefits (general retirement and Federal employee retirement)	48	48	
Black lung disability trust fund	85	85	
Assistance payments	573	573	
Veterans pensions	10		
Salaries of judges	3	1	
Payment to civil service retirement [1]	(214)	(214)	
National wildlife refuge fund	(*)	(*)	
General revenue sharing [1]	(1,142)	(1,142)	
Defense pay raise—military	925	897	
Total entitlements	3,588	3,181	
Total current level as of November 8, 1985	1,068,940	981,032	792,995
1986 budget resolution (S. Con. Res. 32)	1,069,700	967,600	795,700
Amount remaining:			
Over budget resolution		13,432	
Under budget resolution	760		2,705

[1] Interfund transactions do not add to budget totals.

[2] Less than $500 thousand.

Note: Numbers may not add due to rounding.

TRIBUTE TO DR. JACK STANZLER

● Mr. RIEGLE. Mr. President, I would like to bring to the attention of my colleagues the fact that Dr. Jack Stanzler, of my hometown of Flint, is to be honored by a gathering of friends and associates on Saturday, November 16, 1985.

Tribute is being paid to Dr. Stanzler in recognition of his outstanding contributions to the community, his efforts to promote brotherhood, and his advocacy for our young people and those who are less fortunate. Dr. Stanzler has actively crusaded in Flint and nationwide on police gun policies; he initiated and coordinated Flint Interfaith Alliance on Social Justice; and is responsible for organizing the Flint Youth Advocacy Board, under the auspices of the Urban Coalition of Flint. Despite a busy private practice, Dr. Stanzler always found time for his worthy causes. Dr. Stanzler will be leaving Flint soon to assume the position of citizens advocate in the Medicaid office of the Michigan Department of Social Services. He will be sorely missed by all in the Flint community and I want to take this opportunity to personally commend him for his dedication and fine work.●

ORDERS FOR WEDNESDAY

RECESS UNTIL 8:45 A.M.

Mr. DOLE. Mr. President, I ask unanimous consent that when the Senate completes its business today, it

stand in recess until 8:45 a.m. on Wednesday, November 13, 1985.

The PRESIDING OFFICER. Without objection, it is so ordered.

PERIOD FOR TRANSACTION OF ROUTINE MORNING BUSINESS

Mr. DOLE. Following the recognition of the two leaders under the standing order, I ask unanimous consent that there be a period for the transaction of routine morning business, not to exceed the hour of 9 a.m. with Senators permitted to speak therein for not more than 5 minutes each.

The PRESIDING OFFICER. Without objection, it is so ordered.

RESUMPTION OF CONSIDERATION OF H.R. 505

Mr. DOLE. Under a previous unanimous consent agreement, at 9 a.m., the Senate will resume consideration of the House message to accompany H.R. 505, Veteran's Health Care. Two amendments are pending to the motion to concur; therefore, votes will occur prior to the hour of 10 a.m., on Wednesday. If time permits following disposition of H.R. 505 and prior to 10 a.m., I ask that there be a period for the transaction of routine morning business, with Senators permitted to speak therein for not more than 5 minutes each, but not beyond the hour of 10 a.m.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. DOLE. I also indicate at this point that, as I stated last Thursday to the distinguished Senator from California, if there were some difficulty on this side with that unanimous-consent agreement, I hoped he would be able to accommodate any requests on this side. There may be one of my colleagues who has some problem with the agreement. In any event, we hope we can work it out tomorrow morning.

VOTE ON CLOTURE—H.R. 1562

Mr. DOLE. Mr. President, also by unanimous consent, at 10 a.m., the Senate will vote on cloture on H.R. 1562, the House textile bill. If three-fifths vote in the affirmative, then a Hollings-Thurmond amendment dealing with textiles will be offered, and 23 additional amendments will be in order to the Hollings-Thurmond amendment.

Therefore, rollcall votes can be expected throughout the day and evening. I hope that many of those amendments will not be offered. I have looked at the list. Many in effect duplicate one another so it is my hope we can conclude action on that bill fairly early tomorrow or late afternoon, then go back to reconciliation.

HAPPY BIRTHDAY TO SENATOR WILLIAM PROXMIRE

Mr. DOLE. Mr. President, one of the outstanding Members of this body recently marked an important milestone in his life—a 70th birthday. Therefore, the Senator from Kansas would like to salute Senator WILLIAM PROXMIRE by wishing him a happy birthday.

After watching him in the Senate during my 17 years here, I can testify that his abounding enthusiasm easily dispels any preconceptions about what can or cannot be accomplished after seven decades of life. If anyone deserves a "Golden Fleece Award," perhaps it should be Father Time, who has been left in the dust by the energetic senior Senator from Wisconsin.

Mr. President, WILLIAM PROXMIRE remains one of the enduring voices of this great deliberative body. His unyielding advocacy of causes and beliefs continue to be an inspiration to all of us.

As Senate majority leader, I wish, and my colleagues join me in wishing BILL many more birthdays.

Mr. BYRD. Mr. President, if the distinguished majority leader will yield, the psalmist has said:

> The days of our years are threescore years and ten; and if by reason of strength they be fourscore years, yet is their strength labour and sorrow; for it is soon cut off, and we fly away.

I join with the distinguished majority leader in congratulating Mr. PROXMIRE on having lived these 70 years and wishing him many happy returns of the day and many, many more happy birthdays. I am sure all his colleagues on both sides of the aisle join us in those good wishes.

Mr. DOLE. I thank the distinguished minority leader.

VETO MESSAGE ACCOMPANYING H.R. 2409

Mr. DOLE. Mr. President, I ask unanimous consent that the veto message accompanying H.R. 2409, an act to amend the Public Health Service Act to revise and extend the authorities under that act relating to the National Institutes of Health and National Research Institutes, and for other purposes, be spread upon the Journal and that no action be taken until the majority leader and the minority leader have had a consultation concerning an exact time. But I am prepared to advise the distinguished minority leader that it will be either later this week or sometime next week.

Mr. BYRD. Mr. President, reserving the right to object, I shall not object. This is very agreeable with me and others on this side, if we may have the assurance of the distinguished majority leader that indeed the message will be called up and voted upon.

Mr. DOLE. I may have been a little tight in the time. There is some question whether we want to act on this prior to November 22, but I can give the minority leader assurance that it will be called up. Members on both sides of the aisle want it called up, and we will work it out.

Mr. BYRD. With that assurance, Mr. President, I have no objection.

The PRESIDING OFFICER. Without objection, it is so ordered.

RECESS UNTIL 8:45 A.M. TOMORROW

Mr. DOLE. Mr. President, there being no further business to come before the Senate, I move that the Senate stand in recess until 8:45 a.m. on Wednesday, November 13, 1985.

The motion was agreed to, and at 5:31 p.m. the Senate recessed until tomorrow, Wednesday, November 13, 1985, at 8:45 a.m.

NOMINATIONS

Executive nominations received by the Senate November 12, 1985:

DEPARTMENT OF STATE

Rockwell Anthony Schnabel, of California, to be Ambassador Extraordinary and Plenipotentiary of the United States of America to the Republic of Finland.

NATIONAL INSTITUTE OF BUILDING SCIENCES

The following-named persons to be members of the Board of Directors of the National Institute of Building Sciences for terms expiring September 7, 1986:

Fred E. Hummel, of California, vice Herbert H. Swinburne, term expired.

Philip D. Winn, of Colorado, vice Rudard A. Jones, term expired.

IN THE AIR FORCE

The following officers for appointment in the U.S. Air Force under provisions of section 624, title 10 of the United States Code:

To be major general

Brig. Gen. Jimmie V. Adams, [redacted] FR, Regular Air Force.

Brig. Gen. Marcus A. Anderson, [redacted] FR, Regular Air Force.

Brig. Gen. James T. Callaghan, [redacted] FR, Regular Air Force.

Brig. Gen. James S. Cassity, Jr., [redacted] FR, Regular Air Force.

Brig. Gen. Donald L. Cromer, [redacted] FR, Regular Air Force.

Brig. Gen. Fredric F. Doppelt, [redacted] FR, Regular Air Force.

Brig. Gen. Robert F. Durkin, [redacted] FR, Regular Air Force.

Brig. Gen. Robert D. Eaglet, [redacted] FR, Regular Air Force.

Brig. Gen. George E. Ellis, [redacted] FR, Regular Air Force.

Brig. Gen. Richard F. Gillis, [redacted] FR, Regular Air Force.

Brig. Gen. Richard B. Goetze, Jr., [redacted] FR, Regular Air Force.

Brig. Gen. John E. Griffith, [redacted] FR, Regular Air Force.

Brig. Gen. Michael D. Hall, [redacted] FR, Regular Air Force.

Brig. Gen. William K. James, [redacted] FR, Regular Air Force.

Brig. Gen. Wayne O. Jefferson, Jr., [redacted] FR, Regular Air Force.

Brig. Gen. Peter T. Kempf, [redacted] FR, Regular Air Force.

Brig. Gen. Donald J. Kutyna, [redacted] FR, Regular Air Force.

Brig. Gen. Thomas A. LaPlante, [redacted] FR, Regular Air Force.

Brig. Gen. Donald A. Logeais, [redacted] FR, Regular Air Force.

Brig. Gen. Donald L. Marks, xxx-xx-xxxx [redacted]FR, Regular Air Force.

Brig. Gen. Paul H. Martin, xxx-xx-... xxx-... FR, Regular Air Force.

Brig. Gen. Robert P. McCoy, xxx-xx-... xxx-... FR, Regular Air Force.

Brig. Gen. Charles D. Metcalf, xxx-xx-... xxx-... FR, Regular Air Force.

Brig. Gen. Thomas R. Olsen, xxx-xx-... xxx-... FR, Regular Air Force.

Brig. Gen. Richard A. Pierson, xxx-xx-... xxx-... FR, Regular Air Force.

Brig. Gen. Cecil W. Powell, xxx-xx-... xxx-... FR, Regular Air Force.

Brig. Gen. Robert L. Rutherford, xxx-xx-... xxx-... FR, Regular Air Force.

Brig. Gen. Martin J. Ryan, Jr., xxx-xx-... xxx-... FR, Regular Air Force.

Brig. Gen. John C. Scheidt, Jr., xxx-xx-... xxx-... FR, Regular Air Force.

Brig. Gen. Alexander M. Sloan, xxx-xx-... [redacted]FR, Regular Air Force.

Brig. Gen. Richard J. Trzaskoma, xxx-xx-... [redacted]FR, Regular Air Force.

Brig. Gen. John H. Voorhees, xxx-xx-... [redacted]FR, Regular Air Force.

IN THE NAVY

The following-named officer, under the provisions of title 10, United States Code, section 601, to be reassigned to a position of importance and responsibility designated by the President under title 10, United States Code, section 601:

To be vice admiral

Vice Adm. Nils R. Thunman, xxx-xx-xxxx [redacted]/1120, U.S. Navy.

The following-named officer, under the provisions of title 10, United States Code, section 601, to be assigned to a position of importance and responsibility designated by the President under title 10, United States Code, section 601:

To be vice admiral

Rear Adm. Cecil J. Kempf, xxx-xx-xxxx [redacted]/1310, U.S. Navy.

The following-named officer, under the provisions of title 10, United States Code, section 601, to be assigned to a position of importance and responsibility designated by the President under title 10, United States Code, section 601:

To be vice admiral

Rear Adm. William E. Ramsey, xxx-xx-... xxx-.../1310, U.S. Navy.

IN THE AIR FORCE

The following officers for promotion to the grade indicated under the provisions of article II, section 2, clause 2, of the Constitution of the United States of America:

To be colonel

Lt. Col. Ronald J. Grabe, xxx-xx-xxxx [redacted]

To be lieutenant colonel

Maj. William A. Pailes, xxx-xx-xxxx [redacted]

IN THE MARINE CORPS

The following-named officer for promotion to the grade of lieutenant colonel under the provisions of article II, section 2, clause 2 of the Constitution of the United States of America:

Maj. David C. Hilmers, U.S. Marine Corps, xxx-xx-xxxx [redacted]/7583.

CONFIRMATION

Executive nomination confirmed by the Senate November 12, 1985:

DEPARTMENT OF JUSTICE

Charles J. Cooper, of Virginia, to be an Assistant Attorney General.

The above nomination was approved subject to the nominee's commitment to respond to requests to appear and testify before any duly constituted committee of the Senate.

HOUSE OF REPRESENTATIVES—*Tuesday, November 12, 1985*

The House met at 12 o'clock noon.

The Chaplain, Rev. James David Ford, D.D., offered the following prayer:

Bless all those people, O God, who see in what they do the opportunity for helping others. Whether in noble deeds of justice that involve the future of nations or in quiet acts of compassion that go unnoticed and are seen only by the few, we honor those who care for others. Encourage every person to understand that it is in giving and caring for others that we truly receive Your blessed gifts. Amen.

THE JOURNAL

The SPEAKER. The Chair has examined the Journal of the last day's proceedings and announces to the House his approval thereof.

Pursuant to clause 1, rule I, the Journal stands approved.

MESSAGE FROM THE SENATE

A message from the Senate by Mr. Sparrow, one of its clerks, announced that the Senate had passed with amendments in which the concurrence of the House is requested, bills of the House of the following titles:

H.R. 3067. An act making appropriations for the government of the District of Columbia and other activities chargeable in whole or in part against the revenues of said District for the fiscal year ending September 30, 1986, and for other purposes; and

H.R. 3327. An act making appropriations for military construction for the Department of Defense for the fiscal year ending September 30, 1986, and for other purposes.

The message also announced that the Senate insists upon its amendments to the bill (H.R. 3067) "An act making appropriations for the government of the District of Columbia and other activities chargeable in whole or in part against the revenues of said District for the fiscal year ending September 30, 1986, and for other purposes," requests a conference with the House on the disagreeing votes of the two Houses thereon, and appoints Mr. SPECTER, Mr. HATFIELD, Mr. MATTINGLY, Mr. DOMENICI, Mr. LAUTENBERG, Mr. STENNIS, and Mr. HARKIN to be the conferees on the part of the Senate.

The message also announced that the Senate insists upon its amendments to the bill (H.R. 3327) "An act making appropriations for military construction for the Department of Defense for the fiscal year ending September 30, 1986, and for other purposes," requests a conference with the House on the disagreeing votes of the two Houses thereon, and appoints Mr. MATTINGLY, Mr. LAXALT, Mr. GARN, Mr. HATFIELD, Mr. SASSER, Mr. INOUYE, and Mr. STENNIS to be the conferees on the part of the Senate.

RAILROAD RETIREMENT FUND

(Mr. FLORIO asked and was given permission to address the House for 1 minute.)

Mr. FLORIO. Mr. Speaker, on Thursday, my subcommittee will investigate recent allegations of illegal actions by the Department of the Treasury that may possibly jeopardize the future benefits of 1 million railroad retirees.

The Railroad Retirement Act states clearly that it is the Railroad Retirement Board which shall determine when securities held by the Railroad Retirement Fund shall be sold, and that they shall be sold only in an amount necessary to pay benefits.

Normally, the Department of the Treasury withdraws money from the Railroad Retirement Funds only at the direction of the Railroad Retirement Board, and only in such amounts as the Board directs to pay benefits. At the beginning of this month, Treasury did something different.

Between November 1 and November 8, without legal authority, the Department of the Treasury unilaterally sold interest-bearing securities held by the Railroad Retirement Account in an amount $445 million in excess of what was required to make November benefit payments. This sum is almost twice the normal monthly benefit payments of $481 million. Furthermore, this action was taken without consultation with or direction from the Railroad Retirement Board. Simply put, the Treasury Department illegally used funds held in trust for the Nation's 1 million railroad retirees to finance other Government operations.

Last Friday, I wrote Treasury Secretary Baker asking for a complete explanation for this illegal action. I also requested the General Accounting Office to investigate the Treasury Department's action as well.

After this hearing was announced, the Department of the Treasury stated that it would repay the retirement fund the excess funds withdrawn, and pay interest to make the fund whole if the debt ceiling bill required them to do so. I am pleased that the Treasury has now admitted it acted incorrectly, but this does not excuse what must have been a willing violation of the law. We must ensure that this illegal activity cannot happen again, and protect railroad retirees' funds from any such future raids.

LIGHTNING STRIKES TWICE—A SECOND RUSSIAN FREEDOM-SEEKER TURNED AWAY

(Mr. COBLE asked and was given permission to address the House for 1 minute.)

Mr. COBLE. Mr. Speaker, a venerable adage reminds us that lightning never strikes identical targets twice. That adage was shamefully and inexcusably refuted last week. Over a decade ago a crew member of a Russian vessel leaped to what he had hoped was his freedom. Our Coast Guard and State Department, as I recall, became involved and the crew member was returned to his ship against his will. Last week, under strikingly similar circumstances, our Customs Service and State Department rejected another request for freedom and a Ukrainian sailor was turned away. This Congress should demand a detailed accounting.

Do we no longer recognize the constitutional principle of political asylum? How many times must lightning strike before we permit commonsense to dictate reasonable and fair results in response to pleas for freedom?

It was a day of shame—and we should be ashamed.

LEGISLATION AUTHORIZING MINTING AND SALE OF AMERICAN GOLD COINS

(Mr. LEWIS of California asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. LEWIS of California. Mr. Speaker, I wish to inform my colleagues that today I join my friend, the gentleman from California, Mr. JULIAN DIXON, in reintroducing legislation that would call upon the Treasury to mint and put for sale a series of American gold coins. This bill as reintroduced is a reflection of work that has been done between the two Houses. In conference with the Senate, the Members drafted a proposal involving four gold coins to be minted and sold in the marketplace. Those coins including an American eagle gold coin of approximately 1 troy ounce, a half-ounce coin, a quarter-ounce coin, and a tenth-ounce coin.

Mr. Speaker, in the meantime, the President has called upon the Department of the Treasury to produce a report regarding the potential of such coin production. Currently we are experiencing approximately $1 billion deficit in gold coin trading because the United States is not in the market. $400 million of that capital flow goes to South Africa.

Mr. Speaker, it is time for us once again to return to the marketplace. I predict that very soon the Congress will pass and the President will sign such a measure and that the American gold coin will take that marketplace by storm.

A HISTORIC BARGAIN ON DEFICIT REDUCTION

(Mr. SLATTERY asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. SLATTERY. Mr. Speaker, I rise to urge the congressional leadership, and the President, to seek a historic budget compromise.

First, we should pass a clean, 3-week debt ceiling extension.

This would allow President Reagan to meet Mr. Gorbachev, without the worry of severe defense cuts that may be mandated by all versions of Gramm-Rudman.

Second, upon his return, the President should meet with the congressional leadership, with all parties offering honest concessions.

Third, we should seek a broad-based formula for deficit reduction, exempting only those who are truly in need.

Mr. Speaker, we can reject legislative gridlock, avoid financial crisis, and put the national interest ahead of partisan politics.

President Kennedy said we should ask what we can do for our country.

I believe the American people are ready to make the tough choices to reduce the deficit, they are ready to march, so long as they are asked to march together, sharing both the burdens and the rewards.

This Congress and this President can be remembered as the ones that summoned our people to a great endeavor: a historic bargain, to reduce deficits immediately, effectively, and fairly.

THE MISHANDLING OF THE MIROSLAV MEDVID CASE

(Mr. PEASE asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. PEASE. Mr. Speaker, now that the *Marshal Konev* has weighed anchor and steamed out of United States waters carrying the Ukrainian sailor who sought so desperately to defect to the United States, I feel it is only fitting that we review the administration's mishandling of Mr. Miroslav Medvid's case.

In interviews with reporters on Sunday and in subsequent newspaper stories, Secretary of State George Shultz has defended the administration's handling of the matter.

However, Secretary Shultz' comments to the contrary, the Reagan administration first bungled and then chose to stonewall the situation. Despite my efforts and those of my colleagues here in the House of Representatives, and 36 Senators, the administration chose to turn a deaf ear to what may have been a young man's desperate plea for asylum. Despite letters from House and Senate Members, telegrams from me and my colleagues Congressman FEIGHAN to President Reagan alerting him to the possible existence here in the United States of Mr. Medvid's relatives, telegrams and phone calls from me suggesting that he make an official request to the Swiss Government to intervene by allowing Mr. Medvid to be interviewed at their consulate in New Orleans, which the President neither acknowledged nor returned, the administration considered the case closed. I even made this suggestion last Thursday to Assistant Secretary of State Rozanne Ridgway during her appearance before a House subcommittee hearing into the matter; however, my suggestion was ignored.

I am ashamed that our Government allowed such a violation of human rights to take place on our soil. The Reagan administration should thoroughly examine its conscience.

VOTERS WAY AHEAD OF CONGRESS ON UNWARRANTED GOVERNMENT INTRUSION INTO QUALITY MEDICAL CARE

(Mr. SCHEUER asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. SCHEUER. Mr. Speaker, there is one very significant aspect of last Tuesday's election that has not been discussed in this body, despite the fact that it dealt directly with the legislative agenda in the House.

As debate continues over the Kemp-Hatch amendment aimed at prohibiting abortion counseling by title 10 family planning clinics, I point out to my colleagues that last week's election results show that voters of all political persuasions and all religious faiths are way ahead of those members of Congress who support unwarranted government intrusion into the practice of quality medical care.

Last Tuesday, three New England communities voted overwhelmingly against nonbinding referenda asking if the Supreme Court decision legalizing abortion should be overturned.

Ironically, in each community the referendum was placed on the ballot by so-called pro-life advocates.

In the conservative community of Dover, NH, voters opposed the referendum by nearly 2 to 1 and then went even further and soundly defeated the pro-life candidate who placed the referendum on the ballot in his bid for a city council seat.

The candidate came in last among the five candidates actively seeking three available city council seats.

Residents of the New Hampshire hamlet of Derry and the Connecticut city of Bristol also voted by margins exceeding 60 percent to support fundamental civil rights for women and uphold the 1973 Roe versus Wade Supreme Court decision legalizing abortion.

It is time for Members of the House to wake up and sense the mood of all American people of every religious persuasion who support good family planning programs, rather than cater to the views of a small, vocal, minority that wants to kill 15 years of progress.

The debate over family planning funding should not be construed as a religious issue. Last weeks vote proved that.

I respect propoundly all church doctrines and deeply admire the tenets of the Catholic, Protestant, and Jewish religions.

In our day and age, Americans of all religious persuasions have learned to keep faith with their religious beliefs, while thinking, acting, and voting like the mainstream Americans that they are.

LYING TO THE AMERICAN PUBLIC ABOUT THE DEFICIT

(Mr. ROEMER asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. ROEMER Mr. Speaker, how does the country song go?

I'm running for President
I got money to burn
My heart don't ache
My body don't yearn
I'd lie to you for your love
And that's the truth, honey.

Mr. Speaker, we have been lying to the American public about the deficit for years and buying their love by spending money we do not have.

With the final consideration of Gramm-Rudman some lies are going to die this week.

The lie that the deficit will grow away with no pain and no cuts will die.

The lie that supply-side tax cuts will eliminate the deficit will die.

The lie that we can balance the budget without requiring corporations to pay their fair share will be exposed.

The lie that we have the courage and the ability to budget rationally

and make hard choices without the pressure of law on crises will die.

The gentleman from Texas, MARVIN LEATH, gave us that choice a month ago, and we flunked.

Gramm-Rudman with its across-the-board cuts and mindless automation is imperfect and ought to be improved, but it beats the slow, certain death of a massive deficit, costing us and our children countless jobs.

Remember the song:

I'm a movie star, a lawyer, a doctor.
I'm an astronaut.
Yes, honey, I own this bar.
I'd lie to you for your love.

Mr. Speaker, this week many lies should die, and the tough part for politicians is that the love might die, too.

TWO TRANSCENDENT ISSUES BEFORE THE HOUSE TODAY

(Mr. FASCELL asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. FASCELL. Mr. Speaker, there are two transcendent issues before the House today.

The gentleman from Michigan [Mr. BROOMFIELD] and I in a bipartisan effort will present a resolution here today speaking for the American people and the Congress, wishing the President well as he goes to the summit in a rare opportunity to reduce tensions with a nation with which we have a major disagreement. Mr. Reagan goes to Geneva with a broad agenda. Although arms control is the focal point the summit will also discuss issues of human rights, regional conflicts and other bilateral matters, and the Congress and the American people wish the President well in the strongest bipartisan sense.

We also have the opportunity, Mr. Speaker, on another major issue confronting the American people, and that is the question of the deficit and the budget.

Now, we have strong differences of opinion which have been very ably expressed in both bodies and by both parties.

The time has come, which is right now, because the deadline is Thursday, for the parties to come together. Differences of opinion must be resolved and this can only be done under the leadership of the President and the White House meeting with both bodies and both parties to bring this issue to rest.

GETTING MARRIED FOR MONEY—A CHILLING TALE OF INADEQUACIES OF OUR IMMIGRATION LAWS

(Mr. McCOLLUM asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. McCOLLUM. Mr. Speaker, the headlines of a recent article in the Miami Herald, "Getting Married for Money Is South Florida Cottage Industry" tells a chilling tale of the inadequacies of our immigration laws. While total immigration to the United States dropped 9.6 percent from 1978 to 543,903 in 1984, the number of immigrants obtaining status by marriage to U.S. citizens increased 43 percent from 78,057 in 1978 to 111,653 in 1984. A more important statistic recently revealed by the Immigration and Naturalization Service shows that in 1984 alone, 11,721 alien fiances were admitted to the United States, of these 4,935 adjusted their status, and 1,438 decided to leave our country leaving 45 percent unaccounted for.

Mr. Speaker, the legislation that I am introducing today will tighten the "K" nonimmigrant visa category by requiring that a couple intending to marry must have met in person, speak the same language and have a bona fide intention to marry. Upon marriage, the alien would be granted a conditional 3-year visa status which would count toward the 5-year naturalization period. At the end of this period the couple must produce evidence that a bonafide marriage exists. If this information is not produced then status is not adjusted and the individual is subject to deportation. In addition, this legislation creates criminal penalties for those who knowingly enter into a marriage contract for the purpose of evading immigration laws.

INTRODUCTION OF SENSE-OF-CONGRESS RESOLUTION FOR NO INCREASE IN INDIVIDUAL INCOME TAX

(Mr. ROWLAND of Connecticut asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. ROWLAND of Connecticut. Mr. Speaker, thus far in the 99th Congress, higher individual income tax rates have not been proposed in legislative form. However, many expect that early next year some Members of Congress will be saying we need higher income tax rates.

Last week, I introduced a sense-of-the-Congress resolution which states that there should be no increase in individual income tax rates. Today, I invite Members of the House to join this effort to derail a movement to increase personal tax rates next year.

There are numerous areas of the Federal budget that must be cut, rather than using individual income tax increases as a deficit-reduction tool. The American taxpayer already shoulders an excessive tax burden and must not be called on to absorb further pain just because Congress lacks the political will to cut Federal programs.

Those Members signing on to this resolution will be squarely on record as opposing individual income tax hikes and will represent a deterrent to those contemplating such an increase.

ANNOUNCEMENT BY THE SPEAKER PRO TEMPORE

The SPEAKER pro tempore (Mr. SKELTON). Pursuant to the provisions of clause 5 of rule I, the Chair announces that he will postpone further proceedings today on each motion to suspend the rules on which a recorded vote or the yeas and nays are ordered, or on which the vote is objected to under clause 4 of rule XV.

Such rollcall votes, if postponed, will be taken after debate has been concluded on all motions to suspend the rules.

RELATING TO PROPOSED SALES OF ARMS TO JORDAN

Mr. FASCELL. Mr. Speaker, I move to suspend the rules and pass the Senate joint resolution (S.J. Res. 228) relating to the proposed sales of arms to Jordan.

The Clerk read as follows:

S.J. RES. 228

Resolved by the Senate and House of Representatives of the United States of America in Congress assembled, That prior to March 1, 1986, no letter of offer shall be valid with respect to any of the proposed sales to Jordan of advanced weapons systems, including advanced aircraft and advanced air defense systems, that are described in the notification pursuant to section 36(b) of the Arms Export Control Act submitted to the Congress on October 21, 1985, unless direct and meaningful peace negotiations between Israel and Jordan are underway.

□ 1225

The SPEAKER pro tempore. Pursuant to the rule, a second is not required on this motion.

The gentleman from Florida [Mr. FASCELL] will be recognized for 20 minutes, and the gentleman from Michigan [Mr. BROOMFIELD] will be recognized for 20 minutes.

The Chair recognizes the gentleman from Florida [Mr. FASCELL].

Mr. FASCELL. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, the question of arms sales to Jordan is a rather contentious one. It impacts on the difficult issue of the Middle East peace process and a number of other U.S. national security concerns. In short, it is a matter that has received intensive and careful review in both bodies of Congress.

The abiding interest of the Committee on Foreign Affairs in the Middle

East has intensified over the last several months as the United States has increased its diplomatic efforts with both Jordan and Israel regarding a Middle East peace agreement. Correspondingly, both Jordan's King Hussein and Israel's Prime Minister Peres have made several important initiatives to help lay the groundwork for negotiations. The goal of the committee and the goal of this Congress, Mr. Speaker, should be to help advance that peace process.

Pending before the committee at markup were two resolutions. The underlying sentiment of the committee was expressed in House Joint Resolution 428 which was introduced on October 24 by myself and 273 cosponsors and which would prohibit the sale of weapons to Jordan unless direct bilateral negotiations have commenced between Jordan and Israel.

Also pending before the committee was Senate Joint Resolution 228 which extended the notification period to March 1, 1986, but allowed the sales to proceed before that date if direct and meaningful negotiations were underway between Israel and Jordan.

In considering possible legislation, the committee was guided by several principles. First, the committee wanted to support and encourage the peace process. Second, the committee believes it is essential to establish an ongoing peace process before proceeding with new arms sales and, therefore, concluded that until direct and meaningful negotiations are started the United States should not sell advanced weapons to Jordan. Third, the committee accordingly felt that if pressed to vote on these sales now, the sales would be disapproved.

In light of all these factors, the committee decided on November 7 to act on Senate Joint Resolution 228, the resolution which is now before us. The committee believes this resolution represents a compromise which addresses the concerns of all parties, gives the peace process a chance and preserves the options of the committee for further action in the coming months, including an outright disapproval of the issuance of a letter of offer if direct and meaningful negotiations are not taking place.

Senate Joint Resolution 228 was passed unanimously by the committee by voice vote, a quorum being present.

It is the view of the committee that there are several ways in which Senate Joint Resolution 228 could have been improved. However, there is a commitment from the President that he will sign Senate Joint Resolution 228 in its present form; the committee therefore believes that it is important to expedite the legislative process and submit this legislation to the President for his signature.

The committee defines the phrase "direct and meaningful" negotiations in Senate Joint Resolution 228 as involving:

Direct, publicly acknowledged, ongoing peace negotiations between leaders of Jordan and Israel or their designated negotiating teams;

The establishment of a mechanism by the two parties to ensure the continuation of the substantive negotating process and regular face-to-face talks between the two parties;

A process which would result in a clear public declaration to end the state of belligerency between Jordan and Israel.

In providing this definition the committee seeks to make clear its view that any peace conference convened under international auspices should lead promptly to direct negotiations between Israel and Jordan on the substance of peace issues, not procedural questions.

If direct and meaningful negotiations—under the above definition—are taking place, the President should communicate that publicly to this committee and undertake consultations with the Congress at least 30 days before proceeding with any sale. While the resolution provides no procedural mechanism for deciding if direct and meaningful negotiations are underway, the sale of arms to Jordan should take place only if there is a consensus between the executive branch and the Congress that negotiations are underway.

If by February 1, 1986, no negotiations of the specified nature are underway, the committee expects to be informed by the President whether he intends to, first, proceed with an arms sale after March 1, 1986, as per the letter of notification of October 21, 1985; second, delay the sale further until direct and meaningful negotiations are underway; third, resubmit the sale in accordance with section 36(b) of the Arms Export Control Act; or fourth, withdraw the sale.

The committee believes that passage of Senate Joint Resolution 228 in no way restricts the options of the Congress to pass further legislation on this issue as developments occur. As appropriate and warranted, for example, the committee holds open the option of reporting out House Joint Resolution 428 as a resolution of disapproval which would take effect on or after the March 1, 1986, date.

The committee also intends to consider separate but related legislation to provide for expedited procedures in order to facilitate consideration of any future legislation involving arms sales.

One of the committee's chief concerns relating to this matter involved the effect of the Supreme Court's Chadha decision, under which the legislative veto by concurrent resolution is considered unconstitutional. Flowing from that fact is the loss of expedited procedures under which this legislation could be considered.

In an effort to help solve that problem, at least in part, the committee has received assurances from the chairman of the Senate Foreign Relations Committee concerning possible future Senate action. I insert that letter in the RECORD at this point.

U.S. SENATE,
COMMITTEE ON FOREIGN RELATIONS,
Washington, DC, November 6, 1985.

Hon. DANTE FASCELL,
Chairman, Committee on Foreign Affairs, U.S. House of Representative, Washington, DC.

DEAR DANTE: I just wanted to follow up on our meeting last Friday concerning the proposed Jordan arms sale. As you know, at that time I expressed to you and to Larry Smith my own concern that reconsideration of this issue on the Senate floor could injure the consensus we achieved to defer the sale to March 1st. I would like to reiterate that concern now. I have had the occasion to review this matter with officials of the Administration. In my judgment, the Administration has assented only to the language of the current Senate bill and not to any other language.

At the same time, I want to assure you that should there be no negotiations by early next year, a disapproval resolution would be considered by the Foreign Relations Committee in a timely manner. I would oppose parliamentary maneuvering that would allow the sale to go forward against the wishes of the majority of the Senate. As I have all along said, it is necessary to form a consensus on this issue in order to address the problem of potential appropriations further along in the process.

I hope that this commitment is reassuring to you and to other members of the House. I look forward to working closely with you in order to ensure that the deeply felt views of both Houses are reflected in the final outcome.

With best wishes.

Sincerely,

RICHARD G. LUGAR,
Senate, Foreign Relations Committee.

Mr. Speaker, as I said at the outset, this has been a difficult issue involving a number of important implications. Taking all of that into account, this committee has concluded that the best legislative solution at this time is Senate Joint Resolution 228. I therefore urge its passage.

Mr. BROOMFIELD. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, I want to offer my support for the compromise legislation before us today. Thanks to the leadership of Chairman FASCELL and in the spirit of bipartisanship, this resolution received the strong support of the Foreign Affairs Committee. The Senate recently adopted the resolution by a 97 to 1 margin.

The legislation considers the interests of all parties and, in my judgment, should be supported. Its passage is clearly not a defeat for anyone. It incorporates the concerns of many of us in the Congress who believe that peace

is now possible in the Middle East. We must be careful, however, not to lose this promising opportunity.

The administration's needs are also served by the passage of this resolution. I am pleased that the executive branch has no objection to this prudent course of action that we are proposing.

The real strength of the legislation before us is that it lets our Government deal with both Jordan and Israel in an effort to keep the peace process moving forward. I am pleased that there are increasing diplomatic contacts between Jordan and Israel on this important effort.

By supporting this legislative approach, we avoid the undesirable option of taking an adverse vote on the arms sale to Jordan. Under the proposal before us, that sale cannot be made until March 1, 1986, unless direct and meaningful negotiations between Israel and Jordan are underway.

This resolution presents a workable compromise which serves the interests of all of those who want peace in the Middle East. I urge all my colleagues to join me in supporting this important resolution.

Mr. FASCELL. Mr. Speaker, I yield 4 minutes to the distinguished chairman of the Subcommittee on Europe and the Middle East, the gentleman from Indiana [Mr. HAMILTON].

Mr. HAMILTON. I thank the gentleman for yielding this time to me.

Mr. Speaker, I rise in support of Senate Joint Resolution 228 which effectively extends the notification period for the proposed arms sales to Jordan until March 1, 1986, but which would allow the proposed sales to proceed in the interim if direct and meaningful negotiations between Israel and Jordan are underway.

The effect of the resolution is to prohibit the sales temporarily but conditionally.

The phrase "direct and meaningful" negotiations in Senate Joint Resolution 228 involves several features:

First, direct, publicly acknowledged, ongoing peace negotiations between leaders of Jordan and Israel or their designated negotiating teams;

Second, the establishment of a mechanism by the two parties to ensure the continuation of the substantive negotiating process and regular face-to-face talks between the two parties;

Third, a process which would result in a clear public declaration to end the state of belligerency between Jordan to Israel.

The resolution seeks to make clear that any peace conference convened under international auspices should lead promptly to direct negotiations between Israel and Jordan on the substance of peace issues, not on procedural questions.

In recent weeks, the involvement of the United States in diplomatic contacts with both Jordan and Israel with respect to a Middle East peace process has intensified. Jordan's King Hussein and Prime Minister Peres of Israel have made important statements and efforts to try to narrow procedural differences to enable peace talks to proceed. We want to encourage that process.

Mr. Speaker, it is because we want to further the peace process that it is prudent to delay this arms sales package, It is only within the framework of a viable, ongoing peace process that arms sales and other security assistance can be supportive both of U.S. interests and of peace efforts.

Both Israel and Jordan are important friends of the United States. Millions of citizens throughout the Middle East are focused on current efforts to restart peace talks. They want this process to succeed both for themselves and for future generations. At the same time, there is a small minority in the Middle East which seeks, through violence and terror, to frustrate any peace process and cause its failure.

The United States at this time should focus all its efforts on that peace process and avoid any actions which divert energies or attention away from it. Arms sales, without direct and meaningful negotiations, could do precisely that.

Helping Jordan with its legitimate security needs is important, but this should be accomplished in the proper context. Without prejudice to these long-term security needs of Jordan, we today ask for a short delay in the arms sales process in order to give current peace efforts a chance to start sustained and substantive negotiations.

Mr. Speaker, I urge my colleagues to support Senate Joint Resolution 228.

Mr. BROOMFIELD. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, before I call on the next Member on our side to speak, I want to congratulate the gentleman from Indiana [Mr. HAMILTON], the chairman of the Subcommittee on Europe and the Middle East, and also the gentleman I am going to call on, the gentleman from New York [Mr. GILMAN], for the excellent work that that subcommittee did in regard to this legislation.

Mr. Speaker, it is my honor now to yield 3 minutes to the gentleman from New York [Mr. GILMAN].

Mr. GILMAN. I thank the gentleman for yielding this time to me.

Mr. Speaker, I rise in support of the resolution, and I want to commend the distinguished chairman of our committee, the gentleman from Florida [Mr. FASCELL], the distinguished chairman of our subcommittee, the gentleman from Indiana [Mr. HAMILTON], and our ranking minority member, the gentleman from Michigan [Mr. BROOMFIELD], for bringing this measure to the floor with such dispatch.

Mr. Speaker, Senate Joint Resolution 228 temporarily withholding sales of advanced weapons to Jordan, is by no means an ideal solution to the problem of providing proper defense for Jordan. On the other hand, it is a solution which the Committee on Foreign Affairs was able to agree upon with relative dispatch, which was passed by the other body, and which has the support of the President of the United States. I believe it merits the support of each Member of this House.

Sales of arms to Jordan have become linked with the progress of the peace process. As the distinguished chairman of our subcommittee on the Middle East, the gentleman from Indiana, so wisely observed—and I shall paraphrase him—that while consummating any specific arms sale may not bring forward the peace process, improper handling of an arms sale by the Congress can certainly set back the process.

The peace process is—and has remained, as much as we may regret it—at a delicate stage for the past several months. This was not an appropriate time to send to the Congress a major arms sale. The administration, unfortunately, chose to ignore the pleas of Congress and sent us an arms package which while appearing to meet the defense needs of Jordan also has a significant impact on Israel's ability to defend itself. Obviously—and justifiably—such a sale is controversial. While the administration initially plowed ahead, thereafter it wisely bowed to the congressional response, agreeing to postpone a final vote on this matter until late this winter.

Mr. Speaker, while we cannot fortell the future, we hope and pray that peace negotiations can get underway and appropriate arms can be provided to Jordan. But the question of arms supplies remains very much in the hands of the parties to the conflict themselves. We will be watching that Middle East Peace negotiations very closely, looking for indications that peace between Israel and its neighbors can eventually be achieved and the way cleared to the supply of defensive weapons against outside threats.

Mr. Speaker, I commend the Members on both sides of the aisle whose leadership allowed this compromise resolution to come to the floor with such dispatch.

□ 1235

Mr. FASCELL. Mr. Speaker, I yield such time as he may consume to the gentleman from New Jersey [Mr. FLORIO].

Mr. FLORIO. Mr. Speaker, with the understanding that this resolution in no way affects the prerogatives of the Congress under the existing law, I rise in support of the resolution.

Mr. Speaker, I rise to express my opposition to the administration's proposal to sell sophisticated weapons to Jordan, before that nation has accepted the framework of the Camp David peace process and agreed to direct negotiations with Israel. We are today considering a resolution, Senate Joint Resolution 228, that would postpone a decision on this particular sale until March 1, 1986, in order to encourage direct and meaningful peace negotiations between Israel and Jordan during that timeframe.

Mr. Speaker, I rise with apprehension to discuss this resolution because I am concerned about the perception that this resolution would allow the administration to go forward with this sale on March 1, 1986, unless the Congress passes a joint resolution of disapproval before that date. On October 21, 1985, the President formally notified Congress of the intent to sell a package of 40 F-20 or F-16 advanced fighters, 108 Stinger missiles, 12 Hawk missile units, 300 Sidewinder air-to-air missiles, and 32 M-3 Bradley cavalry fighting vehicles. This entire air defense package would carry a cost of as much as $1.9 billion and would threaten the air superiority of Israel—its cornerstone of security.

For a number of years, Jordan's King Hussein has been reluctant to recognize Israel and enter into direct negotiations to bring about a much needed settlement. He is currently hiding behind the shield of an international peace conference that would involve the PLO, Syria, and the Soviet Union as participants. By proposing an arms sale at this time, the administration is rewarding the King for his intransigence. If sophisticated weapons are provided to Jordan before that country makes peace with Israel, the incentive for direct negotiations would be removed and attention would be focused on instruments of war rather than maneuvers for peace. This weapons package would reduce Israel's ability to defend itself from a more possible Arab offensive.

Additionally, the arms sale to Jordan would increase Israel's defense burden by forcing Israel to allot an even greater proportion of its budget to defense needs. Not only would we be facing increases in our foreign aid demands for Israel and Egypt, but it would also be a detriment to the already troubled Israeli economy.

On June 10, I and my colleague from New York, Mr. LENT, introduced House Resolution 194, to express the opposition of the House of Representatives to selling arms to Jordan and to call upon Jordan to enter into direct peace negotiations with Israel. House Resolution 194 received the support of 91 of our colleagues before a joint resolution of disapproval was introduced by Mr. FASCELL. I was pleased to have been an original cosponsor of this resolution and I hope that, if direct and meaningful peace negotiations between Israel and Jordan do not occur before March 1, this joint resolution will be approved by the Congress to block this sale.

The resolution we are considering today should be taken as simply an extension of the legal 30-day period of review that Congress has to block such a sale. It should not be accepted as a resolution approving this sale unconditionally after March 1, 1986. There are meaningful steps that Jordan must take before the Congress lends approval to this sale.

Increasing our weapons supply to this region and promoting fear among our ally, Israel, will not foster peace and understanding in the Middle East. Encouraging direct negotiations with meaningful results will.

Mr. Speaker, it is imperative that this message be sent both to the administration and to all parties involved in this conflict. Our Government cannot condone intransigence by providing Jordan with gifts of weapons. Too much time has been spent already in waiting for Jordan to recognize Israel's right to exist and agree to direct meaningful negotiations. I hope that, as March 1 approaches, Congress will again review any progress that has been made and if there has not been any, pass a resolution of disapproval to block this sale once and for all, and send a message of our expectations in the peace process.

Mr. FASCELL. Mr. Speaker, I yield 3 mintues to the gentleman from Florida [Mr. SMITH].

Mr. SMITH of Florida. Mr. Speaker, I thank the gentleman from Florida for yielding me this time.

First, I want to commend the gentleman from Florida [Mr. FASCELL] as author of the House resolution, together with the gentleman from Michigan [Mr. BROOMFIELD] and myself, and 280-plus other sponsors of the resolution of the House which was a resolution of disapproval. That resolution was exactly duplicative of the resolution that originally was filed in the other body.

The other body went ahead and changed the wording of their resolution to accommodate what was basically the argument that had been made by both this Chamber and the other body, and that was that the delay was the most important thing, that this was not the appropriate time for an arms sale in the Middle East, for an arms sale to Jordan. It would most likely hinder rather than help the peace process.

The gentleman from Florida [Mr. FASCELL], the gentleman from Michigan [Mr. BROOMFIELD], the majority leader, the gentleman from Indiana [Mr. HAMILTON], and others were successful in putting together the kind of work that was necessary to make sure everybody understood that what we wanted to do was to see the peace process move forward, and not bog down over a secondary, marginal issue.

What the problem is, however, and let us make it very clear, and let us make no mistake about it, is that the resolution language as the other body has drafted it, and as we are going to pass it, provides that as of March 1, the resolution allows for a sale to proceed without further notification by the President or the administration to the Congress.

The House resolution of over 280 cosponsors was a resolution of disapproval. That resolution will be taken up in the event that as of February 1, approximately, there is no change in the circumstances on the ground in the Middle East. If Hussein and Perez are not talking, if Israel and Jordan are not talking with each other, if their negotiating teams are not talking, I fully intend as a prime cosponsor of that legislation, and I am sure the others feel the same way, to move forward with our resolution to block that sale so that we again do not get bogged down in that arms sale while there is no good-faith effort being made toward the peace process.

Just this weekend alone, Arafat said once again that they would not lay down their arms in an arms struggle against Israel, and King Hussein said, and unfortunately, I am sorry to hear, that once again Arab flags, Jordanian flags would be flying over Jerusalem. I thought that was what the purpose of negotiations were supposed to be.

This country is a good friend of Jordan, this country is a good friend of King Hussein. This year alone, we raised above the administration's proposal the amount for economic support, we raised over the administration's proposed amount the amount for arms.

I urge my colleagues to vote for this, for the delay, and then wait to see what happens in the Middle East.

Mr. FASCELL. Mr. Speaker, I yield 1 minute to the gentleman from Michigan [Mr. LEVIN].

Mr. LEVIN of Michigan. Mr. Speaker, I appreciate the gentleman yielding me this time, and I rise in support of this resolution and associate myself with the very cogent remarks of the gentleman from Florida who has just spoken.

Mr. Speaker, during King Hussein's visit this past summer he spoke of his commitment to the peace process in the Middle East. More recently, the King hailed Prime Minister Shimon Peres' speech to the United Nations, calling him a "man of vision."

All of which are encouraging signals to those of us watching this region closely.

But none of the above can let us ignore the central fact in this process—that Jordan's relationship with the Palestinian Liberation Organization empowers their terrorist agenda in the region. And that Jordan and Israel are not yet at the negotiating table.

Additionally, it is impossible to ignore that the type of weapons under discussion are just what must be most threatening to

Israel's security. Jordan's air bases are close to Israel's population centers. Israel's longest border is with Jordan—180 miles of territory difficult to defend by ground forces. The F-16 and F-20 interceptors under consideration could make it impossible for Israel to defend her own airspace.

In addition to the combat aircraft under discussion, the sale of Hawk and Stinger missiles raise their own questions about stability and peace in the region. Jordan already has 14 improved Hawk batteries—but their purchase was conditioned on their being attached to concrete pads that eliminated the possibility of their use against Israel. The new Hawks would not be so conditioned, and pose a much greater potential threat.

The Stinger has been called the "ideal terrorist weapon"—portable, potent, it can destroy a low-flying aircraft from any angle. The obvious questions about Jordan's ability to keep these weapons out of the hands of the PLO has yet to be answered by this administration.

Finally, the proposed sale includes Bradley fighting vehicles and Sidewinder heat-seeking missiles.

This sale would indisputably harm Israel's air superiority over its neighbors in the region. Right now, it is a risk Israel—and we—cannot take. The bill before us delays the sale until March, unless Jordan comes to the table in the meantime. I urge my colleagues' support of this measure.

Mr. FASCELL. Mr. Speaker, I yield 1 minute to the gentleman from Oklahoma [Mr. JONES].

Mr. JONES of Oklahoma. Mr. Speaker, I, too, rise in strong support of this measure, Senate Joint Resolution 228, disapproving the sale of advanced weapons to Jordan.

As in the Florio and Fascell resolutions, both of which I have cosponsored, this legislation is based on one premise: That the United States must not reward intransigence or weak-hearted approaches to peace in the Middle East.

No Middle Eastern nation which refuses to engage in direct and meaningful negotiations with Israel should be supplied with advanced United States weapons.

By standing firm on this guiding principle, we will undoubtedly enhance the chance of long-term success for the Camp David peace process.

I urge my colleagues' support for this measure.

Mr. FASCELL. Mr. Speaker, I yield such time as he may consume to the gentleman from California [Mr. BERMAN].

Mr. BERMAN. Mr. Speaker, I rise in support of the resolution and in support of the principle of negotiations before arms.

Mr. Speaker, the resolution before us transforms the proposed Jordan arms sale into an opportunity for peace.

In passing the resolution, we prevent an immediate arms sale before direct and meaningful negotiations between Israel and Jordan are underway.

We leave open the question of future weapons transfers to Jordan. If serious negotiations do not begin, Congress can enact legislation before March 1 to block or further postpone a sale. The House and Senate have shown that they will so act with their overwhelming support for resolutions barring arms sales to Jordan before direct bilateral talks are in progress.

The Foreign Affairs Committee, on which I serve, stands ready to report whenever necessary the resolution barring arms sales to Jordan. That resolution was cosponsored by 281 Members of the House and 75 Senators.

If the President determines that direct and meaningful negotiations are underway and proceeds with a letter of offer of arms to Jordan, Congress can independently assess the talks and can still act to halt or restrict the sale.

While this resolution prevents the administration's proposed immediate arms sale to Jordan and leaves open the question whether the sale will go forward in the future, it avoids the kind of outright disapproval that could jeopardize the United States' and Israel's ability to work with Jordan toward peace.

For months, we who support this resolution have been pleading with the administration not to send up for congressional approval or disapproval at this time a sale of sophisticated weapons to Jordan.

The only successful strategy for linking Arab arms sales to peace is that followed with Egypt: no weapons transfers until talks are underway, the commitment to peace is clear, and irrevocable steps have been taken toward a settlement.

By contrast, strategies of first arms then peace have proved abysmal failures with Jordan and Saudi Arabia. In fact, these weapons transfers have been barriers to peace. If a country can obtain the most sophisticated arms from the United States without sitting down at the negotiating table, what incentive is there for peace? The weapons transfers only serve to heighten tensions and escalate the arms race that is raging in the Middle East.

Israeli Prime Minister Shimon Peres recently reminded the Knesset, "During the 37 years of Israel's existence, we have known five wars and one peace."

Mr. Peres added, "For wars—irrespective of who initiates them—all the sides pay a price. In peace—irrespective of who initiates it—all the sides enjoy its fruits. Today, Israel is ready to pay the price for peace—but provided that the payment actually brings peace, and provided that the Arabs also pay its price. Otherwise, no one will believe that they genuinely want peace."

Mr. Speaker, Jordan's purchase of American arms now—before peace talks begin—would not be the proper payment for peace.

We should have peace first. If peace talks take place, then we can discuss arms sales later.

But in the absence of peace talks between Jordan and Israel, we in the House must stand by the decision we took unanimously in July and oppose massive new arms sales to Jordan.

Prime Minister Peres was quite frank about what will follow this arms sale. He said, "Forty new F-16's will be received by Jordan in 3 years and could strike many targets in Israel. Weapons are always being given to the Arabs and then we have to ask for balance in aid and arms * * *. The mobile Hawk missiles are a serious military security problem."

I ask my colleagues to consider a few facts about the balance of arms in the Middle East before they vote on whether or not to allow an immediate arms sales to Jordan.

We know that when a united front of Arab nations launched a surprise attack on Israel in 1973, Jordan was able to excuse itself from the original attack by explaining to its Arab allies that it had no air force capable of defending itself from an Israeli retaliatory air strike.

Jordan's air force bomb payload was 100 metric tons in 1973 at the time of the Yom Kippur war; Jordan's air force bomb payload has increased almost fourfold since then, and this sale would further boost that nation's bomb payload to 500 metric tons.

At the time of the Yom Kippur war, Jordan had about 50 planes, most of them outdated and unsophisticated. Today Jordan has 115 planes in the air force, and King Hussein has plans to increase the number to 160. Further, Hussein has said he plans to retire many of his older planes on his way to a 160-plane air force. This arms sale will not fulfill his plan—he will be back for 40 more sophisticated fighter-bombers after this sale is made.

Jordan had no air defense batteries at the time of the Yom Kippur war, when the absence of air defenses restricted Jordan's participation in that united attempt by Arab regimes to destroy the Nation of Israel.

If this arms sales were completed, Jordan would have 43 air defense batteries. The next time, should the other Arab nations pressure Jordan to join in a united attack on Israel, Jordan would not be able to plead the absence of an air defense as a reason to sit out the original attack on Israel.

Of course, what American weapons Jordan had at the time of the Yom Kippur war were provided on the solemn promise that those weapons would not be turned against our friend, Israel. We all know that Jordan's American tanks were on the Gholan Heights, firing on Israeli soldiers, in blatant violation of King Hussein's solemn promise.

We would be deluding ourselves were we to estimate future damage from war in the Middle East based on damage caused by previous wars. The sophistication and the destructive power of weapons held now by both Israel and by the Arab Nations is far beyond what it was just a little over a decade ago.

Surely my colleagues were as appalled and frightened—and, frankly, as awed—by the new weapons that were on display at

the time of the Falklands war. Missiles that flew in from over the horizon to disable aircraft carriers, jump-jets that operate like tanks in the sky, hand-held antiaircraft weapons that would be the dream of any small terrorist organization like the PLO—these new weapons got their tryout in the south Atlantic Ocean off the coast of Argentina, when that little war served as an arms bazaar and a live-ammo demonstration tape for arms salesmen around the world.

Let us think twice before we raise the level of the arms race in that volatile region by approving this transfer of weapons to Jordan.

There are three levels to the arms race in the Middle East and this single arms transfer would exacerbate all three of those races.

There is the arms race between Israel's American weapons and the American weapons we sell to Arab countries. When an Arab country receives the latest generation of an American weapon, we must—to assure the continued existence of Israel—provide weapons as sophisticated or more sophisticated. Through this transfer we will again raise the need for additional weapons to Israel.

In addition to the continuing spiral of ever-more advanced American weapons on both sides of the conflict in the region, there is the race between American weapons and the Soviet weapons provided to the Soviet allies in the region. The administration proposes to justify this sale by arguing that Jordan needs these weapons to defend itself against Syria. That is a transparent dodge—these weapons are, in fact, uniquely designed for use in a war against Israel, not a land invasion of Jordan by Syria. But despite the transparence of that dodge, this sale will lead Syria and other Arab allies of the Soviets to demand that the American sale of weapons to Jordan be matched by a Soviet arms transfer to them.

Finally, Israel—surrounded as she is by nations committed to her destruction—cannot sit idly by when American arms held by Arab countries are upgraded through additional arms sales. Rather, Israel's arms industry must develop weapons to defend against the new generation of American weapons being provided. This arms sale will lead to new expenditures by Israel to devise defensive weapons designed to thwart the American weapons provided to Jordan. That level of the arms race will be further exacerbated when Israel is forced to respond to the additional Soviet arms that this sale of American weapons will draw into the region.

On all three levels, this arms sale to Jordan escalates the Middle Eastern arms race.

The border with Jordan is Israel's longest, and Israel cannot defend that border without the air superiority it now enjoys. This arms sale will seriously threaten that air superiority, both by supplying airplanes and air defenses, and will gravely threaten Israel's security.

Finally, this arms sale threaten's American security. The most obvious reason for that is the threat to Israel posed by this arms sale. Israel is our strongest, most stable and most reliable ally in the region. Israel is the fiercest enemy of the Soviet Union in the Middle East. Any threat to Israel is a direct threat to United States interests in the Middle East.

Mr. Speaker, I beg my colleagues to delay this arms sale to Jordan. It will escalate the arms race in a volatile region, and will threaten the security of our strongest ally in the region.

Jordan has been willing to inch toward peace only under the toughest pressure from our Nation, but Jordan has not gone nearly far enough to have earned this awful reward. There are not peace talks now. There is no lifting of the formal state of war with Israel by King Hussein. There is no renunciation by Jordan of the efforts of the PLO and the Soviet Union to turn peace negotiations into a propaganda exercize orchestrated by the greatest enemy of the United States and by the worst terrorist organization in the world.

An arms sale before peace talks rewards Jordanian intransigence.

Mr. Speaker, let us have peace first.

Mr. FASCELL. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, at this point I want to express my appreciation to the ranking Republican Member, the gentleman from Michigan [Mr. BROOMFIELD], for his work and efforts on this matter in bringing about a bipartisan approach to a resolution of this problem. I also express my deep appreciation to the chairman of the subcommittee, Mr. HAMILTON, and the ranking member of the Middle East Subcommittee Mr. GILMAN, for their work, for the hearings that they have held in bringing this resolution forward. A special thanks goes to my colleague from Florida, Mr. SMITH, who undertook to do the hard work of sponsoring the original resolution which is still pending before our committee and now has 280 cosponsors to show a very large bipartisan consensus in this body that we do not believe that the peace process can be enhanced with the sale of sophisticated equipment to Jordan, or for that matter, to any other country, in the Middle East.

We need to provide the incentive whereby both Israel and Jordan, who have already indicated their seriousness, can make those concessions, which will help ultimately to bring about face-to-face negotiations, thereby reducing the tensions and bringing about a just and lasting peace in the Middle East. We have that here now. We hope that because of this message going forward from both bodies in the Congress on a fully bipartisan basis that the parties in the Middle East will take this seriously in an effort to bring about the necessary steps for direct and substantive negotiations.

None of us envision simply a meeting for the parties to get together and have some chitchat as satisfying the criteria in this legislation. We are not talking about that. What we are talking about is direct, face-to-face negotiation, substantive, meaningful efforts in order to arrive at the peace process.

We are willing to delay, Mr. Speaker, the time within which this sale would go forward. However, while we hope that the process would continue and the criteria which we have laid down in the law, which is inherent in this legislation, would actually be met, we stand ready, as my colleague from Florida has said, and all of us know and we have agreed, Republicans and Democrats alike, that the resolution which is still pending before the committee would be brought forward. Also in the record now are the assurances of the chairman of the other body's Committee on Foreign Relations that they would move forward promptly with disapproval legislation in the event that the peace process was not able to move forward.

So we present this legislation, Mr. Speaker, in the fervent hope that the parties will take it seriously, and that they will undertake to move forward from the positions they have now made public, and that the peace process can continue, that there will be direct and meaningful negotiations between Jordan and Israel, and the peace process can move on.

Mr. Speaker, I yield such time as he may consume to the gentleman from New York [Mr. SCHUMER].

Mr. SCHUMER. Mr. Speaker, today we will be called upon to consider how long we should postpone the administration's $1.3 billion arms sale to Jordan. And once again it is obvious what a short memory this administration has. For 10 years ago almost to the day the Nation of Jordan was one of the principal sponsors of the infamous Zionism is racism resolution in the United Nations. That resolution, forever a scar on the history of the United Nations, is the way that Jordan and the other Arab Nations have justified their attack on Israel.

The Zionism is racism resolution was not the first attack on the people and the Nation of Israel and God knows it wasn't the last. Fortunately the friends of Israel have much longer memories than this administration does.

If the Jordanians have changed their minds about Israel and are now serious about peace in the region, and I hope they are, let them show it by entering into direct unfettered talks with Israel before we reward them.

Mr. Speaker, 10 years ago yesterday 72 nations decreed in a U.N. Resolution that Zionism was racism. Although 10 years have passed that same anti-Semitism is the cause of most of the attacks on Israel. Let us send the message that we in Congress do not forget so easily. I urge my colleagues to postpone this misguided arms sale for at least another 10 years.

Mr. WAXMAN. Mr. Speaker, I rise today in strong support of Senate Joint Resolu-

tion 228, which delays the sale of $1.9 billion worth of weapons to Jordan for at least 6 months, unless direct and meaningful negotiations are underway between Israel and Jordan.

The essence of this issue is whether we ought to reward Jordan for something it has not yet done. We are trying to move Jordan to enter direct talks with Israel—the kind of talks that Egypt undertook with enormous success in the late 1970's. It makes little sense to give Jordan further means to make war while trying to coax them to make peace.

It did not require an arms package to convince the Egyptians to go to Camp David. They went because they decided it was in their interest to make peace with their neighbor. Part of that interest lay in the prospect of significant American aid—both economic and military—after such a peace was attained. And indeed we now have a larger aid relationship with Egypt than with almost any other nation in the world.

But imagine if we had offered Egypt large arms sales before the negotiations. The incentive to the Egyptians would have been reduced, and the negotiations might never have taken place.

Mr. Speaker, the Government of Israel now rests with a tenuous coalition. Prime Minister Peres is taking the boldest steps he possibly can for peace—continually sending signals to Jordan that Israel is ready to negotiate any time, any place. But he is under tremendous pressure from this Likud partners who are extremely skeptical of the peacemaking process, and very worried about compromising Israeli security in any kind of bargaining. To sell $1.9 billion of sophisticated fighter aircraft and surface-to-air missiles to Jordan now would make it much harder for Prime Minister Peres to justify to his coalition partners and to his people the taking of any kind of risk for peace.

In short, Mr. Speaker, I believe the sale to be ill-timed and ill-conceived, and I will fight against it unless and until Jordan clearly starts down the road to peace with Isreal. Thank you.

Mr. SCHEUER. Mr. Speaker, I rise in strong support of Senate Joint Resolution 228, a measure to delay President Reagan's proposed arms sale to Jordan. This proposal has been rightfully opposed by an overwhelming majority in both Houses and I believe that Senate Joint Resolution 228 should be adopted promptly.

There can be no doubt in the mind of anyone in this Chamber today, indeed in the minds of anyone in the United States, that Israel is our most loyal and steadfast friend in the turbulent Middle East. There can be no doubt that Israel, the only truly democratic nation in the region, is surrounded by nations which are pledged to destroy Israel. How can the President possibly imagine that selling Jordan F-16 or F-20 fighter aircraft, Stinger air-to-air missiles, and other advanced weapons systems will improve Israel's precarious situation?

Jordan has been in a state of war with Israel since 1948 and has refused not only to recognize Israel's right to exist but also to enter into direct negotiations with Israel to reach a peaceful settlement. Although recent events have provided some glimmer of hope that the status quo may change in favor of a more conciliatory position by Jordan with regard to Israel, this is far from a foregone conclusion and we would be wise to postpone any arms sale until the dust has settled and the smoke has cleared.

The foreign aid authorization passed by Congress and signed by the President earlier this year stated in clear, concise terms that no sale of weapons to Jordan should be made until Jordan recognizes Israel's right to exist and enters into direct negotiations with Israel. Because President Reagan has ignored this provision, it is necessary for us to go on record once again and state that we will not even consider an arms sale until there have been direct and meaningful peace negotiations between Israel and Jordan. This, of course, necessitates that Israel be recognized by Jordan.

I believe that it is sensible and in fact necessary that any arms sale proposal be postponed from consideration until at least March 1, 1986, as stipulated in the measure before us. I urge my colleagues to join me in supporting passage of Senate Joint Resolution 228.

Mr. SHELBY. Mr. Speaker, I rise to express my deep concern over the proposed arms sale to Jordan.

Peace and stability in the Middle East is a key national interest and has direct ramifications on our own security and well-being.

Any arms sale to Jordan at this time is premature and an antithesis to peace. I am concerned that it will escalate the chances for war and increased terrorist activity.

King Hussein and Prime Minister Peres are currently making overtures of peace and it is the hope of all of us that these leaders will continue to demonstrate the resolve and courage to enter into direct peace negotiations.

In this climate of peace, an arms sale now would only bring about a tempest. It would not encourage the pursuit of peace, but the escalation of a regional arms race.

I also question whether we can rely on Jordan's assurances that United States supplied weapons will not be used against Israel. In 1964, United States supplied tanks to Jordan on the basis of such assurances, but 3 years later, Jordan sent these tanks to the West Bank where they were used in the Six-Day War. Again in 1973, Jordanian Army forces used American weapons against Israel in the Golan Heights.

We must not permit the weakening of the security of our good and trusted ally, Israel. I am convinced that the arming of Jordan will threaten Israel militarily, and also undermine its fragile economic recovery as more resources are shifted to defense.

Mr. Speaker, this resolution encourages face-to-face discussions between Israel and Jordan, and allows time for those negotiations. Should the peace process fail, Congress retains its leverage to disallow this arms sale.

Only when Jordan and Israel move beyond the loose rhetorical commitments to peace and make positive steps in the direction of a meaningful and lasting peace, should the sale of arms to Jordan even be considered.

Mr. FORD of Tennessee. Mr. Speaker, the issue at hand is a very simple one. Should we arm the State of Jordan before there is any indication of that nation sitting down to the bargaining table with their neighbors, the Israelis? While I do not reject the notion of an arms sale to Jordan in the future, it is the Jordanian nation that remains technically at war with the State of Israel, our most reliable ally in the region. I can see no reason at the present time for this chamber, in fact this country, to support such an arms sale, and it is in that regard that I am a strong supporter of today's resolution.

Detractors of this resolution believe that this measure is legal blackmail; that the Jordanians will turn to the Soviets to obtain their arms. Let me point out to these people that the Jordanians know full well that Soviet military hardware are delivered with many unwanted strings attached. I doubt that the King is ready to turn Jordan into a Soviet-client state.

It is more realistic to believe that instead of inviting in an influx of Soviet aides, the King will await a propitious time to announce that Jordan will sit down at the negotiating table with Israel. At that time, I will be more than ready to support this arms sale. A true peace in the region needs the strong participation of Jordan. I believe the Jordanians to be reasonable people, and will understand the present American concern about such a sale.

Mr. WIRTH. Mr. Speaker, I rise in support of the resolution. However, I believe the House's support for Senate Joint Resolution 228 should be carefully qualified. The willingness of the Congress to defer consideration of the arms sale to Jordan must not be construed by the administration as a signal that Congress will approve the arms sale come March 1, 1986.

In fact, the administration should prepare itself for a resounding defeat of any unconditional arms package if Jordan continues its staunch opposition to recognizing and negotiating directly with Israel.

Jordan may contend that the arms sale is a necessary prerequisite to its entry into the peace process. But we have seen through previous arms sales to Arab countries that advanced arms do not guarantee a commitment to peace with Israel. For example, in 1981, President Reagan conditioned the sale of AWACS planes to Saudi Arabia on that country's promotion of the peace process. Despite those conditions, the Saudis are still working to subvert the peace process by strongly supporting the PLO and Syria. Beyond that, they have made no secret of their efforts to destroy Israel. Their economic policies—especially their boycott against firms doing business with Israel—threaten to erode Israel's com-

mercial viability. In short, arms sales to Arab countries provide no guarantee of peace for Israel.

More likely, arms sales risk encouraging another Arab war against a vulnerable Israel. We cannot forget that Jordan has been involved in three wars against Israel in the last 37 years. It would be the height of folly to arm Jordan with advanced fighter aircraft without extracting an irrevocable commitment to peace from King Hussein.

For a better example of how to use arms sales to advance the peace process, we should look to Egypt. The United States did not send any arms to Egypt until it had entered into direct peace negotiations with Israel. Our Government rewarded Egypt for its pursuit of peace through direct negotiations. We must not similarly reward Jordan's opposition to direct negotiations, a position King Hussein has affirmed by calling for an international conference involving the Soviet Union, Syria, and the PLO. We must not lend credibility to the negotiating credentials of a country which continues to harbor the PLO, has yet to renounce its hostile intentions toward Israel, and has failed to abide by its recognition, in 1967, of Resolution 242.

Mr. Speaker, I urge our colleagues to approve Senate Joint Resolution 228 as an indication of congressional dissatisfaction with Jordan's delay of the peace process. It should also serve as an expression of concern about the President's arms proposal as presently constituted and conditioned.

The resolution calls for direct and meaningful negotiations. We should take this opportunity to define clearly the substance of that phrase to that Jordan has no illusions about the requirements it must meet to receive American military aid. We should unambiguously state that no arms sales to Jordan can take place until Jordan has begun direct negotiations with Israel. Those negotiations must be based on Jordan's full understanding and acceptance of U.N. Resolution 242 and the Camp David accords. Finally, Jordan must accompany its willingness to negotiate with a clear and definitive renunciation of violence against Israel.

Until those conditions are met, I will vote against any advanced arms package to Jordan. I urge our colleagues to follow the same course in order to assure the security of Israel, as well as further the cause of peace in the Middle East.

Mrs. KENNELLY. Mr. Speaker, I rise in support of Senate Joint Resolution 228, a resolution to bar the sale of any weapons to Jordan until March 1, 1986, unless direct and meaningful negotiations between Israel and Jordan are underway by then.

I was 1 of 281 House Members to cosponsor House Joint Resolution 428, the resolution to bar the administration's proposed arms sale to Jordan. I cosponsored that resolution because I believed that before we sell arms to Jordan, we need something in return from King Hussein, and that is a clear demonstration that he is willing to talk directly with Israel. I support Senate Joint Resolution 228 for the same reason: any arms sale to Jordan must come after, not before, substantive moves by King Hussein.

The Mideast peace process is stalled. It needs a push. But providing Jordan with advanced surface-to-air missiles, fighter jets, and antitank missiles isn't a push toward peace; it is a shove away from the negotiating table. We would be rewarding Jordan for its delays, and the result could well be that these crucial negotiations would never take place.

A clear majority of the House is already on record as opposing the arms sale for precisely this reason. This resolution achieves the same objectives: it says that peace talks, not arms sales, must be our first consideration in the Middle East. I support this resolution with the understanding that if there is no movement in the peace process by March 1, I will continue to stand with my colleages in opposing this arms sale.

Mr. MATSUI. Mr. Speaker, I rise in support of Senate Joint Resolution 228, which would delay the sale of $1.9 billion worth of sophisticated weapons to Jordan until March 1, 1986.

Of great importance to United States interests in the Middle Eastern region is the national security and survival of the State of Israel. Providing advanced aircraft to Israel's neighbor Jordan, who shares her longest border, would erode Israel's qualitative military superiority. Such a sale would seriously upset the military balance in the Middle East and introduce an added measure of instability to the region. It would also place an added financial burden on Israel's already strained economy.

I believe that an arms sale of this magnitude, at this delicate stage of the peace process, would harm the chances for a negotiated settlement. An arms sale to Jordan must not be made independent of any movement toward peace, but should come only after direct negotiations have achieved positive results.

The United States has a proven track record on this issue. President Carter brought 30 years of war between Egypt and Israel to an end with the Camp David accords. The Camp David accords, and subsequent adherence to the peace, have opened the door for both of those nations to receive increased financial support from the United States.

Today, with this resolution, we are sending a message to Jordan that is consistent with our Camp David policy: The road to receiving increased American support is reached through participation in the peace process.

Mr. Speaker, by taking this action today we are enhancing the prospects for peace in the region. I urge my colleagues to join me in support of this resolution.

Mr. LEVINE of California. Mr. Speaker, I rise in support of Senate Joint Resolution 228. This resolution states that prior to March 1, 1986, no letter of offer for any sale to Jordan of advanced weapons systems included in the administration's notification of October 21 shall be valid unless "direct and meaningful peace negotiations between Israel and Jordan are underway."

Adoption of this resolution will defer congressional consideration of arms sales to Jordan at a point when what is needed is time—time to let the peace process unfold.

Mr. Speaker, we cannot buy peace with arms sales. Those who believe that selling weapons to Arab nations will entice them to the peace table are misguided in their belief. Rather, arms sales should come after Arab nations have agreed to make peace with Israel and engaged in direct negotiations with it.

The ideas put forth by Israeli Prime Minister Shimon Peres in his speech to the United Nations, the statements of King Hussein, and the diplomacy of our own President all give reason to hope that Jordan and Israel will engage in direct negotiations. Direct negotiations are at the heart of any substantive effort to secure peace between these two countries. We can help serve the cause of peace by doing all we can to facilitate these negotiations. Adoption of this resolution will help avoid an acrimonious debate—a debate no one wants to engage in especially at this crucial time in the evolution of the peace process. If Jordan, which is a friend of the United States, makes peace with Israel, then Congress can in the future agree to sell it arms. This resolution gives the process needed time.

This is a responsible resolution. I support it and I urge my colleagues to support it as well.

Thank you.

Mr. BIAGGI. Mr. Speaker, I rise in strong support of Senate Joint Resolution 228 to delay until at least March 1, 1986, a proposed sale of some $2 billion in United States arms and weapons to Jordan. A delay of this type is absolutely essential at this time for without it we are undercutting in the worst possible fashion the recent peace initiative put forward by Prime Minister Peres of Israel.

In all candor, I would prefer that the administration had taken the initiative to completely withdraw this ill advised and poorly timed arms sale. Its approval would most certainly gut the latest peace proposal and could lead to a further imbalance of power in the Middle East threatening Israel's security.

Prime Minister Peres, in a dramatic speech before the United Nations last month, invoked the spirit of Camp David when he proposed a process that would lead to direct talks between Israel and Jordan. As he put it: "The state of war between Israel and Jordan should be terminated immediately. Israel declares this readily."

Prime Minister Peres' plan would involve negotiations that would be based on the U.N. Security Council Resolutions 242 and 338. Negotiations would be conducted directly between states and would not include a Jordanian-Palestinian delegation both comprising delegates that represent peace, not terror.

The United States called the Peres plan "Statesmanlike, thoughtful, and forward looking." King Hussein of Jordan welcomed the spirit of the Peres peace proposal. In his words:

I believe his speech represents the beginning of movement in the right direction and reflects a personal concern for the fate of future generations and a determination to contribute toward the achievement of peace in our time.

The fact is Prime Minister Peres has made a bold and important proposal which deserves an opportunity to succeed. It should not be diminished by virtue of an action by the United States to sell sophisticated arms to a nation which remains an adversary of Israel. Yet that is precisely what the administration has proposed with the Jordan arms sale.

Yet the issue that perhaps troubles me the most is the fact that the United States is not doing more to ensure that Israel maintains its military superiority in the Middle East. We propose to sell $2 billion in arms to Jordan at a time when her import of arms is rising at a rapid and dramatic rate. Today, 25 percent of Jordan's gross national product goes to arms and weapons.

Where is the incentive for King Hussein to enter into peace talks with Israel if we insist on this sale? Further, where are the guarantees against Jordan converting these arms into offensive purposes against Israel? For this reason alone, this sale should be delayed if not entirely shelved.

According to a dramatic article in a recent Washington Times, Israel's military edge against its Arab adversaries "is steadily eroding and this increases the danger of military confrontation." Again according to the Washington Times, whereas in recent years Israel's military expenditures have remained steady or even slightly decreased, Arab military expenditures have skyrocketed and in the past decade alone have jumped from $10 to about $40 billion. We should do nothing to exacerbate this situation and should not pursue arms sales to Arab nations on the assumption that Israel's military superiority is unchallengeable.

Let us not proceed to reward King Hussein and Jordan by selling them arms. Let us not forget the precise nature of relations between Israel and Jordan. Jordan does not even recognize Israel's right to exist. Jordan does not condemn the PLO and in fact continues to negotiate with them. Jordan has no trade with Israel. Finally, Jordan continues to militarize along their border with Israel, posing a daily threat. For this they should not be sold $2 billion in additional U.S. arms and weapons.

Let us view the Peres plan as a catalyst that could lead to a resumption of the Camp David principle and perhaps an expansion of it. Direct negotiations between Israel and Jordan are critical to any plan to bring peace to the Middle East and should be pursued. Let us contribute to a furtherance of the conditions for peace. Let us not contribute to the furtherance of conflict.

Finally, the resolution does delay action on the sale until March of next year unless direct and meaningful negotiations between Israel and Jordan are underway. Let us hope that this is the outgrowth of this resolution. As a cosponsor and supporter, it is my intent.

Mr. SHAW. Mr. Speaker, we find ourselves in a paradoxical situation: We are ready to sell arms to a nation that recognizes the fervent enemy of our closest ally in the Middle East—Israel. Our President has indicated his support for a sale of sophisticated weapons to Jordan, which recognizes the Palestinian Liberation Organization, and I want to take this opportunity to urge the President to take a long and critical look at political conditions in the Middle East before moving forward with the sale.

This arms sale will do little to further peace in the Middle East. More likely, it will strain tensions even further and disrupt our own relations with our ally, Israel. Because of these reasons, I have joined other Members of this Congress in signing a joint resolution opposing any arms sale to Jordan prior to the commencement of direct bilateral negotiations between Jordan and Israel.

Our resolution further states that if action on the sale of arms to Jordan is taken before the resolution is enacted then the President shall make no deliveries to Jordan pursuant to that sale without specific authorization by the Congress. I want to applaud my fellow Congressman in the Florida delegation, LARRY SMITH, for his commitment to this important measure.

Mr. Speaker, the President has notified us of his intention to sell some of our most advanced aircraft and air defense systems to Jordan. I have supported a measure approved here in the House and in the Senate that would delay the sale until at least March 1986.

It is vital that we maintain what precious stability currently exists in the Middle East. Before the President approves this sale, I hope he will give great consideration to its implications.

Mr. FASCELL. Mr. Speaker, I have no further requests for time, and I yield back the balance of my time.

Mr. SPEAKER pro tempore. The question is on the motion offered by the gentleman from Florida [Mr. FASCELL] that the House suspended the rules and pass the Senate joint resolution, Senate Joint Resolution 228.

The question was taken; and (two-thirds having voted in favor thereof) the rules were suspended and the Senate joint resolution was passed.

A motion to reconsider was laid on the table.

SUPPORT OF HOUSE OF REPRESENTATIVES FOR PRESIDENT REAGAN AT GENEVA SUMMIT

Mr. FASCELL. Mr. Speaker, I move to suspend the rules and agree to the resolution (H. Res. 316) expressing the support of the House of Representatives for the President as he prepares to meet with Soviet General Secretary Gorbachev in Geneva, Switzerland, and expressing its hope that this summit meeting will provide a basis for a freer, more stable, and more peaceful world.

The Clerk read as follows:

H. RES. 316

Whereas the November 1985 summit meeting between President Reagan and Soviet General Secretary Gorbachev in Geneva, Switzerland, provides an historic opportunity for the United States and the Soviet Union to begin to reduce tensions between the superpowers; and

Whereas President Reagan exercised leadership and statesmanship in seeking this important meeting with General Secretary Gorbachev: Now, therefore, be it

Resolved, That the House of Representatives hereby offers its support for the President as he prepares to meet with Soviet General Secretary Gorbachev, and expresses its hope that this summit meeting will provide a basis for a freer, more stable, and more peaceful world.

The SPEAKER pro tempore. Is a second demanded?

Mr. BROOMFIELD. Mr. Speaker, I demand a second.

The SPEAKER pro tempore. Without objection, a second will be considered as ordered.

There was no objection.

The SPEAKER pro tempore. The gentleman from Florida [Mr. FASCELL] will be recognized for 20 minutes and the gentleman from Michigan [Mr. BROOMFIELD] will be recognized for 20 minutes.

The Chair recognizes the gentleman from Florida [Mr. FASCELL].

Mr. FASCELL. Mr. Speaker, I yield myself such time as I may consume.

Mr. FASCELL. Mr. Speaker, I rise in support of the resolution at the desk concerning the upcoming Reagan-Gorbachev summit.

This resolution received unanimous approval in the Committee on Foreign Affairs and is cosponsored by the ranking minority member, Mr. BROOMFIELD.

The resolution is simple and straightforward. It commends President Reagan for his leadership and statesmanship in seeking the upcoming summit meeting with General Secretary Gorbachev and expresses the hope that the summit meeting will provide a basis for a freer, more stable, and more peaceful world.

Mr. Speaker, I am sure all of us have our own ideas about what the summit meeting should accomplish concerning arms control, human rights, regional issues, and bilateral relations. Nonetheless, it is important that we send the President a clear bipartisan message of support. This resolution accomplishes that important task and I urge its approval.

□ 1250

Mr. BROOMFIELD. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, this resolution expresses the sense of Congress that this body and the American people offer their support for the President's efforts for constructive discussions in Geneva. This resolution is both timely and appropriate. Now is the time to stand squarely behind our Chief Executive as he prepares to meet with Mr. Gorbachev.

Who can doubt the importance of the upcoming Geneva talks? Our two nations share a common interest in the survival of mankind in this nuclear age. There is tension, however, between our two nations over numerous issues. The issues of mutual concern between our two countries also affect our allies and friends around the globe.

I believe that President Reagan's latest arms reduction proposal demonstrates our government's strong commitment to achieve mutual and verifiable reductions in nuclear weapons. Our President also deeply believes in the rights of human beings and the importance of freedom and peace. While there are deep differences between our two systems, I hope that progress can be made in resolving these issues.

In his talks with the Soviet leader, our President will seek ways to ease tensions in the relationship between our nations. On the summit agenda will be an effort to reduce nuclear arms. Discussions will be held on ways to ease regional conflicts. In addition, President Reagan will talk about human rights violations in the Soviet Union as well as other areas of friction. Finally, he will attempt to establish a structure for preserving peace and stability.

All of us share the same vision of the future. We all hope for a world at peace where reason and understanding prevail for all mankind.

As we approach the summit, I urge my colleagues to support our resolution calling for the Congress and the American people to stand behind the President and support his efforts at Geneva.

Mr. FASCELL. Mr. Speaker, I yield such time as he may consume to the gentleman from New York [Mr. GILMAN].

Mr. GILMAN. Mr. Speaker, I am pleased to rise in support in House Resolution 316. Yesterday, on Veterans Day, the President spoke movingly at Arlington National Cemetery about his hopes for the forthcoming summit talks with Soviet Secretary-General Gorbachev. He said that he would bear in mind the sacrifices of millions of our American servicemen in past wars as he strove to work for peace at the summit.

The prayers and hopes of millions of Americans go with the President as he leaves for Geneva. We want him to be open to all new suggestions, yet firm in his defense of our values and interests. We want our President to raise topics of a bilateral nature that go to the heart of our humanitarian concerns about the fate of individuals behind the Iron Curtain. We want him to raise issues of regional peace. Finally, we want him to exert every effort to move toward progress in discussions on nuclear armaments.

There is enormous pressure on the President to come to a final agreement on one or more of these issues with the Soviet leader. The fact remains, however, that in all likelihood insufficient groundwork has been laid for any final agreements to be concluded. The important objective to be achieved at this summit is that positions become understandable and that areas for possible movement by each side become apparent. Then in the weeks and months to come, the negotiating teams can move forward.

The important aspect of the summit for all of us to bear in mind—both here and abroad—is that the United States truly wants peace and will make every effort to achieve peace at the summit and thereafter.

Mr. FASCELL. Mr. Speaker, I thank the gentleman from New York for his comments.

Mr. BROOMFIELD. Mr. Speaker, I yield 2 minutes to the gentleman from California [Mr. DORNAN], a member of our committee.

Mr. DORNAN of California. Mr. Speaker, I want to commend our chairman of the Foreign Affairs Committee and the Republican leader on foreign affairs for bringing to the floor this resolution of guidance to our President. Throughout this next week the world will be watching the U.S.-U.S.S.R. talks and the buildup to these incredibly important discussions. The agenda is wide open. Our President must lead with the subject of human rights.

Over the weekend, I had three separate meetings with fighters for human rights including Soviet citizens who have left their country seeking freedom. There were dissidents who fled for political reasons and religious reasons. All of them begged me and the six other representatives from this great legislative body that we should advise our President not to be dissuaded from using that linkage between human rights and the strategic issues that have brought the Soviet Union to the Geneva bargaining table. After all, remember that the Soviets said they would never deal with Mr. Reagan throughout the full 8 years of his term after they broke off the START talks 2 years ago.

I believe that human rights is exactly the key to make the Kremlin get serious about real, hard-figures arms reductions. Stalin once cynically referred to the value of a single human life: He said that the death of millions of people in war or revolution is not comprehensible, but the death of one person can be understood and used. Consider tragic Miroslav Medvid, who is probably in chains somewhere out there in the Atlantic right now, heading back to Russia and a miserable fate. Consider all of the various refuseniks, Hebrew scholars, or members of broker families pleading to be united with their husbands or wives in the West. They all have high hopes about the Geneva summit. I think the President has been an inspiration to these people over the past 5 years. Now he is going to sit down with Mr. Gorbachev, and clearly explain why we are concerned about the Soviet violations of human rights. Especially in Afghanistan, where they use heavy armor and huge helicopter gunships to crush just hundreds upon hundreds of small villages. These heavy helicopter gunships are also being used to kill young blacks in Angola, fighting for their freedom beside Jonas Sivimbi.

This "Hind" helicopter gunship is used extensively to kill freedom fighters in Afghanistan and Angola and now it has been flying in combat in Nicaragua throughout July, August, September, and October killing freedom fighters here on our own continent of North America. And then there is the Soviet use of poison gas in Afghanistan in violation of all treaties—1925-72.

These human issues are important to the world, particularly to the young world. I believe our President will not let us down, and that when these 2 days, November 19 and 20, have passed many of use begin to discuss the historical significance in special orders thereafter, that we will be expressing great pride in our President. We will be as proud of him and his performance as we have been of any President in our lifetime.

Mr. VALENTINE. Mr. Speaker, House Resolution 316 addresses the most important issue of our time, the relationship between the two most powerful nations on Earth. As President Reagan meets with secretary Gorbachev, I want to express my hope for the success of their meeting in Geneva.

We must be clear about the definition of success. The President faces the challenge of showing both strength and flexibility. He must succeed in negotiating for peace while guarding our Nation's right to military strength.

Our country's allies, especially in Europe, will be looking to the President as the leader of NATO. He will have to succeed in keeping their interests in mind as he talks with the Soviet leader, and he will have to exercise wisdom in balancing their

individual perspectives against those of America.

The Soviets act on the international stage with no illusions about the role of personal friendships between the leaders of nations. They have stressed again and again that fundamental national drives are far more enduring than personal relations. It would be foolish indeed to expect a quick and permanent cure for the ills of the world simply because of this meeting in Geneva.

The President must succeed in understanding this without adopting a pessimistic approach. The President can succeed in laying the ground work for a better relationship between the world's strongest countries. He can reassure the Soviets, and the rest of the world, that America strives for peace but insists on its right to a strong and effective national defense. The people of North Carolina join me, I am sure, in wishing him success in this difficult task.

Mr. BROOMFIELD. Mr. Speaker, I have no further requests for time, and I yield back the balance of my time.

Mr. FASCELL. Mr. Speaker, I have no further requests for time, and I yield back the balance of my time.

The SPEAKER pro tempore. The question is on the motion offered by the gentleman from Florida [Mr. FASCELL] that the House suspend the rules and agree to the resolution, House Resolution 316.

The question was taken; and (two-thirds having voted thereof) the rules were suspended and the resolution was agreed to.

A motion to reconsider was laid on the table.

GENERAL LEAVE

Mr. FASCELL. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days in which to revise and extend their remarks on the resolution just adopted, House Resolution 316, and on the Senate joint resolution previously adopted, Senate Joint Resolution 228.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Florida?

There was no objection.

SUPPORT FOR PRESIDENT'S DISCUSSION OF SOVIET PRESENCE IN AFGHANISTAN

Mr. SOLARZ. Mr. Speaker, I move to suspend the rules and agree to the resolution (H. Res. 300) supporting the intent of the President to discuss with leaders of the Soviet Union American concerns with the Soviet presence in Afghanistan, and for other purposes.

The Clerk read as follows:

H. RES. 300

Whereas military forces of the Union of Soviet Socialist Republics invaded Afghanistan in December 1979;

Whereas there are at present more than 115,000 Soviet troops engaged in the systematic destruction of Afghanistan through a scorched earth policy which includes the destruction of crops, water, and food supplies, the agricultural infrastructure, and villages, and includes the widespread killing of innocent civilians;

Whereas Soviet tactics in Afghanistan have directly caused the following: a refugee population in Iran and Pakistan of more than three million, the largest refugee population in the world; hundreds of thousands of war-related casualties; deprivation and suffering for most Afghan citizens; and the possibility of large-scale famine;

Whereas Soviet troops and their Afghan proxies have employed the use of chemical weapons against innocent Afghans;

Whereas the human rights abuses perpetrated by Soviet troops against the Afghan population, including women, children, and the elderly, have been thoroughly documented by the report from Helsinki Watch entitled "Tears, Blood and Cries" and by the report on the situation of human rights in Afghanistan prepared for the Economic and Social Council of the United Nations;

Whereas both the United States and the United Nations have repeatedly called for a peaceful, negotiated settlement of the conflict, including the immediate withdrawal of all foreign troops from Afghanistan; and

Whereas no President of the United States has met directly with the head of the Soviet Union since the invasion of Afghanistan in December 1979: Now, therefore, be it

Resolved, That the House, in an effort to bring about an end to the massive human rights abuses and murderous policies which the Soviet Union is Perpetrating against the population of Afghanistan—

(1) strongly supports President Reagan's intent to discuss directly with Soviet leaders American concerns with the Soviet presence in Afghanistan; and

(2) calls upon the President to reiterate the desire of the United States to achieve a negotiated political settlement agreeable to all interested parties in Afghanistan, which settlement should include-

(A) the complete withdrawal of all foreign troops;

(B) the restoration of the independent and nonaligned status of Afghanistan;

(C) self-determination for the Afghan people; and

(D) the return of Afghan refugees with safety and honor.

SEC. 2. The Clerk of the House shall transmit a copy of this resolution to the President.

The SPEAKER pro tempore. Pursuant to the rule, a second is not required on this motion.

The gentleman from New York [Mr. SOLARZ] will be recognized for 20 minutes and the gentleman from Michigan [Mr. BROOMFIELD] will be recognized for 20 minutes.

The Chair recognizes the gentleman from New York [Mr. SOLARZ].

Mr. SOLARZ. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, I want to begin by paying a very special tribute to my very good friend and our distinguished colleague from California [Mr. LAGOMARSINO], the author of this resolution in the House, which has already been adopted by the other body, where it was introduced by Senator HUMPHREY on October 25.

Perhaps more so than any other Member of the House of Representatives, the gentleman from California, in his own quiet but effective way, has managed to put the issue of Afghanistan on the agenda of the Congress and of the country, and he has indefatigably pursued the effort to mobilize support, both in the Congress and around the country, on behalf of American assistance; politically, diplomatically and in other ways, for the very brave resistance fighters in Afghanistan.

This resolution which he authored which is before us today expresses the support of the Congress for the determination of President Reagan to raise the Afghan problem in his discussions with the leader of the Soviet Union, Mr. Gorbachev, when they meet in Geneva next week.

This will indeed by the first summit conference between the leaders of our two nations since the invasion of Afghanistan by the Soviet Union in 1979.

□ 1300

Over the course of the last 6 years, up to a million Afghans have lost their lives in ways that are clearly attributable to the Soviet occupation of their country. Through carpet bombing, through the destruction of crops and irrigation networks, and through the use of chemical agents against the people of Afghanistan as well, hundreds of thousands and up to a million of them have lost their lives; a third of the entire Afghan nation has been driven into exile and are now living as refugees in the neighboring nations of Pakistan and Iran.

At this very moment, 115,000 Soviet troops continue to occupy the country. In response to this brutal invasion, the people of Afghanistan, almost as they were one, have risen up against their oppressors. There can be no doubt but that the primary issue on the agenda at Geneva when President Reagan meets with Chairman Gorbachev will be the overriding need for some kind of breakthrough in the effort to bring the arms race and nuclear weapons under control. But arms control and the arms race will not be the only issues under discussion at Geneva. It is very important that some of the regional conflicts which could potentially escalate into superpower confrontations be put on the agenda as well. And there is indeed no other issue, other than arms control, where the Soviet Union could make a greater contribution to the reduction of tensions between our two countries than on Afghanistan, if they were prepared to indicate a willingness to withdraw all of their forces from that country and to permit the Afghan people to freely determine their own future and the refugees who have been driven from that country to return in honor.

I am sure that President Reagan would have raised this issue at Geneva

even in the absence of this resolution, but with its adoption he will cross the Atlantic for his historic meeting with Gorbachev confident in the knowledge that the Congress of the United States stands foursquare behind him in his determination to raise this matter at the summit.

This is an issue on which all of us, Republicans and Democrats, conservatives and liberals, Members of Congress and the members of the executive branch, are united, in the determination that we should use all of our influence to facilitate a resolution of the Afghan problem in a way which is compatible with the legitimate concerns of the Afghan people as well as with the security concerns of the Soviet Union and the strategic interests of the United States and our friends in the region.

So I want to pay tribute to the gentleman from California [Mr. LAGOMARSINO] for bringing this matter before us, and I urge my colleagues to vote for this resolution when the debate has concluded.

Mr. BROOMFIELD. Mr. Speaker, I yield myself as much time as I may consume.

Mr. Speaker, I want to commend my colleague, the gentleman from California [Mr. LAGOMARSINO] for sponsoring this resolution, which offers the support of the Congress for the President's plans to discuss United States concerns about Afghanistan with Soviet leaders. I believe that it is vital that Congress voice its support for our President's efforts.

As my colleagues know, the Soviets have been terrorizing Afghanistan for 6 years. Their scorched Earth policy has resulted in the destruction of agriculture in that country as well as the killing of innocent civilians. Soviet atrocities and the extensive use of chemical weapons have been well documented. The Soviet occupiers of that country have even booby-trapped toys in order to inflict casualties on the poor Afghani people. Millions of refugees have fled from that long-suffering country.

Our country and the United Nations have called for a negotiated settlement of the conflict, yet little progress has been made.

This resolution supports the President's intent to discuss directly with Soviet leaders our deep concerns about the illegal Soviet presence in that country. It also calls upon the President to restate our intention to seek a negotiated political settlement agreeable to all interested parties to include withdrawal of foreign troops and self-determination for the Afghani people.

I urge all of my colleagues to join me in supporting this worthwhile resolution.

Mr. Speaker, I yield such time as he may consume to the gentleman from California [Mr. LAGOMARSINO].

Mr. LAGOMARSINO. Mr. Speaker, I want to commend the chairman of the full committee, the gentleman from Florida [Mr. FASCELL], the chairman of the subcommittee, the gentleman from New York [Mr. SOLARZ], and, of course, the ranking Republican, the gentleman from Michigan [Mr. BROOMFIELD], for their help and assistance in bringing this resolution to the floor.

House Resolution 300 is quite simple but, I believe, important legislation expressing the concern and the interest of the House regarding the future of the Afghan people and nation.

As has been pointed out, the other body has already passed identical legislation. This legislation is very similar to legislation offered by the gentleman from New York [Mr. KEMP], and cosponsored by many of my colleagues, and he is a cosponsor of this measure as well.

Mr. Speaker, House Resolution 300 supports the intent of the President to discuss during his November 19–20 summit meetings with Soviet General Secretary Gorbachev American concerns with the continuing Soviet presence in Afghanistan. In addition, the resolution calls upon President Reagan to reiterate the desire of the U.S. House of Representatives and the American people to achieve a negotiated political settlement agreeable to all interested parties in Afghanistan. Such a settlement should include the complete and total withdrawal of all Soviet troops; the restoration of its independent and nonaligned status; self-determination for the valiant Afghan people; and, the return of Afghan refugees with safety and honor.

Mr. Speaker, this legislation notes that in December 1979 tens of thousands of Soviet Red Army troops invaded and began occupying that south Asian nation. It further notes that the Soviets—today—have over 115,000 troops inside Afghanistan. And, according to National Security affairs adviser Robert McFarlane, these troops "are waging the most brutal war underway on the face of the earth." The resolution states that the Kremlin-directed "scorched-earth" policy in Afghanistan includes the systematic destruction of crops, water and food supplies, the agricultural infrastructure, and villages, and includes the widespread killing of civilians.

Furthermore, the resolution states that Soviet tactics in the war against Afghanistan have directly caused the following: a refugee population in Iran and Pakistan of more than 3 million, the largest refugee population in the world; hundreds of thousands of war-related casualties; deprivation and suffering for most Afghan citizens; and the possibility of wide-spread famine.

In their ruthless drive to conquer that once peaceful and "unrulable" land, the resolution notes, Soviet troops and their Afghan proxies have employed chemical weapons against innocent Afghan tribesmen and villagers. When we discuss Soviet violations of international treaties and agreements, this flagrant violation becomes all the more difficult to ignore. The use of deadly poisons against innocent tribesmen who merely want to be left to their families, their crops and their culture, is simply appalling and, I believe, says much about the people sitting across from us at the arms control negotiating tables in Vienna, Geneva, and elsewhere.

Mr. Speaker, the resolution also notes that the human rights abuses perpetrated by Soviet troops against the Afghan population, including innocent women, children and the elderly, are almost unimaginable. As Americans, we find it difficult to understand how such a ruthless campaign of terror can be so coldly planned and executed against our fellow human beings. It is difficult to escape the fact that a war of genocide is underway in Afghanistan, Mr. Chairman. As the Soviets have done so often in the past, terror, torture, famine and execution are being used by the Soviets as tools to smash the will to fight of a freedom-loving nation and people. But should such behavior surprise us? Surely it should not. After all, it constitutes merely a repeat performance of what the world witnessed when the "peace-loving" Soviets "Liberated" Lithuania, Estonia, Latvia, and so many other nations and peoples.

As Americans, we cannot turn a blind eye to this—even as horrible as it appears. We in this Congress, and as Americans, who represent the beacon of hope and freedom for the world's downtrodden, have a moral responsibility to bring the plight of these courageous people to the forefront of international attention. Let me just briefly add that a thorough documentation of Soviet human rights practices and violations has been published by Helsinki Watch, entitled, "tears, blood and cries," and that another report on the human rights conditions in Afghanistan has been drafted by Felix Frmacora, an able international civil servant, for the economic and social council of the United Nations. I highly recommend these reports to my colleagues for a grim recital of what is today going on inside Afghanistan. But let me warn you, such reading is not for the squeamish.

The resolution notes further that both the United States and the United Nations have repeatedly called for a peaceful, negotiated settlement of the conflict, including the immediate withdrawal of all Soviet troops from Afghanistan. The Soviets have expressed a profound lack of interest in participating directly in these negotiations. They view the conflict, instead, as one

between Pakistan, which allegedly provides safe haven and support for CIA and Chinese bandits and mercenaries—a ludicrous and blatantly false claim—and the regime of Babrak Karmal in Afghanistan. But the world knows better. We all know that the Soviets are the ones directing this brutal war of aggression against a once-independent, nonaligned and Islamic nation. We all know that the Soviets are manipulating the puppet regime of Babrak Karmal. We all know it is the Soviets who are directly threatening Pakistan with repeated border violations and armed attacks against Pakistani border villages and refugee camps. We all know it is the Soviets who initiated this expansionist war of occupation and repression. And we all know that it is the Soviets who could stop this bloody war if they chose to.

Members of this body are undoubtedly aware of the tragic plight of the Afghan people. The case of Afghanistan is one of the most clear-cut examples of treachery and foreign occupation and oppression in modern times. The Soviets have used ruthless tactics to try to eliminate all resistance to their barbarous policies there; yet, the Afghan people have courageously refused to surrender their freedom, and their nation, to Communist domination and oppression and have continued their armed struggle for freedom to this very day.

It is up to us as Americans to insure that the light of freedom in Afghanistan is not extinguished. We have it in our power to assist these desparate people in their time of need. I was proud to have sponsored an amendment to the fiscal 1986 foreign aid authorization bill, which has since been signed into law by the President, to provide—for the first time—overt humanitarian assistance to the Afghan people, inside that war-torn country. That amendment, which passed unanimously, is, I believe, a strong signal of the support of the American people and the Congress for the courageous Afghans, who are so fiercely battling for freedom against the world's most-powerful land army. Passage of this resolution will, I believe, Mr. Chairman, add further impetus to the Afghan people's worthy cause.

Just briefly, Mr. Speaker, let me explain some of the underlying rationale behind this legislation. While the American Government supports the worthy goal of a "peaceful, negotiated settlement", many of us are concerned that those most directly affected by Soviet aggression, the Afghan people, might be left out of any solution. This legislation makes plain that the Congress and the American people refuse to be party to an agreement which does not take into consideration, and negotiations which do not actively seek, the views of the Afghan people. Any diplomatic negotiations to find a "solution" to the Afghan problem" must include participation by the non-Communist Afghan leaders themselves.

I would also like to just briefly point out to my collegues that many of the leaders of "free Afghanistan" will be in New York this week to seek admission to the United Nations General Assembly. I wish them great luck and can only say that this action is one which our Government can and should support. These rebel leaders are certainly better representative of the Afghan nation than the representatives of the puppet regime of Babrak Karmal, which so ruthlessly destroys Afghan villages, mutilates and disfigures Afghan children and violates practically every norm of decency and human behavior.

Mr. Speaker, I urge my colleagues to support this important legislation and to send a strong signal to the President and to the Soviets in these last few days prior to the Reagan-Gorbachev summit. That signal is that, if the Soviets hope for an improved bilateral relationship with the United States, they can do much to improve the climate of relations by getting out of Afghanistan and letting the lives of the Afghan people begin to return to normal. More than any one single event, the Soviets' quitting Afghanistan could signal that they, too, seek an improved bilateral relationship.

Mr. SOLARZ. Mr. Speaker, I yield such time as he may consume to the gentleman from New York [Mr. BIAGGI].

Mr. BIAGGI. Mr. Speaker, I thank the gentleman for yielding, and I commend the committee for reporting this resolution.

It clearly focuses attention on a terrible situation in Afghanistan. The Afghans are tremendously heroic and brave in resisting the encroachment and domination of the Soviet Union, and hopefully, that issue can be met and addressed at the Geneva summit, and I am sure this resolution will be of substantial importance.

Mr. Speaker, once again I thank the gentleman for yielding.

Mr. SOLARZ. Mr. Speaker, I yield such time as he may consume to our extraordinarily distinguished, able, effective, and beloved chairman of the full committee, the gentleman from Florida [Mr. FASCELL].

□ 1315

Mr. FASCELL. I thank the gentleman for yielding.

Mr. Speaker, I take this time to rise in strong support of this resolution. The chairman of the subcommittee Mr. SOLARZ, beat me to the punch a little bit because, really, one of the reasons I took this time was to express my appreciation to him for his leadership on the Committee on Foreign Affairs, where the gentleman from New York does an outstanding job in every issue that I can think of. He is dedicated and determined. He has made a substantial contribution to the foreign policy of this country in a very constructive way.

And may I add my commendations, also, to the gentleman from California, who is the chief sponsor of this resolution, in raising an issue which is of vital concern to the American people, for what is involved here is a matter of principle. The Soviet Union is, of course, a great country. But it seems almost unbelievable to think of what they have done to their own creation in Afghanistan. This fight started not because Afghanistan was free; this fight started because the Soviets did not like the kind of Communist government that was in there. So this whole fight, this whole destruction of freedom in Afghanistan, is simply for the Soviet Union to show not only the people of that country but to the world that if everybody is not in a little square box that looks exactly like the box the Soviets want, they will go out and destroy people who show the slightest variation from whatever it is the leadership in that government wants to have.

This is a phenomenal thing we are seeing in Afghanistan—the destruction of a people and a country, in a dispute over a slight variation within their own system.

So here we are, as a matter of great moral conviction, talking about self-determination and human rights. This is a matter that should be of greater interest to the Soviet Union than anyone else because of the message that they have given so clearly to the Third World that if you are going to choose a different system, if you are not going to go to the democratic process, you better be darn sure what kind of a Communist process you choose, because if they do not like what you are doing even as Communists, they are going to set out to destroy you. That is the message of Afghanistan.

But that is not the reason I took the floor. I took the floor because I want the American people to know about this bipartisan support for this. They read and they hear about so much contention in the Congress, and that the parties are always fighting and that there is a dipute between the Republicans and the Democrats or between the House of Representatives and the other body or the Congress and the chief administrative officer of the country, the President of the United States. Yet what we have demonstrated in the Committee on Foreign Affairs since the beginning of this Congress is that we have managed to take extremely important issues with strongly held views of both the Republican Party, the Democratic Party, lib-

erals, conservatives and people in the middle, and we have forged a bipartisan consensus. And this resolution is another example of that effort.

I want the American people to understand and realize that all is not lost. While we have our different parties, while we have our differences of opinion, when it comes down to the bottom line, we come together to support not just the President of the United States, not just some political party, but we support what is in the best interest of the people of the United States, and the lovers of freedom around the world.

Mr. BROOMFIELD. Mr. Speaker, I yield 2 minutes to the gentleman from New York [Mr. GILMAN.]

Mr. GILMAN. Mr. Speaker, I commend the author of this resolution, the gentleman from California [Mr. LAGOMARSINO], a distinguished member of the Committee on Foreign Affairs. It succinctly sets forth what I believe is the overwhelming sentiment of the Members of the House, and indeed, the American people, that the Soviet presence in Afghanistan over 100,000 Soviet troops, is offensive and should be withdrawn. The President has the full support of the House in his efforts to put forward this position and to work for a peaceful solution to the problems of Afghanistan. Such a resolution should include the complete withdrawal of all foreign troops, the restoration of Afghanistan's nonaligned and independent status, self-determination for the Afghan people, and the safe return of Afghan refugees to their homes.

Mr. BROOMFIELD. Mr. Speaker, I yield 2 minutes to the gentleman from Pennsylvania [Mr. RITTER].

Mr. RITTER. Mr. Speaker, Afghanistan is important to the upcoming summit talks because it is a crucial human rights question. It is the most egregious violation of human rights in the world today. The Soviet Union is systematically—I say systematically—destroying the life and the people of the whole nation in Afghanistan.

Afghanistan is a question of world peace. While there are 115,000 Soviets troops in Afghanistan waging war against the Afghan nation, world peace cannot be achieved.

And also extremely important is that Afghanistan is a strategic question for the United States and for Western civilization.

Afghanistan occupies the high ground above South Asia. Afghanistan is some 300 miles from the Arabian Sea. On the Arabian Sea is the port of Gwadar, the finest deep-water port in the area. If the Soviets took Afghanistan, if they had a stable situation there, it would not be a great endeavor for them to move south and take the warm-water port, the dream not only of commissars, but of czars, going back through Russian history; their navy, positioned on the Arabian Sea could easily threaten the oil-shipping lanes of the West.

Thus, Afghanistan poses crucial questions for the American people, for the people of the West, for the question of war and peace, for the question of human rights, and for the question of strategic balance between the two superpowers.

I support this resolution and urge the President to bring up the question of Afghanistan with Mr. Gorbachev in the most serious and deliberate fashion.

Mr. SOLARZ. Mr. Speaker, I yield 2 minutes to the gentleman from Michigan [Mr. LEVIN].

Mr. LEVIN of Michigan. I thank the gentleman for yielding.

Mr. Speaker, I rise in support of this resolution. What it says again is that human rights issues represent an indispensable subject at the forthcoming summit and that within that indispensable ambit must be included the discussion of the plight of Afghanistan.

It is important because the summit approaches; it is important because the sixth anniversary of the invasion of Afghanistan by Soviet troops is fast approaching. And since then, the picture there has become more brutal, more gruesome, rather than less.

It is also important to say this because, in the last week or two, we have seen a couple of important events. They represented single acts, acts by two Soviet citizens who tried to leave the Soviet ambit, who tried, literally and figuratively, to "jump the Soviet ship." The results, I think, highlight for us the importance of human rights issues. Those were two individuals. But I think we have learned in our discussion and approach to human rights issues that every single human life has to count. And here, in the case of Afghanistan, we are talking about millions of people who want their freedom and whose freedom at this point is being suppressed.

So I am privileged to rise in support of this resolution. I hope it will pass this House unanimously.

Mr. SOLARZ. Mr. Speaker, I yield such time as he may consume to my very good friend, the gentleman from California [Mr. LEVINE].

Mr. LEVINE of California. Mr. Speaker, I rise in support of House Resolution 300, supporting the intent of the President to discuss with leaders of the Soviet Union American concerns with the Soviet presence in Afghanistan.

It is almost 6 years since the Soviet Union invaded Afghanistan and cast an enduring chill over East-West relations. There are now more than 115,100 Soviet troops engaged in the systematic destruction of Afghanistan. The Soviets dominate Afghanistan's security forces and the bureaucracy. They have constructed extensive military and logistical facilities to support their forces and have tied Afghanistan closer than ever to the Soviet economic system. They are engaged in a scorched earth policy which includes destruction of crops, water and food supplies. They have destroyed villages and have killed Afghan civilians. Massive human rights abuses by Soviet troops against the Afghan population have been documented by Helsinki Watch.

The Soviet occupation and the internal turmoil in Afghanistan have caused the flight of one-fourth or more of its pre-1979 population, creating the largest refugee population in the world. Close to 3 million Afghan refugees are reported to be in Pakistan, and some 1½ million in Iran.

Soviet troops and their Afghan proxies have used chemical weapons against innocent Afghans. Soviet strategy seems to be to maintain control of Afghanistan with a minimum commitment while, ominously, seeking a new generation of Afghan Communist leader loyal to Moscow.

Both the United States and the United Nations have repeatedly called for a peaceful, negotiated settlement of the conflict in Afghanistan, including the immediate withdrawal of all foreign troops from that country.

Mr. Speaker, the President will soon meet with Soviet Chairman Gorbachev. He has indicated he will discuss the Soviet occupation of Afghanistan with the Soviet leader. The resolution we are considering affirms our support for the President's intent to discuss directly with Chairman Gorbachev our concerns about the Soviet presence in Afghanistan. It calls upon the President to reiterate our desire to achieve a negotiated political settlement which should include: First, the complete withdrawal of all foreign troops; second, the restoration of the independent and nonaligned status of Afghanistan; third, selfdetermination for the Afghan people; and fourth, the return of Afghan refugees with safety and honor.

The United States must do all it can to end the massive human rights abuses, the suffering and the destruction caused by the Soviet occupation of Afghanistan. This resolution is an affirmation of our goal.

I strongly support House Resolution 300, and I urge my colleagues to do so as well.

Thank you.

Mr. VALENTINE. Mr. Speaker, House Resolution 300 expresses the support of the House for an end to the Soviet Union's oppressive occupation of Afghanistan. We must express in no uncertain terms the repugnance we feel for the methods and goals of the U.S.S.R. in this innocent land.

It is well known that the Soviet Union fomented a change of government in Kabul in order to make itself appear as an invited guest fighting for the restoration of order in Afghanistan. The free world had no trouble in seeing through this facade. To this day, Soviet armies continue to inflict gruesome suffering on the people of Afghanistan.

The Soviet compulsion to subdue this nation stands as distasteful tribute to the Russian fear of diversity and freedom in

the nations that border the Soviet Union. Even within the Soviet Union itself, the rulers of Moscow have imposed their authority on unwilling peoples whose traditions, customs, and language differ fundamentally from those of their Communist masters. Today, the Soviet Union contains over 100 separate nationalities under the dictatorial rule of Moscow's Russian oppressors.

The United States must heed the lesson of Moscow's invasion of its southern neighbor. The world must know with no uncertainty that the United States supports the people of Afghanistan in its heroic resistance to Soviet rule.

The SPEAKER pro tempore. The question is on the motion offered by the gentleman from New York [Mr. SOLARZ] that the House suspend the rules and agree to the resolution, House Resolution 300.

The question was taken; and (two-thirds having voted in favor thereof) the rules were suspended and the resolution was agreed to.

A motion to reconsider was laid on the table.

GENERAL LEAVE

Mr. SOLARZ. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days in which to revise and extend their remarks on the resolution just agreed to.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from New York?

There was no objection.

EXPRESSING SENSE OF THE HOUSE REGARDING THE DEFECTION OF MIROSLAV MEDVID

Mr. LANTOS. Mr. Speaker, I move to suspend the rules and agree to the resolution (H. Res. 314) expressing the sense of the U.S. House of Representatives that Miroslav Medvid should not be allowed to be removed from the United States until a complete investigation can determine whether he has been accorded all rights due him as a possible defector, and until he is accorded those rights, as amended.

The Clerk read as follows:

H. RES. 314

Whereas Miroslav Medvid, a Ukrainian sailor on board the Soviet ship *Marshal Konev*, jumped into the Mississippi River and swam ashore on October 24, 1985; and

Whereas he indicated that he sought refuge in this country: Now, therefore, be it

Resolved, That it is the sense of the House of Representatives that the President should pursue an active and impartial investigation into the facts and circumstances of the Medvid case so that no similar tragic and improper mishandling of a political asylum case will ever again cast its shadow on our principles of liberty and freedom.

The SPEAKER pro tempore. Is a second demanded?

Mr. BROOMFIELD. Mr. Speaker, I demand a second.

The SPEAKER pro tempore. Without objection, a second will be considered as ordered.

There was no objection.

The SPEAKER pro tempore. The gentleman from California [Mr. LANTOS] will be recognized for 20 minutes and the gentleman from Michigan [Mr. BROOMFIELD] will be recognized for 20 minutes.

The Chair recognizes the gentleman from California [Mr. LANTOS].

Mr. LANTOS. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, for the last couple of weeks the attention of the American people has been riveted on New Orleans where a young Ukrainian sailor twice attempted to make his break for freedom. In one of the most dramatic episodes of attempted defection, this young man swam the waters of the Mississippi twice, only to be dragged back to his ship by six Soviet sailors where, on the basis of every evidence we have, he was drugged, he was threatened and, after a considerable length of time elapsed, he was finally interviewed by our own authorities. He claimed that he wished to return to the Soviet Union.

Now, Mr. Speaker, it is self-evident that there are grave unanswered questions concerning the case of seaman Medvid. He initially attempted his escape with his sailor's papers carefully placed in a sealed jar. Upon reaching shore, he wanted to make contact with the New Orleans Police. Upon being interviewed by a Ukrainian-speaking interpreter, he twice stated his desire to remain in the United States. Yet he was taken back to his ship. He jumped into the Mississippi again. He swam ashore to freedom. He had to be taken back, kicking and screaming, against his wishes, to the Soviet ship.

When our officials first visited with him on the ship, he appeared sedated, he was tied to his bed, his left arm and wrist were bandaged; and, subsequently, the Soviet physician indicated to us that he attempted to commit suicide.

Yet when he was finally interviewed, in the presence of his captain, in the presence of Soviet diplomatic officials, we accepted his statement clearly given under duress, under threats, under intimidation, that he wanted to return to the Soviet Union.

He is now on the high seas, and he may never again be seen outside of the Soviet Union.

It is mandatory, Mr. Speaker, that a thorough and complete and impartial and nonpolitical investigation be undertaken to ascertain all of the facts surrounding the case of seaman Medvid.

What makes this investigation all the more significant is that we had a similar case some 15 years ago, when a Lithuanian sailor jumped off a Soviet ship, only to be returned to Soviet hands against his own wishes.

□ 1330

At a hearing in the House Foreign Affairs Committee last week, that sailor who spent 4 years in the gulag, assured us, as we all knew anyway, that this young man was compelled by threats, use of drugs, and intimidation, to change his mind, to try and protect his parents. At this hearing we reviewed the incredible report of the U.S. psychiatrist, who did not order blood and urine tests that should have been conducted.

We are celebrating the 100th anniversary of the emplacement of the Statue of Liberty, and it is a singularly unhappy celebration when we send a message around the globe that, when there are other considerations present, we do not consider the right of individuals who want to live away from totalitarian systems—an important right.

I want to pay special tribute to my good friend and colleague from Pennsylvania, Congressman RITTER, who is the author of the resolution which initially called for not only an investigation but to keeping the sailor here so that he would be given an opportunity in a nonthreatening, quiet environment to rethink his decision and make, finally, a rational judgment about where he wanted to spend the rest of his life.

Circumstances and events have overtaken our original resolution. What we are dealing with now is merely a request of the President of the United States to get to the bottom of this affair. We must do so to be true to our principles, and we must do so, Mr. Speaker, so that we do not send the wrong signal to possible future defectors so they will know that their rights as potential defectors will be fully protected.

I think it is critical that we pass this resolution to try to undo the damage that was done in this case by ill-advised decisions of various governmental agencies involved.

Mr. BROOMFIELD. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, I want to join the gentleman from California [Mr. LANTOS] in paying our tribute to the principal sponsor of this resolution, the gentleman from Pennsylvania [Mr. RITTER]. I think it is very timely.

I support this resolution. It expresses the sense of the House that Mr. Medvid should have stayed in this country until an investigation determined that he had been granted all rights due him as a possible defector. We as a nation must ensure that human beings who seek freedom in this country are granted that freedom.

As has been reported, Mr. Medvid twice swam back to shore in his futile efforts to defect to the United States. After being returned to the ship, Mr. Medvid was probably threatened by the ship's captain. During a later interview he signed a statement that he did not want to defect. Unfortunately, he is on his way back to the Soviet Union.

I have been incensed at the way this attempted defection was handled. Through mishandling freedom may have been denied to this young man.

I believe we should know all of the facts concerning this unfortunate situation. I call upon the President to order a full investigation into the Medvid case, as well as Congress. We must learn the truth so that this tragedy will never happen again.

I am deeply concerned about the fate of Seaman Medvid. We all know how Soviet authorities deal with those who have attempted to defect. A long prison term is often the minimum punishment given to those who have reached out for freedom.

All elements of our Government must work together to ensure that future defectors are properly handled. We must understand exactly what went wrong so that we can avoid these blunders in the future. This is the least we can do for those who risk their lives in the quest for liberty.

I call upon my colleagues to join me in support of this resolution.

Mr. Speaker, I yield such time as he may consume to the gentleman from Pennsylvania [Mr. RITTER].

Mr. RITTER. I thank the gentleman for yielding to me.

Mr. Speaker, the American people have been expressing a sense of outrage which is now a sense of disgust, which has been translated into the stomachs of anyone who has been associated with this situation to a sick feeling.

There are still so many unanswered questions as to what exactly happened to poor Mr. Medvid as he sought asylum in the United States. Just one, brief example. Mr. Medvid discussed with Mrs. Irene Padoch, a Ukrainian-speaking woman in New York, over the telephone, from New Orleans, the background of his desire to come to the United States. He expressed desire to seek asylum, and yes, when asked by INS authorities, Mrs. Padoch said, "Yes, the man wants political asylum. Yes, the man wants to defect."

In one part of this conversation between the INS official in charge and Mrs. Padoch, the INS official mentioned to Mrs. Padoch that she should tell the young man that Mr. Medvid faces no harm, that they will speak in the morning, yes they will be in contact with Mrs. Padoch in the morning.

Something happened; something happened that is yet unknown. It was very obvious to that particular immigration officer who was talking with Mrs. Padoch at the time, that Miroslav Medvid sought political asylum. We in this Congress, as the Representatives of the American people wish to know exactly what happened to change the mind of the Immigration and Naturalization Service on the scene. To change—from their expressed intent—to Mrs Padoch—to provide safe keeping for this man seeking asylum until the next morning—to the terrible decision to send him back to the Soviet ship, 1 hour from the point in a conversation indicating safe treatment for Medvid.

The way they did it makes one sick as well. They did not take the poor man back on the ship themselves; they called the shipping company that deals with the Soviet grain ship, and they asked the shipping company to take care of it; to get Mr. Medvid back.

The way they did that was to call the Soviet ship and ask for six burly sailors to take Mr. Medvid back, kicking and screaming. Mary McGrory, in a column written in the Washington Post last week, referred to Mr. Medvid's actions as "universal body language." INS at some point understood that body language, yet for some unknown reason, chose to switch. This resolution requests a full accounting. It calls upon the President for a full accounting.

It is not that we are going to get satisfaction on Mr. Medvid's case itself. According to Simas Kudirka, who underwent similar trials and tribulations more than a decade ago trouble lies ahead for Medvid, Kudirka was a would-be Lithuanian defector who jumped ship and was himself dragged back kicking and screaming. According to Kudirka the fate of Mr. Medvid is dire indeed. Mr. Kudirka referred to a special concentration camp in Mordavia in the Soviet Union that deals with would-be defectors who do not succeed. His testimony before a House subcommittee was gruesome on that account.

□ 1340

Unfortunately, Mr. Medvid does not have a parent, as Mr. Kudirka did, who was born in the United States so that eventually he could be freed.

No, the fate that awaits him is dire, but perhaps, perchance we can through this investigation see to it that the name of the United States, that the symbol of the Statue of Liberty is not sullied forever, that we can make clear to those seeking political asylum that indeed they are and they will be welcome in these United States.

Mr. LANTOS. Mr. Speaker, I am pleased to yield as much time as he might consume to the distinguished chairman of our committee, the gentleman from Florida [Mr. FASCELL].

Mr. FASCELL. Mr. Speaker, I thank the gentleman from California.

Mr. Speaker, I rise in strong support of this resolution, and commend my colleagues, the gentleman from California [Mr. LANTOS], the gentleman from Pennsylvania [Mr. RITTER], and others who have been following this matter very closely. This resolution was unanimously adopted in the Committee on Foreign Affairs and those who bring it here to the floor of the House so that we can have a discussion on this unfortunate event are to be congratulated.

This resolution, simply asks for an impartial investigation into the medical case which we all think is very important, in the hope that this tragic episode will not be repeated.

The United States must have a policy in cases like this that is understandable. Instructions should go out to the field so that our people know how to act and know what to do in cases of this kind, particularly with respect to the Soviet Union.

Whenever we have a case of this kind it is always extremely sensitive. This cannot be helped because of the fact that we have two superpowers involved. Our relationships are always extremely sensitive and delicate, and whenever a poor individual like Mr. Medvid gets in the middle of it he is the one who suffers.

I would hope also, Mr. Speaker, that proper representation be made to Soviet authorities so that Mr. Medvid would be accorded some humane consideration when he is returned to the Soviet Union. It seems to me that this is the least we can do for this gentleman. He is now at the mercy of Soviet justice and you cannot expect too much.

As a matter of fact, I need to remind my colleagues that in all of the testimony before the Commission on Security and Cooperation in Europe—where we have heard from Soviet defectors of one kind or another, and from many Soviet experts—the Soviets have a particular theory with respect to defectors of any kind, or people who ask simply to leave the country to go join their families. The Soviets take the position that any Soviet citizen who wants to leave the Soviet Union has to either be insane or a criminal. They treat him or her that way under their laws. It is hard for us to understand that, but that is the way they look at it.

So make no mistake about it, when Mr. Medvid goes back to the Soviet Union as a Soviet citizen, he will not be accorded normal treatment. Immediately the concept that there is something wrong with him mentally or that in some way he acted criminally against the state will be in force. Therefore, any way that any country or any individuals can intercede in his behalf for humane considerations on

his return to the Soviet Union might be helpful.

Nevertheless, it is our strong feeling in this resolution that the mistake in handling the Medvid case should not have happened. We hope it never happens again. In the meantime, what we are saying in the resolution is let us conduct a thorough, impartial investigation and get to the facts.

Mr. RITTER. Mr. Speaker, will the gentleman yield for just one comment in response to his comments?

Mr. FASCELL. I am happy to yield to the gentleman from Pennsylvania.

Mr. RITTER. Mr. Speaker, I thank the gentleman for yielding.

It often happens that Soviet citizens who face trouble in the realm of human rights are protected by attention given to them in the West, and the gentleman is correct when he states that perhaps a focus of attention on Mr. Medvid could save him from the brutality which he might expect if he simply disappeared into the abyss.

Mr. FASCELL. Mr. Speaker, I thank the gentleman for his comment.

Mr. BROOMFIELD. Mr. Speaker, may I inquire as to the amount of time left on both sides?

The SPEAKER pro tempore. The gentleman from Michigan [Mr. BROOMFIELD] has 12 minutes remaining and the gentleman from California [Mr. LANTOS] has 8 minutes remaining.

Mr. BROOMFIELD. Mr. Speaker, I yield 2 minutes to the gentleman from New York [Mr. GILMAN].

Mr. GILMAN. Mr. Speaker, I thank the gentleman for giving me this time.

Mr. Speaker, this resolution, House Resolution 314, deserves the strong and full support of the House. It expresses the concern of the House about the abominable mishandling of the case of the Ukrainian sailor, Miroslav Medvid, who jumped ship, seeking asylum in the United States but who was cruelly turned back because of gross errors and violations of of regulations committed by low-ranking officials of the Department of Justice.

This resolution was initially introduced by the gentleman from Pennsylvania [Mr. RITTER] and the gentleman from Maryland [Mr. HOYER], and referred to our Committee on Foreign Affairs. Because of the pressing nature of the matter, the committee marked it up immediately, thanks to the assistance of the distinguished chairman of the committee, the gentleman from Florida [Mr. FASCELL] and our ranking minority member, the gentleman from Michigan [Mr. BROOMFIELD], as well as the chairman of the Europe and Middle East Subcommittee, the gentleman from Indiana [Mr. HAMILTON]. The resulting resolution is now before us.

In its operative paragraphs, the resolution, as reported, spoke to actions that the administration should have taken before the Soviet vessel, the *Marshal Konev*, was allowed to leave United States territorial waters, and to the steps needed to prevent such lapses in the future. It is regrettable that the administration chose to let the Soviet ship leave our shores without allowing the subpoena issued by a committee of the other body to be enforced. Nevertheless, it is appropriate to pass this resolution, as amended, at this time to express the concern of the House about our Nation's treatment of Seaman Medvid, and to exppress its further desire that every possible step be undertaken to ensure that such an event will never again occur.

Accordingly, I urge my colleagues to support this resolution.

Mr. LANTOS. Mr. Speaker, I yield such time as he may consume to my distinguished colleague, the gentleman from New York [Mr. BIAGGI].

Mr. BIAGGI. Mr. Speaker, I thank the gentleman for yielding me this time.

Mr. Speaker, I would like to make the comment that the action taken by the Department of Justice boggles the American mind, but the message that is delivered worldwide as a result of the conduct of our officials is going to have an inhibiting effect on all those who seek freedom and justice and freedom from oppression. Clearly the Medvid case should go down in history as infamous in nature and unpardonable.

Mr. Speaker, the issue before us is a most important one. We must not let the Medvid matter happen again. When this original resolution was filed, the *Marshal Konev* was still in the Port of New Orleans, and Miroslav Medvid was still in custody on American soil.

However, on Saturday, in an action that perplexes and perturbs me, the Reagan administration allowed the ship to leave. This decision, according to an article in the New York Times, was made after American officials concluded that the seaman Miroslav Medvid, a 25-year-old Ukrainian wanted to return home. As a result we are unable to urge the President to provide Medvid with an additional interview. As a result we are unable to urge the President to allow Medvid to meet with his anxious relatives. As a result we are not able to urge the President to do the right and just thing—presume Medvid wanted to defect and grant him political asylum.

How totally inconsistent this incident is with our proud tradition of supporting freedom and those who aspire to it, whether they be an individual or group of people. Since when is it consistent for the United States of America to presume an individual who on two occasions escapes from his Soviet ship is not doing so for the purpose of defection? Since when is it consistent for the United States to side with the Soviet Union in matters related to a person seeking asylum.

Let us review the circumstances of this bizarre story. On the night of October 24, Seaman Medvid leaped off the *Marshal Konev* and swam a quarter mile to the shore. He was interviewed by immigration officials, but none of whom spoke or understood Russian. They relied on an interpretor who contended that he told immigration officials that Medvid was seeking asylum. The immigration service disagreed and contended that no request for asylum was made.

Following the interview agents of the Border Patrol tried to return him to the *Marshal Konev* but he again sought his freedom by jumping from their small boat. He was then forced onto the ship in handcuffs by a ship's officer and five shipmates.

Sometime in the ensuing 3 days, Medvid injured his wrists, according to the State Department, but the official refused to make a determination as to whether it constituted a suicide threat. The seaman was then removed from the ship and interviewed for 2 days by various American officials. This included a psychiatrist who concluded that defection was not being sought based on interviews with Medvid. However, this same psychiatrist admitted that officers aboard the ship had warned Medvid that harm would come to his parents if he chose to defect.

It was felt up until the events of Saturday that the confusion surrounding Medvid would lead to a delay in any action to send him back on the ship. In order to secure this, a subpoena from the Senate Agriculture Committee was issued.

Yet, in the end despite the legitimate concerns of Medvid's relatives, despite the concerns of Members of Congress and the American public, Medvid was returned to the Soviet Union and whatever aspirations he had for freedom were dashed when the ship pulled itself from the Port of New Orleans.

Some have contended that the administration did not want to risk a major incident just prior to the Geneva Summit. Yet, one is hard pressed to accept that view considering the nature of this event. Here was a young man who came to us. The United States did not orchestrate this situation or incite it. In fact, had we simply been more responsive initially when Medvid first presented himself to our shores, we might have averted a major incident. It would have been a cut-and-dried situation. However, our subsequent bungling of the entire affair made this a potentially serious incident. We deferred to the Soviets. We should not have.

There are clearly lessons to be learned from this tragic affair. First and foremost, we must have Russian-speaking personnel among immigration service and customs service personnel so the initial intention of a person, such as a Madvid, would be clearly understood and responded to. Second, when there is a judgment call of this nature to be made again, let us land on the side of the individual and assume defection. Finally, if the situation must be resolved at the highest levels of our Government let it not be done with the arrogance displayed in the Medvid case. It is not done

with the arrogance displayed in the Medvid case. It was obvious that there was deep concern and vast confusion about this case. A live Senate committee subpoena did exist in this matter but nonetheless the decision to free the ship *Marshal Konev,* and imprison the sailor, Medvid, was made.

I hope the passage of this resolution will convey to the White House the sense of outrage and frustration that many of us feel about the entire Medvid incident. It is a sorry incident that should never be repeated.

Mr. BROOMFIELD. Mr. Speaker, I yield 3 minutes to the gentleman from California [Mr. LUNGREN], who is the ranking member of the Subcommittee on Immigration of the Committee on the Judiciary.

Mr. LUNGREN. Mr. Speaker, as the ranking member of the Subcommittee on Immigration, I have followed this matter with some interest and have been involved in conversations with members of the INS and the Justice Department. When all is said and done, I think what we can say about it is that it was a screw up. The guys on the ground did not do what they were supposed to do.

I do not find any grand conspiracy involved here based on the information I have been able to get. Sometimes you can establish the best guidelines and try to sensitize your employees the best you can, and things do not always work.

□ 1350

Now, I am pleased that the Commissioner of the INS has reiterated the policy of the Department, has sent out a special communique to all of their offices around the country, has underscored the fact that when dealing with people from Communist countries there has to be an enhanced sensitivy because of the difficulties from which these people have come and the difficulties they have in even bringing themselves to talk with representatives of the U.S. Government because of the repercussions that may ensue both for themselves and the family members.

Several months ago I had conversations with the INS because I was concerned about how several people from the People's Republic of China had been treated and a lack of sensitivity shown to them. At that point in time, following conversations with both representatives of the State Department and the INS, we were assured that new policies or a refinement of old policies had gone into effect and, in fact, I take that to be true.

I am sorry that this incident has come up to suggest that we have to again refine those policies. But there does seem to be no doubt that a greater sensitivity must be conveyed by those who deal with these individuals from these Communist countries because of the essential differences in experiences that these people bring with them.

There is no question in my mind that the policy of the INS was violated. There is no question in my mind that when the supervisors in the INS belatedly heard about this they took action to do what they could do. But unfortunately it is like the horse that has gotten out of the barn, if you do close the door, it really does not get that horse back.

With respect to the second interview that took place, I am convinced that both the State Department and the INS did everything they could at that time. Unfortunately, it was not enough because the individual had been in the hands of the Soviets for some considerable period of time. For various reasons I do think at that point in time he made it clear that even though he may very well have wanted to come to the United States, and I am convinced he did, I think everything indicated that he did, that was no longer his thought.

The SPEAKER pro tempore. The time of the gentleman from California [Mr. LUNGREN] has expired.

Mr. BROOMFIELD. Mr. Speaker, I yield 2 additional minutes to the gentleman from California.

Mr. LUNGREN. But again, as I say, that was not enough because of what had happened in the first instance.

What I hope will be done by this resolution, which basically is supportive of what is already going on, that is, an investigation is ongoing, is that perhaps we can raise the issue to such a visibility that that sensitivity which is necessary for the people actually involved in the service will be there, rather than be marked by its absence.

So I certainly join my colleagues in supporting this resolution, but I also think I should point out that it is my understanding that such an investigation has already been launched.

I am sorry that even the resolution of that investigation most likely can do very little for Mr. Medvid himself.

Mr. LANTOS. Mr. Speaker, will the gentleman yield?

Mr. LUNGREN. I am happy to yield to the gentleman from California.

Mr. LANTOS. Mr. Speaker, I obviously welcome the support of my friend, the gentleman from California, for the resolution, but I would like to make a point which I think goes to the core of this issue.

There is unanimity about the initial mistakes made by INS officials. The problem many of us have with the final decision is that our State Department had plenty of other options than to put this poor fellow back on the ship. We could have kept him here for 10 days or 2 weeks. The State Department testified there was no time limit. We should have put him in a nonthreatening environment where he could have talked to fellow Ukrainians, where he could have talked this thing through, where possibly the drugs that were administered to him by the Soviet physician aboard the ship would have worn off and he could have made a judgment.

If I may just finish my thought, we are talking about two mistakes here. We are talking about the initial mistake, if indeed it was a mistake, of sending him back on the ship; but we are talking also about an even more serious judgment call of returning him from American soil when the American people and the American Congress know that this man wanted to defect. He was intimidated and drugged by the Soviets aboard the ship and we simply tried to sweep the whole issue under the rug.

Mr. LUNGREN. Madam Speaker, I do not think the people involved attempted to sweep it under the rug.

The SPEAKER pro tempore (Mrs. BURTON of California). The time of the gentleman from California [Mr. LUNGREN] has again expired.

Mr. BROOMFIELD. Madam Speaker, I yield 3 additional minutes to the gentleman from California.

Mr. LUNGREN. Madam Speaker, I do not want us to get off the point here, in which we have mutual support; but I frankly do not find any attempt by the administration or the people in the State Department, the INS, they sweep it under the rug.

I think once the initial mistake was made, we have some very legitimate concerns with respect to what we do. I think the fact that the gentleman says there would have been another option, an easy option, to keep a person here 10 days or 12 days who has already indicated under the law that is established that he does not wish to be here leads us to some very serious public policy consequences with respect to the Soviet Union.

I obviously am no defender of the Soviet Union, but I do not want a situation in which we set a precedent for the Soviet Union to take an American citizen and hold him for 12 days, even though that person has indicated he does not want to stay in the Soviet Union.

The point is that at some point in time you have to make a decision based on what the law is. The law states that someone has to express a well-founded fear of persecution and indicate that he or she wishes to be here.

It is my understanding that we had both a doctor and a phychiatrist in attendance during the period of time we had this individual.

We cannot undo the pressure that the Soviet Union brought to bear on him. That is why I say let us recall that we made an initial mistake.

Mr. RITTER. Madam Speaker, will the gentleman yield?

Mr. LUNGREN. I am happy to yield to the gentleman from Pennsylvania.

Mr. RITTER. Madam Speaker, the gentleman has made a good point. The gentleman from California [Mr. LANTOS] has also made a good point.

Here is what it all boils down to. In the hearings conducted by the gentleman from California [Mr. LANTOS] and the subcommittee, Mrs. Ridgeway, the Assistant Secretary of State for Europe, claimed that the call of the State Department was a judgment call.

The question then remains, with a man who has tried to slit his wrists, with a man who has obviously been drugged, with a man who is standing in front of a Soviet ship captain looking him right in the eyes, and with our knowledge of what most probably preceded the State Department finally getting to interview this person, what probably preceded this on the Soviet ship, the question is, is one night's sleep away from his tormentors and harassers, is that enough?

The interviewer from the State Department was speaking Russian. Now, this is a man who comes from Lwiw, who lives on the border of the western Ukraine with Poland. His mother is Polish, speaks Polish. On the streets of Lwiw they speak Ukrainian and the whole thing is conducted in Russian. Why was it conducted in Russian, why? Perhaps for the benefit of the Soviet ship captain who did not speak Ukrainian. I do not know.

I think this is what this investigation may point out; but given all of this and given the tormented state of this individual was in, perhaps we should have given him more time.

The SPEAKER pro tempore. The time of the gentleman from California [Mr. LUNGREN] has again expired.

Mr. BROOMFIELD. Madam Speaker, I yield 2 additional minutes to the gentleman from California.

Mr. LUNGREN. Madam Speaker, I yield to the gentleman from Pennsylvania [Mr. RITTER].

Mr. RITTER. Perhaps we should have given him some greater time, as the gentleman from California [Mr. LANTOS] says, to speak to somebody who speaks Ukrainian, his own mother tongue, to speak with some people perhaps from the Ukrainian-American community who could convince him that the United States is not all that bad, after allowing him to be taken back after jumping ship twice.

Mr. LUNGREN. Madam Speaker, I will take back my time.

I just want to say, look, there was a mistake. It was a bad mistake. We do not want it to happen again. I have been working with the INS to make sure that it does not happen again. It not only involves Russian sailors, it involves members of the People's Republic of China and other countries.

We have to have an enhanced sensitivity with respect to the people that are involved.

I just will say, we ought to recognize that we did have a doctor, we did have a psychiatrist in attendance. When we are presented with certain facts with certain information, we are required under our law to make a decision. It does not matter whether the person is from the Ukraine or whether the person is from China or whether the person is from Nicaragua or whether the person is from Honduras, or wherever.

I just want us to keep that in mind. We have established certain laws. Those laws are to be duly executed.

I would argue in this case because of the insensitivity of the personnel first involved, we did not execute the law in the way in which we envisioned it here in the House of Representatives and the U.S. Senate and at the highest levels of the administration.

I hope that the investigation might bring to light this subject a little more clearly so that again we will continue to press those people involved with a recognition of that amount of sensitivity that is absolutely necessary to make certain that this thing does not happen again.

We must recognize that these claims are made on thousands of occasions and we do not want the fact that they are made on thousands of occasions to make people callous in terms of their consideration of them. That is the important thing.

Mr. LANTOS. Madam Speaker, I yield such time as she may consume to my friend and colleague, the gentlewoman from Ohio [Ms. OAKAR].

Ms. OAKAR. Madam Speaker, more than 2 weeks ago on October 24, Miroslav Medvid, a Ukrainian sailor on board the Soviet ship *Marshal Konev,* jumped into the Mississippi River near New Orleans and swam to shore seeking freedom in our country. Astonishingly, United States officials returned him to Soviet custody three times, the last time following a meeting where Mr. Medvid appeared in a drugged state and in the presence of Soviet officials who had threatened him and his family. On November 9, the *Marshal Konev* left our waters with Miroslav Medvid aboard, to face an uncertain fate in the Soviet Union.

During the 2-week drama, the administration took the consistent line that "we consider the matter closed." The American people, however, did not consider the matter closed and insisted on asking questions and demanding answers. Now that the ship has left with Miroslav Medvid on board, there is a sense of dismay.

As we sort through the mistakes and mishandling of the tragic case of Miroslav Medvid, it is important that we not close the case. We must use the resources of the U.S. Government, from the highest levels, to continue to express the interest of the American people in the fate of Miroslav Medvid, to seek assurances and solicit genuine evidence that he and his family have not been subject to reprisals for an act that our Government considers impulsive and nonpolitical.

It is also important that we learn from the mistakes that were made during the mishandling of this case. According to Government and news accounts, the errors began with a clumsy translation procedure over long-distance telephone. Later, when Miroslav Medvid met with Soviet and American officials for the last time, he was provided with a Russian translator, instead of one who speaks his native Ukrainian language. These technical errors and shortcomings of translation are inexcusable and certainly unnecessary. Our country is rich in language skills, if only we organize them correctly. Our various ethnic communities, including the Ukrainian community, have been sponsoring language and culture schools that constitute an invaluable resource for our country. It is essential that appropriate Government agencies, especially the State Department and the Immigration and Naturalization Service, establish orderly procedures to avail themselves of language skills on the scene in the event of cases such as the one we just witnessed. Obviously, other procedures must be evaluated and improved to prevent a similar case from occurring in the future.

Many people are dismayed and disappointed over the unfortunate mishandling and unhappy outcome of the Miroslav Medvid bid for freedom. It is my hope and expectation that this case will be raised at the highest levels in order to gain assurances about the well-being of Mr. Medvid and his family. I also hope and expect that an investigation of this case will reveal the errors and shortcomings that led to such a serious mishandling and that corrections in procedures will be made to avoid a similar outcome in the future.

Mr. LANTOS. Madam Speaker, I yield 1 minute to my friend and colleague, the chairman of the Helsinki Commission, the gentleman from Maryland [Mr. HOYER].

Mr. HOYER. Madam Speaker, I want to thank the gentleman from California for yielding. I want to congratulate him, the ranking member of the Helsinki Commission the gentleman from Pennsylvania [Mr. RITTER] and others, and certainly congratulate the committee for the work they have done on this resolution.

I would also at this time like to bring to the attention of the House that I have a letter here, that will be distributed to the House Members on the first rollcall, to the President indicating that as he goes to the summit, which has been discussed in the context of this resolution, that he continue to be forceful in his placing of human rights at the forefront of America's agenda. I would urge all Members of the House to sign it. We are hoping to have all 435 Members of the House sign this letter to the President. It is similar to a letter sent by

the other body, making it very clear to the Soviets and to the world that human rights is on the front burner of the agenda of the Congress of the United States.

Madam Speaker, the letter is as follows:

HOUSE OF REPRESENTATIVES,
Washington, DC, November 12, 1985.

The PRESIDENT,
The White House, Washington, DC.

DEAR MR. PRESIDENT: On the eve of the Geneva Summit, we extend our sincere wishes for a successful meeting and reaffirm our strong support for you in presenting our country's forceful position in regard to human rights.

We pledge our firm support for your urging General Secretary Mikhail Gorbachev to undertake just and expeditious actions to alleviate the human rights abuses in the U.S.S.R. and to take steps that indicate an intent to abide by past international agreements such as the Helsinki Final Act. It must be emphasized that in the search for those elements needed for a more positive United States-Soviet relationship, respect for human rights and fundamental freedoms is absolutely essential.

Respectfully,

Mr. LANTOS. Madam Speaker, I yield 1 minute to my distinguished friend, the gentleman from New York [Mr. GARCIA].

Mr. GARCIA. Madam Speaker, I would like to join in this debate. I think everybody here has spoken quite well and eloquently on this issue.

I would hope that this lesson gets back to the INS, the Immigration and Naturalization Service.

One of the areas that I have for many years felt that they have lack of knowledge in is on the question of sensitivity. Many of the issues in which I have personally dealt with the INS dealing with sensitive matters, they have on occasion demonstrated a lack of knowledge. It seems to me that what has come out of this discussion, today it appears to me without doubt in my mind that the INS, Mr. Nelson, as Immigration and Naturalization Commissioner, should immediately institute a program to sensitize INS agents. There are many agents who are in fact sensitive, but it proves once again in this terrible episode that sensitivity was not demonstrated.

Mr. LANTOS. Madam Speaker, I have no further requests for time.

The SPEAKER pro tempore (Mrs. BURTON of California). The question is on the motion offered by the gentleman from California [Mr. LANTOS] that the House suspend the rules and agree to the resolution, House Resolution 314, as amended.

The question was taken.

Mr. RITTER. Madam Speaker, on that I demand the yeas and nays.

The yeas and nays were ordered.

The SPEAKER pro tempore. Pursuant to clause 5 of rule I, and the Chair's prior announcement, further proceedings on this motion will be postponed.

GENERAL LEAVE

Mr. LANTOS. Madam Speaker, I ask unanimous consent that all Members may have 5 legislative days in which to revise and extend their remarks on the resolution just considered.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from California?

There was no objection.

HANDICAPPED CHILDREN'S PROTECTION ACT OF 1985

Mr. WILLIAMS. Madam Speaker, I move to suspend the rules and pass the bill (H.R. 1523) to amend the Education of the Handicapped Act to authorize the award of reasonable attorneys' fees to certain prevailing parties, to clarify the effect of the Education of the Handicapped Act on rights, procedures, and remedies under other laws relating to the prohibition of discrimination, and for other purposes, as amended.

The Clerk read as follows:

H.R. 1523

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SECTION 1. SHORT TITLE.

This Act may be cited as the "Handicapped Children's Protection Act of 1985".

SEC. 2. AWARD OF ATTORNEYS' FEES

Section 615(e)(4) of the Education of the Handicapped Act (hereinafter in this Act referred to as "the Act") is amended by inserting "(A)" after the paragraph designation and by adding at the end thereof the following:

"(B) In any action or proceeding brought under this subsection, the court, in its discretion, may award reasonable attorneys' fees, expenses, and costs to the parents or guardian of a handicapped child or youth who is the prevailing party.

"(5) For purposes of this subsection—

"(A) fees awarded under this subsection shall be based on rates prevailing in the community in which the action or proceeding arose for the kind of quality of services furnished; and

"(B) fees, expenses, and costs awarded under this subsection to a prevailing party may not be paid with funds provided to the State under this Act.".

SEC. 3. EFFECT OF EDUCATION OF THE HANDICAPPED ACT ON OTHER LAWS.

Section 615 of the Act is amended by inserting at the end thereof the following new subsection:

"(f) Nothing in this title shall be construed to restrict or limit the rights, procedures, and remedies available under title V of the Rehabilitation Act of 1973 or other Federal laws redressing the rights of handicapped children and youth, except that before the filing of a civil action under such laws seeking relief that is also available under this part, the procedures under subsections (b)(2) and (c) shall be exhausted to the same extent as would be required had the action been brought under this part.".

SEC. 4. IMPROVEMENTS IN PROCEDURAL SAFEGUARDS UNDER THE ACT.

(a) PUBLIC ACCESS TO HEARING DECISIONS.—Section 615(d)(4) of the Act is amended by inserting "shall be made available to the public consistent with the requirements of section 617(c) and" immediately before "shall also".

(b) INFORMAL COMPLAINT RESOLUTION PROCEDURE.—Section 615(b)(2) is amended—

(1) by striking out the first sentence and inserting in lieu thereof the following:

"Whenever a complaint has been received under paragraph (1) of this subsection, the parents or guardian shall be provided an opportunity to meet informally with the State of local educational agency or intermediate educational unit to resolve the complaint. If the complaint is not resolved satisfactorily or a decision is made not to meet informally, the parents or guardian shall have an opportunity for an impartial due process hearing which shall be conducted by the State educational agency, the local educational agency, or an intermediate educational unit as determined by State law or by the State educational agency."; and

(2) by inserting at the end of such paragraph the following new sentence:

"Any decision regarding participation in an informal meeting under this paragraph shall not affect the availability or provision of any rights of the parents or guardian under this section.".

(c) ANTI-RETALIATION PROVISION.—Section 615 of the Act is amended by inserting at the end thereof the following new subsection:

"(g) No person may discharge, intimidate, retaliate, threaten, coerce or otherwise take an adverse action against any person because such person has filed a complaint, testified, furnished information, assisted, or participated in any manner in a meeting, hearing, review, investigation, or other activity related to the administration of, exercise of authority under, or right secured by this part.".

SEC. 5. GAO STUDY OF ATTORNEYS' FEES PROVISION.

(a) The Comptroller General of the United States, through the General Accounting Office, shall conduct a study of the impact of the amendments to the Education of the Handicapped Act made by section 2 of this Act. Not later than June 30, 1989, the Comptroller General shall submit a report containing the findings of such study to the Committee on Education and Labor of the House of Representatives and the Committee on Labor and Human Resources of the Senate. The Comptroller General shall conduct a formal briefing for such Committees on the status of the study not later than March 1, 1988. Such report shall include the information described in subsection (b).

(b) The report authorized under subsection (a) shall include the following information:

(1) The number, in the aggregate and by State, of written decisions under sections 615(b)(2) and (c) transmitted to State advisory panels under section 615(d)(4) for fiscal years 1984 through 1988, and the prevailing party in each such decision. For fiscal year 1986, the report shall designate which decisions concern complaints filed after the date of enactment of this Act.

(2) The number, in the aggregate and by State, of civil actions brought under section 615(e)(2) and the prevailing party in each action for fiscal years 1984 through 1988. For fiscal year 1986, the report shall designate which decisions concern complaints filed after the date of enactment.

(3) Data, for a geographically representative selective sample of States, indicating the specific amount of attorneys' fees, costs,

and expenses awarded to the prevailing party, in each action and proceeding under section 615(e)(4)(B) from the date of the enactment of this Act through fiscal year 1988, and the range of such fees, costs, and expenses awarded in the various types of actions and proceedings under such section.

(4) Data, for a geographically representative sample of States, on the experience of educational agencies in resolving complaints informally under section 615(b)(2), from the date of the enactment of this Act through fiscal year 1988.

SEC. 6. AWARD OF ATTORNEYS' FEES ONLY FOR CIVIL ACTIONS.

(a) AWARD OF ATTORNEYS' FEES.—Section 615(e)(4)(B) of the Act is amended by striking out "action or proceeding and inserting in lieu thereof "civil action".

(b) EFFECTIVE DATE.—

(1) Except as provided in paragraph (2), subsection (a) shall take effect four years after the date of the enactment of this Act.

(2) If the report authorized under section 5 is not submitted to both committees of the Congress within the period established by such section, subsection (a) shall take effect 180 days after the date on which such submission requirement is fulfilled or five years after the date of the enactment of this Act, whichever occurs first.

SEC. 7. EFFECTIVE DATE.

(a) GENERAL PROVISION.—Except as otherwise provided, this Act shall take effect on the date of enactment of this Act.

(b) LIMITED RETROACTIVE APPLICATION.—The amendments made by sections 2 and 3 shall apply with respect to actions or proceedings brought under section 615(e) of the Education of the Handicapped Act after July 3, 1984, and actions or proceedings brought prior to July 4, 1984, under such section which were pending on July 4, 1984.

□ 1405

The SPEAKER pro tempore. Is a second demanded?

Mr. BARTLETT. Madam Speaker, I demand a second.

The SPEAKER pro tempore. Without objection, a second will be considered as ordered.

There was no objection.

The SPEAKER pro tempore. The gentleman from Montana [Mr. WILLIAMS] will be recognized for 20 minutes and the gentleman from Texas [Mr. BARTLETT] will be recognized for 20 minutes.

The Chair recognizes the gentleman from Montana [Mr. WILLIAMS].

Mr. WILLIAMS. Madam Speaker, I yield myself such time as I may consume.

Madam Speaker, on March 7, 1985, H.R. 1523, the Handicapped Children's Protection Act was introduced. The original bill was designed to accomplish four basic objectives.

First, to authorize courts to award reasonable attorneys' fees to parents of handicapped children who prevail in specified circumstances under Part B of the Education of the Handicapped Act.

Second, to reestablish statutory rights repealed by the U.S. Supreme Court in the decision in Smith versus Robinson.

Third, to reaffirm, in light of this decision, the viability of section 504 of the Rehabilitation Act of 1973, 42 U.S.C. 1983 and other statutes as separate vehicles for ensuring the rights of handicapped children.

Fourth, to improve the due process procedures available under part B of the Education of the Handicapped Act.

Today, we are considering an amendment in the nature of a substitute which satisfies all of these objectives. The road traveled to reach this bipartisan compromise has not been smooth. The issues involved in the legislation are extremely complex and affect all participants in our educational system: Handicapped children and their families, teachers, and school officials. However, Members on both sides of the aisle have worked long and hard to reach this bipartisan compromise. Special recognition must go to Mr. HAWKINS, Mr. BIAGGI, Mr. JEFFORDS, and Mr. BARTLETT. My personal thanks for all your efforts.

In the course of drafting this legislation, organizations representing handicapped children, parents, educators, administrators, boards of education have often expressed strong and often divergent positions on the provisions in the bill. The consequences of including or excluding particular provisions were expressed and then debated at length.

The bill we present today for passage represents a consensus which achieves the needed balance between the rights of handicapped children and local and State educational agencies. I urge my colleagues to support this bipartisan substitute.

Let me briefly describe the key components of the legislation.

First, it amends part B of EHA to provide that a parent or guardian of a handicapped child who prevails against a school district or State educational agency in a civil action in Federal or State court, or an administrative proceeding such as a due process hearing or State appeal, may be awarded reasonable attorney's fees, costs and expenses by the court.

Second, it provides for the submission to Congress of a GAO study on the impact of this provision no later than 3½ years after the date of enactment of the legislation.

Third, the legislation contains a sunset provision under which a court's authority to award fees to parents who prevail in administrative proceedings terminates 4 years after the date of enactment of this legislation if the GAO report is submitted on schedule. Thus, after 4 years, unless Congress passes additional legislation, a court's authority to award fees will be limited to civil actions in State or Federal courts in which parents prevail.

Fourth, it overturns the U.S. Supreme Court's decision in Smith versus Robinson by reestablishing the viability of Section 504 of the Rehabilitation Act of 1973 and other statutes as separate vehicles for ensuring the rights of handicapped children and youth.

Fifth, it deletes section 3(b) of H.R. 1523, as reported out of the Education and Labor Committee. Section 3(b) provides that with respect to preschool, elementary, secondary, and adult education programs and activities, section 504 must continue to be carried out in accordance with the regulations in effect on July 4, 1984, unless expressly authorized by act or joint resolution of the Congress approved after July 4, 1984.

The decision to delete this provision from the bipartisan substitute should not be construed as reflecting a congressional change in support for the validity of the current section 504 regulations. The section 504 regulations were the result of extensive consideration in the regulatory process. Congress had the opportunity to review these regulations during oversight hearings in 1977, preceding the passage of the 1978 amendments to the Rehabilitation Act of 1973. At that time Congress explicitly approved the section 504 regulations.

This view of the section 504 regulations has been upheld in two recent unanimous Supreme Court decisions, Consolidated Rail Corporation versus Darrone and Alexander versus Chaote.

In Darrone, the Supreme Court found that the "responsible congressional committees participated in their formulation, and both these committees and Congress itself endorsed the regulations in their final form." The court also found that in passing the 1978 amendments, "Congress incorporated the substance of the Department's regulations into the statute."

In Alexander, the Supreme Court characterized its decision in Darrone as "holding that the 1978 Amendments to the act were intended to codify the regulations enforcing section 504."

Today, we reaffirm Congress' prior endorsements of the current section 504 regulations and the Supreme Court's understanding of our intent. The decision to delete section 3(b) from the bipartisan substitute simply reflects our conclusion that it is no longer necessary to codify the existing section 504 regulations in this bill because the administration is expressing no current desire to modify these regulations in any way.

Sixth, the bipartisan substitute amends part B of the Education of the Handicapped Act to improve procedural protections under the act. These changes include: a requirement that hearing decisions be made available to the public without diminishing the privacy rights of the children; a re-

quirement that a school district provide a parent with an opportunity to meet informally with agency officials to resolve complaints prior to the due process hearings; and an anti-retaliation provision barring public agencies from taking adverse actions against persons participating or involved in, among other things, meetings or hearings.

Finally, the bill specifies that the provisions concerning the awarding of attorneys' fees and the effect of the Education of the Handicapped Act on other laws apply retroactively with respect to actions or proceedings after July 3, 1984, and actions or proceedings brought prior to July 4, 1984, which were pending on July 4, 1984.

The Congressional Budget Office states that there will be no increase in Federal cost as a result of this bill.

Public Law 94-142 was hailed upon passage as a significant step forward in ensuring the educational rights of persons with handicaps and it is living up to its promises. This legislation before you today only strengthens that capability. I urge my colleagues to support the compromise.

Madam Speaker, I reserve the balance of my time.

The SPEAKER pro tempore. (Mr. GARCIA). The Chair recognizes the gentleman from Texas [Mr. BARTLETT].

Mr. BARTLETT. Mr. Speaker, I yield myself 14½ minutes.

Mr. Speaker, first, for the House, I would note that the section would codify section 504 regulations has been deleted, and that eliminates one-half of the controversy from the floor today.

Second, I would note that upon a letter that was delivered this morning to the chairman of the committee, it is apparent that the administration does support the bill in its present form with that deletion of codification of section 504 and with reservations relating to administrative fees prevailing in the community, and the absence of a double-dipping provision.

Mr. Speaker, I would also note that I support this bill and do urge a "yes" vote and its enactment today, although I do have some reservations about one section of the bill which I will detail in my statement. I will take a few minutes. Mr. Speaker, to explain a bit as to how we got here.

In July of 1984, the Supreme Court handed down a decision in the case of Smith versus Robinson which seriously threatens the ability of parents to enforce their handicapped child's rights under Public Law 94-142, the Education For All Handicapped Children Act. In that case, the Court upheld the claim of the parents of a special education student who sought appropriate placement for their handicapped child, but denied their request to recover attorneys' fees on the grounds that Public Law 94-142 is silent on the issue. The Court reasoned that since the educational relief was granted under the authority of Public Law 94-142, the claimants could not seek to recover attorneys' fees under another statute which authorized fees. While this decision is consistent with the so-called American rule which provides that attorneys' fees are not recoverable unless specified in the statute under consideration, the Smith versus Robinson decision represented a serious setback for parents of handicapped children seeking to enforce their child's right to a free and appropriate education. By denying attorneys' fees in Smith, the Supreme Court effectively shut the courthouse doors in the face of poor and middle-class parents of handicapped children who would find the cost of retaining counsel prohibitive without the prospect of recovering fees upon prevailing in the civil action.

Quite simply, the Supreme Court's decision has compelled Congress to act to amend Public Law 94-142 to specify that parents who prevail in court actions brought under Public Law 94-142 are entitled to recover reasonable attorneys' fees. Justice Brennan, writing for the three dissenting Justices in the Smith decision captured the task before Congress when he said:

"* * * with today's decision coming as it does after Congress has spoken on the subject of attorneys' fees, Congress will now have to take the time to revisit the matter. And until it does, the handicapped children of this country whose difficulties are compounded by discrimination and by other deprivations of constitutional rights will have to pay the costs."

Mr. Speaker, H.R. 1523 constructively addresses the issue of the recovery of attorneys' fees for civil action under Public Law 94-142 in response to the Smith decision. It properly authorizes courts to award reasonable attorneys' fees to parents of handicapped children who prevail in civil actions. I support without reservation, this portion of H.R. 1523, believing that not only the families of handicapped children will be served by this amendment but also the public interest of ensuring the provision of a free and appropriate education for all handicapped children.

Saying this, Mr. Speaker, I must raise what I consider to be a serious flaw in H.R. 1523 which taints its contributions to Public Law 94-142. H.R. 1523 mistakenly extends the authority for the recovery of attorneys' fees into Public Law 94-142's administrative hearing process.

Public Law 94-142 is essentially a grant-in-aid statute that provides an informal process by which parents and educators can mutually determine what is an appropriate education for a handicapped student. The system for identifying, evaluating, developing, and administering the individualized educational program rests upon the ability of parents and educators to meet, share information, and agree upon a program.

When parents and educators disagree on what is educationally appropriate for a handicapped child, either party may file a request for an administrative hearing presided over by an impartial due process hearing officer. These hearing officers are trained by the State and are generally individuals with experience in special education or special education legal policy. The hearing officers are not required to be attorneys, and neither the parents nor the school systems are required to be represented by attorneys. The hearing officer's responsibility is to determine the appropriate education for the handicapped student based upon the information that the parents and the educators present.

Under H.R. 1523, for the first time, parents who retain an attorney for work conducted at the administrative hearing level will be able to recover fees if they prevail at the hearing, even if the issue does not go to court. This represents a significant departure from past and current practice, where it has only been the case four times since 1975 that courts have awarded attorneys' fees at the administrative level to parents who later prevailed in court action and never awarded attorneys' fees at the administrative level in cases which do not go on to court.

There are a number of very good reasons why this provision is both unnecessary and could be destructive. Foremost is an indisputable fact that the number of administrative hearings held each year to resolve disputes between parents and educators is decreasing. According to a survey by the National Association of State Directors of Special Education the number of first-level hearings decreased by 39 percent between 1979-80 and 1983-84. For the school year 1983-84 only 1 out of every 3,000 of the approximately 4 million students was involved in a first-level hearing and only 1 in every 64,800 was the subject of litigation.

In the cases which reach a hearing level we know, according to a recent Rand Corp. study of attorneys' fees under Public Law 94-142, that parents win about 50 percent of the time.

We also know that school systems are understandably reluctant to hire attorneys for Public Law 94-142 hearings. A recent survey conducted by the American Association of School Administrators indicates that 56 percent of the local educational agencies surveyed stated that they either never use an attorney or only use an attorney when a parent does in special education hearings.

Examining this information, it becomes clear that: First, there are in-

creasingly fewer disputes in special education resulting in administrative hearings; second, in the hearings that do take place, parents currently prevail approximately 50 percent of the time, and; third, school systems have demonstrated that they would like to avoid their own attorneys' fees.

Mr. Speaker, H.R. 1523 threatens to significantly alter a system of conflict resolution which is working as Congress intended, and no compelling evidence exists which supports a need to make this fundamental change. I am confident that Public Law 94-142's administrative hearing system is working fairly and properly, and I attribute this to its formal and inexpensive nature. My position is affirmed by the Rand study, and I quote:

The administrative due process system offers plaintiffs the same kinds of protections and results as the courts, but at greater speed and lower cost. Parents and school officials are therefore generally eager to settle their disputes informally or in the administrative due process system.

H.R. 1523, by allowing for the recovery of fees at the administrative level, removes the incentive to resolve disputes informally because schools will be as liable for attorneys' fees under the administrative system as they are in court. The complications resulting from this part of H.R. 1523 becomes even clearer when one considers the impact of fees at the administrative level on the mediation or informal complaint procedure that is also a part of H.R. 1523.

Section 4 of H.R. 1523 provides that after a complaint has been filed, parents are entitled to an informal meeting with school officials to see if a resolution of the dispute can be worked out prior to a hearing. The purpose of this provison is to provide that parents and educators should be given a final opportunity prior to a hearing to informally reach a solution to their dispute. This well-intended provision is undermined completely by H.R. 1523's administrative hearing fee recovery provision because if a parent brings an attorney to the informal complaint resolution meeting, and the school officials and the parents reach a settlement, then according to H.R. 1523 the school system is liable for the parents' attorneys' fees.

Mr. Speaker, why would a school system seek to settle a dispute informally, knowing that a consequence of that settlement will include the cost of the parents' attorneys' fees? Common sense tells us that too often persons in that situation would not settle and face certain fees payment, but rather take their chances of winning in a hearing and thus avoid paying fees.

The principle that I advocate on this issue is a simple one: Congress should not do anything to encourage the participation of lawyers in a conflict resolution situation which does require their participation. By allowing for the recovery of attorneys' fees under Public Law 94-142 at the administative level, H.R. 1523 will increase the participation of attorneys and decrease the likelihood that parents and educators will resolve their disputes informally and inexpensively.

In addition to making the relationship between parents and educators more adversarial, the cost for these attorneys' fees will come out of the State and local public schools' general educations funds. The money that our schools will pay to lawyers to participate in the resolution of these educational disputes will mean less money for books, equipment, and teachers' salaries. To add injury to insult, our State and local school systems are not allowed to use Federal funds to pay for the consequences of this Federal requirement.

Mr. Speaker, the issue of attorneys' fees is one of the fastest growing and most controversial areas of law. It has been compared to a quicksand pit where with every turn one becomes more deeply involved in a new set of problems and complexities. To allow for an unlimited authority to recover attorneys' fees at the administrative level under Public Law 94-142 will unnecessarily invite the complications besetting fee-shifting statutes into our public schools. We will have succeeded in making Public Law 94-142's decisionmaking process more litigous, but not necessarily any better.

The development of this legislation has typified those complexities cited here, and I recognize the difficult waters that the chairman of the Select Education Subcommittee has navigated over this legislation. I commend him for his efforts and appreciate the bipartisan work that has gone into the sunset provision and GAO study which will address the long-term concerns that I have raised here.

Mr. Speaker, there is an old Italian proverb which says that "A lawsuit is like a fruit tree growing in a lawyers' garden." I am afraid that H.R. 1523 has added Public Law 94-142's administrative and informal complaint resolution processes to that garden. I wish it were not the case and hope that the situation can yet be improved.

I support H.R. 1523 at this time for two reasons: First, I do believe Congress should act to restore attorneys' fees to court level, and second, the bill includes sunset on the provision authorizing fees at the administrative level. This sunset will mean that after a sufficient period of time, Congress will be able to examine the impact of the bill as presently constituted and act accordingly. If this provision were not in H.R. 1523, I could not support the bill.

Mr. Speaker, H.R. 1523 serves a vital purpose of allowing courts to authorize attorneys' fees to parents who prevail in Public Law 94-142 litigation. H.R. 1523 also jeopardizes Public Law 94-142's administrative hearing system and the process by which parents and educators informally determine what is appropriate for a handicapped student.

Mr. Speaker, I support the major purpose of H.R. 1523 but wish to register my serious concern that the latter provision noted here may well overshadow the public service constituted in allowing courts to award attorneys' fees to parents who prevail in Public Law 94-142 litigation. The sunset provision represents something of a safety valve for the integrity of Public Law 94-142's decisionmaking system, allow Congress to take a closer look over the next several years.

Mr. Speaker, parents of handicapped students, particularly poor and middle-class parents, should be able to access our judicial system as readily as those with substantial means in order to enforce their rights under Public Law 94-142. The Supreme Court's ruling in Smith versus Robinson will be viewed as only a temporary setback because of the action that Congress is taking. I support this effort.

□ 1415

Mr. Speaker, at this time, I would ask the gentleman from Montana [Mr. WILLIAMS] if he would engage in a colloquy.

Mr. WILLIAMS. Mr. Speaker, will the gentleman yield?

Mr. BARTLETT. I yield to the gentleman from Montana.

Mr. WILLIAMS. Mr. Speaker, I will be pleased to join with my colleague in a colloquy.

Mr. BARTLETT. Mr. Speaker, section 2 of H.R. 1523 amends section 615(e)(4) of the Education of the Handicapped Act by adding the following new provision:

In any action or proceeding brought under this subsection, the court, in its discretion, may award reasonable attorneys' fees, expenses, and costs to the parents or guardian of a handicapped child or youth who is the prevailing party.

Could you clarify the meaning of the terms "action" and "proceeding?"

Mr. WILLIAMS. The term "action" is intended to include a civil action filed in a State or Federal court. The term "proceeding" is limited to the due process hearing that parents are required to exhaust under 615(b)(2) and the State appeal under section 615(c). The term "proceeding" is not intended to include meetings held to develop individualized education programs or meetings to make decisions concerning such matters as the identification, evaluation, or placement of handicapped children.

Mr. BARTLETT. It is my understanding that parents are not entitled to any fees, costs, or expenses when they are declared the prevailing party

in any action or proceeding but at the final appeal of such action or proceeding the school district is declared the prevailing party. Do you agree with this statement?

Mr. WILLIAMS. Yes, I do agree with that.

Mr. BARTLETT. Similarly, where the parents lose in any action or proceeding but at the final appeal of such action or proceeding the parents are declared the prevailing party, do you agree that they are entitled to reasonable fees, costs, and expenses related to all prior actions and proceedings as well as the final appeal?

Mr. WILLIAMS. Yes, I do.

Mr. BARTLETT. Would you clarify the meaning of the terms "reasonable" and "prevailing?"

Mr. WILLIAMS. These terms are intended to be construed as being consistent with all of the standards set forth in the U.S. Supreme Court's decision in *Hensley* v. *Eckerhart*, 461 U.S. 424 (1983). In this case, the Court held, in part, that:

> The extent of a plaintiff's success is a crucial factor in determining the proper amount of an award of attorneys' fees. Where the plaintiff has failed to prevail on a claim that is distinct in all respects from his successful claims, the hours spent on the unsuccessful claim should be excluded in considering the amount of a reasonable fee. Where a lawsuit consists of related claims, a plaintiff who has won substantial relief should not have his attorneys' fee reduced simply because the court did not adopt each contention raised. But where the plaintiff achieved only limited success, the court should award only that amount of fees that is reasonable in relation to the results obtained.

Mr. BARTLETT. I thank the gentleman. Do you share my expectation that, although the precise amount of fees awarded to a prevailing party must be determined on the facts of each case, it is the intent of this legislation that the courts will not simply pay lip service to Hensley decision; rather they will actually undertake the analyses set out in the decision?

Mr. WILLIAMS. Yes, I would agree with that interpretation.

Mr. BARTLETT. And would you also agree that it is the intent of this legislation that the courts must provide a concise but clear explanation of their reasons for the fee award?

Mr. WILLIAMS. Yes.

Mr. BARTLETT. To ensure that we all have the same understanding of the standards set out in Hensley, I would like clarification of certain issues that are of particular importance to me. First, would you state your understanding of the starting point for determining the reasonableness of a fee and the prevailing party's obligation with respect to the claim?

Mr. WILLIAMS. In accordance with Hensley, a useful starting point for determining the amount of a reasonable fee is the number of hours reasonably expended on the litigation multiplied by the reasonable hourly rate. The parents bear the burden of establishing their entitlement and documenting the amount. The parents' attorney must submit evidence supporting the hours worked and the rates claimed. Where documentation is inadequate, the court may reduce the award accordingly. The court also should exclude from the fee calculation those hours that were not reasonably expended. Cases may be overstaffed and the skill and experience of lawyers vary widely. Hours that are excessive, redundant, or otherwise unnecessary should also be excluded. An applicant for fees must exercise billing judgment with respect to hours and should maintain billing time records in a manner that will enable a reviewing court to identify distinct claims.

Mr. BARTLETT. What is your understanding of the next point of inquiry?

Mr. WILLIAMS. The product of reasonable hours times a reasonable rate does not end the inquiry. There remain other considerations, including the critical factor of the results obtained. This factor is particularly crucial where a plaintiff is deemed a "prevailing party" even though he or she succeeded on only some of the claims for relief. In this situtation two questions must be addressed:

First. Did the parent fail to prevail on claims that were unrelated to the claims on which he or she succeeded?

Second. Did the parent achieve a level of success that makes hours reasonably expended a satisfactory basis for making a fee award?

Our intent to limit awards to the parents when they are the prevailing party requires that unrelated claims be treated as if they had been raised in separate lawsuits and therefore no fee may be awarded for services on the unsuccessful unrelated claims.

Where the prevailing party only obtains partial or limited success, the product of hours reasonably expended on the litigation as a whole times a reasonable hourly rate may be an excessive amount. This will be true even where the prevailing party's claims were interrelated, nonfrivolous, and raised in good faith. The most critical factor is the degree of success.

Where the parents only win on a preliminary procedural matters—for example, motion to compel discovery, certification of the class, or motion filed by the school district to dismiss the action—but they fail to prevail on the merits on any claim, for example, a claim that the hearing examiner was not impartial, they are not considered a "prevailing" party and therefore are not entitled to fees.

And finally, in contrast, where a prevailing party has obtained "excellent" results, his or her attorney should be entitled to recover a full fee. See the text of Hensley accompanying footnotes 9 and 11. Under these circumstance, the fee award should not be reduced simply because the prevailing party failed to prevail on every contention raised in the lawsuit. Litigants in good faith may raise alternative legal grounds for a desired outcome and the courts rejection or a failure to reach certain grounds is not sufficient reason for reducing a fee. The result is what matters.

Mr. BARTLETT. Mr. Speaker, I reserve the balance of my time.

□ 1430

The SPEAKER pro tempore. The gentleman from Texas [Mr. BARTLETT] has 5½ minutes remaining and the gentleman from Montana [Mr. WILLIAMS] has 13 minutes remaining.

Mr. WILLIAMS. Mr. Speaker, I yield 7 minutes to my colleague, the gentleman from New York [Mr. BIAGGI], without whose help and leadership this bill would not have come this far.

Mr. BIAGGI. I thank the chairman for yielding and I also take this opportunity to commend him for his vital contribution and leadership; also the gentleman from Texas [Mr. BARTLETT] for his sense of cooperation.

Although we have arrived at this point, Mr. Speaker, it was not without some great difficulty, and I regret deeply that 3(B), the codification portion of the bill has been deleted, because in my mind it was critical to permanently protect the rights of the handicapped children, which were addressed in this bill; but for the sake of expediting this bill and providing once and for all a clarification with relation to attorney's fees, I rise to support the legislation.

As one of the original authors of Public Law 94-142, which was enacted some 10 years ago, I have during this period shepherded its development and clearly, it has worked the will of the then Congress. I am proud to be here today to support this legislation.

The part of the bill that the gentleman from Texas says is flawed I regard as its strength. What we are talking about is providing attorneys' fees for those individuals who are being denied access to the educational system; access as provided by Public Law 94-142.

It is argued that the hearings are informal and that the school boards are generally cooperative. The reality of the matter is this: We are talking about Mr. or Mrs. John Doe who have a problem with a child gaining access, who then come before a school board. While most of us have experience, testifying in one forum or another; so hence we are not impressed nor more intimidated by a school board. Do we fully understand the psychological impact and burden it places on the parents appearing before a quasi-judi-

cial body? There is an inhibition placed; they do not have the ability nor experience to argue and to make their case.

At the same time, the school board has present, on staff, their own attorneys; but absent that, members of the school board are not burdened with the same lack of experience. They have been subjected to election; they have been through the process time and time again; they come in in an adversarial position, and that is the critical nature of this legislation and of this situation.

They are there to say that the child should not be in the school. The parents want the child in the program. So clearly, confrontation exists. It is important to establish a record, whether the parents prevail at this point or not, the record must be established. Most parents, by themselves, cannot effectively establish the record on which a step forward into the courts can be based. They do not have that knowledge or skills.

For the most part, they will not prevail, and oftentimes when they are rejected at that point, they leave and give up the fight, to the detriment of the child.

In contravention of Public Law 94-142, which was clearly the intent of the Congress.

Reference is made to Smith versus Robinson, which said that the bill was silent. Well, that may be a gray area, but certainly it was not a gray area in the minds of the Members of the House in committee who voted for this bill in 1975. We went through the same committee process, and it was the intention that there be attorneys' fees; there would be some attorneys present.

Well, Smith versus Robinson upset that whole course of events; and that is what we are here today, to deal with the legislation before us. That puts it in place; not simply in the courts, but at the administrative hearings where we have most of the difficulty.

Why should not the parents, in the advocacy of the child access rights, civil rights to put it more aptly.

Why should not that parent have that right? That is what we are talking about; and for those who say legal fees will run wild, or it will be a lawyer's harvest, I think not. The fact of the matter is, when you are dealing with 4 million handicapped children in this educational system, and you talk in terms of the paltry sum that have finally gone to court, the cost is minimal.

It has been stated by the Congressional Budget Office that this legislation if enacted will require no additional cost to the Federal Government.

So I have analogized this matter, Mr. Speaker, in a way that all people can understand: This is like the David and Goliath struggle; David with his slingshot slew the mighty Goliath. In this case, the school system is the Goliath. The parents are David. The unfortunate part of it is that this David does not have a slingshot. The slingshot in this instance would be represented by the presence of an attorney, with an assurance that legal fees will be paid and providing they would not be swayed from engaging an attorney because they are afraid of the cost of said lawyer.

There is a paramount issue here, pure and simple: Four million handicapped children, who have the right to have access to school. It is a civil right, it is a right mandated by Public Law 94-142. It is not to be denied; it is to be enhanced in every way, and his legislation does it.

The committee substitute provides an appropriate response to the July 5, 1984, decision by the Supreme Court in Smith versus Robinson which eliminated the ability of parents to secure the educational rights of their handicapped children. By eliminating the parent's inability to be reimbursed for fees under Public Law 94-142—an elimination that I believe was a misinterpretation of the law—the Court has made the due process procedures under the act unavailable to many low-income families.

This bill restores equity to this process and clarifies the original intent of Congress in this matter. The language in this bill which provides reimbursement for fees, identical to the language adopted by the Supreme Court in the 1980 case New York Gaslight Club versus Carey.

It is important to note that statistically, there are very few cases under Public Law 94-142 that actually go into litigation that this bill seeks to address. In only about 0.03 percent of the 4.2 million students in special education, is there an appeal through the formal administrative proceedings. An even smaller number, only 67 cases in 1983, go beyond the administrative proceedings to court. Clearly, schools and parents are working together effectively to meet the needs of handicapped students.

However, we need H.R. 1523 for the very reason that there are exceptions to every rule. For example, we know that discrimination on the basis of race and disability continues to be a problem for many minorities that are incorrectly classified as mentally retarded. For the benefit of my colleagues, I wish to place into the RECORD a memo that was written by the Disability Rights and Education Fund that outlines the special problems faced by minorities in special education:

ATTORNEY'S FEES UNDER THE EHA—IMPACT ON MINORITY CHILDREN

Too often disabled children involved in special education are assumed to be white and middle class. To the contrary, studies indicate that due to a variety of factors such as lack of pre-natal care, the incidence of disability is significantly higher among minority populations.[1] Moreover, minority children not only face all the issues that all disabled children face in securing an appropriate integrated education, but also face additional burdens due to racial discrimination.

Approximately four and one half million children are served under the Education For All Handicapped Children's Act (U.S. Dept. of Education, 1985). Minority students overall, and especially blacks, are more likely than white students to be in special education and are greatly over-representated in some special education programs. In 1980, enrollment in classes for the educable mentally retarded [EMR], trainable mentally retarded [TMR], specific learning disabled [SLD], seriously emotionally disturbed [SED], and speech impaired [SI] accounted for 93 percent of the total enrollment in special education. The incidence of enrollment in these classes differed significantly between minorities and non-minorities (Table 1).

Table 1.—Number of Students Per 1000 Enrolled in EMR, TMR, SLD, SED, and SI in 1980[2]

All minorities	83.2
Blacks only	97.4
Hispanics only	65.0
Whites	72.4

[2] Dept. of Education, Office of Civil Rights, Elementary and Secondary School Civil Rights Survey (1980-1981).

Discrimination on the basis of race and on the basis of disability merge in the context of the over-classification of minorities as mentally retarded. In 1980, blacks were three times as likely as whites to be enrolled in classes for the educable mentally retarded and one and a half times as likely to be enrolled in trainable mentally retarded programs.[2] While blacks comprise only 16 percent of the school population, they represent 39 percent of the enrollment in EMR classes.[3] This classification results in stigma, and segregated, dead-ended placements which largely determine future adult roles.[4] See, *Larry P.* v. *Riles*, 495 F. Supp. 926, 935 (1979).

Specific findings on misclassification follow.[5]

1. The average percentage of minority students in EMR classes exceeds the average percentage of whites in every state except four.

2. The South exhibits consistently high and disproportionate minority enrollments in EMR. While not nearly as high as the

[1] Statistical Abstract of the United States (102nd ed., 1981) at 25, Table Nos. 26, 28; reprinted in Bureau of the Census, U.S. Dept. of Commerce. See also *Executive Summary for the California Disability Survey—Prepared for the California Dept. of Rehabilitation* (J. Shanks & H. Freeman, Dirs., 1980), Table ES-7. Moreover, a study by Glideman and Roth for the Carnegie Council on Children concluded that physical disabilities, sensory handicaps, and chronic health impairments may be twice as common among poor children as among other children. *Unexpected Minority*, p. 5.

[2] *Id.*

[3] National Academy of Sciences Analysis of Fall 1978 data from the Office of Civil Rights Elementary and Secondary Civil Rights Survey.

[4] Minority students, other than those classified EMR, are also over-represented in segregated facilities. In 1978-79, state schools for the visually handicapped has a 23 percent black enrollment and state schools for the seriously emotionally disturbed had a 25 percent black enrollment, though blacks made up only 16 percent of the regular public school population. *Id.*

[5] *Id.*

South, relatively high minority disproportions are found in the Border states. The Northeastern and Midwestern states have much lower minority placement rates than other states. More specifically, in 1978, minorities were three or more times as likely to be placed im EMR classes in:

9 of 11 Southern states
2 of 7 Border states (Delaware, Kentucky, Maryland, Missouri, New Mexico, Oklahoma, and West Virginia)
2 of 13 Western states
1 of 9 Northeastern states

Minorities were more than twice, but less than three times as likely to be placed in EMR classes in:

2 of 11 Southern states
2 of 7 Border states
3 of 9 Northeastern states
5 of 13 Western states
6 of 11 Midwestern states

3. In general, smaller degrees of disproportion occur in districts, states, and regions where smaller proportions of students are enrolled in EMR classes.

4. Districts with larger EMR disproportions are those in which the racial composition of the schools is more nearly balanced; districts where schools have imbalances tend to have more similar EMR rates for whites and minorities.

5. Among middle-sized school districts, those with student enrollments ranging from 1,000 to 30,000 students, there is a strong positive correlation between the placement of minorities in EMR classes and the suspension of minority students from school.

Moreover, classification as mentally retarded is more often used as a disciplinary tool for blacks than whites. A recent study by Designs for Change (1982) found that while the incidence of EMR placement for whites was virtually the same in elementary (1.77 percent) as secondary (1.78 percent) school, the EMR incidence among blacks jumped from 3.42 percent to 4.83 percent between elementary and high school. Experts have attributed this difference to the use of the EMR classification to isolate hard-to-handle youth.

The issue of misclassification was a major focus of Congress in enacting the EHA. Specific provisions were enacted to guard against discriminatory testing and segregation. See, 20 USC 1412 (5)(c) and 34 CFR 300.532. A parent who disputes the validity of the tests, or the results, or the placement decision, has a right to challenge the school district's determination through the administrative hearing procedures established under the Act.[6]

However, few parents will utilize the process without the assistance of a trained advocate. The fair hearing is similar to a trial. An impartial hearing officer presides, and both parties have the right to examine and cross-examine witnesses and present documentary evidence, which is often technical or medical. School districts are represented either by counsel or by trained specialists, who possess education, psychology, or other degrees and have been trained by attorneys. Few parents feel comfortable representing themselves in this situation. Class, race, and educational differences exacerbate the inherent inequality.

The whole purpose of attorney's fees provisions is to help equalize the balance of power and to enable those protected by civil rights statutes to pursue the procedures established by Congress. As it was stated in a Senate Report on the issue of civil rights attorney's fees:

In many cases arising under our civil rights law, the citizen who must sue to enforce the law has little or no money with which to hire a lawyer. If private citizens are to be able to assert their civil rights, and if those who violate the Nation's fundamental laws are not to proceed with impunity, then citizens must have the opportunity to recover what it costs them to vindicate these rights in court.

In enacting the 1976 Civil Rights Attorney's Fees Act, Congress recognized that, "if our civil rights laws are not to become mere hollow pronouncements which the average citizen cannot enforce, we must maintain the traditionally effective remedy of fee shifting." S. Rep. No. 1011, 94th Cong., 2d Sess. 6 (1976).

The Supreme Court has acknowledged the importance of attorney's fees in a case which extended the recovery of fees to the administrative hearing in a statute with a similar structure to the EHA. The Court stated that the primary purpose of an attorney's fee provision is "to make it easier for a plaintiff of limited means to bring a meritorious suit." *N.Y. Gaslight Club, Inc.* v. *Carey*, 447 U.S. 52, 61 (1980).

There can be no doubt that an attorney's fee provision for the EHA which reimburses prevailing parents for fees incurred in the administrative as well as judicial proceedings will be a critical tool for minority parents seeking to secure Congress' guarantee of an appropriate education for their children. Without such a provision, minorities will continue to be powerless to challenge school-district decisions that are adverse to their children. A right without a remedy is no right at all.

In closing, Mr. Speaker, I wish to thank the chairman of the subcommittee, Mr. WILLIAMS, for his cooperation and our Republican colleagues, JIM JEFFORDS and STEVE BARTLETT. I also want to note for the RECORD the efforts of countless disability organizations which have played a pivotal role to date. They include United Cerebral Palsy, National Society for Children and Adults with Autism, the National Education Association, the Association for Retarded Citizens and the Disability Rights and Education Fund. They are certainly not the only organizations that have been interested and supportive of our efforts—but they are several of the many members of the Coalition for Citizens with Developmental Disabilities that have helped to bring us to this point today.

Mr. Speaker, I urge adoption of this legislation so that we may look back in another 10 years, as we celebrate the 20th anniversary of Public Law 94-142, and know that we did the right thing in adopting this legislation.

Mr. BARTLETT. Mr. Speaker, I yield 4 minutes to the gentleman from Vermont [Mr. JEFFORDS], the ranking member of the Education and Labor Committee.

Mr. JEFFORDS. Mr. Speaker, the bill before us today, H.R. 1523, the Handicapped Children's Protection Act, is necessary because of a Supreme Court decision in the case of Smith versus Robinson. There is no doubt that there is agreement among all of us that the decision rendered by the court in July 1984 must be overturned.

In this decision the court ruled that Public Law 94-142, the original authorizing legislation enabling a free and appropriate education for all handicapped children, was silent on the issue of payment of attorneys' fees. The question we face with the bill before us today is how to balance the original intent of the law and a parent's ability to seek the enforcement of their child's right to an education. All of us who have worked on this issue have labored long and hard to bring a reasonable bill to this body for consideration. I must congratulate the chairman of the subcommittee, Mr. WILLIAMS, and the ranking Republican, Mr. BARTLETT, for their efforts on this bill. The results of their labors is a bill that continues to support a handicapped child's rights, and the enforcement of those rights, to an appropriate education.

As a member of the Education and Labor Committee for the past 12 years, I worked on the original legislation which became Public Law 94-142. There was substantial debate and discussion at that time regarding the procedures established to insure adequate due process. During those discussions it was made clear that the intent was to guarantee that the proceedings would remain as informal as possible prior to a court appeal. Inherent in this construct is the belief that the process would not develop into a prolonged, adversarial confrontation between the parents and the schools. The overriding determining factor was that the parents and the schools could be brought together in an informal way to work out a sound agreement regarding the appropriate education program for the child.

In addition, substantial work was done to assure that each party would have open access to the documentation used in such informal proceedings. We attempted to reduce the costs associated with such procedures for the parents by making transcripts of the proceedings available to them at their request. Much of the work that I did 10 years ago with respect to the original legislation, in committee and in conference, was directed toward assuring that parents would not have to incur extensive expense, that the proceedings would remain as informal as possible, and that the procedural safeguards were clarified and strengthened so that the legal rights of the child and the parent would be protected. We wanted to provide a complete remedy to the parents and assure that a court review was available should it be necessary. Remarks made on the floor during the discussion of the conference report substantiated our ef-

[6] Studies suggest that use of proper assessment techniques will not result in more than 1.25 percent of any ethnic group being placed in EMR classes. (Designs for Change, 1982.)

forts toward the development of an impartial due process hearing with respect to the programs under the act.

I believe that the statistics bear out the original intent of the law and support my conviction that the law has worked well. In the development of most individualized education programs for handicapped children, disagreements are resolved informally. In the 1983-84 school year, 1,462 hearings were held, with only 56 going to court. This means that only 1 out of every 3,000 of the almost 4 million handicapped students served under the law was involved in a first-level hearing, and only 1 out of every 64,800 was the subject of litigation.

The issue is not whether attorneys' fees for court cases in which the parents prevail should be recompensed, but whether such fees should be paid for work done at the administrative hearing level. By providing for attorneys' fees at the administrative level, I am concerned that we will be reversing our original intent and interfering with a procedure that is working. Instead of informality and cooperation, the process will become formal and adversarial. The process will be working against those very people it was established to protect.

Currently there is no prohibition against the use of an attorney by either party at the administrative proceedings level. Neither the school district nor the parent is prohibited from using an attorney if so desired. Similarly, because one party has an attorney does not automatically trigger the requirement that the other party retain an attorney. We know though, that many school systems are understandably reluctant to hire attorneys. In a recent survey, 56 percent of the school districts questioned either never use an attorney, or only use one when the parent does. Our action in this bill may draw in the use of an attorney at an earlier stage in the proceedings than has been the norm to date. In this way, we may be disrupting a system of proven effectiveness. We may be providing a disincentive to resolve disagreements informally, as soon in the process as possible. We may instead be providing incentive to take the dispute to court.

The seriousness of this issue deserves discussion by this body. Our debate on the issue though, has been precluded somewhat by the action taken by the other body. Instead, concerns regarding the wisdom of providing for attorneys' fees at the administrative proceedings level have been partially addressed in H.R. 1523 by the inclusion of a sunset provision. I appreciate the willingness of the majority to work with the minority on this point. By including a 4-year sunset provisions directed toward the payment of attorney's fees at the hearing level, and requiring a GAO study to assess the affects of the provision, we can review the outcome and make the appropriate changes if they are necessary. I hope that my fears are proven wrong. It would be nice to be able to come to this body 4 years from now and heartily endorse the payment of attorneys' fees at the administrative level. I am not sure that such an action will be supported by our findings.

None of us disputes the intent of this bill. We all want to see the decision in Smith versus Robinson overturned, and allow the courts to authorize the payment of attorneys' fees to parents who prevail in Public Law 94-142 litigation. We may have tipped the scales too far in favor of such payments, but I believe that the balance we seek comes through the sunset provision added by the committee amendments today.

All children have the right to a free and appropriate education. Parents have the right to protect the rights of their children in this regard. We must act to retain these rights. These efforts should be supported and I encourage my colleagues to do so.

□ 1440

The SPEAKER pro tempore. The gentleman from Montana [Mr. WILLIAMS] has 6 minutes remaining.

Mr. WILLIAMS. Mr. Speaker, I yield 3 minutes to our colleague, the gentleman from California [Mr. MILLER].

Mr. MILLER of California. Mr. Speaker, I rise in strong support of H.R. 1523, the Handicapped Children's Protection Act, a bipartisan bill which reaffirms the rights of handicapped children to a free and appropriate public education.

Tonight we will celebrate the 10th anniversary of Public Law 94-142, the Education for All Handicapped Children's Act of 1975. As a coauthor of Public Law 94-142, I am extremely proud of the accomplishments of our law in the last decade. This landmark legislation has opened the schoolhouse doors to some 4 million handicapped children. The evidence is clear that the law has been effective.

Some problems have emerged with this law, and correcting some of those shortcomings is the goal of H.R. 1523. Some disabled children and their parents, and others who have been misclassified as handicapped, have been denied an appropriate education or the right to redress their grievances as the law guarantees.

Today's action is viewed as a response to the invitation of some of the Justices in Smith versus Robinson who asked Congress to "revisit this matter," because they argued that "until it does, the handicapped children of this country whose difficulties are compounded by discrimination and other deprivations of constitutional rights will have to pay the costs."

Parents' involvement in the education of their handicapped child is not only essential to the task, it is a right specifically included in the law.

This is a right, not just for the wealthy and well informed, but for all handicapped children.

The law requires parental involvement at all stages of the process, from requesting an evaluation to yearly review of the individualized education plan [IEP]. In those instances where parents feel compelled to pursue a formal hearing or court action to attain free appropriate education for their child, providing reimbursement for needed legal assistance is critical to assure fair and equal access to this right.

As an original coauthor of this landmark law, and as one who specifically wrote the provisions assuring parents the very rights we are discussing today, it was my clear intent that parents seeking redress should be entitled to attorney's fees.

I wrote this section of the law with three facts in mind:

First, without the ability to pay, parents' ability to exercise the due process rights which are the heart of Public Law 94-142 becomes meaningless. A right which is unaffordable is no right at all.

Second, without parental advocacy on behalf of handicapped children, these children's access to a free appropriate public education will be further jeopardized.

And third, neither I nor others who wrote the law intended that parents should be forced to expend valuable time and money exhausting unreasonable or unlawful administrative hurdles to gain for their children an education which meets their individual needs.

It is important to note that there are certain situations in which it is not appropriate to require the exhaustion of EHA administrative remedies before filing a civil law suit. These include complaints that: First, an agency has failed to provide services specified in the child's individualized education program [IEP]; second, an agency has abridged or denied a handicapped child's procedural rights (that is, failure to implement required procedures concerning least restrictive environment or convening of meetings); third, an agency has adopted a policy or pursued a practice of general applicability that is contrary to the law, or where it would otherwise be futile to use the due process procedures (that is, where the hearing officer lacks the authority to grant the relief sought); and fourth, an emergency situation exists (that is, failure to provide services during the pendency of proceedings, or a complaint concerning summer school placement which would not likely be

resolved in time for the student to take advantage of the program).

Today's bill addresses all of these concerns. I urge my colleagues to support this important legislation.

Mr. BARTLETT. Mr. Speaker, I yield the remaining 1½ minutes to the gentlewoman from Connecticut [Mrs. JOHNSON], a good friend of mine. We came together to this Congress in the 98th class, and we have worked together ever since.

Mrs. JOHNSON. With only 1½ minutes remaining, let me say very, very briefly that this is a good bill that addresses a very important concern, but it does need to be drawn more precisely and narrowly.

I thank the gentlemen for their colloquy. That moves to some extent in the right direction.

I urge the committee in conference to adopt the language that the subcommittee, on a bipartisan basis, adopted and brought to the full committee originally. It is imperative that every Member of this body find out what is happening in terms of insurance policies. The availability of those policies is dropping, the costs are skyrocketing. We must be careful not to divert even more money into litigation and away from the very education that these children desperately need and that we here in Congress are saying is critical to the future of America.

We need to provide all children with the right to litigation fees in court. But we must move carefully in supporting attorney's fees to be awarded at the administrative level without limitation, without going to court, because we are dealing with a subject that is very sensitive and difficult.

I do believe we must do children justice. I know that we risk doing to school districts what is happening to cities, to day-care centers, to nursemidwives, and that is the cost and availability of insurance are way up and our school districts are, in the future, not only not going to make playgrounds available but they are going to withdraw many other benefits.

Mr. WILLIAMS. Mr. Speaker, I yield myself whatever time I may consume.

Mr. Speaker, the gentlewoman raises a matter which has been one of great contention. I will tell my colleagues that it has been considered, that the bill has been accepted overwhelmingly, and the administrative fee language in this bill is identical to that which has been accepted in the Senate. This bill provides to handicapped children and their parents the same rights, no more, no less, that are provided to all other groups under the other Civil Rights Acts of the United States. Handicapped children and their parents deserve no less than those protections which are provided to all of our other citizens.

This bill accomplishes that and no more.

Mr. BARTLETT. Mr. Speaker, I yield back the balance of my time.

Mr. WILLIAMS. Mr. Speaker, I have no further requests for time and I yield back the balance of my time.

The SPEAKER pro tempore. The question is on the motion offered by the gentleman from Montana [Mr. WILLIAMS] that the House suspend the rules and pass the bill, H.R. 1523, as amended.

The question was taken; and (two-thirds having voted in favor thereof) the rules were suspended, and the bill, as amended, was passed.

A motion to reconsider was laid on the table.

Mr. WILLIAMS. Mr. Speaker, I ask unanimous consent that the Committee on Education and Labor be discharged from further consideration of the Senate bill (S. 415) to amend the Education of the Handicapped Act to authorize the award of reasonable attorney's fees to certain prevailing parties, and to clarify the effect of the Education of the Handicapped Act on rights, procedures, and remedies under other laws relating to the prohibition of discrimination, and ask for its immediate consideration.

The Clerk read the title of the Senate bill.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Montana?

There was no objection.

The Clerk read the Senate bill as follows:

S. 415

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That this Act may be cited as the "Handicapped Children's Protection Act of 1985".

SEC. 2. Section 615(e)(4) of the Education of the Handicapped Act is amended by inserting "(A)" after the paragraph designation and by adding at the end thereof the following new subparagraphs:

"(B) In any action or proceeding brought under this subsection, the court, in its discretion, may award a reasonable attorney's fee in addition to the costs to a parent or legal representative of a handicapped child or youth who is the prevailing party.

"(C) Whenever the parent or legal representative of a handicapped child or youth—

"(i) is awarded fees under subparagraph (B), and

"(ii) is represented by a publicly funded organization which provides legal services,

the reasonable attorney's fee which is awarded pursuant to this subsection shall be computed based upon the actual cost related to the bringing of the civil action under this subsection to the publicly funded organization, including the proportion of the compensation of the attorney so related, other reasonable expenses which can be documented, and the proportion of the annual overhead costs of the publicly funded organization attributable to the number of hours reasonably spent on such civil action.

"(D) For the purpose of this paragraph, the term 'publicly funded organization' means any organization which receives funds, other than attorney fee awards, from Federal, State, or local governmental sources which are available for use during any fiscal year in which the action or proceeding is pending to enable the organization to provide legal counsel or representation.".

SEC. 3. Section 615 of the Education of the Handicapped Act is amended by adding at the end thereof the following new subsection:

"(f) Nothing in this title shall be construed to restrict or limit the rights, procedures, and remedies available under the Constitution, title V of the Rehabilitation Act of 1973, or other Federal statutes protecting the rights of handicapped children and youth, except that before the filing of a civil action under such laws seeking relief that is also available under this part, the procedures under subsection (b)(2) and (c) shall be exhausted to the same extent as would be required had the action been brought under this part.".

SEC. 4. The amendment made by section 2 shall apply with respect to actions or proceedings brought under section 615(e) of the Education of the Handicapped Act after July 3, 1984, and actions or proceedings brought prior to July 4, 1984, under such section which were pending on July 4, 1984.

MOTION OFFERED BY MR. WILLIAMS

Mr. WILLIAMS. Mr. Speaker, I offer a motion.

The Clerk read as follows:

Mr. WILLIAMS moves to strike out all after the enacting clause of the Senate bill, S. 415, and insert in lieu thereof the text of H.R. 1523, as passed by the House.

The motion was agreed to.

The Senate bill was ordered to be read a third time, was read the third time, and passed.

The title of the Senate bill was amended so as to read: "A bill to amend the Education of the Handicapped Act to authorize the award of reasonable attorneys' fees to certain prevailing parties, to clarify the effect of the Education of the Handicapped Act on rights, procedures, and remedies under other laws relating to the prohibition of discrimination, and for other purposes."

A motion to reconsider was laid on the table.

A similar House bill (H.R. 1523) was laid on the table.

APPOINTMENT OF CONFEREES ON S. 415

Mr. WILLIAMS. Mr. Speaker, I ask unanimous consent that the House insist on its amendment to the Senate bill, S. 415, and request a conference with the Senate thereon.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Montana? The Chair hears none and, without objection, appoints the following conferees: Messrs. HAWKINS, BIAGGI, WILLIAMS, HAYES, MARTINEZ, ECKART of Ohio, JEFFORDS, GOODLING, COLEMAN of Missouri, and BARTLETT.

There was no objection.

PERMISSION FOR COMMITTEE ON PUBLIC WORKS AND TRANSPORTATION TO FILE REPORT ON H.R. 2817, SUPERFUND AMENDMENTS OF 1985

Mr. WISE. Mr. Speaker, I ask unanimous consent that the Committee on Public Works and Transportation may have until midnight tonight, November 12, 1985, to file a report on H.R. 2817, the Superfund Amendments of 1985.

Mr. Speaker, this has been cleared with the minority.

The SPEAKER pro tempore (Mr. MONTGOMERY). Is there objection to the request of the gentleman from West Virginia?

There was no objection.

ELIMINATION OF DECENNIAL CENSUSES OF DRAINAGE

Mr. ACKERMAN. Mr. Speaker, I move to suspend the rules and pass the bill, H.R. 2722, to amend title 13, United States Code, to eliminate the requirement relating to decennial censuses of drainage.

The Clerk read as follows:

H.R. 2722

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That (a) section 142 of title 13, United States Code, is amended—

(1) in subsection (b), by striking out "and drainage." and inserting in lieu thereof a period; and

(2) by amending the section heading to read as follows:

"§ 142. Agriculture and irrigation".

(b) The analysis for chapter 5 of title 13, United States Code, is amended—

(1) in the item relating to subchapter II, by striking out "DRAINAGE,"; and

(2) by striking out the item relating to section 142 and inserting in lieu thereof the following:

"142. Agriculture and irrigation.".

The SPEAKER pro tempore. Pursuant to the rule, a second is not required on this motion.

The gentleman from New York [Mr. ACKERMAN] will be recognized for 20 minutes and the gentleman from Utah [Mr. HANSEN] will be recognized for 20 minutes.

The Chair recognizes the gentleman from New York [Mr. ACKERMAN].

Mr. ACKERMAN. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, H.R. 2722 is a noncontroversial bill. H.R. 2722 was introduced by the chairman of the Subcommittee on Census and Population, Mr. GARCIA, at the request of the Secretary of Commerce.

The drainage requirement was added to the 1920 Decennial Census Act as a statistical aid in developing agricultural land. At present, the little drainage activity that does exist is reported by other surveys—therefore, keeping decennial censuses on drainage would create duplicate data.

The Subcommittee on Census and Population conducted a hearing on H.R. 2722 on June 26, 1985, and received testimony from representatives of the Soil Conservation Service, U.S. Department of Agriculture and the Bureau of Census.

On the same day, the subcommittee, by voice vote, approved H.R. 2722, without amendment: and on July 24, the Committee on Post Office and Civil Service favorably reported the bill.

The Congressional Budget Office estimates that enactment of H.R. 2722 would result in savings of $280,000 between 1986 and 1989.

I urge my colleagues to support the legislation.

Mr. HANSEN. Mr. Speaker, I yield myself such time as I may consume.

Mr. HANSEN. Mr. Speaker, I rise in support of H.R. 2722 which was proposed by the administration and would eliminate requirements in section 142 of title 13, which stipulates that a census of drainage is to be taken every 10 years.

Since 1930, new capital investments in drainage projects have almost been matched by depreciation and abandonment of drainage facilities, thus indicating very little new drainage activity. Data collected in the 1977 census of drainage indicated that a majority of drainage districts apparently are inactive. The U.S. Census Bureau through its research found that the data collected was not being used.

Mr. Speaker, I feel it is important that this requirement be deleted. The reasons for eliminating the collection of this data are clear since it has little use, is difficult to collect, and if needed can be better collected by the field staff of the Soil Conservation Service.

Mr. Speaker it is also important to note that repeal of this requirement would enable the Census Bureau to carry out their responsibilities in a more cost-effective manner. Based on the cost of the previous census, with adjustments for inflation, the expected savings to the Census Bureau, if H.R. 2722 were enacted, is estimated to be $35,000 in 1986, $85,000 in 1987, $120,000 in 1988, and $40,000 in 1989.

I urge my colleagues to support this legislation.

□ 1455

Mr. Speaker, I yield back the balance of my time.

Mr. ACKERMAN. Mr. Speaker, I yield back the balance of my time.

The SPEAKER pro tempore (Mr. MONTGOMERY). The question is on the motion offered by the gentleman from New York [Mr. ACKERMAN] that the House suspend the rules and pass the bill, H.R. 2722.

The question was taken; and (two-thirds have voted in favor thereof) the rules were suspended and the bill was passed.

A motion to reconsider was laid on the table.

GENERAL LEAVE

Mr. ACKERMAN. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days in which to revise and extend their remarks, and to include extraneous matter, on H.R. 2722, the bill just passed.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from New York?

There was no objection.

ANNOUNCEMENT BY THE SPEAKER PRO TEMPORE

The SPEAKER pro tempore. Debate has been concluded on all motions to suspend the rules.

Pursuant to the provisions of clause 5, rule I, the Chair will now put the question on the motion on House Resolution 314, on which further proceedings were postponed earlier today and on which the vote will be taken by the yeas and nays.

EXPRESSING SENSE OF THE HOUSE REGARDING THE DEFECTION OF MIROSLAV MEDVID

The SPEAKER pro tempore. The pending business is the question of suspending the rules and agreeing to the resolution, H. Res. 314, as amended.

The Clerk read the title of the resolution.

The SPEAKER pro tempore. The question is on the motion offered by the gentleman from California [Mr. LANTOS] that the House suspend the rules and agree to the resolution, H. Res. 314, as amended, on which the yeas and nays are ordered.

The vote was taken by electronic device, and there were—yeas 405, nays 3, not voting 26, as follows:

[Roll No. 399]

Mr. CROCKETT changed his vote from "yea" to "nay."

Mr. REID changed his vote from "nay" to "yea."

So (two-thirds having voted in favor thereof) the rules were suspended and the resolution, as amended, was agreed to.

The result of the vote was announced as above recorded.

The title of the resolution was amended so as to read: "Resolution expressing the sense of the House of Representatives that the President should pursue an active and impartial investigation to determine whether Miroslav Medvid was accorded all the rights due him as a potential defector."

A motion to reconsider was laid on the table.

COMMUNICATION FROM THE CLERK OF THE HOUSE

The SPEAKER pro tempore laid before the House the following communication from the Clerk of the House of Representatives:

WASHINGTON, DC.,
November 8, 1985.

Hon. THOMAS P. O'NEILL, Jr.,
The Speaker, House of Representatives, Washington, DC.

DEAR MR. SPEAKER: Pursuant to the permission granted in Clause 5, Rule III of the Rules of the U.S. House of Representatives, I have the honor to transmit sealed envelopes received from the White House at 4:35 p.m. on Friday, November 8, 1985 as follows:

(1) Said to contain a message from the President wherein he transmits the 1983 and 1984 annual reports under the Federal Mine Safety and Health Act of 1977 as prepared by the Secretary of Labor; and

(2) Said to contain a message from the President whereby he transmits the 1984 annual reports on activities under the Occupational Safety and Health Act of 1970 of the Departments of Labor and Health and Human Services and of the Occupational Safety Review Commission; and

(3) Said to contain H.R. 2409, an Act to amend the Public Health Service Act to revise and extend the authorities under that Act relating to the National Institutes of Health and National Research Institutes, and for other purposes, and a veto message thereon.

With kind regards, I am,

Sincerely,

BENJAMIN J. GUTHRIE,
Clerk, House of Representatives.

ANNUAL REPORTS FOR FISCAL YEARS 1983 and 1984 ON MINE SAFETY AND HEALTH ACTIVITIES—MESSAGE FROM THE PRESIDENT OF THE UNITED STATES

The SPEAKER pro tempore laid before the House the following message from the President of the United States; which was read and, together with the accompanying papers, without objection, referred to the Committee on Education and Labor:

(For message, see proceedings of the Senate of today, Tuesday, November 12, 1985.)

□ 1520

ANNUAL REPORTS OF DEPARTMENT OF LABOR, DEPARTMENT OF HEALTH AND HUMAN SERVICES, AND OF OCCUPATIONAL SAFETY AND REVIEW COMMISSION—MESSAGE FROM THE PRESIDENT OF THE UNITED STATES

The SPEAKER pro tempore laid before the House the following message from the President of the United States; which was read and, together with the accompanying papers, without objection, referred to the Committee on Education and Labor:

(For message, see proceedings of the Senate of today, Tuesday, November 12, 1985.)

HEALTH RESEARCH EXTENSION ACT OF 1985—VETO MESSAGE FROM THE PRESIDENT OF THE UNITED STATES

The SPEAKER pro tempore laid before the House the following veto message from the President of the United States:

To the House of Representatives:

I am returning herewith without my approval H.R. 2409, the "Health Research Extension Act of 1985," which would extend and amend the biomedical research authorities of the National Institutes of Health (NIH).

My action on this bill should in no way be interpreted as a lessening of this Administration's strong commit-

ment to the biomedical research endeavors of NIH. In fact, I want to underscore my personal support and the support of my Administration for biomedical research and for the NIH. For over 40 years, the NIH has enjoyed unparalleled success. Enormous progress in research and the improved health of the American people attest to that success. An appropriations bill or a continuing resolution will provide uninterrupted funding for NIH activities in fiscal year 1986.

I believe that instead of fostering a strong Federal biomedical research effort, H.R. 2409 would adversely affect the pursuit of research excellence at NIH by:

—imposing numerous administrative and program requirements that would interfere with the ability to carry forward our biomedical research activities in the most cost-effective manner and would misallocate scarce financial and personnel resources;

—establishing unneeded new organizations, which would lead to unnecessary coordination problems and administrative expenses while doing little to assist the biomedical research endeavors of NIH; and

—imposing a uniform set of authorities on all the research institutes, thus diminishing our administrative flexibility to respond to changing biomedical research needs.

Although H.R. 2409 is overloaded with objectionable provisions that seriously undermine and threaten the ability of NIH to manage itself and is therefore unacceptable, I recognize there are areas in which the administration can step forward to strengthen specific research efforts.

As Senator HATCH pointed out when introducing the NIH reauthorization bill in the Senate in June of this year, arthritis afflicts some 49 million of this Nation's citizens and "all of us suffer, at some time in our life, from some form of arthritis." Further, arthritis, along with musculoskeletal and skin diseases, "collectively result in an extraordinary loss to our economy from lost productivity as well as from medical expense."

In recognition of the plight of the millions of arthritis victims and society's costs, I have directed the Secretary of Health and Human Services to establish administratively a separate National Institute of Arthritis and Musculoskeletal and Skin Diseases that will meet the continuing need for coordinated research in this important area. This directive is consistent with the Department's recommendation to me that this Institute be established.

At the same time, I do not believe that the establishment of a nursing research center at NIH is appropriate, for a very basic reason—there is a lack of compatibility between the mission of such a center and the mission of NIH. The biomedical research activities of NIH are concerned with discovering the etiology of and treatment for diseases. In contrast, nursing research uses substantive scientific information and methodology and focuses on their relevance to nursing practice and administration. This research is important, but neither it nor disease-oriented research are served by the provisions of the bill.

H.R. 2409 manifests an effort to exert undue political control over decisions regarding scientific research, thus limiting the ability of the NIH to set this Nation's biomedical research agenda. I do not believe that it is either necessary or wise to restrict the flexibility under which the NIH has operated so successfully. In 1984, I rejected a very similar bill, and once again I find no reasonable justification for the extensive changes to the NIH mandated by H.R. 2409. In order to allow NIH to continue to provide excellence in biomedical research and in its management, I am disapproving this bill.

RONALD REAGAN.

THE WHITE HOUSE, *November 8, 1985.*

The SPEAKER pro tempore. The objections of the President will be spread at large upon the Journal.

The question is, Will the House, on reconsideration, pass the bill, the objections of the President to the contrary notwithstanding?

The gentleman from California [Mr. WAXMAN] is recognized for 1 hour.

Mr. WAXMAN. Mr. Speaker, first of all, I yield 30 minutes of my time to be managed by the ranking Republican member of our subcommittee, the gentleman from Illinois [Mr. MADIGAN], pending which I yield myself such time as I may consume.

Mr. Speaker; this afternoon we will have the opportunity to reassert congressional and public support for a strong and viable biomedical research effort by overriding the President's veto of H.R. 2409.

The purpose of the Health Research Extension Act was to preserve America's preeminence in medical research. It represented a bipartisan compromise resulting from 3 years of consideration between the House and Senate. It was the product of countless hearings and markup sessions.

The National Institutes of Health is a national treasure. It has done more to expand human knowledge about the cause, treatment, and prevention of disease than any other research institution in the world. It has accomplished these successes because of the responsible guidance and oversight of the Congress.

On October 23, this House approved the conference report on H.R. 2409 by an overwhelming vote of 395 to 10. The Senate passed the legislation unanimously. Last Friday, November 8, the President vetoed this legislation.

I regret the President's action.

Today we will have the opportunity to let the administration know that this Congress intends to stand behind this legislation and support one of this Nation's proudest achievements, its world leadership in biomedical research.

H.R. 2409 represents a responsible balance between scientific freedom and the Congress' responsibility to oversee the $5 billion annual budget of the National Institutes of Health. This legislation is needed to keep biomedical research on a firm and balanced foundation. It represents a necessary and forceful statement of support for the biomedical research programs of the NIH.

Mr. Speaker, let me briefly summarize some of the major provisions of the legislation. H.R. 2409 would:

Reauthorize the National Cancer Act and continue the war on cancer for 3 years.

Establish a new National Institute of Arthritis and Musculoskeletal and Skin Diseases.

Emphasize patient care research through a new National Center for Nursing Research.

Consolidate unnecessary reporting requirements.

Establish high priorities for research on Alzheimer's disease, spinal cord injury, AIDS and other public health emergencies.

Emphasize health promotion and disease prevention.

Reauthorize the National Heart, Lung and Blood Institute for three years.

Place a ceiling on administrative costs at the NIH.

Establish procedures for dealing with scientific fraud.

Establish guidelines for the proper care and treatment of animals used in biomedical research.

Mr. Speaker, support for biomedical research is an investment in the future. I urge Members to join in maintaining the quality and productivity of biomedical research by supporting the Health Research Extension Act of 1985.

□ 1530

Let me point out a couple of considerations in overriding this veto.

The dispute with those who have been successful in urging the President to veto the bill was not one over money. The dispute was over whether the Congress ought to have a say in some of these issues that are dealt with at NIH.

We feel that if the taxpayers' dollars, $5 billion a year, are being used for biomedical research, we ought to spell out some of our priorities. We ought to tell NIH what we think they ought to be looking at. It is not for us to make the individual decisions that

ought to be left to scientific peer review. But if we say that arthritis is a major crippler in this country and there ought to be a separate institute on arthritis, that is within our prerogative to do. We feel that that is establishing a priority which we as elected representatives of the people ought to be able to establish.

We set out protection for the cancer centers. We set out spinal cord regeneration as something we want a higher priority for them to deal with. We say, do the research, but do not forget about prevention, disease prevention and health promotion, and we ask NIH to give more consideration along these lines.

And we adopt many of the regulations that are already in place at NIH in terms of their overview of the fraud that may be committed by people who would receive Government funds for research purposes.

The bill went through many, many hearings, markups, disputes, and we reached an overwhelming consensus in the Congress of the United States as to how we ought to establish these issues for a sense of priority as it affects those people here in the Congress who are voting to spend this money.

If this bill is not passed, notwithstanding the veto of the President of the United States, we will still have an NIH, but it will be an NIH that will be funded without the full impact of the congressional oversight with recommendations as to how this money ought to be spent and some of those considerations we want to be reviewed by the people running NIH.

Let the scientists run the scientific activities, but let us have some say over how the people's money is being used to fund these research activities.

Mr. Speaker, I urge that we reaffirm our support which was expressed in vote of 395 to 10 for a strong NIH.

Mr. Speaker, I reserve the balance of my time.

Mr. MADIGAN. Mr. Speaker, I yield myself such time as I may consume.

(Mr. MADIGAN asked and was given permission to revise and extend his remarks.)

Mr. MADIGAN. Mr. Speaker, I am going to vote to override the veto of the President on the National Institutes of Health authorization.

My understanding was that the conference report was a compromise between the House, the other body, and representatives of the administration. That vehicle, which I understood to be a compromise, as has been pointed out, passed the House of Representatives by a vote of 395 to 10, and passed in the other body unanimously. I also understand that 78 Members of the other body have signed a letter urging the President to sign this bill.

In reading the veto message of the President relating to this bill, I note that he refers to it as being the same as a bill which he previously vetoed.

I would like to say at the outset that this bill is nowhere near the same as the bill that was previously vetoed. In this bill, the authorizations were changed to 3 years, which was a request of the administration.

The Nursing Institute contained in the previous bill was changed to a Nursing Center in this bill, which I understood to be a compromise between the other body and representatives of the administration.

The manpower provisions that were in the previous bill were changed in this bill to accommodate the administration's position.

The provision in the previous bill that called for the establishment of 55 cancer research centers was eliminated in this bill.

This bill removed a commission and two studies called for in the previous bill that were objected to by the administration.

In the veto message, no objection is raised by the administration the the authorization levels contained in this bill. These levels are consistent with the budget resolution and they are consistent with the levels contained in the appropriation bills in both bodies. No language in this bill would exempt this bill from any provisions of Gramm-Rudman.

With regard to the micromanagement issues referred to in the veto message, I understand that these are objections raised by the general counsel of the Office of Management and Budget.

As I previously said, the nursing provision I understood to be a compromise.

The statutory conditions on animal research contained in this bill, which can be termed "micromanagement," are actually based on the guidelines issued by the National Institutes of Health.

In the news story referring to the veto of this measure, mention is made of the restrictions placed on fetal research, which ovbiously would be a micromanagement issue. It is not possible for us in this body to pass an NIH bill without these restrictions on fetal research unless the House would be willing to consider the bill under a closed rule.

We have a letter from the National Right to Life organization urging the President to sign the bill because of the restrictions placed on fetal research in the bill.

This bill also allows the Secretary of HHS to expedite peer review processes at NIH in the event of a public health emergency.

I understand why the scientific community would object to expediting the peer review process, but this is not required. It is only allowed in the event of a public health emergency.

This is not a confrontation that I want or that I wanted. The conference between the House and the other body went on for nearly 3 months trying to work out language on all these items, and, as I said, I thought we had that job done.

The fetal research provisions in this bill are a victory for the gentleman from California [Mr. DANNEMEYER] of this body and the chairman of the Labor and Human Resources Committee in the other body.

Under our rules, the House must act first on this because it was the House bill that was the vehicle used in the conference.

The counterpart of the gentleman from Michigan [Mr. DINGELL], the chairman of the committee in the other body responsible for this legislation, has encouraged me to support overriding this veto.

As I said, it is not a confrontation that I want or that I wanted, but I feel that I must keep my word to the conferees from this and the other body on what I was led to believe was an agreement. I am therefore going to vote to override the veto.

Mr. Speaker, I reserve the balance of my time.

Mr. WAXMAN. Mr. Speaker, I yield 2 minutes to the gentleman from California [Mr. ANDERSON].

Mr. ANDERSON. Mr. Speaker, I thank the gentleman for yielding time to me.

Mr. Speaker, on October 23, 395 Members of this body voted to approve the conference report on H.R. 2409, the Health Research Extension Act. This measure amends the Public Health Service Act to extend the authorities under that act relating to the National Institutes of Health and the National Research Institutes.

This conference report provides vital funding for research on health problems confronting all Americans. The funding in this report for biomedical research is essential to the well-being of all Americans, and of our future generations.

One section of this report is particularly of interest to me. The report establishes a lupus erythematosus coordinating committee to plan, develop, coordinate, and implement comprehensive Federal initiatives in research on lupus erythematosus. This committee will meet at least four times a year and will submit a report on their activity no later than 18 months after the date of the enactment of this conference report. I believe that this coordinating committee will provide tremendous leadership in the fight against lupus.

Similarly, I believe that this conference report will provide tremendous leadership in the fight against all diseases. I urge my colleagues to join me in overriding the veto on this confer-

ence report which provides vital funding for the fight against health problems confronting all Americans.

Mr. WAXMAN. Mr. Speaker, I am pleased to yield 3 minutes to the gentleman from Oregon [Mr. WYDEN].

Mr. WYDEN. Mr. Speaker, first of all, I want to commend Chairman WAXMAN of California for a tremendous job in trying to put together what I think is excellent legislation.

It seems to me that the administration in vetoing this legislation is running up the white flag in our Nation's war against Alzheimer's disease, and cancer research, and arthritis. I think there is a reason why 395 Members of this body voted for this legislation, and that is because the considerable investment our country has made in health research has paid off very, very handsomely. We can tell that just by asking those with artificial joints and the many people in this country who have benefited from the early detection of disease: Health research has paid off for them.

The other thing that concerns me, Mr. Speaker, is that this legislation will help us tremendously in our efforts to combat Alzheimer's disease in this country. Only recently we have come to the realization that Alzheimer's disease is a leading cause of death among seniors. This legislation authorizes important funding for Alzheimer's disease research centers and a national registry to promote further research.

For that and many other reasons, Mr. Speaker, I believe this bill is a moneysaver. I believe we are going to save money in the years ahead as a result of important research efforts that it would authorize.

Mr. Speaker, I urge my colleagues to support this veto override.

Mr. MADIGAN. Mr. Speaker, I yield such time as he may consume to the gentleman from Utah [Mr. NIELSON], a member of the committee.

Mr. NIELSON of Utah. Mr. Speaker, I rise in reluctant support of overriding the veto.

In the committee, I opposed the bill as originally brought to the committee, but the ranking member of the committee, the gentleman from Illinois [Mr. MADIGAN] was able to cut the funding down to a reasonable level and the conference committee took out the major objection that I had to the Institute of Nursing.

It seems to me that the compromise that we had was fair and reasonable to continue biomedical research.

As far as the micromanagement is concerned, I think that is overstated.

You might be interested in knowing that of the 42 members of the Committee on Energy and Commerce, 38 members voted for this bill, 2 voted against and 2 were absent.

In the original bill that was passed by a voice vote, I am aware of three or four others who would have voted against it at that time, but as it now stands it appears to be a very good bill. It will continue to research in the vital areas of cancer, heart disease, and things of this nature.

The objection the President had 2 years ago about the Institute of Arthritis, he apparently has changed his mind on that and is doing administratively what this bill calls for legislatively.

So the only valid objection I can see that he would have, since he has agreed on the budget levels and he has agreed on the arthritis measure, would be on nursing research.

I think a fair compromise was obtained there which provides for nursing research without having a separate institute using up vital money for that purpose.

□ 1545

Therefore, I urge my colleagues, and as I say, I say this with some sadness because there are a lot of bills that I think should have been vetoed and this is not one of them. I believe that the veto could well have been placed on a number of health bills that we have passed in this committee, but this, I believe, is a good one and I urge my colleagues to vote to override the President.

Mr. WAXMAN. Mr. Speaker, I yield such time as he may consume to the gentleman from California [Mr. DELLUMS].

PERMISSION TO FILE CONFERENCE REPORT ON S. 1042, MILITARY CONSTRUCTION AUTHORIZATION ACT, 1986

Mr. DELLUMS. Mr. Speaker, I ask unanimous consent that the managers may have until midnight tonight to file a conference report on the bill (S. 1042) to authorize certain construction at military installations for fiscal year 1986, and for other purposes.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from California?

There was no objection.

Mr. WAXMAN. Mr. Speaker, I yield 2 minutes to the gentleman from Tennessee [Mr. FORD].

Mr. FORD of Tennessee. I thank the gentleman for yielding this time to me.

Mr. Speaker, I would like to commend my colleagues here, both the gentleman from California [Mr. WAXMAN] and the gentleman from Illinois [Mr. MADIGAN], for bringing this piece of legislation to the House floor.

Mr. Speaker, on this past Friday the President vetoed H.R. 2409, the Health Research Extension Act of 1985, a bill which provides funds for cancer research institutions throughout our country.

The National Cancer Institute proposed to reduce cancer mortality by 50 percent by the year 2000. I indicated, on the floor of this House last month, that at our current rate of investment in cancer research this goal is merely a pipe dream; it simply will not happen without new comprehensive cancer research centers and more funds.

It is a cruel hoax upon the American public to set goals that all look forward to achieving, goals that will eliminate pain, suffering and thousands of unnecessary deaths, and then to withhold the means, the money necessary to attain these goals.

Mr. Speaker, we fool no one when we engage in such shenanigans and we should put an end to them. I am particularly sensitive to such ploys because the mid-South area does not have a comprehensive adult cancer research center. My cancer stricken constituents must frequently travel hundreds of miles for treatment adding more misery to this already sorrowful condition.

Mr. Speaker, let us stop this nonsense, let us vote to override the President's veto of this bill.

Mr. WAXMAN. Mr. Speaker, I yield 3 minutes to the gentleman from Pennsylvania [Mr. WALGREN.]

Mr. WALGREN. I thank the gentleman for yielding this time to me.

Mr. Speaker, I think it would be most proper to underscore the point that was made by the chairman of the Health Subcommittee that this is essentially a battle over whether the Congress has anything to say about the National Institutes of Health and whether we can, in some way, bring back from our districts the interests and sensitivities of people in this country who are suffering from aspects of disease or from a lack of responsiveness in our medical system that are not coming through in other ways.

I think in particular of the Alzheimer's provisions in this legislation. There is no more dramatic problem for the elderly than Alzheimer's disease. We attempt to direct the attention of the National Institutes of Health in a constructive way, with 10 centers, and some goals of their research. To say that this overmanages NIH is just denying the Congress the ability to bring the sensitivity that we pick up from our constituents to bear in this area.

The same can be said of the spinal cord injury provisions. These are not provisions that require the expenditure even of a specific amount of money, but it is an effort to direct the attention of the medical community because, in a sense, these are orphan causes, or causes that have not been pursued to the degree that we believe, both because of the advice we get and because of the depth of the problems that our people bring to us, they can be pursued.

If any administration should understand the pursuit of something that is not now real, this administration

should. Certainly they are leading us down that path to the tune of billions of dollars with respect to Star Wars. They can go with us down that path on some of the little orphan medical causes that deserve at least the emphasis and the attention of some of the effort being made through the National Institutes of Health.

Mr. Speaker, I urge that this veto be overridden.

Mr. MADIGAN. Mr. Speaker, I yield such time as he may consume to the gentleman from Michigan [Mr. PURSELL].

Mr. PURSELL. I thank the gentleman for yielding time to me.

Mr. Speaker, first I want to congratulate the chairman and the ranking minority member for an outstanding piece of legislation. I am very disappointed today that somebody in the administration has recommended a veto to the President, who I am not sure has really looked at this bill.

Mr. Speaker, I rise today in support of this effort to override the President's veto of the National Institutes of Health Authorization.

The veto was exercised for two reasons: Because of the inclusion of the Center for Nursing Research and because of perceived congressional intrusion into the operation of the institutes. Neither concern offers a valid reason to block approval of this important NIH authorization.

I think it bears pointing out that this final bill represents a significant compromise—a compromise reached in conference by both sides and in both Houses.

I believe the decision to veto this bill was an unfortunate decision, considering the reasons offered for this action.

First of all, it must be pointed out that the Center for Nursing is a substantial compromise. Last year, we were told that authorization of an Institute for Nursing Research was "unneeded and premature," just as the proposed Institute for Arthritis was also unneeded.

The administration this year has decided to establish the Arthritis Institute by administrative order, yet is unwilling to accept a Nursing Center.

This body recognized the importance of nursing and went to conference with language calling for a Nursing Institute. The compromise of going from an Institute to a Center already is an insult to the many people who work in this field. Let's not go a step further and tell the members of this important health profession, the nurses of America, that a Nursing Research Center is unneeded.

Second, the idea that Congress is intruding into the management of the Institutes in unfounded. I believe it goes without mention that Congress has a responsibility for the management of taxpayers' resources.

But beyond that, this authorization also includes a compromise calling for a 3-year extension of the 1984 NIH bill. This is a 3-year program which is virtually free of specific congressional directions.

I urge my colleagues to join with me in voting to override.

The SPEAKER pro tempore. The gentleman from California [Mr. WAXMAN] has 14 minutes remaining, and the gentleman from Illinois [Mr. MADIGAN] has 19 minutes remaining.

Mr. WAXMAN. Mr. Speaker, I yield 1 minute to the gentleman from Ohio [Mr. ECKART].

Mr. ECKART of Ohio. I thank the gentleman for yielding this time to me.

Mr. Speaker, the bipartisan effort generated by the gentleman from California [Mr. WAXMAN] and the gentleman from Illinois [Mr. MADIGAN] deserves the strong support of the Members of the House.

Without reservation, this bill is fiscally responsible, ontime and under cost. Three points deserve to be noted well by all of the Members of the House.

First, we place a ceiling on the frittered-away administrative costs used in the past by NIH to truly deny appropriate scientific research.

Second, we place a strong emphasis on disease prevention, which we know is substantial and more cost effective than disease treatment.

Third, and perhaps most importantly, we consolidate unnecessary reporting requirements that have been burdensome to those who have participated in these programs in the past.

□ 1555

Mr. Speaker, this bill is deserving of our support. It is a bipartisan answer and appropriate response to health emergencies all across the United States.

The gentleman from Illinois [Mr. MADIGAN] and the gentleman from California [Mr. WAXMAN] have crafted a careful compromise that I think needs the fiscal constraints that are impinged upon the House while still dealing in a caring and compassionate way with the medical emergencies we are confronted with.

I urge an override of the veto.

Mr. MADIGAN. Mr. Speaker, I yield such time as he may consume to the distinguished minority leader, the gentleman from Illinois [Mr. MICHEL].

Mr. MICHEL. Mr. Speaker, as the Members of the House well know, before being elected leader, I served on the Appropriations Committee for many, many years as the ranking member of the old Subcommittee on Health, Education and Welfare that had to do with the funding of activities at the National Institutes of Health. Over that period of years, there were times when that whole institution grew enormously, by leaps and bounds, no question about it. But I think it was due in no small measure to the additional attention that we felt that institution required.

There were times, however, when we felt they had gone astray and needed correcting, restraining, and we exercised that authority at that time.

Now, I thought I listened quite attentively to the gentleman from Illinois [Mr. MADIGAN] when he made his remarks that would position him in overriding the President's veto of this legislation. Normally one would think leaders of the President's own party ought to stand down here, and without reservation whatsoever, support the President's position, and certainly take the ball and run with it in sustaining the President's position.

But before doing that, if I might inquire of the distinguished gentleman from Illinois if I heard him correctly when he said in the earlier deliberations of this legislation there were significant corrections made in keeping with what the administration had asked the committee to do. Is that not correct?

Mr. MADIGAN. Mr. Speaker, I think in my remarks I pointed out that we changed the period of authorization to accommodate the administration. We changed the Nursing Institute to a Center For Nursing Research, which was an accommodation to them. We changed the manpower provisions to what they wanted. We eliminated a provision on cancer research centers to accommodate them. We removed a commission requirement and two studies called for that they were objecting to.

With regard to the micromanagement issues that they raised, as I pointed out, those are either animal research restrictions or fetal research restrictions, something that we could not possibly do otherwise unless we did so under a closed rule. I thought that those were all things understood very well by the administration representatives with whom I was conversing.

Mr. MICHEL. And those were members of the administration with whom the gentleman was counseling, I gather, and not individuals from the National Institutes of Health, but actually political appointees of the administration? Is that not correct?

Mr. MADIGAN. If the gentleman will yield further, my conversations were entirely with people of that character.

I understand the chairman of the appropriate committee in the other body, who was certainly very much involved in all of this compromise, was in contact with professionals at NIH. But I was not. I was talking to political appointees for the administration.

Mr. MICHEL. Then when the time came for the President to make a determination as to whether he signed or vetoed this legislation, might I inquire of the distinguished gentleman whether he was contacted as to his views on what position the administration ought to take, of course, in view of the overwhelming vote in support of it in this body?

Mr. MADIGAN. No, sir; I was not.

Mr. MICHEL. Then the gentleman from Illinois must conclude from that that notwithstanding every effort being made on the part of the distinguished members of the committee to accommodate the administration, and in full light of day to the degree that they felt those objections were being met, it seems very odd that then there should be a recommendation for a veto. I gather that that veto communication came from some individual or group of individuals advising the President on this.

How can the gentleman from Illinois enlighten this gentleman from Illinois on that subject?

Mr. MADIGAN. If the gentleman will yield further, following the adoption of the conference report by both bodies, following that by a period of some days, I communicated with by telephone, and subsequently visited in my office with a gentleman from the Office of Management and Budget who had not previously been involved in the compromise or the negotiations in any way. I had been given to understand, indirectly, that that gentleman was very influential in causing the bill to be vetoed. Although not on budgetary grounds, because there is no issue of the budget being raised. The issues being raised are these micromanagement issues which I have attempted to address.

Mr. MICHEL. Did the gentleman from Illinois advise that inquirer of what conditions prevailed here in the Congress on both sides of the Capitol and among both parties of what is doable and what is not doable by way of the Members' feelings, strong feelings?

Mr. MADIGAN. If the gentleman will yield, I did discuss that with him. With regard to the specific item that the gentleman wanted to discuss with me, which was the Center for Nursing Research, I advised the gentleman that I did not originate that. I am not the father of that child. The chairman of the appropriate committee in the other body is the father of that child, and I understood that was something the gentleman from the other body had discussed with administration representatives.

Mr. MICHEL. I thank the gentleman. I simply want to make the observation that there is a general impression that the President himself, while sending up a veto message with the explanation that we received, is not all that engrossed in this piece of legislation. Notwithstanding that, the gentleman has to take this position.

I have been a pretty good supporter of the President over the course of years as his leader here, but I find it very difficult to bring myself around to sustaining a position that I know was made by someone other than those really responsible for trying to make this whole system work around here. And while I may very well vote to sustain, I certainly do not have my heart in it, and I doubt very much whether there are going to be too many of the other Members having that same feeling.

I guess maybe just as a word of caution, of all of those measures that I have seen come down the pike here that would be candidates for a veto, this probably would be a least likely candidate. So I thank the gentleman for laying it all out on the record here today.

In my judgment, Members are going to be pretty free to vote as their conscience dictates to them. As for this Member, yes; I will support the President's veto and vote to sustain. But as I said, it is quite obvious the gentleman does not have his heart in it.

Mr. MADIGAN. Mr. Speaker, I have no further requests for time, and I yield back the balance of my time.

Mr. WAXMAN. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, we tried the best we could to fashion a compromise that was brought together by both Democrats and Republicans, Members of this body and the other body, and that has passed overwhelmingly. We now have the constitutional prerogative of making this law, notwithstanding the veto of the President, and I urge my colleagues to vote with me and my colleague from Illinois to pass this legislation again.

Mr. FRENZEL. Mr. Speaker, I have been waiting a long time to sustain a veto in the hopes that such action would help enforce a little fiscal discipline on a profligate Congress.

Today we have an opportunity to sustain a veto, but, unfortunately, it is not a fiscal veto. This House, at least in part because it believed the administration had no objection, approved the bill, a NIH authorization, by a vote of 395 to 10.

Most members, including myself, have been given insufficient reason to change their votes, and will vote to override. I'm still patiently waiting for that first fiscal veto.

Mr. DINGELL. Mr. Speaker, I rise today to support, in the strongest possible way, H.R. 2409, the Health Research Extension Act of 1985.

It can justifiably be claimed that the research of the National Institutes of Health drives world biomedical research, and this bill is aimed at preserving and extending America's preeminence in this area. This bill addresses directly the major health problems which confront every American today:

It enables the continuing fight against cancer to be waged on all fronts, and to exploit the many recent breakthroughs made in this area;

It places a new emphasis on research into arthritis and diabetes;

It authorizes new funding for research into Alzheimer's disease.

This is a fiscally responsible piece of legislation:

It demands that all intramural NIH research by subject to peer review; and

It limits expenditures for NIH administration costs to 5.5 percent.

H.R. 2409 also contains provisions which address many of the moral and ethical considerations which surround biomedical research:

There are strengthened provisions for the care and treatment of research animals;

These are provisions to limit the circumstances under which research on fetuses can be conducted; and

It provides for the establishment of a Biomedical Ethics Advisory Board.

I ask my colleagues to join with me in overridding this veto and in demonstrating to the President the commitment of the Congress to the health and welfare of the people of this country.

Mr. WAXMAN. Mr. Speaker, I yield back the balance of my time, and I move the previous question.

The previous question was ordered.

The SPEAKER pro tempore. The question is, Will the House, on reconsideration, pass the bill, the objections of the President to the contrary notwithstanding?

Under the Constitution, this vote must be determined by the yeas and nays.

The vote was taken by electronic device, and there were—yeas 380, nays 32, not voting 22, as follows:

[Roll No. 400]

□ 1620

Mr. DELAY and Mr. ARCHER changed their votes from "yea" to "nay."

Messrs. GROTBERG, MURPHY, and SILJANDER changed their votes from "nay" to "yea."

So, two-thirds having voted in favor thereof, the bill was passed, the objections of the President to the contrary notwithstanding.

The result of the vote was announced as above recorded.

The SPEAKER pro tempore. The Clerk will notify the Senate of the action of the House.

FURTHER CONTINUING APPROPRIATIONS, 1986

Mr. MOAKLEY. Mr. Speaker, by direction of the Committee on Rules, I called up House Resolution 312 and ask for its immediate consideration.

The Clerk read the resolution as follows:

H. RES. 312

Resolved, That at any time after the adoption of this resolution the Speaker may, pursuant to clause 1(b) of rule XXIII, declare the House resolved into the Committee of the Whole House on the State of the Union for the consideration of the joint resolution (H.J. Res. 441) making further continuing appropriations for the fiscal year 1986, and the first reading of the joint resolution shall be dispensed with. After general debate, which shall be confined to the joint resolution and shall continue not to exceed one hour, to be equally divided and controlled by the chairman and ranking minority member of the Committee on Appropriations, the joint resolution shall be considered as having been read for amendment under the five minute rule. No amendment to the joint resolution shall be in order except the amendment printed in the Congressional Record of November 8, 1985 by, and if offered by, Representative Foley of Washington or his designee, and said amendment shall not be subject to amendment or to a demand for a division of the question in the House or in the Committee of the Whole but shall be debatable for not to exceed one hour, to be equally divided and controlled by Representative Foley and a Member opposed thereto. At the conclusion of the consideration of the joint resolution for amendment, the Committee shall rise and report the joint resolution to the House with such amendments as may have been adopted, and the previous question shall be considered as ordered on the joint resolution and amendments thereto to final passage without intervening motion except one motion to recommit.

The SPEAKER pro tempore. The gentleman from Massachusetts [Mr. MOAKLEY] is recognized for 1 hour.

Mr. MOAKLEY. Mr. Speaker, I yield the customary 30 minutes to the gentleman from Mississippi [Mr. LOTT] for purposes of debate only, and pending that, I yield myself such time as I may require.

Mr. MOAKLEY. Mr. Speaker, House Resolution 312 is the rule providing for the consideration of House Joint Resolution 441, making available further continuing appropriations for fiscal year 1986. The rule provides for 1 hour of general debate to be equally divided between the chairman and ranking minority member of the Committee on Appropriations.

House Resolution 312 makes in order an amendment printed in the CONGRESSIONAL RECORD of November 8, 1985, by Representative FOLEY. This amendment shall be debatable for 1 hour, the amendment is not amendable and is not subject to a demand for a division of the question. Finally, the rule provides for one motion to recommit.

Mr. Speaker, House Joint Resolution 441 would extend the existing continuing resolution, due to expire on November 14, 1985, through December 5, 1985. It is intended to provide for the necessary expenses of the U.S. Government and to prevent any disruptions to the Federal Government on November 14, when the present continuing resolution expires.

Mr. Speaker, in order to achieve the savings necessary to reduce the estimated Federal deficit to $161 billion for fiscal year 1986, the Foley amendment would make spending reductions of 3.8 percent. These cuts would be for the duration of this continuing resolution and would be made in a manner consistent with the Balanced Budget and Emergency Defict Control Act of 1985, which was adopted by the House on November 1.

If we were in a position to pass an agreement on Gramm-Rudman today, this amendment would not be necessary. So it has to be understood that the Foley amendment is a realistic proposal with respect to what we can do about spending now. In addition to programs exempt under the House amendment to Gramm-Rudman, the Foley amendment exempts Medicare and indexed programs. it would be disruptive to make changes in these activities during the short term of this continuing resolution, and these matters are better handled in the conference on the debt limit bill.

The amendment would also carry certain restrictions contained in section 254 of the House amendment to Gramm-Rudman with respect to the manner in which spending reductions are applied.

Mr. Speaker, I urge adoption of the resolution.

Mr. LOTT. Mr. Speaker, I yield myself such time as I may consume.

Mr. LOTT. Mr. Speaker, House Resolution 312 makes in order the consideration of House Joint Resolution 441, which extends the continuing appropriations for fiscal year 1986 from November 14, 1985, through December 5, 1985. This is a modified closed rule, providing 1 hour of general debate divided between the chairman and ranking Republican on the Appropriations Committee.

The rule makes in order one amendment to be offered in the Committee of the Whole—an amendment by the gentleman from Washington [Mr. FOLEY] printed in last Friday's RECORD. The amendment is debatable for 1 hour divided between Congressman FOLEY and a Member opposed, and is not subject to amendment or a division of the question in the House or in the Committee of the Whole. Finally, the rule provides for one motion to recommit.

The chairman of the Appropriations Committee, has requested this extension at the behest of the leadership on his side to permit us to enact as many of the regular appropriations as possible before we adjourn sometime in early December.

Mr. Speaker, I support this short-term extension of the continuing resolution because I do think we should encourage the completion of work on as many appropiations bills as we can yet this year. To date only 1 of the 13 regular appropriations bills has been enacted, and 2 others have been sent to the President, though the House has now passed 12 of the 13, and the other body has passed 10. So we are within reach of that goal.

Mr. Speaker, during the Rules Committee consideration of this rule, the distinguished Republican leader, the gentleman from Illinois [Mr. MICHEL], asked that he be permitted to offer an amendment to the continuing resolution that would reduce all the controllable expenditures under that act by 8.2 percent.

He explained that, based on a CBO estimate, the House-passed Rostenkowski substitute for Gramm-Rudman would require precisely such a reduction in those controllable items not exempted by it. You will recall that the Democrat alternative had a deficit of $161 billion this year, but exempted several low-income programs from reductions.

Our Republican leader reasoned, and rightly so, I think, that if this House is really serious about that much deficit reduction this year, it should be aware of the consequences now and be willing to vote for those results in real program cuts now. If we aren't really serious, then we should agree on a more reasonable deficit level and get on with it.

Mr. Speaker, shortly after our Republican leader laid his proposal on the table in the Rules Committee last Wednesday, the chairman adjourned the committee pending a meeting with the Democratic leadership. The results were made known on Thursday when the distinguished majority whip, the gentleman from Washington [Mr. FOLEY] appeared before our committee.

He asked that he be permitted to offer an amendment that would bring spending down to a level consistent with the Rostenkowski alternative to Gramm-Rudman. He went on to explain that a more recent CBO calculation would make that a cut of around 5 percent, instead of the 8.2 percent initially estimated by CBO. The following day, last Friday, when Mr. FOLEY actually put his amendment in the RECORD. as required by the rule, that percentage cut had shrunk even more—this time to 3.8 percent of controllables.

Mr. Speakers, keep in mind that this is the same CBO in which the Rostenkowski plan would vest exclusive authority for determining the percentage reductions. And yet, in just 3 short days, between November 5 and 8, CBO revised downward its estimated reductions from 8.2 percent to 5 percent to 3.8 percent—a 53-percent change. In CBO-doggy dollars, that's about a $21-billion difference. That in itself should be enough to convince you that we need joint CBO-OMB estimates of deficits and reductions under Gramm-Rudman-Rostenkowski.

Now, it could well be that Mr. FOLEY asked CBO to make different assumptions than the current-law snapshot required by the Gramm-Rudman and Rostenkowski amendments. If so, he's asking that we use the Rostenkowski deficit, but not the Rostenkowski baseline for calcuating that deficit.

But the fact remains, our Democratic colleagues agree that if they are to be taken seriously about their $161-billion deficit figure for this fiscal year, they should be willing now to make the necessary reductions in our appropriations bills. The Foley amendment to the continuing resolution represents a symbolic start in that direction.

I say symbolic because this continuing resolution only runs for some 3 weeks, until December 5. But, presumably, the Democratic leadership is committing itself to making this deficit figure stick in real money cuts if it is retained in the final version of Gramm-Rudman.

Mr. Speaker, I intend to reserve final judgment on the Foley amendment pending an explanation from him as to how this will affect major defense and nondefense categories. I will point out, however, that I opposed the $161 billion deficit figure put forward by House Democrats in the Gramm-Rudman conference. It was my belief then, as it is now, that we're trying to do too much too soon with this new process, and that if we try to cut another $13 billion or so for the last 9 months of this fiscal year, after we're already gone through the budget, appropriations, and reconciliation cycle we'll be straining this process beyond the breaking point.

Now I know that's what some are hoping—that either we send something to the President he can't sign, or that is thrown out by the courts, or that sinks under its own weight in the first year. But I'm frankly interested in something that is reasonable and workable.

The key to the success of this process in not Presidential sequestering across-the-board, but the threat of it that will force Congress to set its own spending priorities and meet these deficit goals during the regular budget process, not after it is completed.

Mr. Speaker, I urge support of this rule because we do need a further continuing resolution while we complete action on our regular appropriations bills. But I would caution my colleagues to give careful consideration to the full ramifications of the Foley amendment before they embrace it. Let's make sure the author gives us a complete rundown on what impact this will have on our various domestic and defense programs before we adopt that amendment. Yes, we need a deficit reduction program. But if it is not well-reasoned and reasonable, we may wind-up losing ground on the road to a balanced budget.

□ 1635

Mr. WALKER. Mr. Speaker, will the gentleman yield?

Mr. LOTT. I yield to the gentleman from Pennsylvania.

Mr. WALKER. I have a question. Do I understand correctly that the minority leader requested the chance to offer an amendment that would cut the amount of money in the bill by 8.2 percent?

Mr. LOTT. That is correct.

Mr. WALKER. That that was not granted by the Rules Committee?

Mr. LOTT. That is correct.

Mr. WALKER. Even though there is a comprehensive CBO study which does show a need for that kind of cut in order to arrive at the House-passed Rostenkowski plan?

Mr. LOTT. That is correct.

Mr. WALKER. And yet what the Rules Committee did do in this rule is

grant an opportunity to the gentleman from Washington [Mr. FOLEY] to come to the floor with a 3.8-percent reduction that is based upon some figures that they evidently jimmied up at the last minute?

Mr. LOTT. Well, those figures are questionable because we do have three different sets of figures now, and I guess it was all prompted by the Republican leader's request to do what we said we were going to do on the floor at the $161 billion figure, but CBO kept giving different numbers.

I have to assume maybe what happened was that the Foley amendment does take into consideration reconciliation, which we have not completed, and completed action on things like the agriculture bill, but that should not be included in the baseline as was passed in the Rostenkowski bill.

Mr. WALKER. If the gentleman will yield, in both reconciliation and the agriculture bill, though, there is add-on spending in both of those. Has the gentleman included the add-on spending?

Mr. LOTT. We do not know for sure. CBO has not given us all that backup information. So I am sure when we get to general debate on the substance of this continuing resolution and the Foley amendment, that is information we need to get, because we just do not know.

Mr. WALKER. I thank the gentleman. I am disappointed in the fact that, really, we lose about 5 percent here. There was an attempt on the floor the other day on a bill that was out here from the Committee on Public Works to get the full 8.2 percent reduction. What we found there was the Democratic leadership rose rather than have a vote on that particular matter, so they obviously are taking the tack here that there is no way they are going to touch the 8.2-percent figure. And now they come back today with a new 3.8-percent figure that, so far as I know, no one knows precisely where it came from.

Mr. LOTT. That is exactly right, and we want to see how the membership will vote on that.

I would urge the Members to vote against the Foley amendment and to pass the continuing resolution to December 5 without these encumbrances on it.

Mr. WALKER. I thank the gentleman.

Mr. LOTT. Mr. Speaker, I yield back the balance of my time.

Mr. MOAKLEY. Mr. Speaker, I move the previous question on the resolution.

The previous question was ordered.

The resolution was agreed to.

A motion to reconsider was laid on the table.

PERMISSION TO OFFER AMENDMENT TO HOUSE JOINT RESOLUTION 441

Mr. WHITTEN. Mr. Speaker, I ask unanimous consent that, notwithstanding the provisions of House Resolution 312, I be allowed to offer an amendment to House Joint Resolution 441 which, on lines 5 and 6, would strike "December 5, 1985" and insert in lieu thereof "December 12, 1985".

Mr. Speaker, may I say that that is in line with the suggestion of the President, so I am advised in writing.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Mississippi?

Mr. WALKER. Mr. Speaker, reserving the right to object, just so I understand what is going on, if I may ask the gentleman, all he is doing is changing the dates that are now in the resolution from the 5th to the 12th, and it has no other impact other than that?

Mr. WHITTEN. If the gentleman will yield, that is right. That is at the request of the President.

Mr. WALKER. Mr. Speaker, I thank the gentleman, and I withdraw my reservation of objection.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Mississippi?

Ms. FIEDLER. Reserving the right to object, Mr. Speaker, I shall not object but I would just simply like to ask the gentleman from Mississippi [Mr. WHITTEN] to again please repeat what he just said to the gentleman from Pennsylvania [Mr. WALKER] regarding the dates.

Mr. WHITTEN. If the gentlewoman will yield, may I say that, in the first place, the resolution which I had introduced some days ago merely extended the date from November 21 to December 5. The President has announced that he would prefer that it be December 12 and that it be limited to just a mere change in the date and a continuation of the existing continuing resolution. It is on that basis that I ask unanimous consent to offer the amendment to make it December 12.

Ms. FIEDLER. Mr. Speaker, I thank the gentleman, and I withdraw my reservation of objection.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Mississippi.

There was no objection.

The SPEAKER pro tempore. Pursuant to House Resolution 312 and rule XXIII, the Chair declares the House in the Committee of the Whole House on the State of the Union for the consideration of the joint resolution, H.J. Res. 441.

□ 1643

IN THE COMMITTEE OF THE WHOLE

Accordingly the House resolved itself into the Committee of the Whole House on the State of the Union for the consideration of the joint resolution (H.J. Res. 441) making further continuing appropriations for the fiscal year 1986.

The SPEAKER pro tempore. The Chair designates the gentleman from Minnesota [Mr. OBERSTAR] as Chairman of the Committee of the Whole and requests the gentleman from Michigan [Mr. BONIOR] to assume the chair temporarily.

The Clerk read the title of the joint resolution.

The CHAIRMAN pro tempore. Pursuant to the rule, the first reading of the joint resolution is dispensed with.

Under the rule, the gentleman from Mississippi [Mr. WHITTEN] will be recognized for 30 minutes and the gentleman from Massachusetts [Mr. CONTE] will be recognized for 30 minutes.

The Chair recognizes the gentleman from Mississippi [Mr. WHITTEN].

Mr. WHITTEN. Mr. Chairman, I yield myself such time as I may consume.

Mr. Chairman, House Joint Resolution 441, which I introduced on November 5, 1985, provides for a simple, temporary extension of the existing continuing resolution—Public Law 99-103—which expires November 14. The new resolution would be in effect through December 5, 1985, which I will amend to December 12, 1985.

It is necessary and essential that this resolution be passed in order to provide continued funding of the government in an orderly way.

During the period of November 14 through December 12, the Committee on Appropriations will continue its work on the regular appropriations bills. The resolution before us provides that whenever a regular appropriations bill is enacted into law it automatically drops out of the continuing resolution.

As far as the House is concerned our record this year on the regular appropriations bills is a good one. Indeed, I consider it an excellent one.

House record on appropriations bills:

Twelve of the thirteen regular appropriations bills have passed the House.

Conference reports have been agreed by the House and Senate on three bills, with one bill signed into law and the other two at the White House awaiting signature.

Only the foreign operations bill has not been considered by the House. Funding levels of House-passed bills: $11.6 billion below the 1985 appropriations; $26.4 billion below 1985 when the 1985 supplementals are included; $19 billion below the President's request in budget authority; $11.6 billion below request in outlays; $26.6 billion below the 302A allocation to the committee; and $2.5 billion below 302 allocation in outlays.

Mr. Chairman, when you look at this record, you quickly realize that the

House and the Committee on Appropriations have done their job.

We have passed our bills.

We have reduced spending.

Mr. Chairman, this is not a one-time phenomenon. The Committee on Appropriations throughout the past has done its job.

The problem with the deficit lies elsewhere. In fact even our friend, former budget Director David Stockman acknowledged this when he stated in testimony before the committee:

I don't think I have ever said, certainly not in recent times, that this committee (the Appropriations Committee), with its responsibility over appropriated defense programs and discretionary domestic programs, is the source of the deficit problem.

In the fiscal year that just ended, fiscal year 1985, total appropriations measures for the year were some $11.2 billion below the request of the President.

And for 39 out of the past 43 years, measures recommended by the Committee on Appropriations and passed by the House have been below the requests of the President—in total by some $196.9 billion.

Mr. Chairman, the Appropriations Committee, in matters directly under its jurisdiction, has done its job. It is entitlements and repeal of the windfall profits tax permitting the sale of tax credits in 1981 that have largely caused the problem.

Mr. Chairman, this resolution is essential to the operation of the Government. It must be passed and agreed upon by the Senate and signed by the President by this Thursday night.

Mr. WALKER. Mr. Chairman, will the gentleman yield?

Mr. WHITTEN. I yield to the gentleman from Pennsylvania.

Mr. WALKER. Could the gentleman tell me how much, with the new date in it, this bill is worth? How much are we spending, pursuant to this particular bill now, with the December 12 date in it?

Mr. WHITTEN. I would not know, in that if they are permitted to go at the rate of the House-passed bill in the Appropriation Act of the present year, or the Senate, whichever is the lowest. And the amendment of December 12 will require new calculations.

Mr. WALKER. I understand the formula, but I am just wondering if we know how much we are actually spending by passing this bill.

Mr. WHITTEN. Well, I do not know. It is my recollection that for the next several weeks, if we pass this, we save a considerable amount of money, in that foreign aid is $2 billion or $3 billion lower than what it was last year because of the supplemental, defense is about $10 billion to $15 billion below what it was last year, so it would be at a reduced rate, but I have not figured it up.

Mr. WALKER. If the gentleman will yield, I just personally, I guess, would like to know, if I am being asked to vote on a resolution, how much it is going to cost for the resolution. Do we have any figures on the floor that somebody could work up here and tell me before I am asked to vote on it?

Mr. WHITTEN. If this is adopted, for the period from now until December 12, if my amendment is adopted, it will be at a rate annually of a reduction of about $15 billion to $16 billion below what you are doing now, in that we are operating under this resolution, we would go along at the reduced rate. I believe that is right.

Mr. WALKER. Well, again, I thank the gentleman for telling me the formula, but I would still appreciate knowing. I do not have the figures here in front of me. I am assuming someone does. I would appreciate knowing how much this particular bill is worth. We have just changed the dates from December 12, which I assume costs us additional money for an additional week extending.

Mr. WHITTEN. May I correct my remarks, because I want to be completely factual with my friend. The numbers I was discussing are what we have done in the fiscal year 1986 bills, in the Committee on Appropriations, and what the House has approved. So last year's level will continue for the remainder of this period, until December 12. And how much that will be, I could not tell the gentleman.

□ 1650

Mr. WALKER. But at this point the chairman cannot tell me how much this particular bill is worth?

Mr. WHITTEN. No, I cannot, because involved in it is the period from now until December 12, and I have not figured it.

Mr. WALKER. I thank the chairman.

Mr. CONTE. Mr. Chairman, I yield myself such time as I may consume.

Mr. CONTE. Mr. Chairman, the joint resolution before the House would extend the current continuing resolution from November 14 through December 12.

The continuing resolution as extended would cover projects and activities in 11 appropriation bills, not including energy and water development, which has been signed, and legislative, which will be.

Appropriations for projects and activities would be continued until December 12, 1985, or until an appropriation is enacted, whichever first occurs.

The rates for the 11 bills are as follows: 4 bills are continued at the current rate and under the current terms and conditions: Defense, Foreign Assistance, Labor-HHS-Education, and Military Construction. Six bills are continued at the current rate or the House rate, whichever is lower, and under the more restrictive authority: Agriculture, Commerce-Justice-State-Judiciary, District of Columbia, Housing and Urban Development, Interior, and Transportation.

One bill is at the House or the Senate rate, whichever is lower, and under the more restrictive authority: Treasury-Postal Service.

Mr. Chairman, I support the joint resolution.

An extension through December 12 will give us an opportunity to complete action on the remaining appropriations bills, and to pass a final continuing resolution for the remainder of the year which would cover those bills not enacted by that time.

Mr. Chairman, at this point I include in the RECORD a more complete description of the individual provisions of the current continuing resolution.

RATES DETERMINED BY THE STATUS OF THE BILL

Section 101(a) continues appropriations for projects and activities which were included in nine appropriation acts for fiscal 1986.

Rates for these bills were based on the status of the bill as of October 1, 1985. Energy and water development has been signed, and legislative will be. The rates for the remaining seven bills covered by section 101(a) are as follows:

Six bills had passed the House as of October 1: Agriculture, Commerce-Justice-State-Judiciary, District of Columbia, Housing and Urban Development, Interior, and Transportation.

Projects and activities in these bills are continued at the House rate or the current rate, whichever is lower, and under the current authority and conditions.

One bill had passed the House and the Senate as of October 1: Treasury-Postal Service.

Projects and activities in this bill are continued at the lower of the House or Senate amount, and under the more restrictive authority.

A project or activity included in only the House or the Senate Act is continued at the rate provided in that act or the current rate, whichever is lower, and under the current terms and conditions.

No new general provision shall take effect unless it is included in identical form in the House and Senate acts.

NO NEW STARTS

Appropriations made available under section 101(a) shall not be used to initiate or resume any project or activity not funded in fiscal 1985.

BILLS AT THE CURRENT RATE

Section 101(b) continues appropriations at the current rate, and under the current terms and conditions for projects and activities which were conducted in fiscal 1985, and for which provision was made in three appropriation acts for fiscal 1985: Foreign Assistance, Labor-HHS-Education, and

Military Construction. The Labor-HHS rate also includes the following activities for which provision was made in section 101(k) of the continuing resolution for fiscal 1985: Activities under the Public Health Service Act; refugee and entrant assistance activities; foster care and adoption assistance activities; emergency immigrant education activities; and activities under the Follow Through Act.

NO NEW STARTS

Appropriations made available under section 101(b) shall not be used to initiate or resume any project or activity not funded in fiscal 1985.

Section 101(c) continues appropriations at the current rate, and under the current terms and conditions, for projects and activities which were conducted in fiscal 1985, and for which provision was made in the Defense Appropriation Act for fiscal 1985.

Funds for procurement of MX missiles shall be subject to all of the limitations, restrictions, and conditions set forth in the 1986 defense authorization conference agreement and conference report as filed in the House.

GENERAL PROVISION

No provision in any 1986 act referred to in section 101 which makes an appropriation therein contingent upon the enactment of authorizing or other legislation shall be effective during the period covered by the resolution.

AGRICULTURE, RURAL DEVELOPMENT AND RELATED AGENCIES

The fiscal year 1986 appropriation bill for the Department of Agriculture, rural development and related agencies, H.R. 3037, passed the House on July 24, and passed the Senate with 102 amendments on October 16. Conferees have not yet met to resolve the differences between the two versions.

In light of this situation, our committee is recommending that the Department of Agriculture and Related Agencies receive funding through December 5, 1985 in accordance with section 101(a)(4) of Public Law 99-103. This subsection provides levels of funding and authority at the current fiscal year 1985 rate, or at the rate provided for in levels contained within the fiscal year 1986 House-passed bill, whichever is lower or more restrictive.

Although we are some $5 billion below fiscal year 1985-enacted levels overall in the fiscal year 1986 House-passed bill, in most accounts we are at or slightly over fiscal year 1985 levels. And so, in general, USDA and its related agencies will receive continued funding at the current, fiscal year 1985 rates.

I join the distinguished chairman of our committee in expressing my hope that we will see final action on the regular fiscal year 1986 appropriation bill before this joint resolution expires on December 5.

COMMERCE, JUSTICE, STATE, JUDICIARY

The House and Senate have passed the fiscal year 1986 bill, H.R. 2965. Conference is scheduled for tomorrow.

Programs are funded at the House-passed level or the current rate, whichever is lower, and under the fiscal year 1985 conditions.

No new programs or new general provisions are allowed.

The House-passed ban on participation in abortion litigation by the Legal Services Corporation is not included.

All current restrictions on the Legal Services Corporation and the Federal Trade Commission would be continued. The Corporation restrictions include bans on assistance to illegal aliens, participation in class action suits, and lobbying. The resolution would continue 1980 FTC authorization act provisions dealing with agricultural cooperatives and marketing orders and trademarks.

HOUSE JOINT RESOLUTION 441 CONTINUING RESOLUTION, FISCAL YEAR 1986: DISTRICT SECTION

The District of Columbia appropriations bill passed the House on July 30, 1985 and was adopted with amendments by the Senate on November 7, 1985. Since the bill passed the Senate after October 1, 1985, the funding rates and conditions are the same as provided in House Joint Resolution 388.

This continuing resolution mandates that programs and activities in the District appropriations bill will be funded at the fiscal year 1985-enacted level or at the House-passed level; whichever amount is lower.

As far as funding levels in this bill, this continuing resolution is fairly straightforward as it relates to the District bill.

However, two fairly controversial provisions adopted by the House are not included in the continuing resolution. Since the general provisions for the District bill from fiscal year 1985 apply in this situation, the new abortion language and the Regula amendment concerning competitive contracting are not included in this resolution. Both of these provisions were modified by the Senate and will be considered during conference on H.R. 3067.

ENERGY AND WATER DEVELOPMENT

When we adopted the first continuing resolution for fiscal year 1986, it provided for the funding of energy and water development programs at the lower of the House-passed or Senate-passed bill.

I am pleased to report that since that time, the Energy and Water Development Appropriations Act for fiscal year 1986 has been signed into law, and has been designated as Public Law 99-141. The extension of the continuing resolution that we are considering today is therefore inapplicable to our energy and water development programs.

FOREIGN OPERATIONS

Neither House has passed the fiscal year 1986 bill.

Programs included in the fiscal year 1985 Foreign Assistance Act are continued at the current rate and under the current terms and conditions.

No new programs or projects are allowed.

Israel has already received the fiscal year 1986 appropriation of $1.2 billion in economic support funds, which were obligated under the first continuing resolution at the end of October under the terms of Public Law 99-83, the International Security and Development Cooperation Act of 1985. Foreign military credit sales in the amount of $1.4 billion for Israel would continue to be apportioned according to the duration of this continuing resolution. Two billion dollars in economic and military assistance to Egypt would also continue to be apportioned.

Current restrictions on population programs and abortion are continued, including restrictions in the Supplemental Appropriations Act, Public Law 99-98. These include bans on aid to programs involving coercive abortion or involuntry sterilization.

All country restrictions are continued, including bans on aid to Angola, Cambodia, Cuba, Iraq, Libya, Laos, Vietnam, South Yemen, and Syria.

DEPARTMENT OF HOUSING AND URBAN DEVELOPMENT-INDEPENDENT AGENCIES

The fiscal year 1986 appropriation bill for the Department of Housing and Urban Development and 16 independent agencies, H.R. 3038, passed the House on July 25, and passed the Senate with 94 amendments on October 18. On Thursday, November 7, conferees met to resolve the differences between the two versions. I am hopeful that we will consider the conference report this week and soon see final action on the regular fiscal year 1986 appropriations bill, so that the funding provision for these important agencies will disengage from this second continuing resolution before it expires on December 5.

Our committee has taken every possible and responsible action to ensure that the essential programs, projects, and activities at the Department of Housing and Urban Development, the Environmental Protection Agency, the National Aeronautics and Space Administration, the National Science Foundation, the Federal Emergency Management Agency, the Veterans' Administration, and each of the independent agencies continue at reasonable and operable rates until such time as we have reached agreement with the other body and have a separate fiscal year 1986 bill signed into law by the President.

In the event that a conference agreement is not adopted and enacted into law between now and December 5, our

committee recommends that HUD and the 16 independent agencies receive funding and authority at the current fiscal year 1985 rate, or at the rate provided for in the fiscal year 1986 House-passed bill, whichever is lower or more restrictive.

HOUSE JOINT RESOLUTION 441 CONTINUING RESOLUTION, FISCAL YEAR 1986: INTERIOR SECTION

The Interior appropriations bill passed the House on July 31, 1985. To date, the Senate Appropriations Committee has reported H.R. 3011, and the Senate began consideration of the bill on October 31, 1985. However, there has been no action in the other body since that time.

This continuing resolution provides that programs and activities in the Interior bill will be funded during this period at the fiscal year 1985-enacted level or at the House-passed level; whichever amount is lower, and under the more restrictive authority.

As far as funding programs in the Interior bill, this continuing resolution is fairly straightforward. However, there is one general provision carried forward in this continuing resolution that may be of concern to several Members. As provided in the fiscal year 1985 continuing resolution, the ban on leasing in the Outer Continental Shelf off the California coast and Georges Bank in the North Atlantic is continued in force. Based on a preliminary agreement, the House-passed Interior bill did not include the OCS leasing plan. Since the Interior Department has no plans for leasing during this period, there is no practical effect for this provision.

LABOR, HEALTH AND HUMAN SERVICES AND EDUCATION

The first continuing resolution, which expires on November 14, funded all programs usually funded in the appropriation bill for the Departments of Labor, Health and Human Services and Education and related agencies, at the fiscal year 1985 rate. The extension of the expiration date which we are considering today, as brought to the floor, would therefore simply provide for continued funding for these programs at the fiscal year 1985 rate, through December 4, 1985.

In addition, this bill, to extend the expiration date of the first continuing resolution, would also extend the applicability of all general provisions and limitations that were included in the fiscal year 1985 Labor/HHS appropriations bill (Public Law 98-619).

LEGISLATIVE

The conference report on H.R. 2942, fiscal year 1986 Appropriations Act for the legislative branch, passed the House and the Senate on October 29. The President is expected to sign the act in the next few days, thus removing the act from the provisions of the new continuing resolution.

DEPARTMENT OF TRANSPORTATION AND RELATED AGENCIES

As with the first continuing resolution for fiscal year 1986, this extension would continue programs and activities for the Department of Transportation and related agencies at the lower of the House-passed or current rate, and under such conditions and restrictions as were in effect during fiscal year 1985.

HOUSE JOINT RESOLUTION 441 CONTINUING RESOLUTION, FISCAL YEAR 1986: TREASURY SECTION

Although the conference report for the Treasury-Postal Service appropriations bill for fiscal year 1986 has been adopted by both Houses, this continuing resolution provides for the programs and activities in this bill to be funded at the House or Senate rate, whichever is lower and under the more restrictive authority.

Under this resolution, the funding levels are the same current rate provided by House Joint Resolution 388. Since the ban on OPM "pay-for-performance" and RIF regulations expired on July 1, 1985, as provided in the fiscal year 1985 continuing resolution, the prohibition will not be carried forward in this resolution. H.R. 3036 did reimpose the ban in the House-passed version, but the Senate removed the provision. In the conference report just adopted, the ban was modified to extend only until May 15, 1986 and to allow OPM to revise the regulations in the interim.

Mr. LUNGREN. Mr. Chairman, will the gentleman yield?

Mr. CONTE. I yield to my good friend, the gentleman from California.

Mr. LUNGREN. I thank the gentleman.

Mr. Chairman, perhaps the distinguished ranking member of this committee might be able to give us some idea of the amount involved in this particular bill. We have had a recitation of the formulae by both the chairman and by the distinguished gentleman from Massachusetts, but I wonder if he might be able to tell us what we are talking about in terms of dollars and cents.

Mr. CONTE. That is a good question. You would have to put into the computer what the figures are on all of these bills with the different formulas, and you would come out with a rough figure of what the entire continuing resolution would be.

You have about $275 billion in defense in the current year, and you have over $100 billion in HHS.

Mr. LUNGREN. If the gentleman would yield further, the gentleman and I have discussed on previous occasions how unfortunate it is that we come to the floor and have to do business by a continuing resolution. In fact, it unfortunately seems to be the rule rather than the exception and this denies us, and I know it denies the gentleman's committee, the opportunity to deal with specific bills in smaller chunks. Let us say, several hundred billions of dollars in one vote instead of all this which may add up to multiples of that.

We oftentimes are here talking about increasing the debt ceiling because our bills have come due. On those occasions we know the amount when the bills come due. Now it seems like we are signing blank checks so that we can spend from now until December 12, and we know that the bill is going to come due sometime down the line.

I just wonder if the gentleman has those same concerns he has expressed before about this process.

Mr. CONTE. The gentleman is right on target. He and I have had colloquies on this in the past. Only one bill has been signed; the Energy and the Public Works bill. It looks like the legislative bill is going to get signed.

This is a hell of a way to run a railroad, to say the least. If I were not on the Appropriations Committee, I would be leading the revolt here. All of these bills are in here and you are going to vote them up or down. You are not going to have the right to dissect a bill as it should be dissected, one program at a time.

But I will say that in the House we have passed every bill except the foreign aid bill.

Mr. LUNGREN. Mr. Chairman, will the gentleman yield?

Mr. CONTE. I yield to the gentleman.

Mr. LUNGREN. I thank the gentleman.

Does the gentleman have any feeling at this point as to whether we might be able to leave here sometime before Christmas having finished our business in the appropriate way, that is, with separate appropriation bills? Or does the gentleman believe that we will be here singing Christmas carols and unfortunately having to pass a continuing resolution to carry us into next year?

Mr. CONTE. If I were a betting man, I would tell you to go out and put your order in for your Christmas tree right now.

Mr. LUNGREN. On the east coast?

Mr. CONTE. You may take your pick too, because the last continuing resolution will be a Christmas tree.

I think we are going to get some vetoes because a lot of people complain the President does not veto anything. That is unfortunate because a lot of these bills that are going through have had a lot of hard work, and I think they should be signed.

Mr. LUNGREN. If the gentleman will yield further, to summarize, the gentleman is saying that this is to take us from now to December 12. That it is funding virtually all of the programs.

That it is a blank check. We do not know how much it is, but it is the gentleman's best estimate that it is at least in excess of $100 billion?

Mr. CONTE. Oh, my goodness, way, way in excess of that.

Mr. LUNGREN. I just wanted to make sure what we are doing here.

Mr. CONTE. Hundreds and hundreds of billions.

Mr. WALKER. Mr. Chairman, will the gentleman yield?

Mr. CONTE. I yield to the gentleman.

Mr. WALKER. Just doing some rough calculations here, it appears as though this one bill might be something on the order of $75 to $83 billion for the period of time from today until November 14, until December 12, would be something on the order of $75 to $83 billion.

Mr. CONTE. It could well be, because if I correctly remember the defense bill that passed here was $269 billion. So, you would have to pro rate that for that period of time. The HHS bill is over $100 billion; you would have to pro rate it for that period of time.

Mr. WALKER. If the gentleman will yield further, that is what I was trying to do here. Just trying to roughly calculate it and it appears as though that comes out to somewhere between $75 and $83 billion. Does that sound approximately right to the gentleman?

Mr. CONTE. It could be. I think you would have to be an Einstein to figure that one out.

Mr. WALKER. But the gentleman thinks that that is in the ball park?

Mr. CONTE. I think that is in the ball park; by all means.

Mr. WALKER. I thank the gentleman.

Mr. WHITTEN. Mr. Chairman, I yield myself 1 minute.

Mr. Chairman, may I thank my friend from Massachusetts. He and I have discussed this resolution before it was introduced, and we had agreed to have a clean resolution. I hope it will continue that way, and I want to thank him for his cooperation, not only here but many times.

Mr. CONTE. If the gentleman will yield, I will say I am pleased to hear that. The gentleman from Mississippi and I do work as a team. I hope the Senate does not tack anything onto this resolution because we were successful in the last one because it was clean. We will be successful in this one because it is clean.

Mr. WHITTEN. Mr. Chairman, I yield such time as he may consume to the majority leader, the gentleman from Texas [Mr. WRIGHT].

Mr. WRIGHT. I thank the distinguished chairman for yielding to me.

Mr. Chairman, I take this time simply to read to the House a statement on the White House stationery of the Executive Office of the President, headed, "A Statement of Administration Policy," and this is the administration's official policy with respect to what we are doing here today.

The administration supports H.J. Res. 441 and strongly opposes any amendment other than to change the expiration date to December 12.

The resolution provides a short-term extension of the current continuing resolution allowing the Congress to continue to work on regular 1986 appropriation bills.

□ 1700

Now it is my understanding that with respect to today's business both sides—the Democratic side and the Republican side—if the distinguished gentleman from Washington would care to address himself to that, have agreed that there would be no amendments offered by either side. Is that correct?

Mr. FOLEY. Mr. Chairman, will the distinguished leader, the gentleman from Texas [Mr. WRIGHT] yield to me?

Mr. WRIGHT. Of course I yield to the gentleman from Washington.

Mr. FOLEY. Mr. Chairman, in view of the statement issued by the administration that they would like to have the House and Senate adopt a clean extension of the debt ceiling, with only the amendment already adopted and offered by the distinguished chairman to extend the date until the 12th of December, I will not exercise the opportunity offered by the rule to call up the amendment authorized by the rule.

Mr. WRIGHT. Mr. Chairman, I thank the gentleman, and I trust that our friends on the minority side would be cooperative as well in order that we might carry out the wish of the administration in this regard and save the Nation from this pending brink on which it totters so that sane heads in good time can work together to hammer out a mutual agreement on which we can find accommodation for the long term.

Mr. Chairman, I thank the gentleman for yielding me this time.

Mr. FRENZEL. Mr. Chairman, this continuing resolution, whether or not it is amended by the distinguished majority whip, Mr. FOLEY, contains spending at levels well above the House budget resolution, and well above the Democrat's deficit reduction alternative of last week.

This House Joint Resolution 441 proves once again that the House majority will vote for any proposal that mentions deficit reductions, but none that actually reduce spending.

The resolution is the usual free-spending, log-rolling catch-all that is always presented at this time of year. No report of the CBO of OMB accompanies it.

There are only two certainties. The first is that there is too much spending here. The second is that I will vote against it.

Mr. WHITTEN. Mr. Chairman, I yield myself such time as I may require.

Mr. Chairman, I appreciate the statement by our distinguished leader and by our distinguished whip, and I offer an amendment at this time.

The CHAIRMAN pro tempore. The Chair advises the gentleman from Mississippi that the amendment is only in order after the general debate has been concluded.

Do the gentlemen on both sides desire to yield back their time so we can proceed to the amendment process?

Mr. CONTE. Mr. Chairman, I yield back the balance of my time.

Mr. WHITTEN. Mr. Chairman, I have no further requests for time, and I yield back the balance of my time.

The CHAIRMAN pro tempore. Pursuant to the rule, the joint resolution is considered as having been read for amendment under the 5-minute rule. No amendments are in order except the amendment printed in the CONGRESSIONAL RECORD of November 8, 1985, by, and if offered by, Representative FOLEY or his designee, which shall not be subject to amendment or to a demand for a division of the question but shall be debatable for 1 hour, to be equally divided and controlled by Representative FOLEY and a Member opposed thereto; and an amendment to be offered by the gentleman from Mississippi [Mr. WHITTEN] changing the date from December 5 to December 12.

The text of the joint resolution is as follows:

H.J. RES. 441

Resolved by the Senate and House of Representatives of the United States of America in Congress assembled, That section 102(c) of the joint resolution of September 30, 1985 (Public Law 99-103) is hereby amended by striking out "November 14, 1985" and inserting in lieu thereof "December 5, 1985".

AMENDMENT OFFERED BY MR. WHITTEN

Mr. WHITTEN. Mr. Chairman, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. WHITTEN: On page 1, lines 5 and 6, strike "December 5, 1985" and insert in lieu thereof "December 12, 1985".

Mr. WHITTEN. Mr. Chairman, I have explained this amendment fully, as has my colleague, the gentleman from Massachusetts. I ask for a vote on the amendment.

The CHAIRMAN pro tempore. The question is on the amendment offered by the gentleman from Mississippi [Mr. WHITTEN].

The amendment was agreed to.

The CHAIRMAN pro tempore. Under the rule, the Committee rises.

Accordingly the Committee rose; and the Speaker pro tempore [Mr. FOLEY] having assumed the chair, Mr. BONIOR of Michigan, Chairman pro tempore of the Committee of the Whole House on the State of the Union, reported that that Committee,

having had under consideration the joint resolution (H.J. Res. 441) making further continuing appropriations for the fiscal year 1986, pursuant to House Resolution 312, he reported the joint resolution back to the House with an amendment adopted by the Committee of the Whole.

The SPEAKER pro tempore. Under the rule, the previous question is ordered.

The question is on the amendment.

The amendment was agreed to.

The SPEAKER pro tempore. The question is on the engrossment and third reading of the joint resolution.

The joint resolution was ordered to be engrossed and read a third time, and was read the third time.

The SPEAKER pro tempore. The question is on the passage of the joint resolution.

The question was taken; and the Speaker pro tempore announced that the ayes appeared to have it.

Mr. CONTE. Mr. Speaker, I object to the vote on the ground that a quorum is not present and make the point of order that a quorum is not present.

The SPEAKER pro tempore. Evidently a quorum is not present.

The Sergeant at Arms will notify absent Members.

The vote was taken by electronic device, and there were—yeas 259, nays 151, answered not voting 24, as follows:

□ 1725

The Clerk announced the following pairs:

On this vote:

Mr. O'Brien for, with Mr. Hartnett against.

Mr. McKinney for, with Mr. Cheney against.

Messrs. LOEFFLER, OXLEY, STENHOLM, KASICH, McMILLAN, BATES, BOEHLERT, DAVIS, EDWARDS of Oklahoma, WOLPE, and GLICKMAN changed their votes from "yea" to "nay."

So the joint resolution was passed.

The result of the vote was announced as above recorded.

A motion to reconsider was laid on the table.

GENERAL LEAVE

Mr. NATCHER. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days in which to revise and extend their remarks on House Joint Resolution 441, and that the gentleman from Mississippi [Mr. WHITTEN] and I may include tabular and extraneous matter.

The SPEAKER pro tempore (Mr. EARLY). Is there objection to the request of the gentleman from Kentucky?

There was no objection.

MAKING IN ORDER ON WEDNESDAY, NOVEMBER 13, 1985, OR ANY DAY THEREAFTER, CONSIDERATION OF CONFERENCE REPORT ON H.R. 3038, DEPARTMENT OF HOUSING AND URBAN DEVELOPMENT-INDEPENDENT AGENCIES APPROPRIATION ACT, 1986

Mr. TRAXLER. Mr. Speaker, I ask unanimous consent that it may be in order at any time on Wednesday, November 13, 1985, or any day thereafter, to consider the conference report and any amendments in disagreement on the bill (H.R. 3038) making appropriations for the Department of Housing and Urban Development, and for sundry independent agencies, boards, commissions, corporations, and offices for the fiscal year ending September 30, 1986, and for other purposes.

Mr. Speaker, I might add that this has the consent and approval of the distinguished gentleman from New York [Mr. GREEN], the ranking minority member of the subcommittee.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Michigan?

There was no objection.

PROVIDING FOR CONSIDERATION OF H.R. 1616, LABOR-MANAGEMENT NOTIFICATION AND CONSULTATION ACT OF 1985

Mr. MOAKLEY. Mr. Speaker, by direction of the Committee on Rules, I call up House Resolution 313 and ask for its immediate consideration.

The Clerk read the resolution, as follows:

H. RES. 313

Resolved, That at any time after the adoption of this resolution the Speaker may, pursuant to clause 1(b) of rule XXIII, declare the House resolved into the Committee of the Whole House on the State of the Union for the consideration of the bill (H.R. 1616) to require employers to notify and consult with employees before ordering a plant closing or permanent layoff, and the first reading of the bill shall be dispensed with. All points of order against the consideration of the bill for failure to comply with the provisions of section 402(a) of the Congressional Budget Act of 1974 (Public Law 93-344) are hereby waived. After general debate, which shall be confined to the bill and shall continue not to exceed one hour, to be equally divided and controlled by the chairman and ranking minority member of the Committee on Education and Labor, the bill shall be considered for amendment under the five-minute rule. It shall be in order to consider the committee amendment in the nature of a substitute recommended by the Committee on Education and Labor now printed in the bill as an original bill for the purpose of amendment under the five-minute rule, and each section of said substitute shall be considered as having been read. At the conclusion of the consideration of the bill for amendment, the Committee shall rise and report the bill to the House with such amendments as may have been adopted, and any Members may demand a separate vote in the House on any amendments adopted in the Committee of the Whole to the bill or to the committee amendment in the nature of a substitute. The previous question shall be considered as ordered on the bill and amendments thereto to final passage without intervening motion except one motion to recommit with or without instructions.

The SPEAKER pro tempore. The gentleman from Massachusetts [Mr. MOAKLEY] is recognized for 1 hour.

Mr. MOAKLEY. Mr. Speaker, I yield the customary 30 minutes to the gentleman from Ohio [Mr. LATTA], for purposes of debate only, and pending that I yield myself such time as I may use.

Mr. Speaker, House Resolution 313 is the rule providing for consideration of the bill, H.R. 1616, the Labor Management Notification and Consultation Act of 1985.

This is an open rule that provides for 1 hour of general debate, to be equally divided and controlled between the chairman and ranking minority member of the Committee on Education and Labor.

The rule waives points of order against the bill under section 402(a) provides that it shall not be in order to consider any bill which of the Congressional Budget Act. Section 402(a) authorizes any new budget authority for a fiscal year, unless that bill has been reported on or before May 15, preceding the beginning of such fiscal year.

Mr. Speaker, H.R. 1616 authorizes appropriations effective in fiscal year 1986 to establish a national commission on plant closings and worker dislocation. Since the bill was not reported by May 15, 1985, a waiver of section 402(a) is required in order to provide for the consideration of this bill.

Mr. Speaker, House Resolution 313 makes in order an amendment in the nature of a substitute which is recommended by the Committee on Education and Labor and is now printed in the bill. This amendment in the nature of a substitute shall be considered as original text for the purpose of amendment, and is to be considered by sections, with each section to be considered as having been read. Finally Mr. Speaker, the rule provides one motion to recommit with or without instruction.

Mr. Speaker H.R. 1616, the Labor-Management Notification and Consultation Act of 1985, is a bill that is long overdue. This bill, which is sometimes referred to as the plant closing bill, would require an employer to give at least 90 days notice of a proposed plant closing or a mass layoff that affects 50 or more employees. H.R. 1616 would also create a 15-member bipartisan commission on plant closings and worker dislocation that would investigate plant closings, and recommend any legislative or administrative responses considered necessary to help alleviate the impact of plant closings in general.

Mr. Speaker, H.R. 1616 is the product of 11 years of studies and hearings held by the Committee on Education and Labor, and other congressional committees. The bill does not attempt to solve all the problems caused by plant closings and mass layoffs. Rather, the bill seeks to accomplish a process that will help prevent dislocations that are unnecessary, and to make possible an orderly process of adjustment, when closings or mass layoffs are unavoidable.

I urge my colleagues to vote for the adoption of House Resolution 313, and for the passage of the bill H.R. 1616.

Mr. LATTA. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, at the outset let me make it clear that we all share the same goal, that is more jobs for Americans. However, while the supporters of this bill are probably well-intentioned, the result of this legislation in many cases will be the loss of jobs which otherwise might be saved.

Mr. Speaker, some of the supporters of this bill have given the impression that it does nothing more than require employers to give workers 90 days notice before closing a plant. Mr. Speaker, this is not an accurate description of all the burdensome requirements which will be imposed on a struggling business by this bill. Let me mention a few of the specific requirements which a business will be required to meet. And bear in mind, Mr. Speaker, a business will be required to bear all these additional burdens at a time when, in many cases, it is already gasping for breath.

First, Mr. Speaker, while the record to support this bill has consistently referred to actual plant closings, the provisions of the bill are triggered by an employment loss of 50 or more employees within 30 days, regardless of whether the number of employees at the facility is 50 or 5,000. In fact, Mr. Speaker, this bill would apply even if the "employment loss" involved was a mere reduction in hours. Thus, Mr. Speaker, the provisions of this bill could be triggered by a business relocating or subcontracting a portion of the work, consolidating operations, or discontinuing of a product line.

In all of these cases the bill imposes an automatic 3-month delay, with notice and consultation requirements, except under ill-defined "unavoidable business circumstances." Mr. Speaker, the use of a vague term such as "unavoidable business circumstances" will result in endless litigation, which is great for lawyers, but just puts another burden on the employer.

Mr. Speaker, an additional requirement imposed by this bill is in section 4, entitled "Consultation Required Before Plant Closings and Mass Layoffs." This section provides in part that:

An employer shall not order a plant closing or mass layoff unless the employer has—

(1) met at reasonable times with the representative for representatives (if any) of the affected employees with respect to a proposal to order a plant closing or mass layoff; and

(2) consulted in good faith with such representative for the purpose of agreeing to a mutually satisfactory alternative to or modification of such proposal.

Mr. Speaker, this requirement for consulting in good faith is another lawyers dream come true. The courts may spend years trying to decide what

constitutes good-faith consultation. And an employer failing to comply with this requirement would be faced with a full range of potential sanctions, including an injunction extending the consultation period beyond the original 3 months.

Mr. Speaker, the requirement for good-faith consultation only applies where there is union representation of the workers. Yet, according to the dissenting views, under current law an employer is already required to engage in good-faith bargaining with the union where labor costs are a factor in a decision resulting in layoffs. This bill would extend the consultation requirement to decisions which are unrelated to labor costs.

Mr. Speaker, the dissenting views include a relevant quote from the case of *First National Maintenance Corp.* v. *NLRB* (1981), which sums up the problem, as follows:

> If labor costs are an important factor in a failing operation and the decision to close, management will have an incentive to confer voluntarily with the union to seek concessions that they make continuing the business profitable.
>
> * * * At other times, management may have great need for speed, flexibility, and secrecy in meeting business opportunities and exigencies. It may face significant tax or securities consequences that hinge on confidentiality, the timing of a closing, or a reorganization of the corporate structure. The publicity incident to the normal process of bargaining may injure the possibility of a successful transition or increase the economic damage to the business. The employer also may have no feasible alternative to the closing, and even good-faith bargaining over it may be both futile and cause the employer additional loss.

So Mr. Speaker, this is why the good-faith consultation requirement in this bill has the potential to do more harm than good.

Mr. Speaker, another provision in this bill which may do more harm than good is section 5 entitled "Duty to Disclose Information During Consultation." Section 5 provides that:

> An employer shall be held to have failed to consult in good faith under section 4 if the employer has not provided the representative of the affected employees with such relevant information as is necessary for the thorough evaluation of the proposal to order a plant closing or mass layoff or for the thorough evaluation of any alternatives or modifications suggested to such proposal.

Mr. Speaker, it is clear that the bill contemplates that "relevant information" would include trade secrets and other competitive information because it specifically provides for protective orders to be issued by the Secretary of Labor in such instances. However, an employer's fear of disclosing such information to anyone, regardless of the bill's so-called protections could be so significant as to inhibit decisions necessary to keep the plant operating in the long run.

But now, Mr. Speaker, let me tell you what happens if after trying to comply with all these requirements, there is a complaint that an employer has violated the requirements of this act. First, within 10 days the Secretary investigates the allegation and makes a determination thereon. If the Secretary determines there is reasonable cause to believe the allegation is true, the Secretary is directed to take the employer to court.

The court may grant orders which may include, but shall not be limited to: First, giving required notice; second, extending the consultation period and requiring the employer to consult in good faith during the period as extended; and third, requiring reinstatement with backpay and related benefits.

In addition, section 7(b) of this bill provides for civil actions against employers. It provides in part that:

> Any employer who orders a plant closing or mass layoff in violation of this act or of a court order under subsection (A) shall be liable to each employee who suffers an employment loss as a result of such closing or layoff for reinstatement or damages or both.

Damages are to include backpay and related benefits, and may include general or punitive damages or both. The court may in addition to any judgment awarded to the plaintiff allow a reasonable attorney's fee to be paid by the defendant. Together with the costs of the action.

And then, just for good measure, Mr. Speaker, section 8 of the bill provides that:

> The rights and remedies provided to employees by this Act are in addition to, and not in lieu of, any other contractual, statutory, or other legal rights and remedies of the employees.

Mr. Speaker, this bill should be labeled the Lawyer's Relief Act of 1985. They will be the prime beneficiaries. However, the bill will quite likely succeed in closing down plants, which otherwise might have been saved. In many cases it will end up hurting those workers that it is supposed to help.

Mr. Speaker, the rule which provides for consideration of this plant closing bill is an open rule, providing for 1 hour of general debate. Unfortunately, like so many other rules reported in recent years. This one contains a waiver of the Budget Act. In this case it is a waiver of section 402(a) which requires authorization bills to be reported before May 15.

In conclusion, Mr. Speaker, the rule provides another waiver of the Budget Act, and the bill will do more harm than good in many areas. I can't see very much to recommend either one.

□ 1735

Mr. Speaker, I yield 3 minutes to the gentleman from Texas [Mr. DELAY].

Mr. DELAY. Mr. Speaker, I can understand the frustration by which this bill and this rule has found its way to the floor. Every Member of this body has plants that are closing and has to be quite concerned about the closing of those plants and the economy in their local communities.

But Mr. Speaker, ultimately, the issue of this plant closing legislation is jobs, something that all of us here are concerned about. The fault of this bill does not lie in its intent but in its content: It focuses on joblessness, the consequence, rather than job creation, the solution.

H.R. 1616 attempts to artificially resuscitate jobs which already have been lost by impeding employers' ability to make necessary management decisions. Such action is hardly a remedy; it's an exacerbation of a problem.

If plant closing legislation were to be effective, it must concentrate on job creation. And that would mean affording management the most flexibility and least regulation possible for the survival of that business.

Let me show you an example that should be enough to vote against this rule and put this bill to bed.

A simple comparison of employment statistics between Western Europe and the United States illuminates the need, or lack thereof, for plant closing legislation.

Between 1965 and 1984, America's work-age population increased by 38 percent. But jobs during that period grew by 45 percent, from 71 million to 103 million, despite oil shocks, recessions, and the decline of some traditional industries. Western Europe, on the other hand, has experienced job shrinkage, with 3 million fewer jobs than that there were 10 years ago.

A factor to be considered in this comparison are the respective environments in which job creation or shrinkage occurred. We have examples by which we can plainly see what would happen if this legislation passes. In Western Europe, plant closing legislation similar to this is common—it has passed in France, West Germany, England, and Ireland. Consequently, increased unemployment plagues that part of the continent where the economic environment has been strangled by the grip of government regulation.

Contrast that with the U.S. economy which now has about 10 million more jobs than even optimists predicted 15 years ago. Job creation is a direct product of a profitable business, just as unemployment directly results from business failures. By preserving an economic environment that facilitates growth, expansion, and relocation of individual businesses, we promote job creation.

I, for one, do not want to follow the example of Western Europe when we here in the United States are an exam-

ple ourselves. Let's not institute a system that has been the albatross around our European counterparts' necks.

Mr. LATTA. Mr. Speaker, I yield 2 minutes to the gentlewoman from New Jersey [Mrs. ROUKEMA].

□ 1750

Mrs. ROUKEMA. Mr. Speaker, I rise in opposition to the rule and I am against consideration of the bill. It is not that I have any problem with the rule per se, I think it is an eminently fair rule that has been brought forward, but I strongly oppose the bill and I strongly believe that we are not ready to address this issue.

The issue, despite the energetic and sincere efforts of our colleagues Mr. CONTE, Mr. CLAY, and Mr. FORD, who have worked on the legislation, is too controversial and polarizing because it is based on too little information.

It is for that reason, Mr. Speaker, that I oppose bringing it to the floor at this time. It is also for that reason that Congressman JEFFORDS, the distinguished ranking member on the Committee on Education and Labor and myself approached Secretary of Labor Bill Brock and asked him, because of the importance of the issues of plant closings, economic dislocations, and the psychological problems attendant to those issues, if he would appoint a task force to address the issues.

The Secretary did that. He has appointed a high-level task force of academics, of business people, and of labor leaders who all have experience in the field. I think it is those people to whom we should be looking for their expertise and understanding of the problems, so that we can have not a divisive program that will divide labor versus management, north versus south, and community versus community; but rather bring us together with a relevant, coherent, and prudent plan to solve the problems.

We are talking here about symptoms, not the underlying problems, and we would be well advised to avoid this legislation now and come back with a comprehensive and well-thought-out program.

Mr. LATTA. Mr. Speaker, I yield 2 minutes to the gentleman from Pennsylvania [Mr. WALKER].

Mr. WALKER. Mr. Speaker, this rule ought to be defeated. We have heard a lot of talk during recent months about voodoo economics; well, we have here the first example of cuckoo economics, because this propounds the economic theory that you can solve the problems of a transitional economy by creating more bureaucracy and hiring more lawyers.

I think that we ought to be moving away from that kind of concept rather than toward it. What we have before you here, though, is a rule that suggests it is a part of that whole movement that what we ought to do now is waive the Budget Act as well.

So here we are with one more Budget Act waiver before us, after already considering at least 10 since the beginning of this year. How much longer are we going to go along with this idea that somehow we are not at fault for what is happening in the budget process when we go ahead and waive the Budget Act at every conceivable opportunity? That is what we are doing here again.

All we are told is that this is just a minor waiver; that it involves the reporting date. Well, the gentleman from Massachusetts said in his remarks: Here is a bill that has been around for 11 years. We have been working on this idea for 11 years, and yet we could not meet the reporting date.

Why is the reporting date there? Because what we are attempting to do is establish some pattern that assures us that the authorization process will follow what we have done in the Budget Act.

We are not doing that here; we are just saying that once again we are going to waive the reporting date, waive the authorization process, go ahead and spend the money.

I suggest we ought to vote against this rule for several reasons, one of which certainly is the fact that it is a rule to bring forth a bad bill; but, second, I think anybody that is concerned about the budget process ought to vote against one more waiver of the Budget Act.

Mr. LATTA. Mr. Speaker, I yield 4 minutes to the gentleman from Colorado [Mr. BROWN].

Mr. BROWN of Colorado. Mr. Speaker, the gentleman from Ohio referred to this bill as one that should be called the Lawyer's Relief Act. I want to take issue with my friend from Ohio.

It should not be called the Lawyer's Relief Act, although there is some reason to look at it that way. Any thoughtful analysis of this bill would mandate it being called the Economic Illiteracy Act of 1985. It reflects a level of misunderstanding of the basic economic of this country that is staggering.

Take a look at what this measure will require. It will not discourage the closing of plants, it will encourage them. Anyone who has been involved in the closing of a plant I invite to come to the floor and debate this issue.

Second, it will discourage the locating new plants in this country. For any operation that has a choice as to where they locate a plant, this is one more factor that will discourage them from locating a productive enterprise in the United States.

It will encourage the closing of plants; it will discourage the locating of new plants in this country, and, third it will reallocate resources. It will take resources that can be used to pay the working men and women of this Nation and reallocate them to be spent for attorney's fees and paperwork. Any plant that has problems is going to hire special labor law attorneys to advise them.

It will take resources and divert them to attorneys' fees, redtape, paperwork, and increased bureaucracy.

If there is any doubt as to whether or not your plant is going to shut down, under this law you will be advised to give notice; and you will give notice before you are ready to shut down.

What does that do? If you are a supplier and you hear 90 days in advance they may shut down, you are more likely to cut off credit. If you are a banker and face any decisions about whether to continue a line of credit to a plant and you hear they are planning to shut down, you will be less likely to continue their line of credit.

If you are a customer buying products from a plant that may be shut down, and you have 90 days' notice, you are less likely to buy those products.

I suggest to the Members that any thoughtful analysis of this bill cannot help but lead to the conclusion that this bill will require many plants to shut down and many people to lose their jobs when it may not be necessary.

The existence of this law will discourage new plants from coming into an area. If the Members want to discourage new jobs in this country, pass this bill, because this will do it.

The bill provides a new basis for lawsuits. Does anyone here suggest that there are not enough bases for lawsuits in this country now?

It provides new redtape and rules and regulations. Can anyone seriously claim we need more of those? It calls for increased attorneys' fees. Those fees will take away from resources that could be provided for workers pay. Is there anyone who says a major need of this country is more attorneys' fees?

Then what about increased bureaucracy? Does anyone believe this bill will help the workers of this country? I suggest it will not. This bill is the personification of economic illiteracy. It deserves to be beaten and beaten soundly. It provides for losing jobs in America; it provides for discouraging new employment, and it provides for a transfer of our resources to pay for redtape and bureaucracy.

I would hope that we would not only turn down this bill, but would come forth with a new resolve to make this country competitive again.

Mr. LATTA. Mr. Speaker, I have no further requests for time.

Mr. MOAKLEY. Mr. Speaker, for purposes of debate only, I yield 2 minutes to the distinguished gentleman from Michigan [Mr. BONIOR].

Mr. BONIOR of Michigan. Mr. Speaker, I rise in support of House Resolution 313, the resolution making in order H.R. 1616, the Labor-Management Notification and Consultation Act of 1985. House Resolution 313 provides for an open rule and 1 hour of general debate on H.R. 1616. There is nothing controversial about the terms of the rule.

As a cosponsor of H.R. 1616, I submit that there should likewise be no controversy about H.R. 1616. H.R. 1616 addresses a problem that Congress has ignored too long—the financial and emotional suffering endured by hundreds of thousands of American families each year when their breadwinner is thrown into unemployment without warning because of a sudden plant closing or mass layoff. Studies by the Bureau of Labor Statistics, academic researchers in Maine and Utah, and a review of major union contracts all confirm that most dislocated workers receive little or no warning of their layoff and have no opportunity to adjust their family budget and spending or to look for work or retraining programs before they lose their job.

This state of affairs is not just cruel and needlessly unfair to the dislocated workers, it is also wasteful and expensive for the taxpayer. Every additional week the Nation's dislocated workers are jobless and drawing unemployment compensation costs the taxpayers hundreds of millions of dollars. It makes good sense to require employers—when possible—to let their employees know well in advance that their jobs will be eliminated. Experience and careful research show that advance notice of plant closures dramatically reduces the resulting unemployment. H.R. 1616 can reduce unemployment without government expenditures and without burdening responsible employers.

I believe that most employers can give 90 days' notice of permanent mass layoff and plant closures affecting 50 or more employees without any problems. But the bill does not ask for the impossible. Section 3(b) provides that if because of "unavoidable business circumstances"—circumstances beyond the employer's control which make the need for layoffs unforeseeable 90 days in advance—the employer must close or cut back its operations without giving 90 days' notice to its employees, it may do so without penalty and without asking for the permission of any union or Government agency.

H.R. 1616 is modest, sensible, and flexible legislation that will help dislocated workers without burdening responsible employers. I urge my colleagues to support House Resolution 313 and to support prompt consideration of H.R. 1616.

Mr. MOAKLEY. Mr. Speaker, I yield such time as he may consume to the gentleman from Michigan [Mr. FORD].

Mr. FORD of Michigan. Mr. Speaker, I rise in support of House Resolution 313, which makes in order the consideration of H.R. 1616, the Labor-Management Notification and Consultation Act. There should be no objection to the terms of the rule provided for by House Resolution 313—it is an open rule providing for an hour of general debate, a rule that guarantees that all sides on this issue can be heard.

There are, however, a number of Members who would like to see no debate at all on this legislation, who argue that consideration of H.R. 1616 is somehow premature. After working on this legislation and similar bills for 11 years, after more than 20 congressional committee hearings on the need for plant closing and prenotification legislation, I find any talk about prematurity incredible. Since I first introduced a plant closing bill in February 1974, 20 million Americans have lost their jobs in plant closures. This bill is not premature.

The gentlelady from New Jersey [Mrs. ROUKEMA] and others have argued that we should not legislate until a task force on plant closings that Secretary Brock will establish has studied all of the issues for a year and are its recommendations.

Mr. Speaker, this argument is nothing but a smokescreen. Where did the idea for Secretary Brock's task force come from? What is its history? The gentlelady from New Jersey claims credit for the idea of a task force, but in fact, Mr. CONTE, Mr. CLAY, and I proposed the establishment of a very similar Commission in H.R. 1616. The gentlelady from New Jersey has served on the Education and Labor Committee for more than 4 years, but she never proposed the creation of a task force to study plant closings until it became evident that H.R. 1616 would be favorably reported from the committee this year. It is no coincidence that Secretary Brock first announced his intention to appoint a task force in June, on the day two subcommittees marked up H.R. 1616.

It is also coincidence that the task force, which originally was to report in July 1986, has not yet met or that Secretary Brock delayed the announcement of appointments to the task force until it became clear that H.R. 1616 would be considered by the House in November. The main purpose of the Roukema-Brock task force is to derail H.R. 1616 and any companion bill in the Senate.

The Roukema-Brock task force is no substitute for H.R. 1616. The Deputy Under Secretary for Congressional Affairs has assured business groups that the task force will not lead to plant closing legislation. The chairman chosen for the task force opposes H.R. 1616, and the Secretary, himself, has declared that he hopes the task force will help prevent the passage of H.R. 1616.

Mr. Speaker, the Roukema-Brock task force is not the unbiased, bipartisan, blueribbon Commission on plant closings and worker dislocation that Mr. CONTE, Mr. CLAY, and I envisioned in H.R. 1616. Unlike the Commission in H.R. 1616, whose membership would have been selected by agreement between the Senate majority leader and yourself—or your successor as Speaker of the House—the Roukema-Brock task force's members were chosen unilaterally by the Secretary of Labor, who is opposed to H.R. 1616, who seeks to eliminate the Trade Adjustment Assistance Program, who sought and received a cut of more than 50 percent in the already insufficient JTPA Dislocated Workers Program.

The task force is a smokescreen designed to obscure the urgent need for H.R. 1616. I hope my colleagues will see through it and support House Resolution 313.

Mr. MOAKLEY. Mr. Speaker, I have no further requests for time, and I move the previous question on the resolution.

The previous question was ordered.

The SPEAKER pro tempore. The question is on the resolution.

The question was taken; and the Speaker pro tempore announced that the ayes appeared to have it.

Mr. WALKER. Mr. Speaker, I object to the vote on the ground that a quorum is not present and make the point of order that a quorum is not present.

The SPEAKER pro tempore. Evidently a quorum is not present.

The Sergeant at Arms will notify absent Members.

The vote was taken by electronic device, and there were—yeas 233, nays 176, not voting 25, as follows:

□ 1815

The Clerk announced the following pair:

On this vote:

Mr. Torricelli for, with Mr. Nelson of Florida against.

Mrs. BENTLEY and Mr. MOLINARI changed their votes from "nay" to "yea."

So the resolution was agreed to.

The result of the vote was announced as above recorded.

A motion to reconsider was laid on the table.

PERMISSION FOR SUBCOMMITTEE ON INTERGOVERNMENTAL RELATIONS AND HUMAN RESOURCES OF COMMITTEE ON GOVERNMENT OPERATIONS TO SIT TOMORROW DURING 5-MINUTE RULE

Mr. WEISS. Mr. Speaker, I ask unanimous consent that the Subcommittee on Intergovernmental Relations and Human Resources of the Committee on Government Operations be permitted to meet tomorrow during the 5-minute rule for hearings only.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from New York?

There was no objection.

LABOR-MANAGEMENT NOTIFICATION AND CONSULTATION ACT OF 1985

The SPEAKER pro tempore. Pursuant to House Resolution 313 and rule XXIII, the Chair declares the House in the Committee of the Whole House on the State of the Union for the consideration of the bill, H.R. 1616.

□ 1819

IN THE COMMITTEE OF THE WHOLE

Accordingly the House resolved itself into the Committee of the Whole House on the State of the Union for the consideration of the bill (H.R. 1616) to require employers to notify and consult with employees before ordering a plant closing or permanent layoff, with Mr. OBERSTAR in the chair.

The Clerk read the title of the bill.

The CHAIRMAN. Pursuant to the rule, the first reading of the bill is dispensed with.

Under the rule, the gentleman from Missouri [Mr. CLAY] will be recognized for 30 minutes and the gentlewoman from New Jersey [Mrs. ROUKEMA] will be recognized for 30 minutes.

The Chair recognizes the gentleman from Missouri [Mr. CLAY].

Mr. CLAY. Mr. Chairman, I yield 3 minutes to the gentleman from Michigan [Mr. FORD].

Mr. FORD of Michigan. Mr. Chairman, I rise in support of H.R. 1616.

Since I first began working on this legislation in December 1973, more than 20 million Americans have lost their jobs in plant closings. We have held hearings in Alabama, Oregon, Montana, Michigan, Ohio, California, Pennsylvania, New Jersey, and Washington, DC. Everywhere we have gone, everywhere you look in the United States—from Maine and Texas, to North Carolina and Missouri—plant closings and worker dislocation are terrible problems for American families and communities.

Some people claim that after 11 years and more than 20 hearings we don't know enough about this issue to legislate. Mr. Speaker, let me assure you, we know a great deal.

We know that plant closings often destroy the financial security of workers and families crushing hopes for an adequate pension, wiping out health insurance coverage, leading to extended periods of unemployment and downward mobility. Sixty-five percent of the disclocated workers surveyed by the Bureau of Labor Statistics in 1984 were jobless or earning less than they had in their previous job.

We know that dislocated workers develop serious health problems from the stress of losing their job, including ulcers, hypertension, increased uric acid and cholesterol levels, and a higher incidence of alocholism. The mortality rate of dislocated workers in one study was 16 times higher than for other men their age.

We know that the mental health problems of dislocated workers and their families are equally serious. They have higher divorce rates, are more likely to engage in child and spouse abuse, and have appalling suicide rates. We heard testimony about plant closings where as many as 10 workers committed suicide.

We know that a single plant closing or mass layoff can devastate a small town it the plant is an important enough employer. We have seen it happen in textile mill towns, shoe factory towns, and mining communities. Even in larger towns and cities, a plant closing or a series of closings can have a terrible ripple effect, leading to layoffs at other businesses, lost tax revenues, decreased public services, and

more layoffs. When the shutdown occurs without advance notice, the community has no time to prepare for its effects, adjust its budget and services, or seek alternatives to the closure. It is no wonder that the National League of Cities strongly supports H.R. 1616.

We know that the Government isn't doing enough to help the millions of dislocated workers who need help. Only one unemployed American in four receives unemployment compensation. JTPA Title III, the Dislocated Workers Program, serves less than 5 percent of the Nation's dislocated workers, and its budget has just been cut more than 50 percent.

But we also know that there are low-cost or no-cost ways of helping dislocated workers, and that is what we propose in H.R. 1616. It doesn't take a genius to realize that prenotification of job loss will allow dislocated workers to find new jobs faster. President Reagan's own Council on Industrial Competitiveness recognized this simple fact in its report earlier this year. The Council recommended:

> Where possible, early identification of the worker to be displaced should be encouraged. Delay in identifying these individuals directly contributes to prolonging the adjustment process—a process already made difficult by the individual's denial of the problem, lack of job search skills, and absence of alternative job or occupation at a comparable wage. Employers should be urged to provide early notification of plant closings, and joint public-private efforts providing prelayoff assistance (such as those authorized by JTPA), should be emphasized.

The usefulness of advance notice is not just common sense, however. Studies have shown that advance notice significantly reduces the amount and duration of unemployment resulting from plant closings. As little as 1 month's notice reduced the resulting unemployment by 20 percent. With 3 month's notice, as H.R. 1616 would require, the effect on unemployment would be even greater. Nationwide, unemployment compensation costs could be reduced by hundreds of millions of dollars.

The American people recognize the benefits of advance notice legislation. A Business Week/Harris poll found that 68 percent of Americans favor a law requiring 1 year's prenotification of plant closings.

Even the Labor Department recognizes some of the potential benefits of advance notice. A recent Labor Department report concludes that "assistance for unemployed workers should begin before layoffs occur," a result that is impossible without advance notice.

The other key feature of this bill is the duty it imposes on employers of 50 or more employees to consult with their employees' union about alternatives to a closure or cutbacks during the 90-day notice period. This is an easy requirement with which to comply, one that will have negligible costs for employers, but enormous potential benefits.

We know from our hearings that, when given the opportunity and sufficient information, employees and their unions can sometimes develop productivity improvements and millions of dollars of cost savings that management has overlooked. We know that the National Labor Relations Act as currently interpreted does not provide a forum for effective employee and union involvement because of its excessively narrow scope of bargaining. If we are to compete internationally we cannot afford to ignore the brains and ideas of the average American worker because of outdated, irrelevant notions about management rights. Nothing in H.R. 1616 diminishes management's right to make management decisions. The bill provides only that before eliminating large numbers of jobs, the employer must meet with the affected employees' union, provide information about the decision, and discuss any alternatives the union might propose in good faith. Nothing in H.R. 1616 allows a union or anyone else to veto a plant closing decision or force an employer to alter its decision to close or lay off employees.

We have seen that businesses are sometimes unaware of alternatives to decisions to shut down or relocate. When given adequate advance notice, cities have been able to change such business decisions for the benefit of everyone concerned by providing new facilities, changing zoning laws, providing low interest loans, or helping to establish an employee stock ownership plan.

None of these fortuitous results is possible without advance notice and information—and that is all that H.R. 1616 requires.

Mr. Chairman, H.R. 1616 is well-balanced, bipartisan, compromise legislation. It is not comprehensive plant closing legislation, but the American people cannot wait for the consensus that would make comprehensive legislation possible. They want and deserve advance notice of plant closings and mass layoffs and an opportunity to influence decisions about the elimination of their jobs. H.R. 1616 will at least give them that. I urge my colleagues to support this bill.

Mrs. ROUKEMA. Mr. Chairman, I yield 4½ minutes to the gentleman from Vermont [Mr. JEFFORDS], the distinguished ranking minority member of the committee.

Mr. GILMAN. Mr. Chairman, will the gentleman yield?

Mr. JEFFORDS. I yield to the gentleman from New York.

Mr. GILMAN. I thank the gentleman for yielding.

Mr. Chairman, I am pleased to rise in support of H.R. 1616, the Labor-Management Notification and Consultation Act of 1985 and to urge its immediate adoption. I know I speak on behalf of thousands of employees and employers in my district when I express my appreciation to the gentleman from Michigan [Mr. FORD], the gentleman from Missouri [Mr. CLAY], and the gentleman from Massachusetts [Mr. CONTE], for working so diligently to bring this vital labor-management legislation before the House today.

Mr. Chairman, very few Members of this body have not experienced the closing of a major business or plant in their district; watching as scores or maybe hundreds of their constituents went from the assembly line to the unemployment line within a matter of weeks. The severe economic impact on those displaced workers, on that town, on that region, and on any and all of the associated businesses is devastating.

I am proud to represent the 22d Congressional District of New York, a portion of which borders northern New Jersey. Several years ago, without adequate notice, the Ford Co. made the decision to close their assembly plant in Mahwah, NJ. That plant employed close to 5,000 workers; over 40 percent of whom resided in my district. Hundreds of my constituents suddenly found themselves out of work without sufficient time to retrain, let alone make alternate plans as to how they were going to satisfy their prior financial commitments. As we consider H.R. 1616, please bear in mind, the individuals affected by this legislation are people who carry mortgages, who work hard to save so that they may send their children to college—we are talking about people who are devoted to their families, their communities and to their jobs. These are workers who care about the job they perform and feel a sense of loyalty to their employer. Indeed the one thing that struck me most whenever I spoke with those workers who had been laid-off at the Ford plant was that they felt they had been betrayed and that their employer had not lived up it its responsibility, neither as an employer nor as a member of the community, when it chose to shut down the Mahwah operation without adequate consultation or advance notification.

H.R. 1616 contains three major provisions to ameliorate the effects of plant closings and represents years of hearings and discussions between the Congress, labor, and management. H.R. 1616 requires any employer who intends over any 3-month period to lay off permanently 50 or more employees or reduce by 50 percent the hours of 50 or more employees, to provide written notice to the affected employees and the Federal Mediation and Conciliation Service [FMCS] 90 days prior to implementing that decision. If a union represents the affected employees, H.R. 1616 requires the employer to meet and consult with the union throughout the notification period in an effort to reach a mutually acceptable alternative to, or modification of, the closing/layoff decision. In a nonunion

shop the employer is encouraged but not required to engage in good-faith consultation with the affected employees. If at the end of the notification and consultation period an alternative has not been reached, the employer is free to implement the closing/layoff decision. H.R. 1616 specifically states that an employer who is faced with unavoidable business circumstances that require him to immediately close his operations need not comply with the notification and consultation requirements.

Enforcement of these provisions is within the jurisdiction of the Department of Labor which when notified by an employer or union that a violation has occurred, can seek injunctive relief in district court. If injunctive relief is unavailable an employer who violates these provisions shall be liable for civil damages which are capped at 90 days back pay and related benefits for each affected employee; in other words the total of what each employee would have received had he or she been notified of the lay-off or closing in accordance with the act.

In addition to the notification and enforcement provisions, H.R. 1616 establishes a National Commission on Plant Closings and Worker Dislocation to study the causes and impacts of plant closings and permanent layoffs. The Commission will be appointed jointly by the Speaker of the House and the majority leader of the Senate and shall include labor representatives, business leaders; Federal, State, and local government officials and academicians. The Commission is required to make its report and any recommendations it deems appropriate 12 months after its formation.

Throughout the towns and cities across this Nation, employers of more than 50 persons can and do have a substantial impact on that region's economy. I feel strongly that these employers have a responsibility to their community, a responsibility that extends to giving that community adequate notice of an impending plant closing or reduction in workforce. Workers and their families must be afforded ample opportunity to make plans; to retrain and or look for alternate employment. While many employers already practice these notification requirements, many more do not. Accordingly, I urge my colleagues to adopt H.R. 1616 the Labor-Management Notification and Consultation Act of 1985.

Mr. JEFFORDS. Mr. Chairman, I rise in reluctant opposition to H.R. 1616, the Labor-Management Notification and Consultation Act of 1985. My reluctance stems both from the tremendous respect I have for the authors of this legislation, and from the sympathy I have for their intent.

I fully support requiring employers to provide advance notice of plant closings whenever and wherever it is feasible. Like perhaps every Member of Congress, sudden plant closings have had a devastating impact on people and communities in my State. My support of notice, however, does not lead me to support the provisions of H.R. 1616, which I believe are flawed in a number of respects. I intend to offer a substitute proposal which attempts to address some of these flaws, and which, I believe, has a greater chance of being enacted into law.

The notice and other provisions of H.R. 1616 are triggered by any employment loss for 50 or more employees, regardless of how large the plant might be. I should note parenthetically that I use the word plant for illustration only. The bill would cover any business enterprise of 50 or more employees. The loss of 50 jobs in a town of 500 would indeed by devastating. But it does not make sense to put into motion the machinery of this bill for the layoff of 50 employees at a mill employing 5,000 people.

More troublesome than the notice requirements of H.R. 1616 are the so-called consultation provisions. It is the intent of the bill's sponsors that employers be required to consult with their employees before closing a plant in order to find a means by which to prevent that closing.

I certainly have no objection to that intent, however, I am afraid that the language of H.R. 1616 goes well beyond that intent. More than just a consultation process, the bill establishes a broader duty to bargain than under current law, and even, it can be argued, a duty to agree.

I would hope that every employer in this country could involve his or her employees in business decisions on an ongoing basis so that this sort of consultation would be routine. Yet there are any number of reasons why a business teetering on the brink might not want to advertise that fact.

If an employer, after giving the matter a great deal of thought, decides to close a plant or lay off some workers in a product line. I think yes, decency requires some notice be given. But mandating good faith bargaining by law just does not seem possible or workable. The employer is in a nonwin situation. If the employer decides to close the plant and then provides notice, he or she is probably guilty of bargaining in bad faith, since the decision had already been made.

It is important to remember that current law already requires bargaining when a decision to close and relocate hinges on labor costs. If that requirement is not being honored, then we should look at that discrete problem rather than this sweeping expansion of an employer's duty to bargain on a decision to close a plant.

The sponsors of H.R. 1616 argue that their bill will not prevent the closure of any business. That may be true, but I think it may prevent the opening of a number of businesses. If a company is deciding were to locate a new facility, this bill provides one more reason to go to Mexico, Korea, or Taiwan.

Moreover, the bill creates a series of potential legal obstacles that would at least delay, and might very well prevent, a closing or layoff. I mentioned earlier the duty to bargain in good faith, a duty which might be impossible to meet. Beyond that, there are several hurdles an employer must overcome. First, notice must be given 90 days in advance. This period may be shortened due to an unavoidable business circumstance which will probably, and perhaps inevitably, be litigated.

Second, once notice is given, the employer must provide all relevant information to the union. Sensitive information could be held back only with a protective order from the Department of Labor. Good faith consultation would probably not commence until all information had been supplied, which means that the process of closing or laying off might take much longer than 90 days.

Failure to give notice or consult in good faith would be remedied through injunctive relief sought by the Department of Labor, or through an individual employees' private or class action. An employer found responsible for an unauthorized plant closing or layoff would be liable for back pay and benefits, general and punitive damages, and attorneys' fees.

Finally, H.R. 1616 authorizes a commission to study plant closings and make recommendations. I frankly don't understand why we should legislate without the benefits of the findings of such a commission. For that reason, along with my colleagues MARGE ROUKEMA and STEVE GUNDERSON, I asked Secretary Brock to create such a commission. He has now done so, and I don't think anyone can fault the caliber of individuals who have agreed to serve on the Brock task force. Creating a second commission simply makes no sense.

Given my objections to the bill before us, I intend to offer a substitute at the appropriate time. In brief, it will require notice only, will be triggered in a somewhat more sensitive fashion, and will sanction the Brock task force. My substitute does not attempt to prejudge the findings of that task force, as it becomes effective 6 months after the task force reports those findings. At the same time it allays the fears of those who are concerned that the task force process will drag on indefinitely by fixing a date certain for enactment. It will not require consultation. But I think it will stand a better chance of someday being considered by the other body and the President.

Mr. Chairman, I urge my colleagues to oppose the bill before them and to support my substitute.

Mr. CLAY. Mr. Chairman, I yield such time as she may consume to the gentlewoman from Ohio [Ms. OAKAR].

Ms. OAKAR. I thank the gentleman for yielding time to me.

Mr. Chairman, I rise in very strong support of this bill.

Mr. CLAY. Mr. Chairman, I yield 6 minutes to the gentleman from Massachusetts [Mr. CONTE].

Mrs. ROUKEMA. Mr. Chairman, I yield 3 minutes to the gentleman from Massachusetts [Mr. CONTE].

Mr. CONTE. I want to thank my good friend and chairman of the subcommittee, the gentleman form Missouri [Mr. CLAY] and my dear friend, the gentlewoman from New Jersey [Mrs. ROUKEMA], for yielding time to me.

Mr. Chairman, as a sponsor of this legislation, I urge my colleagues to support its passage.

Plant closing legislation has been before Congress since 1974. Hearings have been held, studies begun and finished surveys conducted—but still no bill. In just the last 5 years of that stalemated debate, the Bureau of Labor Statistics reports that 11.5 million Americans lost their jobs. No area of the country was exempt. In my home State of Massachusetts, a survey of plants with over 50 employees revealed that between January 1982 and December 1983, 67 plants closed and 12,368 jobs were lost.

The study also showed that in the 8 months between January to August of 1983, 11,696 people from 72 companies were laid off permanently or indefinitely. This from a State enjoying a period of relative economic prosperity.

Some of these closings and layoffs were handled responsibly, but it is clear that many were not. BLS reports that of the 11.5 million Americans who lost their jobs between 1979 and 1984, almost one-half received no notice whatsoever of their layoff.

For those "doubting Thomases' who still think a bill is premature, go ask my people in North Adams. Ask the 230 employees of X-Tyal Corp., which liquidated in July with no notice—despite the fact that it had several Government contracts outstanding. Ask the hundreds who have been laid off from Sprague Electric. Sprague started out in a garage as a family-owned business. It was built into a major company on the strength of the family's dreams and the hard work of the people of North Adams. But in 1972, Penn Central bought out the business, and has been moving it out of town every since. Hundreds of workers have lost their jobs, and little notice has been provided in specific instances. The union is never consulted about possible improvements that might save jobs as the community's lifeblood is drained away.

The sad reality is that the Penn Centrals of the world simply don't care about local communities, or the blood and sweat that local people have invested in the company. But North Adams isn't unique. Whether it's Atari in California, United Technologies in Texas, or X-Tyal and Sprague in North Adams, the hardship and suffering outlined by my friend from Michigan [Mr. FORD], is all the same.

Stress, depression, alcoholism, family abuse, crime, and even suicide—these are the casualties of worker dislocation. Plant closings and layoffs are inevitible in a modern, industrial society. But with so much at stake for our communities and working people, I think we all agree it is absolutely essential that they be handled as responsibly and humanely as possible.

In January, BILL FORD, BILL CLAY and I met believing that it was time for a new approach to the plant closing dilemma—a moderate, bipartisan approach that could generate broad-based support. We agreed that a bill radically different from past legislation was needed if it were to have any hopes of passing. H.R. 1616 is the product of those efforts. It requires only what we consider to be the minimum, immediate protection that must be provided to our working people and communities—90 days notice and consultation. Sensitive to the criticism that past plant closing bills applied across-the-board, we built in an escape clause. Under H.R. 1616, employers may reduce or eliminate the notification period if unforeseen business circumstances require swift implementation of the closing or layoff.

Mr. Chairman, this bill is a far cry from past plant closing legislation. Past bills required 1-year mandatory prenotification. H.R. 1616 requires 90 days. Past bills applied to virtually all businesses with no escape clause. H.R. 1616 applies only to businesses of 50 or more employees and contains an escape clause. Unlike past bills, H.R. 1616 does not require severance pay.

It does not establish transfer rights. It does not mandate companies to make up tax losses to communities. It makes no changes in pension rights. It creates no new government or employer programs to provide job training and relocation assistance. In fact, Mr. Chairman, as I said before the Rules Committee, this bill is so watered down that it reminds me of the soup I had during the Depression. It's so watered down you can barely taste the substance!

Many have urged this bill isn't enough, that more comprehensive relief is necessary. The debate of the last 10 years has shown, however, how difficult it will be to generate a consensus on a more comprehensive bill. Accordingly, H.R. 1616 would commend to a 1-year, bipartisan National Commission on Plant Closings and Worker Dislocation the task of fashioning more comprehensive recommendations, if such are deemed necessary. Given the controversial nature of this issue, I believe a truly bipartisan commission, much like the Social Security Commission, is the only way broad-based recommendations can be developed to address this crucial issue. But in the meantime, we know what minimum relief we can and must provide.

Mr. Chairman, we hear a lot around here about people seeking to take the "high ground" on this and the "high ground" on that. Well, we didn't seek the high ground on this issue. We sought the middle ground—and I think we've achieved it. H.R. 1616 has 174 cosponsors representing a broad cross section of Members from both sides of the aisle. That's more than double the number who have cosponsored any plant closing bill in the past. The AFL-CIO, the Full Employment Action Council, the National League of Cities, the Lutheran Council, the United States Catholic Conference, and a host of others endorse this bill. H.R. 1616 will not prevent plant closings or layoffs. But it recognizes that dislocation is often an inevitable by-product of economic change, and that we need to cushion that as much as possible. Economic change, yes—but economic change with a human face.

I know this is a difficult issue for Members. But it's a difficult issue for the breadwinner of a family of five who goes to work in the morning and confronts for the first time the cruel reality of a closed plant. I think the following passage from the latest draft of the Catholic bishops' pastoral letter on the economy makes the case for our bill in a powerful and direct way:

> At a minimum, workers have a right to be informed in advance when closings or layoffs are under consideration, and a right to negotiate with management about possible alternatives. . . . Also, the local communities in which these companies are located have often invested heavily in them through public services, tax benefits, public education, and a host of other community resources. They too have a right to expect management to respect their investment.

It's time to stand up and be counted. I urge my colleagues to support this responsible approach to the profound problem of worker dislocation, and vote against any attempts to weaken it.

□ 1830

Mrs. ROUKEMA. Mr. Chairman, I yield such time as he may consume to the gentleman from New York [Mr. BOEHLERT].

Mr. BOEHLERT. I thank the gentlewoman for yielding time to me.

Mr. Chairman, I rise in support of the Jeffords alternative, and I rise in opposition to the measure before us and urge my colleagues to look closely at the Jeffords alternative. The substitute is the best compromise possible between the legitimate interests of business and the legitimate interests of working men and women.

I'm in an unusual position here—I cosponsored H.R. 1616 when it was introduced because I felt and still feel a Federal response is necessary to the devastation being felt in so many industrial areas. In my own district in central New York, at least 1,500 of my constituents were laid off during the first 6 months of 1985, and let me say this, unless we have the guts to get our fiscal house back in order, things aren't going to get better very soon. I don't like telling my constituents the overall economic picture is rosy when so many of them have lost their jobs, and I'm sure I'm not the only Member here with that same problem.

Our working men and women deserve a response, especially one that inproves their chances of making a smooth transition from one job to another. I've been working with my colleagues to develop new systems of worker retraining and reemployment, and I support the basic thrust of H.R. 1616, which is to give employees enough notice to make a smooth job transition. I think we can all agree on that objective.

But I had anticipated that some compromises would be made on the way from the committee to the floor. Can we all agree that businesses should be able to forecast any and all slowdowns or layoffs 90 days in advance? Some? Certainly. Many? Perhaps. All? Of course not. Is it responsible to radically empower unions or employees to delay essential business actions indefinitely? Again, of course not. Will the remedy outlined in H.R. 1616 make it easier for laidoff workers to find new jobs with a minimum of dispute and disruption to our economy? No, no, and no.

Let's be realistic here. As it stands, this bill provides one more incentive for businesses to locate or do their transactions abroad, eliminating jobs for the American worker and worsening our trade deficit.

In this past Sunday's New York Times, an op-ed piece made the valuable point that restrictions on plant closings can also be restrictions on plant openings, new investments, or debt refinancing—all of which can save a company and its employees from going under, or even provide new jobs and opportunities.

The Jeffords substitute does include early notice provisions, but without the unrealistic, burdensome, and counter-productive negotiation requirements found in H.R. 1616. Also, it recognizes Secretary Brock's welcome initiative to review the issues involved and make a stronger recommendation. I talked just this afternoon with the Secretary and he assured me of his commitment to follow through.

Mr. Chairman, Americans don't want an intrusive Federal Government making decisions that are better left to the free marketplace. If my colleagues are truly concerned about helping their displaced workers—and God and my constituents know I am—they will vote against this overly reactive, though well-intended bill, and in favor of the Jeffords substitute.

Mrs. ROUKEMA. Mr. Chairman, I yield myself 5 minutes.

Mr. Chairman, we are talking here about legislation on which we all agree in terms of our sensitivity to the problem. Indeed, many of us have had plants close in our districts. In my district I have had an automotive plant close, I have had a machine tool plant close, and I know that Members have had textile plants, steel foundries, and an assortment of others.

But this legislation would not have prevented one of those closings, nor would this legislation have made them more competitive or more compelling. I want to talk now about a real opportunity we have before us. Right now, we have Secretary Brock agreeing to put forward a task force. That task force has already been appointed. It is composed of the highest level people in management, industry, and academia as well as leading economists in the field.

These people are not speaking out of theory nor are they speaking out of a desire to protect any vested interests. They are going to be studying this issue from the point of view of protecting America, protecting American competitiveness, and protecting American jobs.

□ 1840

And that is where I think this legislation has gone so wrong. We have not recognized the unique opportunity that we have now before us to work in a bipartisan way with the Secretary, with the administration, and with the Democratic majority in this House toward resolving this problem in a prudent and a coherent manner.

Now, to get to the point of why we think this legislation is so dangerous, it is not because we are hard-hearted or insensitve or do not understand the problem. We understand it all too well. The reason we oppose this legislation is that, although my dear colleagues present it as a watered-down, stripped-down innocuous, ineffective piece of legislation—if it is so bad, I do not know why they are fighting to bring it to the floor—but anyway, in their own words, that is what they are doing, it is not innocuous, it is not simply a humane notification program, it is not simply a way of providing a waiver in places where it might provide a little problem. It is a bill of danger to labor, business competitiveness, and the community.

Why? Because the language that refers to the waiver under unavoidable business circumstances will lead us right to the lawyers, the Department of Labor, and the courts. There is no real waiver for unavoidable business circumstances.

What about the consultation requirement? This is a lawyer's paradise. The language on consultation requirements. Good-faith bargaining. What, pray tell, is good-faith bargaining in the context of this law? I will tell you what the results will be. The results will be endless litigation. And what happens to the small business that is on the brink of bankruptcy, that is trying to coordinate the problems between its creditors, or is contemplating the possibility of a merger with a more viable company? The idea of notification followed by good-faith consultation under the terms and conditions of this law will throw that business into bankruptcy.

What about the large corporation that may have thousands of workers? That corporation will be equally injured by this, because if they have to lay off 50 people or 100 people in order to save 1,000 or 10,000 jobs, they will be tied up in knots under this legislation.

So I say to my friends this is not the humane or the intelligent way to deal with economic dislocations, this is an important issue that must be discovered and discussed in depth by the task force that the Secretary has just appointed.

Mr. CLAY. Mr. Chairman, I yield 3 minutes to the gentleman from Montana [Mr. WILLIAMS].

Mr. WILLIAMS. Mr. Chairman, this Nation has undergone significant economic change throughout its history, and during these past 5 years that change has been particularly swift and hard. Understanding the inevitability of economic change in an economy as vibrant as ours, the Federal Government has moved to insulate industry against the effects of unnecessary dislocation. We have tax laws that provide incentives, writeoffs, and deductions and exemptions; we have loan guarantees for industry; we have tariffs and quotas. And for communities and workers our response to economic dislocation has been to provide income maintenance efforts such as unemployment insurance and trade adjustment assistance, and to a lesser extent, vocational retraining and jobs programs.

While these efforts are extremely important, all of them, whether they be our attempts to help industry or our attempts to cushion the effects on workers and communities, all of those efforts have depended heavily on the expenditure of tax dollars, and a lot of tax dollars.

In light of the growth of the deficit, particularly during these past 5 years, is it not incumbent upon us now to try to develop other innovative means of mitigating the hardships associated with economic dislocation. I think this bill does that. By providing for consultation, H.R. 1616 might prevent some closures and layoffs from occurring. By providing for notification of impending closing or layoffs, this legislation might better enable workers to provide for themselves more than they do now, more than they are able to

now in those circumstances where the closing or the layoff does occur.

This bill may well reduce the need for reliance on the Federal Treasury to cushion against the shocks of industrial abandonment.

I think we ought to give it a try. In my district, which encompasses western Montana, we have had layoffs in the railroad business, the copper business, and the timber business unprecedented in the past 50 years, and the amount of Federal money going into that district to both industry and communities and workers is really great. This bill might mitigate against the need for that much Federal assistance in the future. It is innovative. It is an attempt to get communities, workers, and industry to sit and reason together, and I think it is worth a try.

I thank the gentleman for yielding me this time.

Mrs. ROUKEMA. Mr. Chairman, I yield 3 minutes to the gentleman from Wisconsin [Mr. GUNDERSON].

Mr. GUNDERSON. Mr. Chairman, one of the great frustrations about being a Member of Congress is that so often when we try to deal with issues, we try one extreme or the other. It seems we either try to suggest there is no problem, and if we ignore it, it will go away, or else that we ought to come down with some major massive Government rules, regulations, paperwork, and penalties. I think that is the temptation that people in this body are facing in this particular issue, that either we are going to come out with H.R. 1616, with all its paper work and penalties, or else we ought to do nothing at all.

Let us understand that there is a social responsibility for large industry and large companies to provide some kind of notification not only to their employees but also I would suggest, to the community in which they reside and from which they derive much of their business and certainly their work force.

But the question above and beyond that is, how far do you go? H.R. 1616 goes very, very far. It requires a notice for any 50 employees up to 90 days ahead of time. It requires consultation, it mandates consultation, and it requires that all relevant information must be disclosed. And get this: If the company wants to prevent that from being made public, they have got to petition the Secretary of Labor and get him to decide not to make it public.

It talks about injunctive relief where for the first time in the history of this country the Secretary of Labor is going to go to court to decide whether companies can make legitimate economic and business decisions in this country. And then it describes and calls for, as everyone in this town I guess appreciates and supports, the need for a task force to discuss this issue, to look into it, and decide exactly where we ought to go.

I would suggest that if we need a task force—and I believe we do, and I commend the Secretary of Labor for appointing one, then we ought not claim to have all the answers today. That is why, when we get beyond general debate and in the 5-minute rule of this bill, the gentleman from Vermont [Mr. JEFFORDS] and I will be offering a substitute. It is a compromise between his substitute and the one I offered in the full committee. What it does is, it tries to deal with this issue in a proper middle-ground way by saying that while the task force is studying the issue and determining what the proper Government policy will be, during that time we still have at least a minimum obligation to let that community and its employees know when a plant closing is going to occur.

We are talking here about a voluntary plant closing, shutting down a plant and moving elsewhere. We are not talking about those unforeseen, unpredictable economic decisions and financial closures, things of that sort. What we are talking about here is a 60-day notice requirement.

We exempt seasonal workers, and we continue the task force. But what we would do in this country is what a number of States have already done, my own State being one of them; we would put into law a minimum standard of moral conduct in behalf of the business and industrial community in this country.

Mr. Chairman, I encourage all the Members to take a good look at that substitute when it is offered.

□ 1850

Mr. CLAY. Mr. Chairman, I yield myself such time as I may consume.

Mr. CLAY. Mr. Chairman, over the past 5 years, 5½ million workers lost their jobs without warning. They woke up 1 day and found themselves without a means of earning a living. What makes this situation more chilling is the mounting evidence that workers, communities, employers, and even taxpayers can realize significant benefits by a few months advance notice of an impending layoff. We cannot afford to continue ignoring the plight of those afflicted by no advance notice of large layoffs.

Prior warning of a layoff gives workers time to adjust. But another increasingly obvious benefit is seen in the growing number of cases where layoffs have been averted through adequate notice to workers and affected communities. When given a chance, employees working together with the community and management have found ways to save their jobs. These jobs have been saved not by forcing management to do anything, but by labor, management, and communities cooperating together. This is what H.R. 1616 seeks to promote. Nothing in the bill can force an employer to keep a plant open. Rather the notice and consultation is intended to encourage the kind of cooperation we hear repeatedly that is necessary to compete in the modern world economy.

When a layoff cannot be averted, prenotification has been shown to reduce the duration of the resulting unemployment. A study of plant closings in Maine showed that giving as little as 1 month's notice, reduced the length of unemployment by about 20 percent. Billions of dollars in unemployment compensation, food stamps, welfare, lost taxes, and lost economic activity could be saved by reducing the period of unemployment for the victims of plant closings.

Traditionally we have dealt with the fallout of worker dislocation by providing training, unemployment insurance, trade adjustment assistance, and other forms of Government-sponsored income maintenance programs. Each of these programs is important, but given the deficit, we must find ways to address these problems that do not require the expenditure of tax dollars. H.R. 1616 provides such an alternative. It encourages the private sector to work out problems of dislocation without Government interference. It does so without spending a single taxpayer dollar.

Because justification for prenotification and consultation is hard to refute, much of the opposition has focused on extraneous issues. We have heard a littany of imaginary horribles of what this bill is about. We have heard it is somehow intended to force employers to keep plants open. This is simply not true. H.R. 1616 requires notice and consultation when possible and nothing more. The provisions in the bill that allow a court to award equitable relief for violations of the bill have been so distorted and misconstrued that we intend to accept a clarifying amendment to the bill which makes backpay the exclusive remedy. There would be no way that H.R. 1616 could force an employer to keep a plant open for even 1 extra day.

We have also heard that consultation would allow employees to force a plant to remain open. Again it is not true. Consultation requires only that a unionized employer sit down and talk with the union when a large layoff appears possible. As stated clearly in the committee report, there is no duty on the part of the employer to reach an agreement, only that the employer have an open mind. This is what consultation requires and no more.

Another argument we have heard is that notice might cause a plant to close. The reasoning is that notice will scare off creditors and suppliers making the layoff inevitable. This

simply does not make sense. Notice is no more than an employer informing its work force that if things do not change, layoffs might be necessary. In nearly every instance, such information is not new to the creditors and suppliers. But even if it was, they would see it to be in their interest that workers be informed so that appropriate adjustments might be made. Notice helps anyone concerned with keeping an employer in business and this includes creditors and suppliers.

We have heard that H.R. 1616 would impose an impossible burden on employers since some times employers are forced into sudden layoffs through no fault of their own. There is a provision in the bill which deals explicitly with this problem. Employers must give notice only when they are aware that a layoff is imminent. Notice is not required when an employer has no knowledge that a layoff is coming.

We have been considering this legislation for years. There have been held dozens of hearings with a great many witnesses. We have made a special effort to address the concerns that have been raised. We have modified and refined the bill which is why 175 bipartisan members cosponsor this bill. The bill presents a simple choice.

If you believe an employer, when able, should give 90 days notice of a layoff of 50 or more people then you should vote for H.R. 1616. If you believe that when possible an employer should discuss the situation with the affected employees, then vote for H.R. 1616.

Mrs. ROUKEMA. Mr. Chairman, I yield 2 minutes to the gentleman from Texas [Mr. BARTLETT].

Mr. BARTLETT. Mr. Chairman, I rise in strong opposition to this legislation.

With only 2 minutes and really no substantive debate on the floor because the rule shortchanged us on the amount of time, and waiting until the House is virtually gone for the day, I suppose the only good news that one could have about this bill before us, H.R. 1616, is that it is not a serious piece of legislation; it is a political piece of proposed legislation that should not be on the floor at all.

We have all heard it described strictly off the floor in political terms that it is only a political vote. It oversimplifies the very real problems that very real people face.

But worse than anything else, this legislation or the prospect of this bill on the House floor never to become law offers a false hope to people who are hurting, holding out that false promise that somehow this proposal might help them. In fact, this bill should be entitled, "The False Hope Law of 1985."

This legislation holds out the false promise or the false hope that somehow a Federal law could repeal the basic laws of economics.

Now, there are a lot of things wrong with the bill in the way it is drafted, but there is one reason that overrides everything else as to what is wrong with the bill and why the House should vote against it tomorrow, and that is that it costs workers their jobs. It is an antijobs bill. It is billed as a temporary job security bill for 90 days. The truth is it would cost workers their jobs and it would cost those workers in a way that they would otherwise keep them.

Let me cite the ways. First, employers faced with a mandatory notice of whether it is 60 days or 90 days or 120 days would obviously merely overcompensate and would back up the time beyond which they would plan for their closing and provide for the notification, and plants would close far sooner. Many plants in which management is trying their best to hold on would be forced to close their plants to try to get in with that notice.

Mr. CLAY. Mr. Chairman, I yield 4 minutes to the gentleman from California [Mr. MARTINEZ].

Mr. MARTINEZ. Mr. Chairman, I rise in support of H.R. 1616, the Labor-Management Notification and Consultation Act of 1985.

My Subcommittee on Employment Opportunities held a joint hearing with the Labor-Management Relations Subcommittee on May 15, 1985 and heard from economists, labor officials, and employer organizations, who all agreed that plant shutdowns were a growing problem confronting our Nation. In the past 5 years, over 5 million Americans lost their jobs as a result of plant shutdowns, while an average of 18,000 plants closed annually, affecting every region of the country.

These plant shutdowns have had a devastating impact on our economy and resulted in massive unemployment among the workers of our country. Whole communities are eroded by plant shutdowns, while State and local governments not only lose their source of revenues, but are burdened by increased welfare and training expenditures.

Yet, the deeper tragedy is how productive human lives are being destroyed, often without forewarning from their employers. Studies have shown that advance notice of plant closings will help workers to make job transition adjustments and enable their families to prepare for the ensuing trials which they must endure.

In my own district in Los Angeles County, a Bethlehem Steel plant closing in 1982 displaced 1,500 workers at a loss of salary to workers and the community of three-quarters of a million dollars per week. According to estimates, only 50 percent of the workers had attained employment as of last year. In addition, the AT&T Co. is also about to lay off substantial portions of their labor force in the district.

The time has come to seriously move legislation to protect the workers of our Nation with a simple and nonburdensome provision for a 90-day advance notice of plant closings. The exchange of information and alternatives provided for in the bill during the shutdown period can only help the parties find solutions to their problems before the actual shutdown. In addition, a study will be a part of this bill to evaluate long-term relief for this major economic problem.

Mr. Chairman, I have heard criticism that this bill will create great burdens for employers who are about to go out of business, but I must emphasize that a 90-day notice period is cost-free and such notice period is waived when an employer cannot meet it due to "unavoidable business cicumstances." It does not compel employers to stay open. On the other hand, most businesses know well in advance of the 90 days that they are going to have to close. Therefore, the worker should have the benefit of that knowledge to protect them from the harsh results of sudden termination from their jobs.

Mr. Chairman, I urge my colleagues to support H.R. 1616 and to reject any amendment which will weaken this already streamlined plant-shutdown notice bill.

Mrs. ROUKEMA. Mr. Chairman, I yield 2 minutes to the gentleman from Illinois [Mr. FAWELL].

Mr. FAWELL. Mr. Chairman, whatever this bill is, I am convinced it is not a simple 90-day notice, that has been said several times, of plant closings. I have tried to zero in on just one provision, much as I suppose a lawyer would, because I think there are certainly will-intentioned people here who want to stop closings. They want to stop layoffs.

I am going to zero in on the layoffs because I think what we are doing here is making layoffs illegal.

I refer basically to the bill, to the definitions of plant closing or mass layoff. I will refer to the mass layoff, which is defined as being employment loss for 50 or more at any site during any 30-day period. That has been cited several times.

The bill goes on to point out that "employment loss" means termination without cause and layoffs over 6 months of an indefinite nature, or reduction of hours of work of more than 50 percent in any 6-month period.

Employment loss is also defined as employment loss for two or more groups, each of less than 50 employees, but which aggregate 50 or more employees. In other words, you could have at the beginning of a 3-month period, 40 people who are laid off and 5 the next month, 5 the next month, and then you have an aggregate of 50,

and as a result you have retroactive unlawful layoffs.

So now you have got to go back and give reinstatement and back pay, to all of the people who were laid off during each month of my hypothetical 3-month period even though not one of the layoffs involved more than 50 employees.

□ 1905

And, of course, it is not free of cost because during the subsequent 3-month period when you have to consult and meet and you have to disclose information to the union representative, the employer must reinstate the employees and pay their salary and related benefits. This is so except where there is no union, then you do not have to meet or negotiate with anyone or disclose information to anybody. That, I wonder about, because it seems to me to be pro-union and aganist the affected employees. If what you are doing is for the benefit of the employees, I don't understand why then the employer, when there is no union representative of the affected employees, isn't required to meet with these employees and consult with them and disclose information over a 90-day period as he is required to do if the employers are represented by a union. That may be a union preference of the authors of this legislation.

The point, however, I want to emphasize is that under the definitions of "employment loss" in H.R. 1616, layoffs of employees can be lawful when made, then later be retroactively determined as in violation of the provisions of H.R. 1616. Let me give an example. Assume that an employer finds it necessary on January 1 to reduce the hours of work—by more than 50 percent—of 50 of his employees. He takes this course of action to avoid terminating their employment entirely Under the provisions of H.R. 1616, such a reduction in hours worked constitutes inclusion in his business' "employment loss"—the same as a layoff—if it continues for 6 months.

Assume also that on February 1 the employer must indefinitely lay off 20 more employees, he lays off 5 more employees on March 1, and, finally 25 more on April 1. As of April 1, the "aggregate" of his layoffs would total 50 within a 90-day period. Under the provisions of H.R. 1616, the employer would have had a "mass layoff" of 50 as of April 1. He would then be obligated to give a 90-day notice to all of these 50 employees and their union representative, as well as go through 90 days of meetings, negotiations, and disclosures of information with the union representative before the layoffs would become lawful. He would also have to reinstate all of the laid off 50 employees and pay back wages and "related benefits." In addition, just about the time he is ending his 3 months of negotiating over the layoff of the 50 employees, he would find himself involved in yet another "mass layoff" because the aforesaid 50 employees who had their work hours reduced would have worked with such reduced hours for more than 6 months as of June 1. That latter fact would trigger another obligation for the employer to again send out another 90 day notice to the union representative and to the affected employees. He would again embark upon another 90 days of meetings, negotiations and disclosing of information to the union representative, presumably also paying for full-time back pay and reinstatement to full time for these employees. Under the provisions of H.R. 1616, in fact, no layoff would be free of potentially later becoming part of a "mass layoff" under the "aggregate" rule or under the rule which would alter the status of a worker working under a reduced work schedule to that of a "layed-off" worker after the expiration of 6 months.

As indicated, H.R. 1616 would not stop layoffs by making them unlawful, including retroactively unlawful. The bill would however, have a severe chilling effect upon any business' initiating new, and especially, "at risk", employment. It appears to me H.R. 1616 is a good example of the "law at its best" being terribly imperfect. Well motivated, but imperfect. New production, not fettering laws, allow businesses to build new jobs. Congress should know that.

Mr. CLAY. Mr. Chairman, I yield 3 minutes to the gentleman from Michigan [Mr. LEVIN].

Mr. LEVIN of Michigan. I thank the gentleman for yielding this time to me.

Mr. Chairman, there has been reference here to the vote on this bill being a political vote. Nothing could be further from the truth. This issue is a basic one in America. Five and a half million people have been laid off since 1979 without notice—5½ million.

What we are really doing is opening the debate on what we are going to do about industrial dislocation in this country, and the ailment is spreading. It is not a political vote. For those who think their districts are immune, it will not be long before the ailment affects them.

A recent headline in the newspaper, just yesterday, "Layoffs By High Technololgy Concerns Raising Fears In California Valley." Once invulnerable, the new horizon is now affected by industrial dislocation. It said here:

While government action cannot change the laws of the market, it can provide that people have some notice so retraining can begin.

Is retraining dislocating the market? I read the letter from the Secretary of Labor and I very much respect him, and he says two things, among others that are so hard to piece together. He says:

The bill injects the Federal Government into an area which should be dealt with and, indeed, has been dealt with through the collective bargaining process.

It sounds, therefore, as though everything is all right. But then he says we are setting up a commission. Those two things are hard to reconcile. If it can be handled through the collective bargaining process, why set up a commission? The fact of the matter is that these last-minute efforts by the administration to thwart this bill have a very hollow ring.

My staff reminded me of some testimony of mine before a subcommittee of this same committee over 10 years ago. I was a former State senator testifying after tremendous dislocation in the State of Michigan from the recession in the early 1970's. Here we are again, and the answer is, in part, set up another task force.

Mr. Chairman, the time for action is now. We will debate the details. It is not a political issue. It is a matter of necessity for this country.

Mrs. ROUKEMA. Mr. Chairman, I yield 2½ minutes to the gentleman from Michigan [Mr. HENRY].

Mr. HENRY. I thank the gentlewoman for yielding this time to me.

Mr. Chairman, while I am sympathetic with the concerns the legislation seeks to address, I believe that the measure is fundamentally flawed in several respects.

I rise in opposition to H.R. 1616, the so-called Labor-Management Notification and Consultation Act of 1985. While I am sympathetic with the concerns which the legislation seeks to address, I believe that the measure before us is fundamentally flawed.

First of all, this bill treats symptoms rather than causes of plant closure and worker layoffs. It does absolutely nothing to generate job creation for our unemployed workers. And it does absolutely nothing to insure job maintenance for those presently working. To the contrary, it establishes new requirements and conditions on job-creating capital investment which actually will serve to hinder new job opportunities for the American people.

Second, the notification provisions of the proposal are arbitrary. Whenever a layoff or reduction in hours takes place involving 50 or more employees, the act is triggered despite consideration as to the "proportionality" of the work force involved. If, for example, I have divided my job product into two separably organized corporations or work sites, each of which employs 100 persons, I can lay off 49 employees at each plant without triggering the act. On the other hand, should I consolidate my operations under one corporate umbrella at one plant location, the Act will be triggered if I layoff 50 individuals out of a work force of 200 employees.

Further, an employer who lays off 50 workers out of a work force of 2,000 is treated exactly the same as a plant of 75 workers which is closed entirely.

Third, this proposal will diminish prospects for new job formation by encouraging employers to increase overtime employment of the existing work

force during good economic times, rather than creating new jobs in the work force, in anticipation of avoiding the consequences of this Act. One of the constant concerns I hear from both management and labor is the fact that the overhead of Social Security, pension benefits, health benefits, et cetera, is such as to discourage new hires and encourage overtime work as an alternative. This bill will only exasperate that problem.

Fourth, the bill is clearly overdrawn in the case of seasonal employment. Will a retail operation have to consult with its employees after seasonal help has been retired following the Christmas holiday sales period? I suspect that this is not the intent of the act—but it is nonetheless a consequence of the act.

Fifth, the bill establishes two classes of working people in our Nation. One class is given consultation rights above and beyond the right to notification—the other class is not. If this legislation is needed as a matter of principle—as its advocates claim—then such rights ought to be granted to all, or not at all.

Finally, there are a host of other concerns which ought to be mentioned at least in passing. Does public disclosure of a company's financial inadequacies augment or diminish its abilities to secure refinancing and continuation? Do the notification and consultation requirements create a quagmire of problems relative to trade secrets and proprietary information critical to a plant's continued existence?

In closing, Mr. Chairman, let me say that as well-intended as this legislation may be, the consequences will be harmful to those workers it is most designed to protect. It reminds me of the old Elvis Presley song, "You Always Hurt the One You Love." Let's do it right Mr. Chairman, or not do it at all.

Mr. CLAY. Mr. Chairman, I yield 2 minutes to the gentleman from Louisiana [Mr. ROEMER].

Mr. ROEMER. I thank my colleague for yielding because he knows that in its present form I cannot support the bill and I appreciate him yielding me time in spite of that, and will, for the rest of my stay in the House, return the favor at every opportunity.

Mr. Chairman, I do rise with some deep emotions on this subject. In my home district, we have had plant closings, and I know the agony of my neighbors and my friends.

There is a kernel of a good idea here that in America, in a society based on freedom and free choice, we owe to our employees, our fellow workers, some notice of major economic change. I wish we could legislate good management. Good management gives good workers fair notice and it pays off in the marketplace. Examples to the contrary always work against the company and certainly the workers.

There is a kernel of a good idea here. However, the bill as written disturbs that kernel in ways that it should not be allowed to grow. For example, the bill in sections 4 and 5, with its consultation provisions require in terms of the work force, as far as I am concerned, that the only jobs this bill will yield are to lawyers, not to workers. The consultation provisions in this bill ought to be removed and I look with favor on some of the substitutes that do that.

In addition, I think that by going to a 50-unit change or workplace we go too far down in the small business society that makes our society unique. Small business hires most people in America and they need the freedom and the speed of change and they do not have either the cash flow or the resources for long notice.

There is a kernel of a good idea here, and I hope that by removing the consultation provisions, expanding the 50 unit perhaps to 200, then we can say to all of our workers that we have made a step forward.

Mrs. ROUKEMA. Mr. Chairman, I yield 1 minute to the gentleman from Wisconsin [Mr. PETRI].

Mr. CLAY. Mr. Chairman, I yield 2 additional minutes to the gentleman from Wisconsin [Mr. PETRI].

The CHAIRMAN. The gentleman from Wisconsin [Mr. PETRI] in recognized for 3 minutes.

□ 1915

Mr. PETRI. Mr. Chairman, I thank the gentleman from Missouri [Mr. CLAY], as well as my colleague from New Jersey [Mrs. ROUKEMA] for their generosity.

Mr. Chairman, H.R. 1616 is a proper attempt to address a serious problem in the United States: inadequate notification of plant closings. There is no good reason why companies deciding to close plants shouldn't give substantial advance notice to workers and communities so that alternative plans can be made. Unfortunately, this bill ends up going too far by intruding into the economic decisionmaking processes of companies. The bill should be amended so as to improve the notification provisions, but to drop the requirements that companies consult with their employees about the decision of whether or not to close operations. In addition, the bill should be amended to require that joint labor-management committees be formed to facilitate and coordinate the readjustment and relocation of displaced workers.

The closing of a plant or large department in a company is usually enormously painful for the workers that lose their jobs and for the surrounding community. Plant and department closings are widespread and will continue to occur in large numbers throughout the country. The shutdown of a plant or department is the normal consequence of a dynamic, competitive marketplace at work, as resources are reallocated to more efficient uses. The number of closings may grow as American industry restructures itself to deal with international competition and rapidly changing technologies.

This restructuring process should not be stopped or impeded. It is a healthy process and a necessary part of building a new, stronger America. This same process went on especially widely in the State of Massachusetts in the 1960's and 1970's with the result that that State now has one of the strongest, most balanced economies with one of the lowest unemployment rates in the Nation.

Instead of trying to retard the process of reallocating productive resources, the Government should be concerned with trying to ease the pain resulting from the process and should try to facilitate the reallocation of resources. With this purpose in mind, at the appropriate time I plan to offer an amendment in the nature of a substitute to H.R. 1616.

The focus of the proposed substitute will be twofold: first, to guarantee that the employees and communities affected by a closing will have enough notice to mitigate the consequent pain and, second, to set up a participative process that facilitates the reallocation of productive resources. This substitute will strike provisions that interfere in the business decisionmaking process on whether or not to close an operation.

Specifically, this substitute will make four major changes.

First, the substitute will limit the definition of affected employees to those who are permanent employees working 20 or more hours per week. This change is necessary in order to address the increasingly common use of part time and temporary employees. Such employees are frequently used to supply manpower needs resulting from market vagaries and to maximize job security for a core work force. Inherent in the use of part time and temporary employees is the transient nature of the work. For the legislation not to recognize expressly this increasingly common form of employment relationship would seriously disrupt the labor market, and impede employers' efforts to provide stable, secure employment for most of their employees.

Second, the substitute will change the notification period from 90 days to 120 days. The purpose of this bill is to guarantee sufficient notice for the employer, the employees, their elected representatives, and the community to ease the pain resulting from the dislocation and to facilitate the reallocation of productive resources—the people, but also at times new owner-

ship for the plant; 90 days is inadequate time to fully and effectively organize readjustment, retraining, and job placement programs, and possibly the repurchase of the assets. The additional 30 days, 120 days total, is sufficient in most instances to organize effectively and search for alternative owners if appropriate. With the efficiencies that come from the assistance of the Department of Labor, as provided later in the substitute, 120 days should be adequate notice.

Balanced against this is the ability of employers to satisfy the 120-day requirement. Any moderately well-run company operates on business plans at least one quarter in advance. The 120-day requirement thus demands only that employers operate according to minimal reasonable business standards. The unavoidable business circumstances exception provides ample leeway.

The third major change the substitute will make is to drop from the bill its consultation requirements in sections 4 and 5. These sections are dropped because the Government should not be trying to interfere with competitive market forces. Sections 4 and 5 are effective tools for labor to use to try to delay the closing of an operation. The consequence of these weapons will be that employers will take fewer risks and make fewer new investments in job creating plant and equipment because of restrictions on their ability to cut their losses if the market turns against them. If employers do not believe they can easily get out of investments that have gone bad, they will not take as many chances on new investments. The stagnant economies in Europe are due in part to restraints on the free flow of capital resulting from employment security laws such as those in sections 4 and 5.

This legislation should not go beyond current requirements to negotiate under the National Labor Relations Act. If the decision to terminate an operation is due to labor costs, then under the National Labor Relations Act the employer must negotiate with labor over whether or not it can close the operation. If the reason for closing is not labor costs then the employer is not required to negotiate the decision with labor. Regardless of the cause of the closure, however, the employer is obliged to negotiate the impact of the decision, including such matters as termination pay, vacation pay, health care, and so on.

Finally, the substitute will add a section on worker readjustment and placement services. This section furthers the second objective for the bill, which is to facilitate the reallocation of productive resources. It requires employers giving notice of closings, to establish joint labor-management worker readjustment and placement committees to facilitate and coordinate the readjustment or relocation of the workers through retraining, counseling, placement, human resource, community, education, and other services. It also provides for Labor Department assistance to these committees.

The specifics in this section closely correspond to procedures that have been demonstrated repeatedly to be most effective in easing the pain from closures and to lead to the most productive results for all concerned parties in reallocating productive resources. Such procedures have been outlined in a valuable Labor Department pamphlet entitled "Plant Closing Checklist: A Guide to Best Practice."

This joint approach should be mandatory rather than discretionary. The cost to communities, individuals, and the taxpayers from plant closings is too great to allow the parties to be irresponsible and to do nothing. The demands of this section are not burdensome and in effect only require employers to be good corporate citizens. Substantial experience plainly demonstrates the benefits; every dollar and hour invested in this joint preclosure effort is paid back many times over in lower unemployment taxes and payments, stronger local economies, and healthier individuals and families. Unemployment is devasting to all those touched by it, and this joint approach has proved that it can reduce unemployment caused by plant closures.

Together, all these provisions of my substitute will redirect H.R. 1616 from trying to interfere with the dynamic, competitive marketplace, and will focus it on guaranteeing sufficient notice of plant closings to mitigate the consequent pain and on facilitating the reallocation of productive resources.

Mrs. ROUKEMA. Mr. Chairman, I yield 1½ minutes to the gentleman from Colorado [Mr. BROWN].

Mr. BROWN of Colorado. Mr. Chairman, occasionally the Members of this body legislate on matters that they are well informed on and knowledgeable about. I must say that this bill not reflect that background knowledge. I dare say, the very well-intentioned folks that have brought this bill to the floor simply do not understand basic economics.

If you have a small business and you give a notice of closing your plant, how do your suppliers respond? Many suppliers, reevaluate your credit. That is not a debatable point, that is what happens in the real world.

If we pass this bill, what we do is shut those operations down that do not necessarily need to shut down. If you give notice of closing of your plant, what happens to your customers? Ask yourself: Are you going to buy a product that is no longer produced 90 days from now? This bill will force the closing and the loss of jobs that would not necessarily need to be lost without it.

If you are a banker and you get notice that a borrower intends to close his plant, will you extend that credit line? Perhaps. But what this bill does is make it more difficult for a struggling operation to make it.

What we have here is a bill that requires someone to give notice of closing if there is any chance they are going to have to close. The penalties for not giving enough notice are enormous. Thus management may be forced into a premature decision to close. Do not impose this kind of perverse legislation on our country.

Mrs. ROUKEMA. Mr. Chairman, I yield 30 seconds to the gentleman from Michigan [Mr. CONYERS].

Mr. CONYERS. Mr. Chairman, I thank the gentlewoman from New Jersey [Mrs. ROUKEMA] for her generosity. I realize we are about all out of time.

I rise to commend the subcommittee for an excellent job done.

I am from Detroit and we have been plagued with plant closings for more than 20 years now. This is a critical, vital measure, and I think it has been carefully worked out. I want to commend all of the parties involved.

We have to realize that a man's economic freedom means nothing if it is not tied to the right to work.

Mr. Chairman, I rise in support of H.R. 1616 to provide notification to communities prior to plant closings. Nearly 5 million workers have been disemployed since 1980. Many of these have had no time to adapt, to become retrained, to attempt to do something to save the plants from leaving their community. And as a result, many of these have suffered severe economic depression. Many have lost all health benefits and have been unable to provide them through some other method. Many have committed suicide.

In the same way that John Donne said that "no man is an island onto himself," I would say that no plant is an island onto itself. In the same way that workers depend on plants to derive their income, plants depend on workers to produce their products and, once produced, to supply the demand for the produced goods. Yet under the current situation, none of the 5 million who have been laid off were even given adequate notice or the arbitrary termination of this relationship, never mind participation in the decisionmaking process.

Britain, West Germany, France, Sweden, Japan and many other countries all have some form of plant closing laws. They all recognize that worker participation in the economic decisionmaking process is both moral and an economic necessity.

In World War II, almost a million Americans died or were wounded in fighting against facism and for the four freedoms: freedom of speech and religion, and freedom from fear and want.

Yet today, untold millions of Americans are enslaved and wounded by fear of continued unemployment and deprivation of dignity, of the the inability to provide for their families, and of another economic downturn which will surely worsen these conditions.

Millions upon millions, from the farm lands to the urban ghetto lands to the industrial heartlands, are enslaved and wounded by this fear.

The challenge to us today is to unleash freedom from these fears. To provide a framework for the people the Congress and the President to work together on behalf of true economic freedom.

Freedom to our forebearers represented escape from a monarch's tyranny, Freedom was then understood as a political concept to be secured through political rights, the right to vote, to assemble and speak freely, to think and worship according to ones conscience.

It was understood, however, that this freedom ultimately rested upon economic independence based on economic security. "A power over a man's subsistence amounts to a power over a mans will" said Alexander Hamilton.

Just what does freedom mean to the unemployed auto or steel worker today. The choice of another job with comparable opportunity? Maybe. But with millions of others jobless, and with no means to ensure that companies invest in communities where jobs are needed or that job training will be made available for the ever shrinking job opportunities, the choices are mighty narrow.

Today we might open a new chapter of freedom by asking what economic rights would establish the security our forebearers assumed to be the handmaiden of political democracy.

In 1825, James Madison remarked that the United States "had been useful in proving things before held impossible," specifically the capacity of human beings for self-government. What gave our Founding Fathers the courage to attempt the "impossible?" At base, it was a moral leap—a profound shift in the perception of what human beings are capable.

Today establishing economic rights seems no less impossible. Do we not need a comparable moral leap, one in which economic becomes as central to our concept of freedom as political rights? I think so. H.R. 1616 is surely a start.

Mrs. ROUKEMA. Mr. Chairman, I yield 2 minutes to the gentleman from Texas [Mr. DELAY].

Mr. DELAY. I thank the gentlewoman for yielding me this time.

We have already heard in a very, very short debate a litany of sad stories that have happened over this Nation, of plant closings and communities being severely impacted by the laying off of employees and the shutting down of plants. That is true, and it is a very, very sad thing.

But let us just think a moment, and let us talk about a very, very sad thing, too, of what would happen if this piece of legislation would go into effect, and what would happen to communities and unemployed people out there that are looking for jobs. Let me give you a perfect example.

In Houston, TX, right now, you may think we are full of money, but we are having a hard time. Oil and gas is not good. People are being laid off left and right in the electronics area. A plant just laid off 600 people in my area a few months ago, and we are desperately going out and looking for people to come in and build plants and facilities in my district.

What do you think, if we had this piece of legislation in America, what would happen if we went to a plant and asked them to expand their facilities into my district? The same thing would happen that happens in Germany, and in England, and in France, and in Ireland with this same sort of legislation. They would thumb their fingers at us. They would go to Mexico to build their plant, because they would not build a plant that they cannot close if things got bad.

You are talking about not being able to employ people. You are talking about not being able to revitalize communities. That is what you are talking about, because a man that has a lot of money, or a corporation that has a lot of money to invest and wants to expand their business looks at silliness like this and thumbs his nose at us, and goes to where it is cheaper to build his plant or store, and he is allowed to operate in more of a free atmosphere, in Taiwan, in Korea, in Singapore, and many other countries that welcome businesses.

You talk about trade here. What you are trying to do is destroy trade. We are not going to be able to compete with this kind of legislation. You are destroying America.

Mrs. ROUKEMA. Mr. Chairman, I yield myself what time remains.

The CHAIRMAN. The gentlewoman from New Jersey [Mrs. ROUKEMA] is recognized for 3 minutes.

Mrs. ROUKEMA. Mr. Chairman, while no one should dispute, ignore or be insensitive to the very real problems of economic and social dislocations associated with plant closings, I must oppose this bill. The impact of a plant closing on the affected workers and their community can be severe, as many of us have witnesses in our own districts. Indeed, I am no exception and have experienced the closing of a major automotive facility in my own district shortly before I was elected to Congress. This bill would not have kept that plant open. Nor will it help the small machine tool factory or the textile mill or the steel foundry in your district.

During the extensive hearings the committee conducted on this issue, the effects of plant closing—unemployment, psychological stress, martial problems, ripple effects in the community—have been well-documented. It is not my intention here today to contend that there is not a problem.

On the one hand, the problems are real and acknowledged, but a wide chasm extends between management, labor, and other experts in the field.

Where does this leave those of us in the middle of this dispute? I believe that we are left at a loss as far as legislating wisely is concerned. The gentleman from Michigan, Mr. FORD, has proposed his solutions to this problem and, while he and I are in total disagreement about this bill. I recognize his tireless efforts in bringing this issue to the attention of the Congress.

However, this bill deals with the symptoms, not the underlying economic forces behind the phenomenon of plant closings. If we pass this legislation, we will fail to recognize that since the ultimate resolution of this issue could have a serious impact upon the vital interests of all affected parties, the need to seek a consensus is essential.

Until now, the vehicle for obtaining that consensus has not existed. I am pleased to say that, at the request of myself and the gentleman from Vermont, JIM JEFFORDS, Secretary of Labor William Brock has recently appointed a task force on economic adjustment and worker dislocation to examine the issue of plant closings and evaluate programs and policies to deal with the problem.

The task force will examine the numerous questions relating to plant closing that have yet to be answered. What are the various reasons for management decisions leading to a plant closing or a layoff? To what extent do existing Federal and State programs and policies address plant closings and to what extent can they be improved? What has been the experience of foreign governments that have enacted plant closing laws? How would economic growth and the creation of new jobs be affected by the various legislative solutions that have been proposed? To what extent are plant closings being handled responsibly by companies and through the collective bargaining system and what incentives can be created to improve this record?

To underscore the concern of the business community about this issue, the Secretary received a flood of requests to serve from all sectors after he announced his intention to form the task force. With the best minds from the business community, labor, academia, and State and local governments, I am confident that this sensitive and complex subject will finally receive the objective analysis and creative attention which it deserves.

But, in the meantime, while we are awaiting the findings and conclusions of the task force, what would we ac-

complished with this legislation? I submit that we would unnecessarily create an atmosphere of suspicion and litigation which could ultimately undermine the positive steps achieved by the task force.

This statement may take some of my colleagues by surprise. They may be thinking that this is just a harmless bill which simply requires an employer to give advance notice before closing a plant and then sit down and hear what the unions have to say. If anyone thinks that that is all that this bill does, I suggest they sit down with the bill and the committee report and take a long hard look at it before casting their vote.

In the first place, the bill goes well beyond establishing protections for plant closings. While the record to support the bill has consistently referred to actual plant closings, the provisions of the bill are triggered by any employment loss of 50 or more within 30 days, regardless of whether the employment at the facility is 50, 500, or 5,000. Moreover, it would apply even if the employment loss involved was a mere reduction in hours.

Consequently, the bill's provisions would apply to a number of business decisions involving something considerably less than a closing, such as relocating or subcontracting a portion of the work, consolidation of operations, discontinuation of a product line or a replacement of machinery. While the amount of time between such decisions and their implementation varies considerably, the bill imposes an automatic 3-month delay with its notice and consultation requirements, except under ill-defined unavoidable business circumstances.

I ask the Members: Are these really the kinds of decisions by management that you want to regulate?

Well, you may say that that depends upon how we regulate them. Therefore, let's take a look at what happens when the bill's provisions are triggered.

First of all, the employer has to give at least three-month notice except where there are unavoidable business circumstances, which, according to the committee report, means they are: First, beyond the employer's control; second, could not be foreseen; and third, require swift implementation. Even if swift action is in the best economic interests of the employer, it must meet all three of these components.

What is unavoidable? Is a cancellation of a major contract by one of the business' larger customers unavoidable? What if that contract was canceled because the business would not agree to certain demands for changes in the product by the customer? That clearly would not be beyond the employer's control so, under the bill, he would have to give 3 months' notice and consult with the union first.

Once notice is provided, the employer is then required to consult in good faith with a union, if there is one, "for the purpose of agreeing to a mutually satisfactory alternative * * * or modification."

The situation that immediately comes to mind here is an employer who is burdened by excessively high labor costs which, because of the marketplace, have hurt his ability to remain competitive. He then wishes to do something about this by either moving the work to another location or subcontracting a portion of the work.

Most of us would say that he should have to consult with the union before doing this. Guess what? He already does. Under the National Labor Relations Act, if labor costs are the reason, the employer is required to bargain with the union before moving the work elsewhere. It is in those situations where bargaining with the union is most likely to be productive.

This bill extends this requirement to decisions which are unrelated to labor costs and which, in the words of the Supreme Court, are at the "core of entrepreneurial control." The Court in the First National Maintenance case made a crucial distinction between these decisions when it started:

> If labor costs are an important factor in the decision to close, management will have an incentive to confer voluntarily with the union to seek concessions that they make continuing the business profitable. * * * At other times, management may have great need for speed, flexibility and secrecy in meeting business opportunities and exigencies.

By not requiring bargaining with the unions in such situations, the law has assumed that the primary interest and expertise of the union lay in protecting the workers they represent. With this bill we are now assuming that they are also more knowledgeable than the employer himself about what is in the best interests of the business as well.

Don't misunderstand, I believe that unions should be a vital partner in guiding the course of a business. In recent years, we have seen some outstanding examples of corporate success resulting from the active involvement of the unions and the workers in the decisionmaking process.

However in this bill the effect would be one where the employer has already checked out all of his options and, decided on the basis of his best-informed business judgment that a change resulting in layoffs is his best alternative.

That may be true, but that isn't what this bill requires. Let me read from the committee report:

> Most of all, the employer must approach the consultative process with a good-faith willingness to explore alternatives . . . An employer does not discharge its obligations under this bill by going through the motions of consulting if the employer harbors an intransigent and unyielding attitude that makes consultation a meaningless exercise.

The report goes on to say that compliance with this requirement "presupposes a desire to reach ultimate agreement."

So now we have the employer in the ultimate catch-22. He has already decided that the union can't really contribute anything to influence his discision because he's just given notice to his employees that they are going to be laid off. We now ask him to go into a "Consultation" process where he has to be genuinely enthusiastic about what the union has to say.

At that point, before the employer makes any changes, the union can go to the Department of Labor and try to convince them that he has not consulted in good faith. If they make a convincing case, the Department can then seek an injunction extending the consultation period, which, in effect, delays the change which the employer had proposed.

There are no time limits here. So, until the employer either gives in to the union or improves his abilities as a thespian, the change of operations he wanted could be postponed indefinitely.

But let's get back to good faith consultation for a moment. Let's assume this employer was open-minded and was receptive to any good ideas the union might have. Unfortunately, that still isn't enough to ensure compliance.

The bill provides that good faith consultation includes providing to the union such relevant information as is necessary for the thorough evaluation of the proposal to order the plant closing or mass layoff for the thorough evaluation of any alternatives or modifications suggested to such proposal.

What does relevancy mean here? Surely, my colleagues recognize the inherent vagueness of this term. Moreover, the committee report states that it shall be given a liberal interpretation.

As is noted in the committee report, there are similar requirements to provide relevant information under the National Labor Relations Act in a variety of situations. What is not mentioned, however, is that there are reams of NLRB and court decisions regarding what is relevant. Ultimately, it is totally dependent upon the unique facts of the situation, which means that an employer confronted with this requirement will have no guidance whatsoever about what he has to provide, at the risk of an injunction against an action which he believes to be economically necessary. I would just add that this is totally different from the situation which arises under the National Labor Relations Act be-

cause, at least under the NLRA, the information being sought pertains to the employer-employee relationship. In this bill, there is no such limitation.

In addition, the bill clearly contemplates that relevant information would include trade secrets and other competitive information because it specifically provides for protective orders to be issued by the Secretary of Labor in such instances. Can the employer really be expected to have faith in such an order in the kinds of volatile situations governed by this bill?

In conclusion, I just ask my colleagues to do one thing: know what you are voting for in this bill. This is not just a simple notice requirement. It provides a union or an employee with the ability to delay a necessary plant modernization or employment change indefinitely and provide every incentive to use that ability. Nor is it a requirement that an employer merely listen to a union.

The bill constructs a series of vague requirements which an employer would have to tiptoe through to avoid costly litigation and delays in implementing necessary business actions. Meanwhile the lawyers would have a field day.

This legislation clearly takes the wrong approach. It will not provide effective protection for workers. It will not create the new jobs we need to stimulate the economy. On the contrary, this measure could be the kiss of death for that small business that finds itself teetering on the brink of bankruptcy. It could also be harmful to that large business attempting to modify its operation in the face of changing market pressures.

This legislation is clearly premature. I remind my colleagues that next year, Secretary Brock's task force will be returning with its comprehensive report on both the effects and the causes of plant closings. The blue ribbon commission will also study the experience of the foreign governments that have legislated in this area. And, finally, the task force will attempt to reach a consensus regarding the appropriate Federal role.

Again, no one will dispute the very real economic and social dislocations associated with plant closings. However, a similar consensus on the economic effects of this legislation, or even its need, does not exist.

Let us avoid legislating in an information vacuum. Let us wait for task force recommendations. I urge defeat of the bill.

The letter from Secretary Brock follows:

U.S. DEPARTMENT OF LABOR,
SECRETARY OF LABOR,
Washington, DC, November 8, 1985.

Hon. MARGE ROUKEMA,
House of Representatives
Washington, DC.

DEAR MARGE: The House will soon consider H.R. 1616, the "Labor-Management Notification and Consultation Act of 1985," which would impose restrictions upon employers prior to plant closings or other changes of operations resulting in layoffs. I am writing to inform you of the Administration's strong opposition to this bill or any substitute and to urge you to vote against this legislation.

The Administration is seriously concerned with plant closings and with their effects on employees and communities. H.R. 1616, however, would only delay and increase these problems, not solve them.

I believe H.R. 1616 or similar legislation would restrict the ability of employers to adapt to changing market conditions by imposing rigid procedures prior to plant closings. Such impediments could cause even large scale business failures and unemployment or jeopardize the capital mobility necessary to maintain a healthy business. Furthermore, the bill injects the Federal government into an area which should be dealt with, and indeed, has been dealt with through the collective bargaining process.

The Department of Labor has programs and resources available to help communities and families affected by plant closings. The Employment and Training Administration administers several programs which assist dislocated workers. These include the Unemployment Insurance program, the employment service, and the dislocated worker program authorized under Title III of the Job Training Partnership Act (JTPA). The Bureau of Labor-Management Relations and Cooperative Programs has extensive experience as a result of nationwide workshops it has sponsored at the State and local levels to assist companies, workers, and communities to adjust to economic changes. The Bureau of Labor Statistics has begun an information survey on plant closings. Further, many States have various mechanisms to deal with this issue, by policy, statute or incentives.

Clearly, the plant closing problem is complex and deserves careful attention and a thorough examination. To ensure such consideration, I am establishing a special 21-member task force. This Task Force on Economic Adjustment and Worker Dislocation will be composed of a diverse and highly qualified group of people representing business, labor, and the academic community, who will evaluate current programs at the local, State and Federal level, as well as the experience of the foreign nations. I anticipate that the Task Force's report will provide us with valuable assessments and recommendations relevant to the needs of dislocated workers. I have instructed the Task Force Chair to meet regularly with the appropriate members of Congress to receive their input and to brief them on the work of the Task Force.

Before we consider a legislative approach, we should look at what the appropriate Federal role should be in the context of our existing efforts and experience. I am confident the Task Force can provide us with that insight, and so I believe the enactment of any legislation in this area prior to the completion of their activities would be inadvisable.

H.R. 1616 is not a bill that preserves or increases jobs. Because of its adverse effect on employers and employees, the Administration strongly opposes it or any substitute.

The Office of Management and Budget has advised that enactment of H.R. 1616 would not be consistent with the Administration's objectives.

Very truly yours,

WILLIAM E. BROCK.

Mr. CLAY. Mr. Chairman, I yield the balance of my time to the gentleman from Illinois [Mr. HAYES].

The CHAIRMAN. The gentleman from Illinois [Mr. HAYES] is recognized for 2 minutes.

(Mr. HAYES asked and was given permission to revise and extend his remarks.)

Mr. HAYES. Mr. Chairman, I rise obviously in support of H.R. 1616, which in my assessment is a narrowly focused bill. It does not attempt to solve all of the problems caused by plant closings or mass layoffs, and it does not prohibit plant closings or mass layoffs. This bill seeks to accomplish two main objectives.

First, to prevent unnecessarily sudden closings and cutbacks which take employees and their communities by surprise.

Second, to ensure that employees have an opportunity to present alternatives to their employer and to have them considered in good faith.

Being one who has a number of years of experience, certainly I think this is a modest approach to what is a problem of rising magnitude. I came from the meatpackers union, and through collective bargaining, we have negotiated contracts which provided for 6 months' notice on plant closings. This at least provided some protection for families who were uprooted as a result of plant closings, and at the same time gave an opportunity to some to work out alternatives, if possible, before the plant actually closed down.

H.R. 1616 provides for the development of a comprehensive, long-term policy on plant closings and worker dislocation to be determined by a bipartisan, blue ribbon panel of business and labor leaders, Government officials and academic experts.

This protection is not just to blue-collar workers, as some people might think, but white-collar workers as well, many of whom have been uprooted, and are the people who work in front offices of these companies. The 174 cosponsors of this measure represent a broad, bipartisan support for the idea of advance notice. I think it is worthwhile our giving some real consideration.

Where a plant closing cannot be prevented, responsible corporate action can blunt some of the impact on employees. Some corporations have made an awful lot of money out of plant closings and out of mergers, and I think the workers and their families are entitled at least to this break.

Mr. SHUMAY. Mr. Chairman, I am sympathetic to the problems of plant closings; however, the legislation before us today, H.R. 1616, is potentially harmful, and will only address the symptoms of plant closings, not the causes. If enacted, this bill, the Labor-Management Notifications and

Consultation Act of 1985, would hamper the free market system by restricting employers' ability to make vital business decisions.

The impact of plant closings and worker dislocations has been of particular concern to Congress over the last two decades. As economic circumstances we have worsened, so have the serious problems associated with plant closings. Congress has sought for remedies to ease the impact on workers who lose their jobs and benefits, sometimes with little notification, due to such closings.

One proposed solution is H.R. 1616. It is described as a simple "notice" bill—a compromise of Federal plant closing bills introduced during past Congresses. However, H.R. 1616 would in actuality subject an employer who plans to lay off or reduce by 50 percent the hours of 50 or more employees within 30 days to new Federal requirements. These far-reaching requirements include 90-day prenotification, consultation with union representatives regarding alternatives to closures, and disclosure of sensitive financial and business information relevant to the development of such alternatives.

H.R. 1616 would require employers to sacrifice the long-term economic vailability of plants for the short-term job security of their employees. Its effect would be detrimental to many businesses and industries, including those within my home State of California. Its enactment would be ill-advised, particularly before Congress evaluates the findings of Secretary Brock's Task Force on Economic Adjustment and Worker Dislocation, the purpose of which is to study the issue of plant closings. Thus, I urge Members of the House to oppose H.R. 1616.

Mr. FRENZEL. Mr. Chairman, H.R. 1616, the "Labor-Management Notification and Consultation Act of 1985" masquerades as a proworker jobs bill, intending to provide 90 days notice of impending plant closings. In fact, this bill is antiworker, antijobs, and has the intent of blocking plant closings altogether.

The provisions of H.R. 1616 would lock businesses into inefficient operations by restricting the employers' ability to adapt to changing demands of the marketplace. This would lead to the inability to compete effectively with other more efficient companies in the United States and abroad. As a result, the bill will not be preserving American jobs, but may encourage businesses to build more plants abroad than in the United States.

It is the responsibility of management, not the Government, and not the unions, to decide what measures to take in order to secure the economic stability of the company. This legislation totally revokes that responsibility and may lead to the loss of entire companies instead of inefficient plants. In effect, more workers and jobs will be endangered by this bill than are directly affected.

No only is H.R. 1616 counterproductive, it is also premature. Secretary of Labor Brock has created a task force on economic adjustment and worker dislocation to study the causes and effects of plant closings. Although I believe that the legislation before us is well-intentioned, it seems to me that the logical order of procedure is to examine the problem before implementing a make-shift solution that does more harm than good.

H.R. 1616 should be defeated and sent back to the drawing board. The problems of worker dislocation and job loss deserve more than short-term solutions which create long-term hardships. I urge my colleagues to join me in opposition to H.R. 1616.

Mr. TRAFICANT. Mr. Chairman, I want to express today my support of H.R. 1616, the Labor-Management Notification and Consultation Act.

For you to understand the stake I have in the problem of plant closings all you have to do is read one excerpt from the committee report:

Some communities never recover from major plant closings. Youngstown, Ohio and its surrounding communities, despite an exodus of their young people and the withdrawal from the work force of many of the older workers who lost their jobs when United States Steel and LTV shut down, still suffer from double digit unemployment.

It almost seems that plant closings are becoming a way of life in this country. We talk about the abstract economic theory of trade deficits and trade imbalances, but what it all comes down to, in practical human terms, is more than just a theoretical shift in the macroeconomic factors of production. There are real human beings whose lives are being destroyed by these decisions. Lives ruined, homes lost, families torn apart; all this tragedy is occurring because of the economic decisions made in the boardrooms of American businesses.

Against this, I am hearing from businesses which claim that if H.R. 1616 becomes law it will mean the end of the free enterprise system as we know it. But what is the economic usefulness of arbitrary and sudden plant closings? Why is this the kind of activity that the Congress should protect—especially when weighed against the costs, both in terms of human suffering and welfare costs to the Government, which it imposes on society? Why should we protect any employer who would throw out onto the streets workers with many years of seniority, representing a lifetime of loyal service, without the decency of giving any warning?

These free enterprise arguments disturb me greatly because I do not consider myself an enemy of the American businessperson. Coming from the area of the country that I do, I cannot afford to be an enemy of business. My district is economically devastated. We need all the business we can get, and further, need to retain those businesses we now have. This is why I am so surprised that my support of H.R. 1616 has aroused such a reaction.

I consider my support of H.R. 1616 not a vote against free enterprise or the right of American businesspersons to run their business as they see fit. Rather, I support H.R. 1616 as a measure which would only attack those unscrupulous businesspersons who disregard the welfare of their employees or who wish to use the plant closings as a weapon against their employees.

There are several factors that I believe point out the reasonableness of this bill. First, it only applies to permanent layoffs of 50 or more. Plant closings for small employers, who may not be well equipped to give much advanced notice and whose businesses will typically be more sensitive to economic shifts, will not be subject to the notice provision.

Second, layoffs or plant closings can occur despite the fact that no notice is given if unavoidable business circumstances prevent compliance with the notification requirement.

Third, the employer can prevent the disclosure of potentially damaging private information in the notification process by requesting that the Department of Labor prohibit employee representatives from revealing this information. The employee representatives would be liable for damages if they disregard such an order.

However, beyond these points, I believe that the strongest case for H.R. 1616 is that it will encourage and require consultation between management and labor representatives prior to the plant closing. Such consultation raises the possibility that negotiations could result in measures being taken to save the plant and avert layoffs.

The notion that a plant can be saved is not a false hope. In its report on H.R. 1616, the Education and Labor Committee has documented several instances where prior consultation has resulted in necessary cost cuts and improved efficiencies which averted plant shutdowns. While 90 days is not much time to build a case to convince an employer that a plant can be saved, the fact that notice is given may be necessary impetus to stimulate changes. When combined with the disclosure and consultation requirements in the bill, I truly believe that many unnecessary and damaging plant closings can be avoided.

Further, there is persuasive evidence that providing 90 days notice will lessen the societal cost of the sudden displacement of a large number of workers. Workers can order their financial affairs, by conserving their funds and deferring any large purchases, to lessen the impact of a potential period of unemployment. The 90-day period will give workers additional time to search for another job, generally lessening the period that they must depend on unemployment and other welfare programs.

H.R. 1616 is a bill which will inject a measure of fairness into the plant closing process. I do not believe that it goes far enough in terms of protecting employees, but it is an important start which I support. Whenever we legislate it is difficult to predict the effect of the laws we enact. I hope my colleagues will agree with me and see the wisdom of taking this first step.

I have included, to be printed in the RECORD below my statement, a copy of an article written by UAW President Owen

Bieber which appeared in the New Times this Sunday. I believe he has eloquently stated the case for H.R. 1616. I hope my colleagues will read this article before voting.

WORKERS DESERVE AN EARLY WARNING
(By Owen Bieber)

All across our nation in the last several years, workers and their communities have been buffeted by recession, increasing numbers of imports, and technological and structural economic change. The pain may be most evident in industries such as autos, steel, shoes and textiles; but it has even hit Silicon Valley as computer chip makers close operations and head for low-wage nations abroad.

The number of workers who have been victims of plant closings and permanent layoffs is enormous—more than five million in the last five years, according to a government study.

People should be protected against the devastating consequences of corporate decisions. Many problems of economic dislocation can be alleviated by a coherent industrial policy that seeks a diversified, balanced, fully employed economy. One component of that industrial policy should be a requirement for advance notice of plant closings and economic dislocations.

We are the only advanced industrialized country in the world without such a requirement; it's about time we had one. A modest step in that direction is H.R. 1616: The Labor-Management Notification and Consultation Act.

Under H.R. 1616, the emotional impact of sudden plant closings and permanent layoffs would be lessened by a 90-day notice requirement. Workers then would have an opportunity for input into the decision since employers would be required to consult with the union or, in the absence of a union, with employees about alternatives to a closure or layoff. Where alternatives cannot be found, there would at least be some time in which workers and communities can adjust to the permanent job loss.

Industrial change is, of course, familiar. Just as our labor force shifted from agriculture to manufacturing in the first half of the century, it is now shifting from manufacturing to services. Since a rising standard of living accompanied the first shift, it is often assumed that it will also accompany the latest change. However, there is mounting evidence that the shifts now under way are not improving the lot of our citizens.

A recent study by a team at Boston College found that more than 112,000 Michigan auto workers experienced extended layoffs between 1979 and 1982. Of those recalled, the average length of layoff was 66 weeks. By the last month of layoff, the average weekly income had fallen 61 percent. Fifty-eight percent of those surveyed were without employer-paid medical coverage during layoff. Among those workers who had savings, 43 percent used up all of their savings.

Since 1979, according to the Government study, the burden of industrial change has fallen disproportionately on blue-collar workers. More than 55 percent of the five million displaced workers had been in blue-collar occupations, a proportion far larger than the 29 percent share these occupations represent among the employed. Almost half had worked in manufacturing, yet manufacturing accounts for only 20 percent of total employment.

As for H.R. 1616, we would prefer that the period of notice and required consultation be increased beyond three months. We know that most companies make their decisions to close a plant or eliminate jobs months or often years in advance. Alternatives to such decisions made so long in advance often cannot be developed within three months. Even if alternatives cannot be found, a longer period of notification would increase the chances that workers will be able to make a less painful adjustment.

The bill would also establish a 15-member commission to make recommendations on a plant-closings policy to the President and to Congress. If the commission does its job, the only credible outcome is a strong endorsement of comprehensive plant-closing legislation.

To fail to take the modest steps proposed by H.R. 1616 is inhumane and economically inefficient. In the recent draft pastoral letter issued by the U.S. Conference of Catholic Bishops, the bishops stressed giving all elements of society a meaningful voice in economic decisions:

"The capital at the disposal of management represents to a significant degree the investment of the labor of those who have toiled in the company over the years," the bishops wrote, adding, ". . . it is patently unjust to deny these workers any role in shaping the outcome of such difficult choices (as decisions to close or move a plant).

"At a minimum," the bishops continued, "workers have a right to be informed in advance when such decisions are under consideration, a right to negotiate with management about possible alternatives and a right to fair compensation and assistance with retraining and relocation expenses . . . Also, the local communities in which these companies are located have often invested heavily in them through public services, tax benefits, public education and a host of other community resources. They too have a right to expect management to respect their investment."

We in the union movement recognize that economic change is inevitable in a dynamic economy. But an evolving economy is not a goal in and of itself. Change should produce positive results for America and her people. The House bill is a step toward insuring that.

Mr. BONKER. Mr. Chairman, my district in southwest Washington, like many others around the country, has been hard hit by economic difficulty in recent years. Many longtime businesses, particularly in the wood products industry, have been forced to close their doors because of economic circumstances they were unable to predict or prevent. Unemployment has soared.

It is because of my concern for those unfortunate workers who suddenly found themselves without jobs, that I joined with 173 of my colleagues in cosponsoring Representative FORD'S bill, H.R. 1616. While many businesses already take far more extensive steps to cushion the blow of a plant closure, this legislation is designed to address those situations in which employers announce mass layoffs or shutdowns with minimum warning to those most affected—the workers and the communities. All too often, these people and localities suffer stresses and hardships that advance notice could prevent.

The legislation would require businesses that are in distress to provide notice to their employees, to the union, if one exists, and the Federal Mediation Council Service, 90 days in advance of a possible plant closure or long-term indefinite layoff. Failure to do so would entitle workers to back pay and benefits for each day under the 90-day notice period.

Over 10 years in the making, H.R. 1616 is based on evidence and recommendations from many sources including the President's Commission on Industrial Competitiveness. This evidence indicates that early notification shortens the length of time workers spend unemployed and allows other local businesses the opportunity to prepare for the economic slowdown which often accompanies widescale community unemployment.

Obviously, a plant does not have to close as a result of filing the notification and in fact, the intent of the 90-day warning period is to provide workers and management the opportunity to work together to prevent such a drastic step. While there are going to be cases when economic realities make rescue of the business unrealistic, it has been shown in many cases that management and labor have been able to take steps that enabled plants to return to profitable operation.

Mr. Chairman, I must point out that my support for this bill is not without some reservation. I believe that in our commitment to soften the blow to workers and communities of sudden unemployment, we also must guard against legislating protections that handcuff businesses and exacerbate the economic problems they face.

I am particularly concerned that businesses, including the commodity based businesses in my district, maintain the flexibility they need to adjust to rapidly changing market conditions. Industries like aluminum and wood products now compete in a fully international system. Abrupt shifts in the world market price of these commodities, or foreign government policies affecting their competitors, often spell the difference between shut-down or start-up for major plants in my district. One of the key provisions of this bill addresses exactly this concern by allowing the notice period to be reduced if the business demonstrates that "unavoidable business circumstances prevent the employer from withholding the closing or layoff." This provision is intended to protect businesses who in good faith must take drastic steps in response to unpredictable financial or market circumstances.

I also have noted the concern expressed by many in business, that the negotiating requirements during the 90-day notice period have the potential for being abused through the courts to delay management from making urgent, economically necessary changes in their workforce past the 90-day notice period. It is my understanding, however, that the requirements on businesses are merely that they show good faith in providing relevant information regarding the reasons for management's decision and in discussing employee proposals. If these proposals are good and would help

the business, it is difficult to foresee why management would be unwilling to implement them, but they are not bound in any way to do so. Businesses are bound only to show good faith in working with the employees and are free to go ahead with their original proposal at the end of the 90-day notice period.

Many businesses have also expressed apprehension about the definition of relevant information as it applies to the documentation they must provide to employees after 90 days notice is given. I recognize that there is some concern about confidentiality violations. Protections, however, do exist in the bill, similar to those which exist in the bankruptcy amendments of 1984 which authorize the Secretary of Labor to issue protective orders to prevent public disclosure of certain information. Furthermore, the standards governing what information is to be disclosed is comparable to the requirements that already exist under the Fair Labor Standards Act.

Again, Mr. Chairman, many businesses already have excellent notification policies and worker dislocation programs. If only their practices were more the norm and incidents of Friday afternoon layoffs fewer, we would have no need for legislation today. Unfortunately, H.R. 1616 is necessary to protect workers who might otherwise be victimized by capricious management decisions in less scrupulous firms that overlook human and community considerations in their management policies.

In closing, I would like to commend Secretary of Labor Bill Brock for acknowledging the seriousness of this problem and appointing a commission to study the problem. Unfortunately, I feel this step is long past due. Congress has been studying this problem for over 10 years and I am unconvinced that further delay is an appropriate response. I believe that H.R. 1616 responds to worker needs while preserving the flexibility essential to management. By addressing those needs and promoting labor-management cooperation, this legislation can help American industry make the changes necessary to stay competitive in the world's marketplace.

I urge my colleagues to support this balanced, much needed legislative solution to a serious problem in the American workplace.

Mr. HAWKINS. Mr. Chairman, I rise in very strong support of H.R. 1616, the Labor-Management Notification and Consultation Act of 1985. Enactment of "plant closing" legislation is long overdue and I commend my committee colleagues, Mr. CLAY, and Mr. MARTINEZ, for their fine efforts in reporting this legislation. I also want to thank Mr. CONTE for bringing a bipartisan perspective to this legislative effort, and in particular, I want to take note of the incredible effort of my colleague, Mr. FORD, for his diligence and patience in pursuing this effort for well over a decade. It is to their immense credit that we are here today having, at last, recognized that the human devastation and societal costs resulting from plant closings and layoffs deserve our immediate attention.

Mr. Chairman, in this short time I wish to make three rather simple points; first, that the problems associated with plant closings are not regional but, in fact, affect every region and area of this country; second, that there are severe public consequences to private sector disinvestment decisions, and third, that an orderly and fair process of adjustment to plant closings is needed.

There is little doubt that the twin problems of plant closings and the resulting unemployment have been with us in varying degrees throughout our industrial history. However, there is sufficient evidence that the contemporary process of industrial change and restructuring is unique, both as to its nature and as to its sheer pace and velocity. The market forces which traditionally have influenced employment and industrial location patterns are being intensified by the pressures of international competition. A study of my home State of California, by Philip Shapira, of the Institute of Urban and Regional Development, University of California, Berkeley, illustrates these significant differences. His findings show that:

* * * the growth and concentration of transnational corporations and the ability of these firms to shift capital have added a new global dimension to industrial change. Large firms now have an unprecedented capacity to coordinate and reorganize their production and investments not just across regions, but across national boundaries. Second, the introduction of new technologies in production, transportation, and communications allows new ways to organizing work, as well as increased levels of productivity, that were not possible in earlier periods.

The result of such a rapidly changing economic environment is a churning of employment that throws millions of Americans out of work each year.

These disruptions and dislocations are too often only seen as problems of the Northeast or Midwest smokestack industrial regions of this country. While it is clear that plant closures and job losses have most heavily affected workers in such basic industries as automobiles, steel, and rubber, the problem is not limited to any particular region of this country. Let me again refer to the study I quoted before and use my home State of California as an example. Mr. Shapira, found:

[I]n California, large-scale basic steel production was established during the Second World War, and had just about left by the 1980's * * * Similarly, in the automobile industry, the period of most rapid growth in California was during the 1950's and 1960's, when General Motors and Ford built major new assembly plants in the state and California rose to third place among the States in automobile output * * * Now, by the 1980's, California vehicle production (together with the associated production of glass, rubber, and other parts) has been drastically reduced * * * In short, California exemplifies the juxtaposition of production growth, change and decline.

California also illustrates that as this restructuring and realignment occurs, and no matter how strong its economy is generally, no region is spared the devastating after effects accompanying plant closures or major layoffs. One need only review the 1984 BLS Report on the number of displaced workers located in the three Far West States to measure the dimension of the problem we are discussing here today.

Mr. Chairman, private sector disinvestment decisions do have severe public consequences which are not limited to the Northeast and Midwest regions of this country but which, in fact, affect every part of this Nation, and every industry from smokestack to high technology, causing havoc not only to the worker and his or her family but to the community at large. Our committee has heard frightening testimony of the human despair suffered not only by the worker but by his or her family not only in terms of loss of financial security but of tension, anxiety, and depression, resulting in spouse and child abuse, desertion, and divorce as well as a very high suicide rate. If ever there was an issue of "family" this is it.

The surrounding community is also devastated when a plant closes or a large portion of the area's work force is layed off. It will lose its tax base at a time when its citizens are most in need of basic services. The societal costs are immense and readily apparent in increased health care costs, costs associated with the greater use of unemployment compensation, food stamps, and other social support programs. It is time not only to recognize the magnitude of these economic changes but to deal with the human repercussions. Sufficient evidence has been presented to show that with appropriate notice to the employee and to the community such devastating effects of a job loss can be minimized.

It is the intent of H.R. 1616, not to impede, halt or alter the economic development that has made this country great nor to infringe on a business decision of disinvestment, but rather to take cognizance of the very human and very public and very pervasive effects that unfortunately seem to go hand in hand with this new economic expansion and development, and to provide an orderly and fair process by which to lessen the burden of these consequences. H.R. 1616, is, in my view, only a start in the right direction. But it is a first step that we can no longer delay if we care at all about the people who provide the human capital for such economic development.

I am inserting at this point in the RECORD a letter from my friend and colleague JOHN DINGELL, chairman of the Committee on Energy and Commerce. That committee might, had it chosen to do so, have demanded sequential referral of H.R. 1616, but for the reasons indicated in his letter, has chosen not to do so. I concur fully with Mr. DINGELL's letter and I agree that his action in this matter does not constitute a waiver of jurisdiction and will not be a precedent for the future.

U.S. HOUSE OF REPRESENTATIVES,
COMMITTEE ON ENERGY AND COMMERCE,
Washington, DC, November 8, 1985.

Hon. AUGUSTUS F. HAWKINS,
Chairman, Committee on Education and Labor, Washington, DC.

DEAR MR. CHAIRMAN: On October 25, 1985, the Committee on Education and Labor reported to the House H.R. 1616, the "Labor-Management Notification and Consultation Act of 1985." As reported, the bill establishes new notification and consultation requirements in the event of a plant closing or permanent layoff of employees. The bill applies to any business employing 50 or more employees, and, therefore, affects the nation's railroads and their employees. In addition, the bill establishes a specific notice requirement to an employee "representative" as determined under the Railway Labor Act (45 U.S.C. 151 et seq.).

Under the Rules of the House, matters related to railroads, including railroad labor, are within the jurisdiction of the Committee on Energy and Commerce. Over the years, the Committee has considered and passed a number of statutes to protect railway labor in instances of plant closings and permanent layoffs. My review of these statutes suggests that generally they would afford railroad labor with equal, if not greater, protection, as compared to H.R. 1616, should one of the nation's railroads be in the situation of a plant closing or permanent layoff. My review also suggests, however, that the protections established for employees under H.R. 1616 would not operate in a manner inconsistent with the procedures and protections established specifically for railroad labor. Accordingly, the Committee on Energy and Commerce did not request referral of the legislation, with the understanding that a waiver of jurisdiction over this will not be a precedent in the future.

I appreciate the opportunity to work cooperatively with you on this matter, and commend you and Chairman Ford for moving forward this important legislation.

Sincerely,

JOHN D. DINGELL,
Chairman.

Mr. HAMMERSCHMIDT. Mr. Chairman, I rise in strong opposition to H.R. 1616, the Labor-Management Notification and Consultation Act, because I believe this legislation would seriously restrict the ability of employers to make business decisions necessary to adapt to changing market conditions.

Although I am deeply concerned with the number of plant closings that are occurring not only in my home state of Arkansas, but across the Nation, and the effect of these closings on employees and communities, I do not believe that government involvement in these business decisions is the best remedy. H.R. 1616 would interfere with the ability of the employer to make the decisions necessary to keep the enterprise competitive, and could eventually lead to more unemployment and greater economic instability.

The proponents of this measure have called it a "simple notice" bill, designed to give employees adequate notice that they are to be laid off. However, the bill would require that during the 90-day notice of a plant closing, the employer must consult in good faith with the union to try to reach a mutually satisfactory alternative, and must give the union all relevant business information. Such restrictions could significantly delay a closure or other change in operation, and in business, the timing of such moves can sometimes be crucial.

The shortsighted provisions in this measure value temporary job security over long-term economic viability, and could ultimately damage economic stability and job security for workers. In addition, H.R. 1616 places government in an area which should be dealt with through the collective bargaining process.

In opposing this legislation, I am not dismissing the problem of plant closings as minor. To the contrary, the problem is extremely serious, and deserves a thorough examination. For that reason, the Department of Labor has recently established a 21-member Task Force on Economic Adjustment and Worker Dislocation, which will evaluate current programs at the local, State, and Federal level, and provide recommendations on what needs to be done, and whether legislation is the answer.

In closing, I believe the approach taken by H.R. 1616 is counterproductive to the free market system, and represents government encroachment in labor-management relations. The answer must be not to prevent economically distressed companies from closing or relocating, but rather to make economic conditions attractive for businesses to locate and remain in the community.

Mrs. BURTON of California. Mr. Chairman, I rise today in support of H.R. 1616, a modest measure, which provides equity in the workplace by providing a 90-day notice on a plant closing to those employees affected so that they can prepare for the economic dislocations that will occur.

This bill provides, in the best sense, a form of social insurance against the cruel realities of economic fate. It simply allows workers to have an opportunity to seek retraining or a new job when a business is forced to shut down or a layoff occurs. This is accomplished by a notification process, equitable in its length and designed to accomplish the purpose of providing advance notice to workers who are about to lose their jobs.

A notice provision will also mitigate the social costs connected with unemployment. Workers put on a 90-day notice may find alternative means of employment thus cutting the costs represented by food stamps, welfare, and unemployment compensation.

Of great importance is that this bill makes a symbolic as well as a substantive contribution to the climate of labor-management cooperation.

By requiring and encouraging employers to consult with their employees an opportunity to mutually explore alternatives to plant closings will be developed and nurtured.

The benefits of this bill are apparent. The impositions imposed are small.

Accordingly, I urge my colleagues to support H.R. 1616.

The CHAIRMAN. All time has expired.

Mr. CLAY. Mr. Chairman, I move that the Committee do now rise.

The motion was agreed to.

Accordingly the Committee rose; and the Speaker pro tempore [Mr. MCCLOSKEY] having assumed the chair, Mr. OBERSTAR, Chairman of the Committee of the Whole House on the State of the Union, reported that that Committee, having had under consideration the bill (H.R. 1616) to require employers to notify and consult with employees before ordering a plant closing or permanent layoff, had come to no resolution thereof.

GENERAL LEAVE

Mr. CLAY. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days in which to revise and extend their remarks on the bill, H.R. 1616.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Missouri?

There was no objection.

REPORT ON RESOLUTION PROVIDING FOR CONSIDERATION OF H.R. 3722, EXTENSION OF APPLICATION OF CERTAIN EXCISE TAXES AND PROVISIONS RELATING TO TRADE ADJUSTMENT ASSISTANCE, MEDICARE REIMBURSEMENT, AND RAILROAD UNEMPLOYMENT BORROWING AUTHORITY

Mr. MOAKLEY, from the Committee on Rules, submitted a privileged report (Rept. No. 99-368) on the resolution (H. Res. 317) providing for the consideration of the bill (H.R. 3722) to extend until December 14, 1985, the application of certain tobacco excise taxes, trade adjustment assistance, certain medicare reimbursement provisions, and borrowing authority under the railroad unemployment insurance program, which was referred to the House Calendar and ordered to be printed.

REPORT ON RESOLUTION PROVIDING FOR CONSIDERATION OF H.R. 3721, TEMPORARY PUBLIC DEBT LIMIT INCREASE AND RESTORATION OF INVESTMENTS OF CERTAIN TRUST FUNDS

Mr. MOAKLEY, from the Committee on Rules, submitted a privileged report (Rept. No. 99-369) on the resolution (H. Res. 318) providing for the consideration of the bill (H.R. 3721) to temporarily increase the limit on the public debt and to restore the investments of the Social Security trust funds and other trust funds, which was referred to the House Calendar and ordered to be printed.

GENERAL LEAVE

Mr. DYMALLY. Mr. Speaker, I ask unanimous consent that all Members be permited 5 legislative days in which to extend their remarks, and to include therein extraneous material, on the bill, H.R. 2409, which was repassed by the House today.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from California?

There was no objection.

GRAMM-RUDMAN: FACT AND FANTASY

(Mr. McHUGH asked and was given permission to address the House for 1 minute and to revise and extend his remarks and include extraneous matter.)

Mr. McHUGH. Mr. Speaker, given the probability of still more votes this week on the Gramm-Rudman amendment, I would like to call the attention of our colleagues to a recent editorial in the New York Times that strongly criticizes both the Senate and House versions of what it rightly calls "this loony budget bill."

While recognizing that the House version is "less bad," the Times points out that both are flawed instruments that deserve to be killed. The Times is absolutely right.

The best thing that can be said for these legislative gimmicks is that they might finally force the President and Congress to act responsibly on the budget. And why might we be forced to do so? Because if any one of these gimmicks goes into effect, irreparable damage will be imposed upon essential defense and domestic programs. To risk such damage is totally irresponsible, particularly since we have the power to act on the budget now.

Mr. Speaker, most of us know what should be done, and we've known it for some time. We should direct the Budget Committee to report an amended budget resolution which restrains spending across the board and calls for some additional revenue to help pay for our national requirements. Because we have a President who refuses to recognize these fiscal facts of life does not relieve us of responsibility, and does not justify either further delay or a resort to legislative gimmickry.

Let's put Gramm-Rudman in all its permutations to rest this week. "Then," in the words of the New York Times, "Congress can get down to the hard work of cutting the deficit, instead of the evasion of inflating appearances."

[From the New York Times, Nov. 8, 1985]

STILL PRETENDING TO BALANCE THE BUDGET

President Reagan, who has said yes, he favors the bizarre balanced-budget legislation making its way through Congress, now says yes, but. If it ends up looking too much like the House version, he may have to veto it. Good.

Though the House's bill is less bad than the Senate's, both embody the faulty concept that deficit reduction can be programmed precisely years in advance. That's a ridiculously rash promise—and bad policy too. A veto is just what it deserves.

Both bills claims to balance the budget, the Senate version by 1991 and the House version by 1990. The Senate would cut the deficit in equal steps each year. The House wants bigger cuts right away and is more sensibly flexible about future cuts, depending on the economy.

If Congress and the President miss a year's target, spending would be cut automatically, with exceptions. The Senate exempts Social Security and most long-term contracts. The House also exempts veterans' pensions and nine poverty programs, and gives the President less room to manipulate cuts.

Warren Rudman of New Hampshire, a Senate sponsor, admits it's "a bad idea whose time has come." Some of the President's most important colleagues have come to agree it's a bad idea. Secretary of State Shultz, Defense Secretary Weinberger and national security adviser McFarlane told their boss last week they didn't like it, and now chief of staff Donald Regan is said to be wavering too. All are concerned, correctly, that national security and foreign-policy objectives not be exposed to arbitrary mandatory cuts. Amen. The same goes for domestic programs.

All this gimmickry is attached to the bill raising the national debt ceiling to $2.1 trillion. But there's no necessary connection. The theoretical deadline for the debt-limit bill is seven days away. Then, the Treasury says, it will have absolutely, positively exhausted all possible tricks to keep the debt under its current $1.8 trillion ceiling. When that happens, the Government may shut down or stop paying its bills—or even go into default, which could damage its credit rating for years.

Whether the threat is as real as the Administration says, this loony budget bill is plenty false. The next step is yet another conference to resolve differences between the Senate and House plans. Ordinarily, reasonable citizens would favor a reasonable compromise. Not this time. The best outcome is either no bill at all or one the President would surely veto. Then Congress can get down to the hard work of cutting the deficit instead of the evasion of inflating appearances.

SALUTE TO GEN. ROBERT C. KINGSTON

(Mr. SKELTON asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. SKELTON. Mr. Speaker, Gen. Robert C. Kingston will retire from the U.S. Army on November 27, 1985, after 37 years' service that started when he enlisted as a private in 1948.

Above all, he has been a warrior with a record few could match in the U.S. Military Establishment or abroad for at least the last four decades. He is a paratrooper and Ranger, awarded the Distinguished Service Cross, two Silver Stars, and numerous lesser decorations for valor, both foreign and domestic, after 16 campaigns during more than 5 years of combat—two tours in Korea, three in Vietnam. Purple Hearts are conspicuously absent, because Kingston led a charmed life; a bullet-creased helmet was the closest he came to a wound. Napoleon, who preferred lucky generals to those who were merely competent, would have found him exemplary.

Twelve years of command time included a rifle platoon, three rifle companies, an infantry battalion, two brigades, the 3d Special Forces Group, the JFK Center for Special Warfare and, at the four-star level, U.S. Central Command, which encompasses 19 countries from the Horn of Africa to Pakistan in its area of responsibility. Almost half of his command tenure was in combat.

Vital statistics, however, tell only part of the Kingston story:

Second Lieutenant Kingston steered a tiny task force to the frozen Yalu River on November 28, 1950, when massive Chinese armies already were streaming south from Manchuria. One major, three captains, and several first lieutenants were officially under his command, a nearly unique lashup that reflected the great faith and confidence senior officers already placed in his leadership abilities.

Major Kingston, as the 82d Airborne Division exchange officer with the British 16th Parachute Brigade, commanded a rifle company in the United Kingdom, with extensive excursions to Germany, Libya, Cyprus, Aden, and Malaya. Enduring ties with that formation and the British Special Air Service, an elite force, remain.

Colonel Kingston commanded two brigades during combat in Vietnam, although the competition was so intense that most rivals felt fortunate if they received one such assignment. One of his brigades spearheaded a sweep through Communist sanctuaries in Cambodia during the 1970 U.S. cross-border incursion, an operation that helped buy time for Vietnamization to replace Americanization of that conflict.

Major General Kingston, whose clandestine, covert, and other special operations experience started in Korean combat 33 years ago, was the father of Delta Force, the Pentagon's primary counterterror instrument. The Army Chief of Staff sold his concept to the Joint Chiefs and Secretary of Defense.

Full General Kingston has been America's senior uniformed representative in the Middle East since July 1981, a sensitive assignment that demands statesmanship, as well as military acumen. Plaudits from chiefs of state and armed forces in that area confirm that he was the perfect choice.

One final factor merits special mention. General Kingston refused to compromise high professional standards. Peers—even superiors—who fell short got short shrift. Subordinates unwilling or unable to conform fell by the wayside. Other associates, regardless of rank, would follow him anywhere. Gen. Edward C. "Shy" Meyer, speaking as Army Chief of Staff, paid tribute when he pinned on Bob's third star: "If I ever go to war again," he said, "I want this man on my flank." A former sergeant, who served with Kingston's battalion in Vietnam, described him as the bravest and best. Kingston, he wrote, "cared about the men who were in each of his companies * * *. He was a born leader," who "got us every kind of support we needed. And there is no doubt he saved a lot of our lives * * *."

Congress and the American people should salute Gen. Robert C. Kingston as he leaves active service. He is a patriot, soldier, and selfless public servant who will be missed in many ways.

MEMBERS URGED TO SIGN DISCHARGE PETITION 4 TO BRING UP FIREARMS OWNERS PROTECTION ACT

(Mr. VOLKMER asked and was given permission to address the House for 1 minute and to revise and extend his remarks and include extraneous matter.)

Mr. VOLKMER. Mr. Speaker, for years I have sponsored legislation that would unshackle the law-abiding firearm owners of America. And for years this body, suffering under dictator-style action, has not been allowed to discuss the merits of such legislation.

A number of you are being persuaded by some law enforcement organizations to refrain from signing Discharge Petition No. 4 enabling this legislation to be brought forth for discussion. But let me share with you a letter I have received from one of the most respected law enforcement organizations in this country—the National Association of Chiefs of Police.

The letter, in part, reads: "When we make citizens into criminals by laws that prevent them from owning a firearm for self-defense or sport, we are not serving society."

The letter goes on to say "We would hope that the Firearms Owners Protection Act would be judged on its merit, and the rights guaranteed to all men, by the Constitution of the United States." I am submitting this letter for the RECORD and urge my colleagues to read it, then sign Discharge Petition No. 4.

NATIONAL ASSOCIATION OF CHIEFS OF POLICE,
Washington, DC, November 8, 1985.

Representative HAROLD VOLKMER,
House of Representatives, Congress of the United States, Washington, DC.

DEAR CONGRESSMAN VOLKMER: A few days ago I saw a political cartoon depicting the National Rifle Association "dollars" being traced to the hand of a drug addict and that pistol being used to kill a police officer. It was vicious and typical of how the media distorts the role of the National Rifle Association and the Police when it fits their mood. The NRA is much admired by many police officers who are aware of its true nature.

Our association reaches out to command law enforcement officers on all levels. There are some 21,000 police agencies in the nation and about 500,000 full time police. Those I have talked with, and those we have polled, feel that decent law abiding citizens should have the right to own a firearm. Some for sport, and those who feel the need for self-protection.

The City of Washington, D.C., bans firearms ownership. It has more police officers per thousand population than any city in America, but these laws that ban firearms, dis-arm law abiding persons. They invite criminals to enter this city with immunity. It is a perfect example of a bad law.

Study after study has proven that strict enforcement of present laws, of persons using firearms in a criminal act, is the best way to reduce crime.

When we make citizens into criminals by laws that prevent them from owning a firearm for self-defense or sport, (or both), we are not serving society. Citizens living in fear are forced to disobey laws which make them defenseless.

Back in 1968, a "Gun Control Act" was passed that was an emotional outcry of a period of difficult times. The law appears after all these years of testing, to be ineffective. In fact, there have been documented abuses that draws unwarranted spotlight on police who bear the brunt of bad laws.

While on one can speak for every lawman, I can tell you that we need a more reasonable law that is fair and enforceable.

Last July, the "Firearms Owners Protection Act of 1985" was passed in the Senate by a vote of 79-15. The people spoke out and the Congress acted to right a series of wrongs.

In the face of such a majority vote, we note that Peter Rodino, Chairman of the Judiciary Committee, has decided by his single vote and position, to "kill the bill".

There was a cry for public hearings and only a few weeks ago, October 28th, New York City was selected as a site. Law enforcement officers who might have favored the bill were not invited. Those who did testify were selected, or better described as, "casted" as to what would be heard.

Yes, there are victims of mis-used firearms. There are groups dedicated to ban all firearms. They have a right to be heard. But I can tell you that I spent nine months recovering from being struck by a drunk driver when I was a traffic officer! He was fined $50. I use that as an example to note that I feel groups like "Mothers Against Drunk Drivers" have a valid point. Get the drunk driver off the road!

Not the car.

There are about three officers killed each week. Almost a third are killed in auto related accidents.

We know that criminals fear homes where owners are armed! We feel that our nations national defense and civil defense is stronger because of a history of citizens who are armed and to defend themselves.

We would like this letter read into the records of Congress. We would hope that the "Firearms Owners Protection Act" would be judged on its merit, and the Rights guaranteed to all men, by the Constitution of the United States.

Sincerely,

GERALD S. ARENBERG,
Executive Director.

LACK OF EXPERIENCE PROBLEM WITH THE NATION'S AIR TRAFFIC CONTROLLER FORCE

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from New York [Mr. MOLINARI] is recognized for 5 minutes.

Mr. MOLINARI. Mr. Speaker, I am deeply concerned with the very serious problems that face the flying public that are caused by the lack of experience of a large percentage of our air traffic controller force.

Most of my colleagues are aware that the existing controller staff levels are substantially less than the levels prior to the 1981 controller strike. Few Members, however, may be aware of the extremely large percentage of present-day controllers who are not fully qualified, or if technically qualified fall short of the experience that is needed to efficiently operate the system.

As a result of the strike, 11,700 controllers were lost; 9,200 of them qualified at the full performance level. The system was left with only 4,000 controllers; 3,400 of them at the full performance level.

As serious as these numbers are, the problem will become even more critical as large numbers of existing controllers will shortly reach retirement age. Indications are that the great majority of them will opt to retire, thus depleting experience levels even more.

Few can dispute what a critical factor experience is in the system's ability to handle aviation traffic, particularly in peak periods or during adverse weather conditions. I have analyzed this problem in depth, and I have had conversations with scores of controllers, supervisors and pilots from across the country.

It is clear to me that we must move effectively and expeditiously to fill the experience void that now exists. There is only one source to achieve this, and that is from the pool of former controllers that were fired in 1981. In a limited period of time, these individuals can be retrained and take their place in the system.

This is not a question of being prounion or being antiunion. It is a question of safety; and that must and should be our first priority. That point cannot be overemphasized.

Secretary Dole recently announced her Department's intention to hire 1,000 new controllers over the above that previously planned. If these controllers are hired over the next 2 years without any prior experience, it could take as long as 5 years before they might reach full-performance level.

In my judgment, we cannot wait that long. These 1,000 new controller positions should be filled with individuals with prior experience and proven performance records.

To each of my colleagues, I have sent a copy of a proposed letter to the President asking him to consider rehiring the former controllers. I strongly urge my colleagues to join me and over 70 other Members in signing this letter to the President. It is my belief that if enough Members sign this letter, the President will give serious consideration to this request.

Some Members who have signed the letter did not support the President's action in 1981. Others, including myself, did. Yet, that is not the pressing concern at stake today.

I implore my colleagues to seriously look at the current state of our air traffic control system. Visit a facility in your district, talk to the working controllers, talk to the pilots, talk to the supervisors. I believe you will hear from them the same story I have heard, time and time again: "We need help, we need it badly, and we need it now."

Let me stress that Congress shares in the responsibility for ensuring aviation safety. We have a very definite role to play and an obligation to fulfill. This responsibility does not lie solely with the administration or with the FAA; it is partly ours as well.

It should not take tragedies or loss of lives for corrective action to be taken. There are enough warning signals today in the system to show that the system is in deep trouble.

□ 1940

We must act now to address the critical problem of controller experience, and I believe the appeal to the President would be a very important step in this direction.

I thank the Speaker.

PERSONAL EXPLANATION

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Florida [Mr. NELSON] is recognized for 5 minutes.

Mr. NELSON of Florida. Mr. Speaker, due to official business, I was unable to be present and voting on November 7 for rollcall vote No. 398. Had I been present, I would have voted "aye" to agree to the conference report on H.R. 3036, Treasury/Postal appropriations.

THE 67TH ANIVERSARY OF POLISH INDEPENDENCE

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Illinois [Mr. ANNUNZIO] is recognized for 5 minutes.

Mr. ANNUNZIO. Mr. Speaker, on November 11, 1918, the courageous people of Poland, determined to obtain and preserve a free and united nation, declared their independence, and reasserted their right to live in freedom after more than a century of foreign domination.

Prior to 1918, the people of Poland were faced with both triumphs and disappointments. A successful attempt to establish a constitutional government in the late 1700's demonstrated the Polish desire to become a self-governing nation. Unfortunately, however, the powerful Russian army crushed Polish aspirations after only 1 year, and soon divided this small country with Prussia.

Poland, a nation that took great and justifiable pride in its long and illustrious history, disappeared from the map of Europe, and it was not to become free again for almost a century and a quarter, in spite of many brave and determined uprisings to rid the country of its foreign despotic rulers.

After World War I, however, the signing of the Treaty of Versailles enabled the Poles to reassert their own national destiny, and to freely develop their national, religious, and cultural institutions without foreign interference. Sadly, this glorious revival of freedom lasted only for one generation. For in 1939, Poland became a victim of Nazi aggression, and her people were subjected not only to another foreign occupation, but also to most extreme savagery, racial persecution, and brutal enslavement. Although 1945 marked the end of this Nazi oppression, the Polish people were forced to submit to a new tyranny in the form of the communism imposed with force by the Red Army.

Today, the Communists continue in their ruthless attempts to destroy the culture and religious heritage of the Polish people. Nevertheless, the struggle to achieve self-determination continues, as men and women fight against overwhelming odds to achieve liberty and human dignity. All freedom-loving peoples throughout the world are inspired by the continuing insistence by the Polish people for fundamental rights, and it is most appropriate that we in the United States acknowledge the steadfast attempts to attain liberty on the part of the Polish people during this anniversary of Poland's Independence Day.

Mr. Speaker, I am privileged to join with Americans of Polish descent in the 11th Congressional District of Illinois which I am honored to represent, and Polish-Americans throughout the Nation, as they commemorate the 67th anniversary of the independence of Poland, and pray for the success of the Polish people in their dangerous and delicate struggle with their Communist oppressors.

DRUG VIOLENCE AGAIN HITS MEXICO

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from New York [Mr. RANGEL] is recognized for 5 minutes.

Mr. RANGEL. Mr. Speaker, I rise to denounce in harshest terms the brutal murder of 22 Mexican policemen by marijuana growers in southeastern Mexico on Friday, November 1, 1985.

According to press reports, the 22 policemen were ambushed and killed by about 30 heavily armed men, all of them residents of a remote farming community 15 miles south of the Gulf of Mexico port city of Coarzacalcos. All of the victims were shot in the head. The Mexican police had surprised a band of marijuana smugglers who were transferring about six tons of marijuana from trucks to a launch on the Rio Coachapa.

I know all of my colleagues express their deep sympathy to the families of the slain policemen, the Government and the people of Mexico for another sad chapter in the fight against illicit narcotics trafficking. These members of the Federal Judicial Police, the Federal Security Directorate, the Veracruz State Public Security Directorate and the Veracruz State Judicial Police have become martyrs in the struggle to rid this world of the unscrupulous who produce and traffic in drugs, destroying the lives of our young people and threatening the welfare of our nations.

As chairman of the Select Committee on Narcotics Abuse and Control, I recently led a study mission to the drug producing and trafficking nations of South America. In the narcotics producing areas in many of the nations to the South, the narco-terrorists are well-organized, well-financed, and well-armed. They control vast areas of these nations and exercise great influence through violence and terrorism. The Dangers faced by law enforcement personnel in assisting to dismantle vast narco-empires cannot be underestimated. This recent episode in Mexico, the brutal killing of our Drug Enforcement Agent Enrique Camarena earlier this year, and the assault upon the Colombian Ministry of Justice and the killing of 11 judges by terrorists in Bogota last week, bear this stark truth.

We must not, however, let this tragic moment daunt our narcotics contol efforts. We must send a strong message to the drug terrorists of the world that every lawful means will be used to bring them to justice. In this vein, I am pleased to note that 16 suspects have already been arrested by the Mexican authorities and are being interrogated in an effort to identify the organizers of the attack and of the marijuana growing operation that the assailants were protecting.

Further, this incident should strengthen our resolve to work with the nations of the world to initiate effective international drug control policies. Through the United Nations, and in our bilateral relations with drug source countries, we must elevate narcotics control to a high priority, and lend

to it the support and resources a problem of this magnitude requires.

In conclusion we again offer our deepest sympathy to Mexico, and once again learn that our fight against drug terrorism requires constant vigilance.

MEXICO SEEKS KILLERS OF POLICE

(By William A. Orme, Jr.)

MEXICO CITY, November 5.—About 30 marijuana growers participated in what is being called "The Day of the Dead Massacre" of 22 policemen in Mexico's southeastern swamplands, the federal attorney general's office here said today.

The killings took place on the eve of the day Mexicans commemorate their dead. It was the largest loss of life from a single clash in Mexico's drug wars and has prompted a massive manhunt. About 100 state and federal police and 500 troops from an Army narcotics eradication squad patrolled southeastern Veracruz State looking for the killers of the Mexican police officers, whose bound and bruised bodies were discovered Saturday.

The 22 policemen were captured and killed by about 30 heavily armed men, "every one of them" a resident of a remote farming community about 15 miles south of the Gulf of Mexico port city of Coarzacaicos, said Federal Judicial Police Cmdr. Florentino Ventura.

Sixteen arrests have been made so far, and information from the suspects "will soon lead us to those responsible," Ventura said in a telephone interview.

The 16 suspects now being interrograted will be able to identify the organizers of the attack and of the marijuana growing operation "that the assailants were protecting," Ventura said.

The victims shot through the backs of their heads were members of the Federal Judicial Police, the Federal Security Directorate, the Veracruz State Public Security Directorate and the Veracruz State Judicial Police, Ventura said.

"This is the price Mexico is paying for confronting these faceless criminals." Mexican Attorney General Sergio Garcia Ramirez, in Veracruz supervising the investigation, said by telephone last night.

The ambush took place in Hidalgotitian, an isolated municipality of cattle ranchers and grain farmers in the sparsely settled Tenuantepec Isthmus lowlands. Larger than the state of Delaware, with vast tracts of marsh and rain forest separating stretches of fertile savannan, the region has few roads but is "full of landing strips, many of them clandestine." Francisco Fonseca chief spokesman of the attorney general's office, said here.

Marijuana cultivation is widespread in the zone and patches of opitum poppies were discovered recently, Fonseca said.

"The problem is economic, and the peasants are the last people we should blame," he said. "It is a depressed area, and the traffickers are able to pay them $20 for a little crop of marijuana when they would earn maybe $2 for the same amount of corn."

Army troops dispatched to the area to search for the killers had been conducting a sweep of the neighboring state of Oaxaca, now believed to be Mexico's largest narcotics production area, Fonseca said.

Mexico is said by U.S. authorities to be the source of one-third of the heroin and perhaps one-fifth of the marijuana imported into the United States, as well as the conduit for as much as one-third of the South American cocaine brought into the United States.

Apparently lured into an ambush by drug traffickers Friday in a remote district of Veracruz State, the police fled on foot but were soon surrounded by a large gang of heavily armed attackers, according to an account by two witnesses, Fonseca said. The witnesses, local police informants, said they escaped into the bush as the gunfight began Fonseca added.

"When the police arrived, the drug traffickers rounded up a group of local marijuana growers, people whom they supplied with weapons," Fonseca said "The witnesses guessed that there were about 40 attackers, but from the duration and scale of the battle; it appears that there may have been as many as a hundred."

The police, who apparently had been en route to a nearby farming settlement before intercepting and following a confessed drug smuggler to the site of a marijuana pickup, ran out of ammunition in the gunfight, Fonseca said. The police were then captured, bound and killed, and their bodies were carried downriver by boat, he said.

Among the suspects being interrogated, Ventura confirmed, is a state judicial police commander stationed in the nearby city of Acayucan.

[From the New York Times, Nov. 4, 1985]

MEXICO SEEKING KILLERS OF 21 POLICEMEN

(By William Stockton)

MEXICO CITY, November 3.—Mexican policemen and soldiers searched a remote region 300 miles southeast of here today seeking a band of drug smugglers who ambushed and killed 21 policemen after the police discovered a large cache of marijuana.

Reports reaching the capital from the area along the border between the states of Veracruz and Oaxaca said the ambush occurred before dawn Friday. Mexican officials said some of the policemen were captured by the smugglers, taken to a nearby farm and tortured and killed.

High-level Mexican officials who are supervising Mexico's efforts to combat drug smuggling directed the search from the town of Minaritian on the Gulf of Mexico coast, which is about 60 miles from the area of the killings.

They included the Mexican head of Interpol and the federal assistant attorney general in charge of Mexico's campaign against drug trafficking.

The killings are a setback in Mexico's efforts to control a substantial traffic in illegal drugs destined for the United States.

They came a week after a major Mexican drug figure escaped from a jail in Tijuana, on the United States Mexican border south of San Diego. Jose Contreras Subias was being held in connection with the killing in 1984 of a Mexican federal police officer in an ambush.

Mr. Contreras was an associate of Caro Quintero who is in a Mexico City jail awaiting trial on charges that he kidnapped and killed a United States Drug Enforcement Agency agent and his Mexican pilot in Guadalajara last winter.

Diplomatic sources here confirmed that 21 police officers had been killed, including 17 members of the Federal Judicial Police. The sources also confirmed that some of the police were captured and later tortured and killed.

According to Mexican officials, the battle between the policemen and the drug smugglers took place near the town of Hidalgotitián in southern Veracruz near the border with Oaxaca. It is a remote region reachable by launch via a river.

It was in this area that the police and Mexican army units from garrisons in Matia Romero in Oaxaca and Minitatián in Veracruz were concentrating their search.

According to Mexican officials and diplomatic sources, the Mexican drug agents surprised a band of drug smugglers transferring about six tons of marijuana from trucks to a launch on the Rio Coachapa. A fight ensued between the police and the smugglers, who were armed with high-powered weapons.

Two policemen escaped. Reporting from Minitatián, the Mexico City newspaper Exceisior quoted the two survivors as saying that the smugglers collected the bodies of the dead policemen and lined them up along the river bank after the battle.

Mexican officials said the surviving policemen were taken to a farm at the village of Cahuapan near Hidalgotitián and tortured and killed. Their bodies were later dumped in Cahuapan.

Mexico is believed to be the source of 20 percent of the marijuana that reaches the United States, about 2,500 to 3,000 metric tons. Some officials think the number might be higher, in light of the seizure in the state of Chihuanua in the fall of 1984 of nearly 10,000 metric tons of marijuana apparently destined for the United States.

Mexico is also believed to be the source for between 18 and 35 percent of the cocaine that reaches the United States and 32 percent of the heroin.

The United States Government frequently has urged the Mexican Government to work harder at intervening in the highly lucrative drug traffic.

Relations between the two countries regarding illegal drug trafficking reached a critical point last winter when the American drug agent, Enrique Camarena Salazar, and his Mexican pilot were kidnapped off the streets of Guadalajara. Their bodies, showing signs of torture, later were found buried on a ranch.

The Reagan Administration reacted angrily and placed heavy restrictions on traffic into the United States at border crossings with Mexico.

But United States State Department officials in Washington have said in recent months that the Mexican Government had strengthened its campaign against drug traffic as a result of the agent's killing and the angry reaction in Washington.

INDEXATION OF DEBT

The SPEAKER pro tempore. Under previous order of the House, the gentleman from California [Mr. LUNGREN] is recognized for 60 minutes.

Mr. LUNGREN. Mr. Speaker, the secret password in Washington these days is "reform." We have tax reform, military reform, immigration reform, and foreign policy reform. Yet there does seem to be one thing that remains, one consistency here, one constant; and that is that, despite all these reforms, we still may have a large, large deficit. We are talking about a $200 billion deficit now, and my colleagues believe that a large portion of that figure, that is, the interest

on the public debt, is out of their hands.

Mr. Speaker, this may not be the case. We can, in fact, address the interest problem by something which may seem novel, by indexing the national debt in order to reduce the inflationary expectation component of the cost of borrowing.

This evening I am going to discuss the reasons for experimenting with indexation, my own legislation to initiate it, and the basis of my confidence in it. Yes, it is a serious shift in policy, but our bloated Government desperately needs the innovative spirit that is an essential ingredient of real reform.

Unfortunately, such reform is hard to come by. We know that if interest payments continue at the rate of $140 billion per year, government borrowing will begin to crowd out the financing of private business. We know that such a contingency could mean a curb on productivity and more problems for economic growth. Yet we fail to consider ideas that are a step beyond the conventional wisdom. The situation reminds me of Winston Smith in Orwell's "1984." We all know we are headed for room 101, but we cannot stop ourselves from going there. This feeling of inevitability, Mr. Speaker, is augmented by the belief of most Members that certain portions of the budget are uncontrollable. Entitlements, we are told, are uncontrollable; the public debt, which constituted 13.9 percent of the budget in 1984, is also deemed uncontrollable. In fact, according to one reckoning of the Senate Rules Committee, fully 73.8 percent of the budget is beyond the pale.

But the fact is that a portion of the cost of the public debt can be controlled because the U.S. Government is currently paying billions of dollars more to bondholders than is necessary. In return for the purchase of 10-year bonds, the U.S. Treasury paid an interest rate of 12.4 percent in 1984. Ideally, the investors and the Treasury should agree on an interest rate composed of the expected level of inflation, first, and second, the "real" rate of interest, which is that which reflects the typical real yield on assets. But the inflation rate was only 4 percent in 1984, and financial experts from the Congressional Research Service and Fortune magazine feel that the real interest rate should be around 3 percent. Why then the missing 5 percent? This missing 5 percent comes from a risk premium. The risk premium is affected by uncertainty about inflation, and this is, in effect, a surcharge to the borrower.

Let us look at an example: Mr. and Mrs. Smith are a young couple saving and investing for their children and retirement. They might be interested in long-term Treasury bonds. If the bond they purchased simply included a real interest rate and the expected rate of inflation, they might be uneasy, they might be worried. What happens to their children's education if inflation explodes beyond the predictions, as it repeatedly did during the 1970's? The answer is that trips to college explode as well. So the Smiths insist on an extra margin of interest to guarantee that inflation does not cut the value of their investment. That is great for Mom and Dad, but since Uncle Sam pays $38 million per day in interest, it is a pretty sad state of affairs for him.

Common sense should tell us that if the inflationary risk premium was eliminated or simply reduced, the Government could save billions of dollars. Now we can accomplish this if the Government provides the guarantees on inflation through the mechanism of indexation. According to an April 1985 issue of Fortune magazine, if the Treasury sliced off a couple of percentage points from interest rates by selling indexed bonds instead of the current bonds, it would save $13 billion just this year. Fortune magazine predicted that the savings could reach $30 billion in 1990. Massive savings were also specified by Mr. Robert Monks in testimony before the Joint Economic Committee. Mr. Monks formerly served as administrator of the Office of Pension and Welfare Benefit Programs in the Department of Labor. He assumes that the indexed bonds of 3- to 20-year maturity would pay 7.7 percent interest as opposed to 13.7 percent with conventional bonds. If these assumptions proved correct, the Treasury could save $9 billion in the first year of indexation and $45 billion by the fifth year.

In all candor, I have to add a couple of caveats to these figures, as promising as they may be. Mr. John Pallfy, writing in a May 14 issue of the Heritage Foundation Backgrounder, essentially agrees with the savings totals produced by fortune. He points out, however, that the ultimate reductions will be slightly altered by the method of indexation. If only the interest on the bonds is indexed, then rising prices will diminish the value of the principal by the time it matures. Since this scenario would undermine the advantages of indexing, it would be preferable, from the standpoint of the investor and therefore probably for marketing purposes, to index both the principal and the interest. That would mean, of course, that some money would be taken away from the $30 billion to $45 billion totals. Those are estimated totals.

The second caveat is more technical. While many authorities here in Washington feel that the real interest rate is around 3 percent, other economists remain uncertain. In fact, some of them hope that indexation by making clear exactly what the inflation component of the interest rates is will show them the "real" rate of interest. The uncertainty prevents exactitude when it comes to estimating the reductions in interest payments likely to result from the indexation.

But the principal remains. If, instead of us having to estimate what the inflation rate might be, an uncertainty that is always going to be out there, trying to translate that into some sort of risk premium, and having in most cases to err on the side of overestimating in order to sell the bonds, we would instead make sure that anyone who bought these bonds would be protected over the lifetime of the bond against the impact of inflation because it would be indexed at the time the inflation occurred.

Let me be clear at this point, however. This is not a panacea; nor is it a substitute for budget cuts.

Colleagues familiar with my speeches and legislative activity known of my strong support for tough budget choices leading to a balanced budget. But I think I would be foolish and so would they not to grasp a savings that is relatively painless and clear of lobbyists. And it might explain more simply: If a family happened to overextend itself and go into debt, they certainly would not solve that problem merely by renegotiating that debt; they would probably try to ensure that they cut their spending over the next year and years ahead. However, they would be foolish to walk into any bank and say, "I want a loan to take care of my debts, and give me your highest loan, that is, your highest rate of financing that loan." Or they would be foolish if they only went to the first bank and did not go to other banks and see if they could not get a better deal on servicing their debt.

What we are suggesting is that indexation would provide another way of the Government now going out and attempting to service the debt that they would be required to service. All they would be trying to do would be bringing down the cost of servicing of that debt.

Now turning to the world beyond the Beltway, I want to emphasize the benefits of indexation to private finance. As I mentioned earlier, indexed bonds would end the risk that future retirees like the Smiths would see their investments eaten up by inflation. Thus, as John Pallfy points out in his backgrounder report, indexed bonds would be especially popular in pension funds, in life insurance, and IRA's. Mr. Monk agrees enthusiastically with this thesis. He observed in his testimony that the 70 million beneficiaries of private pensions would find indexed securities "the ideal funding mechanism, combining lowest risk; [a] stream of payments with assured maintenance of purchasing power and

protection against market conditions at the time of funding or of retirement." In other words, someone who is very well versed in the whole question of the pensions, private pensions of America, someone who has had a public responsibility and now a private responsiblity in this area would, in fact, encourage anyone who was doing consulting with him to purchase these indexed bonds because he finds them, as he said, the ideal funding mechanism.

David Meiselman, a professor of economics at Virginia Polytechnic Institute, sees this aspect of indexation simply as a response to the fundamental question posed by investors; namely: How do I protect myself from inflation? "Whatever past historical associations may have been, none have been consistently dependable in recent years. The bankruptcy courts are littered with the corpses of businesses and individuals who placed heavy reliance on some rule of thumb that just happened not to work out quite the way it had in the past. The old rules of thumb about good inflation hedges that went wrong include equities, short-term interest rates, gold and precious metals, collectibles, diamonds, commodities, timber reserves, and on and on. The only dependable way to hedge against inflation is to link values to a broad price index representing the inflation itself rather than linking values to the prices of individual components of the average. A Treasury obligation indexed to the Consumer Price Index or a similar price index offers one such dependable inflation hedge."

Mr. Speaker, I am convinced that we should be able to pass an indexation bill on this set of justifications alone.

But another secondary benefit under indexation also pertains to inflation. Thomas Woodward, an economics analyst with the Congressional Research Service, recently considered the effect of indexation on Government fiscal policies. He observed that indexation may reduce the Government's prejudice toward inflation. Part of that prejudice stems from conventional bonds since the value of the principal for those bonds diminishes with inflation. I mean, how often have you heard on the floor of the House and other places that we ought not worry about the size of the national deficit because in the future the value of that debt will diminish with inflation? In other words, it may be large now, but it will get smaller as we go along merely because inflation will make it so.

Indexing would remove any temptation on the part of Government to inflate away the underlying value of its debt obligations.

Finally, indexation may contribute to steady economic growth during periods of inflation. At such times, investors normally switch to so-called tangible assets like gold and real estate. This movement imperils economic health because financial liquidity is curtailed and interest rates rise. But such developments could be avoided if investors had a reliable place to put their money other than tangible assets. Bonds that are indexed for inflation would be such a place.

In all candor, Mr. Speaker, some Treasury officials are not all that enthusiastic about the idea of indexing. Such inertia is a frequent reaction to innovation, but I think the actual features of the bill will reassure my friends in the executive branch. Indexation may be a revolutionary concept, but this legislation is not. It is an experiment. I recognize that indexation is not a panacea. I recognize it is not a guaranteed success.

So, therefore, my staff and I have produced a bill that allows a limited trial of indexing. This legislation calls on the Treasury Department to issue securities that are indexed for inflation with the Consumer Price Index. The Secretary will convert at least 5 percent of these securities and no more than 50 percent to indexed status. Someone asked why we would do that. Well, we want to make sure that the Secretary will try it.

□ 1955

We do not want to have such an insignificant trial that it would be dismissed, and so we say that it should be at least 5, and yet we want to give some assurance to others who consider this to be somewhat risky because it is innovative that we would not go over 50 percent of those securities. We require that the face amount of the bonds be indexed so that the bondholder receives the full value of his investment at maturity. With the consent of the Secretary, the bonds should be a representative sampling of 1- to 20-year maturities.

Why did we select the CPI? Mr. Woodward of CRS has pointed out that the usefulness of a price index depends on the person to whom it applies. Mr. Jones buys the range of goods in index A, while Mr. Brown buys the range of goods in index B. The price shifts in the different computations means different things to Jones and Brown. But when it comes to the pricing of U.S. Treasury bonds, we want an index attractive to a very broad range of investors, or, in this case, as we would more correctly call them, lenders. That means we need a comprehensive measurement like the Consumer Price Index or the gross national product deflator. Since the CPI is computed monthly and the GNP deflator is computed quarterly, the former, that is, the CPI, is preferable. It minimizes the lag time between the change in the value of money and the issuance of the index; in other words, giving greater protection to the holder of the bonds and also, frankly, making them more attractive on the market.

I want to mention at this point that certain tax questions are tangentially linked to the indexation issue. Thomas Woodward believes that without any change in the Tax Code both the "real" interest and the inflation adjustment would be taxed as interest, since the law makes no distinction between the categories. In an ideal world, what is in essence the return of principal should not be subject to taxation if a security is to be taxed fairly.

But this is the House of Representatives. The Ways and Means Committee is preoccupied with an already overflowing plate of tax reform issues. And I should add that any change in the tax treatment of securities, in my judgment, should be on grounds of equity and not limited to government bonds alone.

This experimental legislation has been mandated by the need to attack the deficit with originality and daring. These qualities have already been displayed, not here in the House or in the Senate or in the executive branch, but, rather, by financiers in both New York and Chicago, whose exploration of future markets in general and indexes in particular certainly demonstrate an innovative spirit. An example of particular interest is the Consumer Price Index at the New York Coffee, Sugar and Cocoa Exchange. It has been hailed by David Meiselman, professor of economics at Virginia Polytechnic Institute, in testimony before the Joint Economic Committee, where he commented:

> The new C.P.I. futures market will permit the calculation of inflation-adjusted real market interest rates and will give borrowers and lenders the option of doing business on the basis of either nominal or inflation adjusted rates. Also, like other futures markets that permit risk management and risk control measures, the new C.P.I. futures market will make it possible for individuals and financial institutions to engage in "Do it yourself inflation indexing." Another result will be the creation of a whole new range of financial products and services.

Mr. Speaker, unbeknownst to many in this body, I am sure, and unbeknownst to me prior to the time I got interested in this subject, foreign countries have already discovered indexing. The British so-called "Granny Bonds" were introduced in 1975. Designed as an aid to pensioners over 60, the bonds were indexed to the British Retail Price Index. These securities proved quite popular. In 1981, the age requirement was lowered to 50 and the initial limit on holdings was raised from 500 pounds to 5,000. According to Alan Walters, formerly an aide to Margaret Thatcher and now a professor of economics at Johns Hopkins University, the integration of indexed bonds into England's finances has con-

tinued in the last few years. Professor Walters made the following comments in a March 1984, issue of the American Enterprise Institute Economist:

> Since April, 1981, index medium and long bonds have been one of the main forms of government borrowing in the United Kingdom. Indeed, the government has had little or no recourse to conventional long-term debt. More than one-third of its new issues, and virtually all long issues, have been indexed debt * * *. The U.K. government market, then, is substantial and very active.

Americans should find encouragement in the ability of Britain, with its weak economy and sometimes rigid economic thinking, to see the virtues of indexation and pursue them energetically.

The cases of France and Israel are murkier. France introduced gold clause bonds in the mid-1970's. This variety of indexation proved successful in attracting customers. It tied the securities to the price of gold, provided the International Monetary Fund upturned the link between gold and currency, which occurred in 1978. It is significant to note that the French felt the need for indexation and that they had the political will to implement it, but the French use of gold indices rather than a range of prices makes it unwise, in my judgment, to compare indexing operations in France and America.

In Israel, as we are sometimes reminded on the floor, everything from wages to prices are indexed. This general indexation has had the effect of weakening resistance to the necessary anti-inflation policies. While the general concept of indexing is under review there, no one argues that the indexation of bonds is specifically controversial. In fact, it might be queried whether anyone would otherwise purchase their bonds in light of the current difficulties facing the Israeli economy.

As an aside, I might mention that gold clauses were very successful in this country prior to the 1930's. According to Mr. Woodward of CRS, the securities guaranteed the holder repayment in gold or an equivalent value in legal tender. A very, very substantial market existed for them.

And I would just caution people to not believe that when you are talking about indexing, for instance, the indexing of bonds, that we are necessarily talking about the rather poor experience in countries such as Israel, where they have indexed prices, they have indexed wages, they have almost an automatic index, or have in the past, on a daily basis. They have not been in any stretch of the imagination successful, at least over the last number of years, in dealing with the problem of inflation. Here what we are doing is indexing bonds, indexing those IOU's that the Federal Government has to those people who have lent it money. And I would argue very strongly the point that I made before, in that regard it would be one of the best guarantees against public action, Government action, which encouraged inflation. In other words, it would work very, very much in the opposite direction to indexing of prices and automatic indexing of salaries that we have seen in the Israeli economy.

Despite the very special nature of indexation in other countries, I think a sense of confidence should emerge from looking at the evidence. Experience in America and abroad shows that indexation is widely perceived as a healthy practice. The testimony of American business shows a genuine appetite for this policy. These factors and the opportunities a successful program would present are surely sufficient justification for a mere test, albeit a serious test, of indexation.

Certain questions about indexation cannot be lightly dismissed, however. Obviously, the biggest doubts arise when one ponders a return to high inflation. While it is theoretically possible that indexed bonds would cost the Treasury additional money if the actual inflation rate turned out to be higher then what the market anticipated it would be, there are factors which do mitigate this possibility. First of all, it is arguable that part of the risk premium is indirectly attributable to the effect that inflationary fears have on overall market uncertainty. It therefore follows that the reduction in Government interest costs due to indexing might exceed the spread between the actual rate of inflation, which measures the cost to the Government as a result of indexing, and the anticipated rate of inflation. Second, as I indicated earlier, the presence of indexing itself is likely to greatly reduce the incentive for Government to inflate away the debt obligation. This in itself, I would underscore, will have the tendency to keep interest rates lower than they might otherwise be.

Mr. Speaker, one of my staff members recently learned that when President Carter asked economists for suggestions that would benefit the economy, Mr. Alan Binder, a Princeton professor and now a columnist for Business Week magazine, replied that he would advise the indexation of Treasury securities. It is unfortunate that among those ideas that Mr. Carter did accept, this was not among them. But with expert opinions such as that, with the $200 billion deficit, with a vigorous financial community and with couples and retirees needing investment security, we should initiate an experiment with indexing.

To be frank, I am worried that the budget drama of 1985 shows that the real leader of Congress is not the Speaker or the majority leader but rather something called "business as usual." If we cannot break free from this tyranny and attack domestic problems with innovation and energy, we will face problems far worse than excessive interest payments.

Mr. Speaker, I recognize that I have tried to point out the faults as well as the attributes of this sort of plan, this sort of experiment in indexed bonds but, quite frankly, I view it as a win-win situation. I do not think that we could under virtually any scenario that we might possibly believe to be real, find that index bonds would cost the Federal taxpayers ultimately more than the present conventional bonds do.

Second, as we pointed out before, it would have an incentive for the Government to take action not to allow inflation to rear its ugly head again.

Again, Mr. Speaker, it would also provide an essential security. You would take the risk out of holding these bonds. You would take the risk factor out of it with respect to those people who are trying to make long-term commitments for their retirement years. You would take the risk factor out of it for those who are charged with the responsibility of investing safely, with a reasonable rate of return, the assets of major pension plans in this country.

Mr. Speaker, I urge my colleagues to support my bill, H.R. 1773, as a step in an innovative direction. It will not solve the debt problems of the U.S. Government, but I believe, Mr. Speaker, it would go a long way, a very long way, to solving the debt service problems of the U.S. Government.

IRRESPONSIBLE JOURNALISM

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from California [Mr. DYMALLY] is recognized for 60 minutes.

Mr. DYMALLY. Mr. Speaker, a friend of mine, Alex Odeh of Santa Ana, CA, was murdered recently in a terrorist bombing. He left behind a young wife and three little girls, the youngest only 2. The evening before his murder Alex appeared on television to be questioned about his views on the *Achille Lauro* hijacking. Alex made two points: First, that this act of terrorism, and all acts of terrorism are to be condemned; second, that the Palestine Liberation Organization appeared in the *Achille Lauro* case to have played a positive role in ending the incident quickly. The television station edited out Alex's condemnation of terrorism and broadcast only his remarks on the PLO. I consider what that television station did a despicable act. It deliberately distorted the public appearance of a man I knew to be a true humanitarian, making it appear that he did not condemn the hijacking. Many people in southern California feel that this edited inter-

view signed Alex Odeh's death warrant.

On Tuesday, November 5 of this year a similar act of distortion occurred on television. This time the act was done against a young man who is not only a friend of mine but is also a member of my congressional staff. His name is Marwan Burgan. Now, as in the case of Alex Odeh, Marwan's family fears for Marwan's safety, as do I. And Marwan has to wonder whether he can leave his family unprotected. And I have to tell you that the anger I feel toward those who have placed him and his family in this situation is well beyond the power of words to express. My anger is intensified by the fact that Marwan was put in his present situation by a religious network, the Christian Broadcast Network, the fourth largest network in the country. I am a Christian, but in my brand of Christianity we are taught that it is wrong to lie. We are taught that it is wrong to place the lives of others in danger. Apparently access to the airwaves has given CBN a certain largesse to shun the Christian tenets that the rest of Christianity observe.

Let me tell you the truth about Marwan before I proceed to the broadcast lie. I met Marwan through his brother Sam, then a student at Howard University School of Law. I invited Marwan to serve a congressional fellowship in my office. I was so impressed with Marwan's intelligence, his competence, his positive attitude toward work, and his gentlemanly manner that I hired him part time. And I hope to hire him full-time next year. Marwan is a social psychologist by training. He did his undergraduate work at Southern Illinois University, and his graduate work here in Washington at American University. He has been an honors student throughout his training. In light of the present discussion, it is ironic that Marwan's research specialization is content analysis of media presentations.

Marwan was born in Jordan, lived in England for a time, and came to live in the United States in the mid-seventies. Just before Marwan began working for me, I had become interested in the plight of the American hostages who are still held in Lebanon. I was concerned that they had been held so long that the fact of their captivity was slipping from the public consciousness. I feared that without public pressure our Government might not place a high enough priority on winning their release. I assigned my administrative assistant Dr. David Johnson, to contact each hostage family and find out what we could do to help. That inquiry resulted in a special order here on the House floor in which many of you participated. I resolved after that special order to find ways to keep the situation of the hostages before the eyes of the public, and before the eyes of their representatives in the Congress.

I wanted the families themselves to have an opportunity to come here and tell Members of Congress of their anguish. Because Marwan had so deep a personal knowledge of the Middle East, I thought it appropriate to give him the assignment. He too quickly found his heart going out to these families. The meeting he coordinated between the families and Members of Congress was a moving experience. Moreover, it succeeded in renewing public consciousness of the hostages since the meeting was covered nationally by all sectors of the press. Out of that meeting came a plan to compose a congressional support group for the hostage families, and to recommend the creation of a task force on terrorism within the House Foreign Affairs Committee. Marwan has worked tirelessly to bring both the support group and the task force to fruition.

When the CBN story on Marwan was broadcast, Marwan quickly realized that attention on him would deflect attention from the truly important matter here which is to win the release of the hostages. Marwan suggested to the hostage families that it might be in their best interest if he were to stop his efforts and allow some other staff member to take over. The hostage families, to their everlasting credit, would hear nothing of this. They insisted that Marwan continue his effort on their behalf. If the hostages are returned safely, Marwan Burgan will be one of those deserving of credit. His work has helped the families to maintain hope, and his work has kept the fact that there still are American hostages in Lebanon before the public consciousness. Moreover, his work may ultimately lead to Congress taking a careful look at the fact of terrorism, its causes, and the means by which its incidence might be reduced.

Now let me proceed to the broadcast lie which appears to have been first aired on the "700 Club" program which, as many of you are aware, is a nationally broadcast religious program with a very large audience. Footage of Marwan was shown while the commentator made three stunningly inaccurate allegations. While the commentator was correct in noting that Marwan had been helping the hostage families, it was also alleged first, that Marwan had come into my office to steer the activities of the office toward matters involving the Middle East; second, that Marwan is affiliated with the PLO; and third, that his PLO affiliation places him in a conflict of interest situation in any matter involving the Middle East.

Just recounting these lies makes my anger begin to rise once again. The contempt the broadcast showed toward the Congress is itself contemptible. The outright racism contained in the broadcast should make every Christian, indeed every American of whatever faith, deeply ashamed. Who can find the words to express the smallness of those who could insinuate that the desperate efforts of the hostage families and their helpers to bring their loved ones safely home again is somehow tainted, somehow wrong? And who can condemn strongly enough broadcasters who would place innocent lives in danger for no better reason than to manufacture baseless sensationalism?

Let me take the broadcast's allegations one by one. First, the broadcast insinuated that Marwan came into my office with an agenda and that he is now using my office to his own ends. As I have mentioned, Marwan was given the hostage family assignment well after the time that another staff member, Dr. Johnson, had begun work on the project at my direction. In his work, Marwan has always followed my direction. I would have been happy if Marwan had come into my office with the intention to help the hostage families. But in fact this was an assignment he took on at my request, not the other way around. The larger issue here, however, is the insinuation that Members of Congress are no more than the unsuspecting prey of unscrupulous outsiders bent on prostituting the Congress. That is an insinuation that affronts me because it denigrates the integrity of this whole body. It denigrates the judgment of the American people in electing us to represent them. To insinuate that we can be used so easily is to insult the Congress and the American people. This is not a matter that should go unnoticed by the Members of this body. The more so in this case because it is an attitude projected by people who purport to be the spiritual leaders of the Nation. To me, their insinuation belied their belief in the death of a spirit, the spirit of democracy itself.

We are all familiar with code words. They are signals that connote much more than they denote. Calling Marwan an affiliate of the PLO was such a code. Rightly or wrongly, the PLO has come to be associated with terrorism and the name is used to elicit negative feeling toward those of Arab background. To say that a person is a member of the PLO is to signal that it is alright to be hostile toward that person because that person is bad. Marwan is of Arab background. He is not affiliated with the PLO. But what value does setting the factual record straight have once the damage has been done? We all know how difficult it is to correct the public perception of a person or event once an incorrect perception has been sanctified by the media. As with the in-

sinuation that my office is being used, the insinuation that Marwan is somehow a terrorist has a much broader implication. It is that those of Arab descent are evil and that, therefore, acts of violence against them are justified.

I spoke before you recently citing FBI records of terrorist acts committed against Americans. The record shows just what the damage of anti-Arab racism has been. Those of Arab background in this country live in real fear for their life, their property, their career. For, in fact, terrorism and racial discrimination have been visited on Arab Americans vastly more often than the American public is aware of. I would venture to say that my colleagues are unaware that in June the Islamic Center in San Francisco was ransacked after a radio host agreed with a caller that Shiites should be killed; or that in the same month the Islamic Institute in Dearborn, MI, was similarly vandalized; or that the Islamic mosque in Houston was bombed also in June; or that in August the American Arab Anti-Discrimination Committee office in Boston was bombed; or that the ADC office in Santa Ana, CA, was bombed in October, killing Alex Odeh; or that in July a young woman in Tucson, AZ, was brutually raped, beaten, and a carving made in her chest. And for what reason? Because she was dating a man of Palestinian background. I would venture to say you are unaware of these things because the press does not give them widespread publicity. They are, after all, acts done against Americans of Arab descent. When can you remember having heard or read something positive about an Arab?

I said that code words connote more than they denote. By attaching the code PLO to Marwan, the Christian Broadcast Network has done much more than put Marwan in danger. It has made an indirect slur against the hostage families and their efforts to have their loved ones returned safely to them. The Christian Broadcast network has insinuated that their actions are secretly controlled by the PLO. One has to wonder at the motivation of those who would take the suffering of others and use the effort to bring an end to that suffering as a tool to inflict further suffering. This is not a Christian act in my view. Much closer to what I understand to be Christian action is the work of Marwan Burgan. His Christian upbringing taught him that he was to practice the spiritual and corporal works of mercy, and true to these Christian counsels, he has tried to aid the suffering hostage families. If Marwan were a member of the PLO and if he were working as selflessly as he has been working, I would defend him as strongly as I am defending him now. But, in truth, Marwan has been branded by the Christian Broadcast Network not because he is a member of the PLO but because he is Arab. And we just cannot sit idly by and see this racist stereotype of Arabs continue. Marwan is a good man doing good work and thus work cannot be undermined by racists attacks.

In fact, my dear colleagues, America is full of Arab Americans in which the citizens of this country should take justifiable pride. Yet, some of these people are not recognizable by surname as Arab Americans and possibly would not want to be recognizable for fear of the racist acts that might befall them were they to be recognized. I had considered telling my colleagues about some of the contributions these outstanding Americans have made in politics, diplomacy, journalism, the arts, science and medicine, but to respect their possible desire to avoid publicity, I will just mention two publicly known examples to make clear why these people might wish to maintain their privacy. Many of us in the Congress know Candy Lightner as the mother who founded MADD, Mothers Against Drunk Driving. She is an Arab American. Recently, she was honored by an Arab American organization for her stand against drunk driving. Shortly after receiving the honor she was demoted from her job. I do not know if there is any connection between the two events, but it leaves at least a question in my mind. Young people know Casey Kasem as the host of the long-lived and popular "Top 40 Show." Casey is an Arab American. During the last Presidential campaign when Casey held a fund raiser for Presidential candidate Jesse Jackson, Casey's home was picketed by an anti-Arab group.

As I said, the list of distinguished Arab Americans is a long one. It includes Members of Congress, senior diplomats, consumer advocates, leading political journalists, well-known entertainers, writers, producers, musicians, medical researchers, doctors, and scientists.

Few of us are aware of the hundreds of thousands of Arab Americans who are employed in every walk of life this country has to offer. That is as it should be. These people are as deserving as you or I of enjoying and taking pride in their ancestry without fear of retribution. America is culturally rich. America's diversity is part of what makes it such a great place to live. Arab Americans are contributors to this robust culture of ours, this American culture. These people are loyal, hard-working, patriotic Americans, just like you and me. These people are just as capable of feeling compassion for a fellow human being held hostage as you are, as I am, as Marwan Burgan is. These people are as deserving of security and a sense of well-being in their homes and workplaces as you are, as I am. I pray that there will be a day when Marwan Burgan and his family will again have that security which we enjoy without thought.

Mr. Speaker and Members, thank you very much for this opportunity to bring this very important message to you, so that this great disservice committed against Morwan Burgan can be brought to the attention of the public, and hopefully corrected without delay.

□ 2020

THE GROWTH OF NARCO-TERRORISM

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from New York [Mr. GILMAN] is recognized for 60 minutes.

Mr. GILMAN. Mr. Speaker, I rise today to express my deep concern over the ever increasing relationship between narcotics trafficking and international terrorism. This relationship has grown so strong in recent years that a new term—"narco-terrorism"—has become all too common. The "narco-terrorists" have become so powerful in some nations that the 1984 report of the United Nations International Narcotics Control Board warned that "the very security of some States is threatened." As a result of the growing intensity of narcotics control efforts by some nations there has been a corresponding increase in violence, subversion and corruption by the "narco-terrorists" to impede these efforts. It is clear that many terrorist groups are both directly involved in narcotics production and trafficking, and indirectly involved through the financing of terrorist activities from the enormous profits derived from the illicit narcotics trade. As the use of violence against international narcotics control efforts increases we must recognize the serious threat involved and do everything in our power to combat it.

In the past few weeks we have witnessed two deplorable examples of the types of "narco-terrorism" to which I have referred. On November 3, reports surfaced of "The Day of the Dead Massacre"—of the brutal murders of 22 Mexican police officers in Mexico's southeastern swamplands at the hands of a band of drug smugglers. The Mexican policemen were murdered after they were ambushed by the band of smugglers, who were involved in transferring about 6 tons of marijuana from trucks to a launch on the Rio Coachapa. After they were ambushed they were taken to a nearby farm, where they were tortured and then murdered. I am certain that every Member of this body joins me in expressing our deepest sympathies to the families and friends of these brave men and to the Government of Mexico. It is heartening to learn from recent reports that at least 16 arrests

have been made in this brutal case, and that the commander of the Mexican Federal Judicial Police, Florentino Ventura, believes that the information obtained from these suspects will lead directly to the capture and conviction of all those responsible. We stand ready to provide whatever support and assistance we can in that effort.

The second deplorable act of violance occurred a few days later in Colombia, when on November 6, about 25 leftist guerrillas shot their way into the Palace of Justice and seized a number of hostages, mostly judges. The Palace of Justice is the site of the courtrooms and offices for Colombia's 24 Supreme court justices and 20 other Federal judges. The guerrillas were part of M-19—Movement-19—which takes its name from the April 19, 1970, date on which populist ex-Dictator Gustavo Rojas Pinilla, who had ruled since seizing power in 1953, was defeated in a Presidential election that his followers and others charged was fraudulent. Since this urban-based group opened up rural fronts in 1981, it has been directly involved in a guns-for-drugs nexus, and that connection clearly continues today.

On November 7, President Belisario Betancur, who has led one of the most forceful and effective antinarcotics campaigns of any producing nation over the past 2 years, ordered an all-out assault on the Palace of Justice after promising the rebels only that the Government would guarantee they would not be killed and would get a fair trail if they surrendered. The President added "The Government could not negotiate something that was nonnegotiable—the respectability of our institutions." The result of the assault by Colombian Government security forces was devastating. The Palace of Justice was gutted, and at least 85 corpses of magistrates, rebels, court employees, visitors, soldiers and police have been found.

While no direct drug relationship has been established for the Palace of Justice takeover, two things are clear. First, as President Betancur pointed out in his address to his nation after the assault, hundreds of court files that included cases of people being sought for extradition to the United States for drug offenses were destroyed by the guerrillas. Second, regardless of the ultimate motives of the rebels, the financing of their operations is directly linked to the drug traffickers.

As disturbing as these recent events in Colombia and Mexico have been they are only the latest in a series of drug related violence in these two nations. In April of 1984, the Minister of Justice of Colombia, Rodrigo Lara Bonilla, a firm and outspoken opponent of the drug trade, was murdered at the hands of the drug traffickers, and only recently the judge assigned to investigate the assassination was murdered. In addition, the drug traffickers in Colombia have threatened the lives of Americans living in Colombia in response to our requests for extradition of known Colombian drug traffickers to the United States. Early this year, in Mexico, the drug traffickers were responsible for the brutal murder of American Drug Enforcement Administration agent Enrique Camarena Salizar, setting off a period of extremely tense relations between our two nations.

Narco-terrorism is rampant throughout the drug producing nations of South America. The "narco-terrorists" have created a climate of complete lawlessness in Bolivia, especially in the drug producing region of the Chapare. The traffickers intimidate and kill Chapare peasants who do not wish to cooperate in the production and trafficking of narcotics. Even the police are not immune from attack. A group of seven Bolivian policemen were murdered in 1982, when it appeared that the Government was attempting to increase narcotics control efforts. The threat posed by the drug traffickers is not limited to direct incidents of violence. There continue to be persistent rumors that members of the far left and the far right are involved in the financing of political activities through drug trafficking, arms smuggling and other related illegal activities.

In Peru, narcotics related violence has been increasing since late 1983, especially in the Upper Huallaga Valley cocaine producing region. Police units and eradication workers have been repeatedly attacked and these attacks culminated in the November 1984, brutal murders of 19 coca eradication and survey workers, and the murder of the mayor of Tingo Maria.

Narco-terrorism is not limited to this hemisphere. The relationship between insurgency and narcotics trafficking is particularly evident in Burma and in Thailand. In Burma, most of the principal insurgent groups rely on heroin smuggling to finance their activities. These groups control the main areas of opium production in northeastern Burma where rough terrain and the shortage of modern military equipment prevent the Government from establishing any authority. All of the insurgent groups are heavily involved in the production, transport, and sale of heroin, and the Burmese Government is continuing to wage a determined struggle to restrict their activities, despite the heavy odds against them. While similar activities are weaker in Thailand, they do exist, and efforts by the Thai Government to suppress these activities are beginning to yield some success.

Mr. Speaker, it is clear that the scourge of drug trafficking and drug abuse, and related "narco-terrorist" activities, have reached epidemic proportions worldwide. As the ranking minority member of the House Select Committee on Narcotics Abuse and Control, I have worked closely with our distinguished chairman, the gentleman from New York [Mr. RANGEL] in seeking to raise the consciousness of our own Government and all governments throughout the world to the deadly nature of the drug trade and its related terrorist activities.

The ruthlessness of the drug traffickers knows no bounds as they seek to spread their poison to every corner of the globe. Narcotics trafficking is a key ingredient in overall global lawlessness. It must be stopped. If nothing less, we must work with supportive governments to end the direct involvement of some governments in supporting such terrorist activities. Only a firm and coordinated commitment by every nation will lead to a halt of the international drug trade. We must spare no effort and utilize every resource in the fight. The sooner we fully recognize the threat at hand the sooner we will put an end to the tragic events we have experienced in the past few weeks.

Many government leaders have already expressed a firm commitment to the war on narcotics. Along with the efforts already initiated by the Governments of Mexico and Colombia, newly elected Peruvian President Alan Garcia stated in his inaugural address:

> A historic scourge threatens our country: drug trafficking, whose prospects of bringing a sudden fortune corrupts people and has destroyed many Peruvian institutions. Neither Peru nor any other country can be identified as an exporter of poison.

The Prime Minister of Great Britain, Margaret Thatcher, has told the drug traffickers:

> We are after you. The pursuit will be relentless. The effort will get greater and greater until we have beaten you. The penalty will be long prison sentences. The penalty will be confiscation of everything you have ever got from drug smuggling. So stop it—we shall make your life not worth living.

And in Malaysia, Prime Minister Mahathir Mohamad has declared:

> There will be no compromise with those who are slowly killing our people.

Mr. Speaker, those words should become our battle cry—that there can be no compromise with these merchants of violence and death. Greed is the driving force behind their every action. They allow nothing to stand in their way. But we can and must stand in their way, and join together as a world community to end drug production and trafficking and its associated violence once and for all. For the sake of our children we can do no less. I urge my colleagues to join with me and to speak out in this effort.

□ 2030

LABOR-MANAGEMENT NOTIFICATION AND CONSULTATION ACT OF 1985

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Texas [Mr. DELAY] is recognized for 60 minutes.

GENERAL LEAVE

Mr. DELAY. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days in which to revise and extend their remarks on the subject of this special order.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Texas?

There was no objection.

Mr. DELAY. Mr. Speaker, we had general debate today on a bill, H.R. 1616. This bill is commonly called the Labor-Management Notification and Consultation Act of 1985.

Now, during the debate, many Members of Congress, the proponents of this bill, at least, claimed that this was a narrowly gauged bill, that this is simply a notification bill, that this bill is going to protect jobs, that this bill, they inferred and some may have said that this bill would stop the loss of jobs and possibly stop the closing of plants.

I would like to take first, Mr. Speaker, the first part of the proponents' argument, that this is a narrowly gauged bill, that this is a finely honed piece of legislation, that this is just a simple little peace of legislation. My experience in the legislative process going over 7 years is that when anybody tells you it is a simple bill, you had better look out, because it has also been my experience that some people bring a simple bill to the floor of this House and do not tell you the whole story that may be in the bill, so I would like to very briefly start this evening by pointing out and briefly going through what this bill is.

This bill only pertains, supposedly, to 50 or more employees that may be laid off or that will be laid off in a plant closing.

Now, the affected employees means employees who have been employed by an employer for more than 6 months. Why they picked 6 months, I do not know. I guess it is to say if you have been employed more than 6 months, you are a permanent employee. Frankly, I think if you are employed for a year so that you qualify for some benefits and you qualify for at least vacation makes you a permanent employee. We will get into later about how important and how onerous just that little part of the bill is about employees who have worked for more than 6 months.

It also goes even further and says that you have to comply with this bill if you reduce the number, and I am quoting: "if you have a reduction in hours of work of more than 50 percent during any 6-month period" which means that if you have to make a business decision and your plant is in trouble and you are trying to save the jobs of probably more than a majority of the people working in the plant, if you have to cut, for instance, the workweek of some employees of all employees, especially if you have 50 or more employees, then you have to comply with this bill.

Now, also they will say, and I quote from the bill: "If there are unavoidable business circumstances that prevent the employer from withholding such closings or layoffs until the end of such period," which means that the plant can for some unavoidable business circumstances, and frankly they do not define what unavoidable business circumstances are, then you can shut down the plant or lay off employees.

Now, who is going to determine what unavoidable business circumstances are? They wait until you go into a punitive process, punitive on the employer, a punitive process to determine whether you had to close that down quickly because of unavoidable business circumstances.

Now, we go on and get into the consultation part of the bill. First, you are notified with in 90 days that the plant is closing and/or a major layoff of 50 or more employees. Not only do you notify the employees or their representatives, in case it may be a union shop, you also must notify the Federal Mediation and Conciliation Service that you are shutting the plant or laying off employees. That immediately puts it in the realm of the Federal Government and in that case the Federal Mediation and Conciliation Service has the ability in this bill to extend beyond the 90 days that you cannot close your plant or lay off your employees any period of time it sees fit to do so.

Now, it goes even further than that. In section 5 of the bill it says that the employer must provide the representative of the affected employees with "such relevant information as is necessary for the thorough evaluation of the proposal to order a plant closing or plant layoff."

Now, I do not know why they even put in there this kind of language. What they should have said is, "Mr. Employer of the plant, you will open your files and books to the employees and the respresentatives and show everything that you have to show," because everything in a business decision is used in that business decision, everything that a plant has, whether it be books, files, customer records, credit notices, loans, notes, everything is pulled in then in making a decision such as this. If you do not do that, then you are subject to "such protective orders as the Secretary of Labor may issue."

Now, this also goes further to say and gives authority to the Secretary of Labor, as it says in subsection (2) of section 7 that the Secretary of Labor determines whether you have given sufficient information to make these decisions in order to negotiate—and that is a big word, negotiate the closing of the plant or the laying off of employees.

□ 2045

It gives the authority to the Secretary of State to petition any district court of the United States for any district in which the violation is alleged to have occurred. In other words, the Secretary of State can go to court and receive injunctive relief, which means we put it off a little further as for as shutting down a plant or laying off people.

The injunctive relief is spelled out in the bill. First, it requires the employer to give notice. It also extends the consultation period and requires the employer to consult "in good faith during the period as extended," and (c) requires that reinstatement of back pay and related benefits. We are talking about a plant that is in monetary distress enough to have to be closed or to lay off employees, and then we require, well, not only can you not lay off these employees, you cannot shut down your plant, but you are going to pay all back pay and benefits to those employees, putting even more pressure on the plant to be closed.

Now we go even further, not just to the Secretary of State, but we also set up class action suits in the bill, and it says under section 7(b):

> Any employer who orders a plant closing or mass layoffs in violation of this Act or a court order under subsection (a) shall be liable to each employee who suffers an employment loss as a result of such closing or layoff for reinstatement or damages, or both.

Unbelievable.

Also, it says that employees or their representatives may sue, either for himself or for other persons, setting up class actions suits. And damages shall include back pay and related benefits for each day that the employer is in violation, incuding general and punitive damages, or both. Punitive damages, which goes right next to the net worth of the owner of the plant, and could be substantial. There is no limit on the punitive damages. All it says is that they can recover punitive damages.

If that is not bad enough, as usually happens in this Congress, we always protect the lawyers. We go on to another section, section 3, and says that while all this litigation is going on, if this guy who is under monetary distress enough to be considering shutting down a plant or laying off em-

ployees, loses this how-long-do-we-know civil actions suit, and these suits could go on for years, if it happens to be in Houston, TX, it takes 5 to 8 years to settle many civil actions in the overcrowded courts in that area. But even at that, after all this, then, as I call this bill a full employment for attorneys, then we allow the court to bring a judgment to pay any reasonable attorneys' fees. They have to be paid by the defendant, the owner of the plant.

It just does not make sense. We have more in the section entitled "Civil Actions Against Representatives of Employees." We also allow that any representative who brings action to the Secretary can be liable to the employer for financial loss. We are going to balance it out, because if the representative of the employee brings an unreasonable action, then they will be liable under subsection 5(b). But I would like to point out, Mr. Speaker, that when we go back to 5(b), all it says if the employees do not provide information to the employer. What information are they going to provide? They are the employees.

Here we also have in section (d):

For purposes of this section, in determining whether a plant closing or permanent layoff has occurred or will occur, employment losses for 2 or more groups, each of which is less than 50 employees.

And it goes on and on. What this says is that not only can you not have an overall plant reduction of 50 employees before this act goes in effect, you cannot even do it by a section of your business. If you have a business that has many departments in it and you want to cut down the number of employees, if you lay off 10 employees over here and 20 over here and another 20 over here, that equals 50 employees; therefore, you fall under the scrutiny of the act.

Then it goes even one step further. It was stated in the general debate on this bill that we already have, set up by Bill Brock, Secretary of Labor for the United States, a task force that is looking into this matter. But that does not go far enough, so Congress is going to set up a National Commission on Plant Closings and Worker Dislocations, and provide all the appropriations that are necessary for studying this problem. So once again we are duplicating Government services. We have a task force made up of both labor, management, and people in between studying this at this very moment, but that is not good enough. We are going to have the same thing set up by Congress.

You would think that at some point in time that people around here would start trusting each other on findings, or at least look at findings after they have been brought, and see if they are relevant.

I would like to submit for the RECORD a fact sheet that compares, for instance, the consultation process with the committee report, and then gives an evaluation of what the practical effect is therein.

The factsheet is as follows:

FACT SHEET—H.R. 1616, CONSULTATION AND RELEVANT INFORMATION REQUIREMENTS

I. CONSULTATION

Requirement: Where a union is present, a change in business operations resulting in layoffs of 50 or more employees cannot take place until the employer has "consulted in good faith" with the union "For the purpose of agreeing to a mutually satisfactory alternative or modification" of the proposed change.

Committee Report Explanation: The employer would have to engage an "'exhaustive exploration" of the alternatives or modifications. He would have to "approach the consultative process with a good-faith willingness to" explore alternatives and would not be in compliance by merely "going through the motions" if he harbors an intransigent or unyielding attitude that makes consultation a "meaningless exercise." He must have "a desire to reach ultimate agreement."

Practical Effect: An employer would be highly unlikely to give employees notice that he was going to lay them off if he hadn't already thorougly analyzed the situation and exercised his soundest business judgment. If he had confidence in any input by the union, he would likely already have discussed the situation with them. Therefore, to comply, he would have to pretend to have a "desire to reach ultimate agreement" unless he simply wanted to buy the union's alternative. This could be particularly difficult where there had been a history of antagonism between the parties.

Current Law: If the layoffs are occurring as a result of transfer of operations to another location a subcontracting arrangement, the employer must bargain in good faith with the union if the decision is motivated by labor costs. In such situations, the union obviously can be helpful.

II. RELEVANT INFORMATION

Requirement: The employer fails to consult in good faith if he does not provide the union "with such relevant information as is necessary for the thorough evaluation of the proposal" or any alternatives or modifications.

Committee Report Explanation: The union must have "adequate information to understand and intelligently discuss" the issues surrounding the layoffs. The standard for determining relevancy would be a "liberal, discovery-type standard, where relevance is simply synonymous with germaneness. The information need only have some bearing on the issues invovled and the employer must furnish information that is of probable or potential relevance to the union's role as bargaining agent. The information should be provided "as quickly as possible in a manner and from susceptible to rapid understanding and use."

Practical Effect: With such a broad standard, the employer would have virutally no guidance as to what he should provide. Conceivably, his entire filing and data system would be open for review. The implications would be particularly serious where only a portion of the employees are being laid off and there is a continuing relationship between the employer and the union. Even the Committee Report recognizes the "difficult questions" concerning relevance which have arisen under the National Labor Relations Act, resulting in each case being decided on its own unique set of facts. Obviously, this standard has prompted considerable litigation and varying interpretations among the courts. Yet, at least under the NLRA, the issues at stake are relevant to the employer-employee relationship. The issues arising under this bill go well beyond that relationship.

III. ENFORCEMENT

If the Secretary of Labor determines that "there is reasonable cause to believe" that these requirements have been violated, he shall seek injunctive relief in any district court where the employer does business. That relief could include an extension of the "consultation period" for an unlimited period of time. As long as the employer failed to comply, that period could be extended indefinitely.

Now, what does all this mean? Some of the proponents said, and they brought out this outrageous fact, because I found in the legislative process, in order to zing the hearts of conservatives, you must dip into the pocketbook of Government. So one of the arguments for the proponents was,

Well, we have proven in Maine that with this kind of situation, by notifying the employees, the employees can go look for jobs, thereby lowering the amount of money that the Government pays for unemployment compensation. Therefore, the Government saves money by this bill.

Let me put it a different way. In Europe, and I will give a little example because the gentleman from Colorado is better at this than I am, but let me just give an example of how this works, because in England and in France and in Germany and in Ireland, they have this sort of labor law.

In England, the Rover, built by Leyland Motors, a corporation, was in the same situation, where they could not build this automobile in competition with the rest of the world, with Japan, the United States, they felt they should shut down the plant. Well, in England the law prevents that, almost like this law does. It went on and on and on, and we got to a situation where the owners of the automobile, Leyland Motors, just absolutely could not continue. So in order to keep these jobs, the Government bought the company and produces it now and it costs three times the amount of money to produce this car than what they sell the car for.

If that is not a drain on government, I do not know what is. And besides, would it not be nice to have an economy like England's, or France's, or Ireland's? I think it is interesting that people on the floor of this House would like to pattern the U.S. economic system after countries like that which are doing so well with their economy and are certainly outpacing the United States as far as economics is concerned.

□ 2055

But let me just talk about H.R. 1616 and how it will hurt the American worker.

According to Labor Department figures, between 1973 and 1983, 18 million jobs, new jobs, were created in North America. Western Europe, on the other hand, had a net loss of 840,000 jobs during the same period of time. In other words, new jobs were created in the United States while Western Europe has not been as fortunate.

Now, at first blush, these facts might be puzzling. Western Europe is one of the world's strongest markets for a broad range of goods and services. Its people are highly educated, and the area has a long history of mercantilism. One of the principal reasons that Western Europe has had so much trouble in creating new jobs is the fact that it is no longer an attractive place to locate major business enterprises.

Since World War II, the Western European countries have put into place strict plant closings and employee termination laws much like what H.R. 1616 proposes. Once an employer opens a plant and hires employees in Western Europe, it is extremely difficult to close the plant and begin production of a more competitive product when business conditions become adverse.

Jean-Jacques Oechslen, who is chairman of the executive committee of the International Organization of Employers, and chairman of the governing body of the International Labor Organization, makes this point very eloquently. A recognized expert on European Community plant closing practices, he recently stated that

A form of flexibility demanded by the employers in most of the European Community contries is the possibility of rapidly adjusting the labor force to the activities of undertakings which themselves depend on increasingly sharp fluctuations in markets. In some countries, such as France and Spain, administrative controls over dismissals make this adjustment a protracted and hazardous affair. In other countries, cumbersome and complex internal procedures cause useless delays. As a result, undertakings hesitate to take on extra staff even to capture potential markets, the more so because these countries are burdened with regulations that discourage the use of various types of employment relationship such as fixed-term contracts or part-time, 6 months, remember, in the bill, or temporary work.

In France, a survey carried out by an opinion poll institute showed that the experimental abolition of government authorization for dismissal for economic reasons could lead to the creation, could lead to the creation of 370,000 jobs in just 2 years. The United States already has the flexibility that leaders such as Jean-Jacques Oechslen have long sought. As a result, the United States can create new jobs by responding quickly to market demands.

Passage of H.R. 1616, however, would remove that flexibility and freeze job growth in this country. It is essential for job growth in this country that companies be free to close down inefficient, failing, antiquated production processes. Legislation like H.R. 1616 that can be used to block necessary closings will force failing businesses to continue operating.

We see a lot of that, for instance, in ERISA, whereby if you close down your company, you have to continue to pay the benefits based upon your assets to the employees. So, many companies, as has been demonstrated in the trucking business, remain open today at serious losses. That hurts everyone, including the consumers.

So if the decision to phaseout an antiquated product or production process is blocked indefinitely by court action, the company will not be able to compete either here or overseas, and everyone suffers.

This country is as strong economically as it is because we allow a vacuum tube manufacturer to close down vacuum tube plants and startup plants that make transistors. H.R. 1616 would make changeovers like that extremely difficult in plants where employees are represented especially by labor unions.

Equally important, enactment of bills like this would be one more reason for large companies to locate business operations overseas. Producers, whether they are American, Japanese, Dutch or some other nationality, will be less likely to build a new plant in the United States if they know that having built here, it would be very difficult to close the plant should the market for its products dry up.

Now I want this Nation to be able to compete in the world markets. Most of the proponents of this bill, most of those who voted for the rule today have been at this well talking about trade and how America must do something about trade, and then they bring a bill like this to the floor that is one of the worst and most insidious pieces of legislation that would seriously hamper trade, because you cannot trade if you cannot shut down an inefficient plant.

I do not want jobs to be shipped overseas. I want to keep them here. I want this country to attract major producers willing to build large operation in the United States that employ American workers.

That is why I cannot support bills like H.R. 1616, and we should make no mistake about it. H.R. 1616 is not intended just to give workers notice. It is intended to prevent the rapid transformation of businesses from the old, antiquated, outmoded and dying into strong operations that provide American workers with jobs in growing industries.

What would happen, and we had a textile bill that passed this House, what is happening in many areas where textile plants are being shut down? How could you replace those plants with efficient textile plants, replace old, antiquated plants with very efficient plants. If the steel industry up in the North and Northeast, when an old, antiquated steel mill is shut down, what do you think the decision of those people to shut that plant down that want to build a more efficient plant that would work, and that would employ people and work people and be able to compete overseas would do? Where do you think they are going to build that plant? They are not going to build it in a nation that will not allow them to shut it down and build a more efficient plant. They are going to take it, and forget all of the hassle, take it to Mexico, or why not Canada, or Taiwan where they want people to build plants. Why not build them there? That is exactly where they are going.

Mr. Speaker, I find it would be exceedingly ironic that we are about to consider legislation that would further limit the ability of our businesses to compete overseas at the same time that foreign competition is one of Congress' primary concerns. Yet that is exactly what H.R. 1616, the so-called plant closing legislation, would do. By interfering with the ability of American business managers to make decisions that permit them to close or phaseout inefficient operations, the bill would instead force businesses that should be closed to remain open while diverting management resources away from pursuing innovative business practices designed to make our companies more competitive.

If we are serious about our concern to address the threat of foreign competition in trade, then let us proceed on the basis of policies which would enhance the ability of our businesses to meet the challenge rather than enacting legislation that can only make the task more difficult.

I think what we are talking about here is whatever happened to the word freedom on the floor of this House? When you pass this legislation, you may think you are going to stop plants from closing. You may think you are going to stop employees from being laid off. But think the other way, too. What you have done is taken millions of stockholders' ability to run an efficient operation, you have taken away their freedom, and you have taken away from people like myself who owns one business, built that business from scratch, wants to close down his business because of hard times, or wants to lay off a few employees because of hard times, you

have taken away my freedom, my decision to do those kinds of things.

I think that is insidious. I think it is unconstitutional, but we do not deal with that in this House. We deal with bad legislation many, many times, and this is one of the worst pieces of legislation as far as taking away the freedom of Americans to build businesses, to go out of business, to buy, to buy businesses that are going out of business.

This is a freedom in our economic system that has brought us to where we are today. With legislation like this, you will become an England, or you will become a France, or an Ireland, or a socialist country because what I am talking about, and what I think this bill is is pure socialism.

Mr. BROWN of Colorado. Mr. Speaker, will the gentleman yield?

Mr. DELAY. I will be glad to yield to the gentleman from Colorado.

Mr. BROWN of Colorado. Mr. Speaker, I want to thank the gentleman from Texas for yielding to me. I rise out of concern over H.R. 1616. I might say to the gentleman that I rise as one who was a member of a labor union as well as a member of management in business enterprises.

My concern about this bill falls on two fronts. First, that it will not accomplish the purpose that the folks who offered this bill wish for it to accomplish. Rather than save jobs, it will cost jobs. Rather than to providing new opportunities, it will destroy existing opportunities. And rather than help American workers, it will dramatically and significantly harm them.

I would like to take a few minutes and share those thoughts with the gentleman and the Members of this body and those who are listening in. This measure was debated earlier today, but unfortunately, the leadership did not provide extensive enough time for all the remarks that I think need to be made on this subject to be introduced, so we have taken advantage of this time to share further concerns about H.R. 1616.

It is called the Labor-Management Notification and Consultation Act of 1985. I must say to the gentleman from Texas, I truly believe it should be called the "Economic Illiteracy Act of 1985," not because the folks who offered it do not have good intentions, but because they simply do not understand the basics of economics in this country. What they have offered will do the opposite of what they hope to accomplish.

This bill should not be confused in any way with a proper effort to communicate with workers and share the concerns of a business and, yes, indeed, share the necessity of shutting down a plant. That can and should be done right now, and I for one would like to see it done in every operation. That kind of communication is essential for good management, it is essential for a good productive enterprise, and it is essential so people's jobs can continue.

Please do not confuse this bill with that endeavor, because they are opposites. This bill provides complicated and at times very vague guidelines and rules. If you violate one, or simply are unable to comply with it because it is so vague, you are subject to massive penalties. What that says is that it is more profitable to provide jobs and opportunities in another country if this passes. So we say that we do not want those operations in America.

There is another point here that I think has to be looked at. We are not talking about simple notice to employees. We are talking about notice to everyone—to creditors, to customers, to those who hold in their hands the very ability of this operation to continue to exist. What this bill says is you have to provide people who extend you credit, who give you supplies, who buy your products, with advance notice that you might go out of business. That notice does not just go to employees, it goes to everyone you deal with.

□ 2110

As a result you stand in danger of causing the collapse of business operations that otherwise would not stop at all.

Let us deal with some of the myths and realities. Why do plants close? The backers of this bill will tell you or imply that plants close because they want to hurt employees. Plants close because some people are mean. That is nonsense, and anyone who has spent any time in the real world—not in these halls, but in the real world where they work for a living and not just talk for a living—knows that is nonsense.

Plants close because they do not make money or because they cannot comply with Government regulations or other reasons. The basic reasons plants close is because they are not profitable. If they are profitable, people will fight to keep them going. If they are unprofitable, they have no choice but to shut them down.

They do not shut them down simply to hurt employees. What this bill suggests is massive penalties on employers when a business fails, because it is going to be almost impossible to comply with these complicated, detailed rules.

Now what does it accomplish? What it accomplishes is providing a massive penalty on someone whose business has just gone under. That may make those folks who hate free enterprise feel better, but it will not help those workers. It will hurt them, because it takes funds and the ability to operate out of the hands of those who provide the jobs.

It penalizes those people who are fighting to keep the business going. The simple fact is that the myth that this bill is built around is inaccurate. Rather than help the workers, it will hurt them.

Let us take a second aspect. Will the law make a plant stay open when it is unprofitable? That is one of the objectives of the backers of the bill. Will the plant have to stay open when it is unprofitable? The simple fact is, it will not.

The simple fact is that economics dictate when an enterprise is losing money it has to either adjust to become competitive or go out of business. Well, that does not mean you cannot delay it for awhile; that does not mean you cannot subsidize it for awhile, but do we really want to subsidize the makers of buggy whips?

The simple fact is, in a free enterprise system or even a socialist system, change has to occur. I hear the voices of those opposed to change of any kind, but the simple fact is, if we care about our workers and our citizens in this country, we know change has to come, and we have to adapt to it.

This law will not stop an unprofitable plant from closing. What will it do? What happens when you run an enterprise and you have problems? One of your concerns is to fight to make sure that you can get supplies and raw materials to come in that plant gate. Normally, suppliers of raw materials or other supplies end up providing credit. That credit is essential. It is essential because very few businesses are able to pay for everything c.o.d.

There has to be some float, in the time that it takes you to get paid from your customers; so the ability to purchase raw material and supplies is vital and important.

What happens when you give that supplier notice that you are going to shut down your plant in 90 days? You know what happens; the simple fact is, when you give him that notice, he is less likely to sell you raw material and supplies, and if he does, he is very likely to ask for cash on delivery.

Most healthy enterprises have trouble paying on delivery, much less ones that are experiencing problems. Requiring 90 days' notice of a shutdown will precipitate the shutdown because of the reaction of the suppliers to it.

It does not accomplish what the backers of the bill want.

What about creditors? One of the vital things for any continuing enterprise is to have a usable line of credit. Most lines of credit for businesses in this country have a provision that allows the lender to call the loan.

What we have designed here is a system that almost mandates, if there

are major problems, an advanced notice of 90 days of shutting down the plant, which then will precipitate a reaction on the part of the creditor. He could or she could call the line of credit and close down the plant itself.

At the very least, it will make it far more difficult to secure vital financing at the very time you ought to be fighting to make this enterprise work. Once again, what this bill does is make it far more likely that people will lose their jobs.

What about customers? Anybody here want to buy products from a plant that is going to shut down in 90 days? Oh, yes, there are some, but the simple reality is that this bill makes it much more difficult to sell the products of an enterprise.

By giving 90 days' notice you say to those customers: We might be out of business in 90 days. You might not be able to get spare parts for the product we manufacture. You might not be able to get a continuing supply. You might have to change your whole process if you rely on this enterprise.

Once again, what this bill does is make it far more likely an enterprise will got out of existence. I suggest to the gentleman and gentlewomen who have offered this bill that they have not thought this bill through. Rather than help people, it hurts them.

Take a look at the countries that have tried this. I do not suggest that the bad experiences of other countries that have tried this idea are solely related to this law. I think those bad experiences are partly related to this law and partly related to other laws that reflect that kind of hatred of enterprise.

Take a look at the facts before you push this off on the American people. From 1982 to 1984 the United States saw unemployment drop 31 percent; a tremendous record. What about those countries that had so-called plant closing laws?

In contrast to the dramatic drop in unemployment in the United States, the countries that tried this brand of legislation had the opposite experience. France, during that same period we had a 31-percent drop in unemployment, had a 15-percent increase in unemployment. Germany had a 23-percent increase in unemployment. The United Kingdom had a 9-percent increase in unemployment.

This law does not work; what it does is make it far more difficult for people to maintain jobs and operations.

For Sweden, which had a similar law we do not have figures for the 1982 to 1984 period, but do have figures that go from 1980 to 1983. During that period, they saw unemployment rise 75 percent. That law does not work. It has made things more difficult; not better.

Let us take a look at one other thing. I think it is a fundamental question we ought to be talking about tonight. How do we create jobs? How do we help American citizens have a better opportunity? How do we care for those who were thrown out of work?

I think there are some answers to that. What are they? We have got to be competitive; that is one thing. We in Government can do our part: We can eliminate redtape, we can eliminate unnecessary paperwork, we can reduce cost of operation, we can provide a favorable climate for putting Americans to work in this country. We can eliminate unnecessary regulations which cost American businesses billions of dollars a year in an unnecessary waste of redtape and paperwork. They tend to make us noncompetitive. At the worst, those regulations that are unneeded drive businesses and enterprises out of the country.

This House must begin to control the deficits that push up interest rates and raise the value of the dollar to a level that makes it very difficult to compete in foreign markets.

If you care about workers and their jobs, the changes start here, in this Chamber, with each and every Member who could have the courage to stand up and vote to get our deficit in line. Straightening out our budget, will do more to help out people who are unemployed than any single thing you could do.

This bill does none of that. It reflects a deep and abiding hatred for jobs and enterprise. It reflects a deep and abiding hatred for those who provide jobs—a hate of change, a hate of enterprise and hostility toward a system that has been the most productive in the history of the world.

The tragedy is that what we need right now as Americans is to begin to work together; not hate the employee or hate the union, not hate the employer who works for jobs or the investor or the person who provides his labor or her labor for the enterprise. We need a climate of cooperation that says we are going to work together to make America competitive again.

If that is what we want, if we want America to be competitive again, let us defeat this misbegotten bill, and let us stand shoulder to shoulder to solve the problems in Congress that will really begin to make America the land of opportunity again.

I want to thank my friend from Texas [Mr. DELAY] and thank him particularly for his leadership on this issue. I am convinced, if more Members took the time to look into this bill as he has, that it would last a very brief time on the floor.

Mr. DELAY. I would hope so, and I thank the gentleman from Colorado [Mr. BROWN] for coming down at this late hour and talking about an issue that I think is vital to America's ability to create jobs in defeating H.R. 1616.

I might ask the gentleman: It was proposed during the debate that a substitute might be offered on the floor either tomorrow or Thursday, and this substitute as it was presented by its proponents was, "Yes, we understand the problem and we are going to try to deal with it in a compromise."

In my opinion, that substitute is a compromise for compromise's sake.

□ 2120

Now I might point out to the gentleman and ask the gentleman if, in his very succinct and pointed way, he can detail the effects on businesses and on our economy. The substitute, that is, this substitute that still is a notification substitute although it cuts it down from 90 to 60 days and still is a notification substitute that does raise the size of businesses which would have to comply with this law to businesses which have 200 or more employees at a single site or 50 or more employees at a single site in an area outside of a metropolitan statisical area as defined by the Office of Management and Budget pursuant to its authority under section, and it goes on, blah, blah, blah, as it goes on and on and on, it is still a notification bill. It is still, I think, and I would hope the gentleman would express himself on this. Would the gentleman's words still apply here?

Mr. BROWN of Colorado. I might say to the gentleman that the substitute still does not deal with the basic economic realities. People do not close a plant because they want to. They close it because it is unprofitable. Requiring notice still puts the creditors and the suppliers and customers on notice that the plant may shut down.

By putting those folks on notice, what you do is precipitate a closing of the plant that might never have had to close. So while the substitute is more limited, it still provides those elements of economic unreality that will make the situation worse, not better.

What you are doing with this bill is causing a notice that will seal the fate of the business rather than creating a climate where people can work together and solve problems.

Mr. DELAY. I do not think it was mentioned in the debate that this bill, and, frankly, the substitute, if you look at it, could also apply to supermarkets which want to close one unprofitable location and move to another location in the same town. They would have to go through this procedure. Even under the substitute, the minute they give notice to their employees of the 60 days, in 60 days they are going to be moving, those employees will start looking for jobs. Now, if he wants to take his employees and reemploy them in another supermarket

in another part of town and they are running around looking for other jobs, what does that do to the employer who is under severe monetary pressure because it costs a lot of money to build a new store or to buy into a new store and move all that equipment? Just the moving alone costs a lot of money. Now, he has to spend more money, then, rehiring people because a lot of his employees left him looking for other jobs.

Mr. BROWN of Colorado. No question, that gets to be a problem. Whenever you have an attorney come in and advise on an operation like this, the question to the attorney is: "How should I do it? How should I conduct my affairs? I do not know that I need to close down in 60 or 90 days. Should I give notice even though I do not know there is a chance I could make it?" The attorney, if he is a competent attorney, says, "If you don't give notice, you face horrible penalties. If you do give notice, you still have a way to work around this." So the advice I believe every enterprise is going to get in this is: If there is any question, give notice, give notice of the closing. The people who get hurt by that the most are the workers themselves.

One aspect of this is that we have not discussed is that we still have a labor law in this country that provides protection for those workers. That is still in existence. This bill comes around and supersedes the labor law in many areas. So protections that are in the law for workers can be superseded or denied, in effect, by this statute. What we have is a bill, and a substitute, that is held out as an effort to protect employees. In reality, what it will do is harm those very employees.

Mr. DELAY. And the communities that these plants are located in.

Mr. BROWN of Colorado. No question about that. Look at all the other countries who have lived under these kinds of laws, and see what happens to job opportunities in those nations. You can debate all you want over issues, and sometimes we are right and sometimes we are wrong, but when you try something and it fails, then it is time to look for a different answer.

The fact is, this idea has been tried in other countries and it has been an abysmal failure.

Mr. DeLAY. Time and time again. Now, I just cannot imagine, and I know the gentleman, Mr. BROWN of Colorado, was a member of chambers in Colorado, as I was a member of chambers in Texas. In my chamber work, one of the things we consistently and constantly did was have an economy development committee that went around the United States and foreign countries, for that matter, trying to entice businesses to come into my community and build plants, creating jobs. That is important to state, creating jobs. Workers and labor unions do not create jobs. They take advantage of those, they make themselves advantaged over working those jobs. But I have yet to see a labor union go out and start a business.

They work the jobs, but they do not create jobs. Businesses and capital and entrepreneurs and the free enterprise system create jobs. So when these chambers go out trying to entice industry to come in and build a new plant or a new store in their area in order to create jobs, to employ maybe the people who were just laid off from another plant or another type of business, it has been proven time and time again, especially in the history of the countries which have tried this kind of legislation, that businesses, corporations, and individuals tend to shy away and will not build jobs in those areas.

That is hurting a community's ability to revive itself, to expand its opportunities, to expand the opportunities of workers, and I think is devastating. It is ill-founded in this case.

Mr. BROWN of Colorado. The gentleman makes a good point. The reality is a successful economy is like building a chain. Included in the chain is capital which provides for equipment; included in the chain is labor that provides the core of the operations and the creative effort; included in the chain is management which is important to set the course and set standards and goals.

The fact is, all of us in America operate by working together, and we are a chain. Like a chain, we are as strong or as weak as our weakest link.

This bill is an effort to inflict heavy damage on one link of that chain. By doing that, it destroys the integrity of the entire chain which is our economy. It is this blind hatred of a portion, a vital portion of our economy, I think, that is the bill's undoing. We ought to be focusing on working together instead of trying to impose extremely harsh penalties on one vital sector in that chain.

Mr. DELAY. I agree. I certainly appreciate the gentleman coming down at this very late hour and participating in this special order. I cannot tell the Speaker how important I think the defeat of this bill is to the American people, to the American worker, and to the communities where businesses are located and workers work and avail themselves of the opportunities that are provided through our fine, free enterprise system, that if we would just get Government out of it, there is no limit to where we can go.

Mr. DANNEMEYER. Mr. Speaker, this week the House will consider H.R. 1616, the Labor-Management Notification and Consultation Act of 1985. As you know, this legislation requires employers with 50 or more employees to notify and consult with employees at least 90 days before ordering a plant closing or permanent layoffs. In complying with this requirement, an employer would be obligated to meet with his employees and attempt to arrive at a satisfactory alternative to the proposed action.

If the employer did not attempt to provide an alternative, the Federal Mediation and Conciliation Service could order the employer to continue meeting with his employees by obtaining an injunction against the employer. The injunction would extend the 90-day period and effectively give employees a cause of action against their employer.

While I can sympathize with the plight of any worker affected by a plant closing or mass layoffs, the enactment of legislation along these lines is inadvisable. Businesses could be forced to continue operating, even if there were legitimate reasons for them to discontinue a portion of their operations. In many instances, an employer needs to have flexibility to shut down a portion of his operations, especially if he is noticing that it is unprofitable and could ultimately affect the survival of the company as a whole. If this legislation is enacted, an employer may have to operate a facet of his entity which proves to be a liability, possibly risking bankruptcy, rather than simply closing a single portion of his operations.

If an employer is forced into shutting down his entire business, rather than just one facet, then all of the company's employees will be left without work, not just the few that were to have been laid off at the outset.

Western European countries have implemented regulations similar to those found in H.R. 1616. Yet, from 1974 to 1984, Western Europe lost 3 million jobs. On the other hand, from 1965 to 1984, the working age population increased in the United States by 38 percent, but employment opportunities during that period increased by 45 percent.

In my opinion, we cannot follow the example set by Western Europe and we must preserve employment opportunities for our citizens. Business has already taken the lead by publishing voluntary guidelines to be followed by companies which are proposing to close their operations or to relocate their plant. These guidelines include a flexible combination of voluntary notification of employees, severance pay, benefit extensions, liberalized retirement provisions, placement, and retraining.

With the kind of initiative displayed by private industry, we must not hamper industry with unwarranted legislation. To compete effectively throughout the world, companies need the flexibility to make necessary decisions concerning their operations and to implement them without jeopardizing their future, especially if employers are to continue creating jobs for future generations.

Mr. DELAY. Mr. Speaker, I yield back the balance of my time.

SERIOUS PROBLEMS IN UNIFORM POLL CLOSING

The SPEAKER pro tempore. Under a previous order of the House, the gen-

tleman from Minnesota [Mr. FRENZEL] is recognized for 30 minutes.

Mr. FRENZEL. Mr. Speaker, the House Administration Committee recently voted out the uniform poll closing bill, H.R. 3525. This bill would mandate a uniform poll closing time of 9 e.s.t. for Presidential general elections only and would keep the Pacific time zone States on daylight saving time until the Sunday after election day.

Not only would this seemingly innocuous bill require 39 States to change the time the polls close in their States but would create havoc for the transportation industries. I want to call to my colleague's attention a letter I received from Mr. William J. Burhop of the Air Transport Association of America.

Mr. Burhop states that this bill would result in considerable confusion among passengers and cargo shippers moving goods in interstate commerce, disrupt airline schedules, and cause airlines and related travel industry business to incur considerable expense. I would commend his letter to you and suggest that when we are asked to consider this bill, you will vote against it.

AIR TRANSPORT
ASSOCIATION OF AMERICA,
Washington, DC, November 4, 1985.

Hon. BILL FRENZEL,
U.S. House of Representatives, Washington, DC.

DEAR REPRESENTATIVE FRENZEL: I am writing to you on behalf of the members of the Air Transport Association of America (ATA) to express our concern over the confusion, disruption and expense that would be caused by a proposal to extend Pacific Daylight Savings Time for two weeks every four years in order to achieve uniform voter poll closings during presidential elections.

A bill to close all voter polls within the continental United States at 9:00 p.m. Eastern Standard Time on the day of a presidential election was recently reported by the Committee on House Administration. That bill, H.R. 3525, would require Daylight Savings Time to be extended in the Pacific Time Zone for two weeks more than the rest of the country during presidential election years to avoid the problem of west coast polls closing at 6:00 p.m., which is too early for many voters to reach the polls after work. By extending Pacific Daylight Savings Time for two weeks, the west coast polls would close at 7:00 p.m. Pacific Daylight Savings Time, which would be 9:00 p.m. Eastern Standard Time. All of California, Nevada, Oregon, Washington, and part of Idaho would be affected.

ATA fully understands this Congressional effort to establish a uniform closing time for voter polls, but we believe the method proposed by H.R. 3525 is defective. It would result in considerable confusion among passengers and cargo shippers moving goods in interstate commerce, disrupt airline schedules, and cause airlines and related travel industry businesses to incur considerable expense. A few of the problems H.R. 3525 would create are highlighted below.

The most serious problem would be the disruption of airline schedules, impacting both passengers and cargo shippers nationwide. This nationwide impact results from the fact that many flight schedules to and from other parts of the country are geared to Pacific Time Zone departure and arrival times, and because the availability of aircraft and flight crews at other cities may be dependent upon Pacific Time Zone arrivals or departures. In many instances, existing flight connections at hub operations would be broken unless there could be corresponding adjustments to connecting flights to compensate for Pacific Time Zone variations. Such adjustments, however, are not always possible.

Because airline schedules are somewhat like a jigsaw puzzle with many pieces to be matched, it is not possible to quantify each of the specific effects of a Daylight Savings Time variation without going through the mechanics of a complete airline schedule change. We suggest, however, that the effects on the public, and the costs to the airline industry, are significant.

Second, the proposal would cause airlines to incur substantial costs to develop and publish two complete schedules in a two-week period. The cost to carriers for publishing two schedules in printed airline guides, and the cost of loading two schedules into airline computer reservation systems, due to the staggered time zone changes, would double for the month of November (and very probably for the month of October) in each presidential election year.

Third, not only would flight schedules be adversely affected, but many crew scheduling problems would occur both in terms of FAA duty time limits and logistics. In some cases, schedule changes required by the time zone change would alter the actual hours of service of many flight crews to the point of exceeding duty time limits, thereby necessitating further personnel scheduling changes Also, since flight crew members for a particular flight often come from different parts of the country, changing the Pacific Time Zone would disrupt crew scheduling.

Fourth, airlines would be unable to comply with nighttime noise curfews at several west coast airports. With only a two-hour time difference between the east and west coasts, west-bound flights scheduled pursuant to the normal three hour time difference could not comply with nighttime restrictions at not less than four airports, affecting approximately 28 flights daily. If airlines are forced to adjust flight schedules to meet the curfews, considerable inconvenience will be suffered by passengers and cargo shippers, and airlines will suffer substantial productivity losses.

Finally, a significant impact will be felt by the business community, particularly those persons traveling west to conduct business on a same day turn-around trip.

The problem addressed by the legislation was not caused by the airlines and the burden of its solution should not be borne by the airlines or their passengers and shippers. ATA believes there is a better way to achieve the goal of uniform voter poll closings, and we welcome the opportunity to work with Congress in finding a more appropriate mechanism than H.R. 3525.

Sincerely,

WILLIAM J. BURHOP,
Senior Vice President, Government Affairs.

CONFERENCE REPORT ON S. 1042

Mr. DELLUMS submitted the following conference report and statement on the bill (S. 1042) to authorize certain construction at military installations for fiscal year 1986, and for other purposes:

CONFERENCE REPORT (H. REPT. No. 99-366)

The committee of conference on the disagreeing votes of the two Houses on the amendment of the House to the bill (S. 1042) to authorize certain construction at military installations for fiscal year 1986, and for other purposes, having met, after full and free conference, have agreed to recommend and do recommend to their respective Houses as follows:

That the Senate recede from its disagreement to the amendment of the House and agree to the same with an amendment as follows:

In lieu of the matter proposed to be inserted by the House amendment insert the following:

SECTION 1. SHORT TITLE

This Act may be cited as the "Military Construction Authorization Act, 1986".

TITLE I—ARMY

SEC. 101. AUTHORIZED ARMY CONSTRUCTION AND LAND ACQUISITION PROJECTS

(a) INSIDE THE UNITED STATES.—(1) The Secretary of the Army may acquire real property and may carry out military construction projects in the amounts shown for each of the following installations and locations inside the United States:

UNITED STATES ARMY FORCES COMMAND

Fort Bragg, North Carolina, $68,380,000.
Fort Campbell, Kentucky, $26,200,000.
Fort Carson, Colorado, $51,350,000.
Fort Devens, Massachusetts, $610,000.
Fort Drum, New York, $85,490,000.
Fort Greely, Alaska, $2,500,000.
Fort Hood, Texas, $78,450,000.
Fort Hunter-Liggett, California, $11,100,000.
Fort Indiantown Gap, Pennsylvania, $5,300,000.
Fort Irwin, California, $28,150,000.
Fort Lewis, Washington, $104,980,000.
Fort McCoy, Wisconsin, $940,000.
Fort Meade, Maryland, $18,930,000.
Fort Ord, California, $25,820,000.

Fort Benning, Georgia, $39,650,000.
Fort Bliss, Texas, $31,760,000.
Fort Dix, New Jersey, $6,100,000.
Fort Gordon, Georgia, $46,040,000.
Fort Jackson, South Carolina, $6,600,000.
Fort Knox, Kentucky, $20,770,000.
Fort Leavenworth, Kansas, $6,900,000.
Fort Lee, Virginia, $13,082,000.
Fort Leonard Wood, Missouri, $12,350,000.
Fort McClellan, Alabama, $39,350,000.
Fort Pickett, Virginia, $420,000.

Fort Rucker, Alabama, $11,950,000.
Fort Sill, Oklahoma, $52,000,000.
Fort Story, Virginia, $1,950,000.

MILITARY DISTRICT OF WASHINGTON

Fort Myer, Virginia, $8,300,000.

UNITED STATES ARMY MATERIEL COMMAND

Aberdeen Proving Ground, Maryland, $4,670,000.
Anniston Army Depot, Alabama, $8,960,000.
Army Materiel and Mechanics Research Center, Massachusetts, $770,000.
Corpus Christi Army Depot, Texas, $4,400,000.
Detroit Arsenal, Michigan, $320,000.
Dugway Proving Ground, Utah, $8,650,000.
Fort Wingate, New Mexico, $490,000.
McAlester Army Ammunition Plant, Oklahoma, $2,300,000.
Navajo Depot Activity, Arizona, $240,000.
New Cumberland Army Depot, Pennsylvania, $88,000,000.
Picatinny Arsenal, New Jersey, $1,000,000.
Pine Bluff Arsenal, Arkansas, $19,000,000.
Pueblo Depot Activity, Colorado, $200,000.
Red River Army Depot, Texas, $820,000.
Redstone Arsenal, Alabama, $25,750,000.
Rock Island Arsenal, Illinois, $29,000,000.
Sacramento Army Depot, California, $4,550,000.
Savanna Army Depot, Illinois, $510,000.
Seneca Army Depot, New York, $1,410,000.
Sierra Army Depot, California, $2,600,000.
Tooele Army Depot, Utah, $11,490,000.
Umatilla Depot Activity, Oregon, $260,000.
Yuma Proving Ground, Arizona, $240,000.

AMMUNITION FACILITIES

Holston Army Ammunition Plant, Tennessee, $320,000.
Indiana Army Ammunition Plant, Indiana, $210,000.
Iowa Army Ammunition Plant, Iowa, $810,000.
Kansas Army Ammunition Plant, Kansas, $570,000.
Lake City Army Ammunition Plant, Missouri, $930,000.
Louisiana Army Ammunition Plant, Louisiana, $640,000.
Newport Army Ammunition Plant, Indiana, $8,000,000.
Radford Army Ammunition Plant, Virginia, $2,910,000.

UNITED STATES ARMY INFORMATION SYSTEMS COMMAND

Fort Huachuca, Arizona, $2,050,000.

UNITED STATES MILITARY ACADEMY

United States Military Academy, New York, $31,000,000.

UNITED STATES ARMY HEALTH SERVICES COMMAND

Fort Detrick, Maryland, $7,600,000.
Tripler Army Medical Center, Hawaii, $970,000.
Walter Reed Army Medical Center, Washington, District of Columbia, $1,150,000.

MILITARY TRAFFIC MANAGEMENT COMMAND

Bayonne Military Ocean Terminal, New Jersey, $3,200,000.
Oakland Army Base, California, $330,000.
Sunny Point Military Ocean Terminal, North Carolina, $1,200,000.

UNITED STATES ARMY CORPS OF ENGINEERS

Humphreys Engineer Center, Supt. Activity, Virginia, $11,000,000.

ASSISTANT CHIEF OF ENGINEERS

Various, United States, $3,000,000.

(2) Funds appropriated for construction of an Army aviation museum at Fort Rucker, Alabama, that is authorized in paragraph (1) may not be obligated for that purpose unless the Secretary of the Army determines that an amount equal to the amount appropriated for that purpose has been made available for such purpose from private sources.

(b) OUTSIDE THE UNITED STATES.—The Secretary of the Army may acquire real property and may carry out military construction projects in the amounts shown for each of the following installations and locations outside the United States:

UNITED STATES ARMY, JAPAN

Japan, $1,050,000.

EIGHTH UNITED STATES ARMY

Wiesbaden, Germany, $2,960,000.
Wildflecken, Germany, $20,000,000.
Wuerzburg, Germany, $48,070,000.
Various Locations, Germany, $101,000,000.
Various Locations, Greece, $1,440,000.
Various Locations, Italy, $1,850,000.
Various Locations, Turkey, $7,440,000.

SEC. 102. FAMILY HOUSING

The Secretary of the Army may construct or acquire family housing units (including land acquisition) at the following installations in the number of units shown, and in the amount shown, for each installation:

Fort Ord, California, six hundred units and seventy manufactured home spaces, $50,640,000.
Fort Carson, Colorado, fifty manufactured home spaces, $712,000.
Fort Stewart, Georgia, twenty manufactured home spaces, $253,000.
Bamberg, Germany, one hundred and six units, $7,209,000.
Various locations, Germany, ninety-eight units, $6,120,000.
Vilseck, Germany, three hundred and seventy units, $26,830,000.
Fort Riley, Kansas, fifty manufactured home spaces, $700,000.
Fort Campbell, Kentucky, fifty manufactured home spaces, $689,000.
Fort Devens, Massachusetts, twenty manufactured home spaces, $317,000.
Fort Drum, New York, eight hundred units, $67,500,000.
Fort Bragg, North Carolina, two units by reconfiguration and fifty manufactured home spaces, $637,000.
Dugway Proving Ground, Utah, one hundred and four units and twenty-four manufactured home spaces, $8,674,000.
Fort Myer, Virginia, six units, $596,000.

SEC. 103. IMPROVEMENTS TO MILITARY FAMILY HOUSING UNITS

(a) AMOUNT AUTHORIZED.—(1) Subject to section 2825 of title 10, United States Code, the Secretary of the Army may make expenditures to improve existing military family housing units in an amount not to exceed $167,521,000, of which $10,950,000 is available only for energy conservation projects.

(2) Of the funds appropriated pursuant to authorizations made in subsection (a) and in section 601(a) for support of military family housing, the Secretary of the Army shall use $1,521,000 for housing improvements at Watervliet Arsenal, New York.

(b) WAIVER OF MAXIMUM PER UNIT COST FOR CERTAIN IMPROVEMENT PROJECTS.—Notwithstanding the maximum amount per unit for an improvement project under section 2825(b) of title 10, United States Code, the Secretary of the Army may carry out projects to improve existing military family housing units at the following installations in the number of units shown, and in the amount shown, for each installation:

Walter Reed Army Medical Center, Washington, District of Columbia, one unit, $99,000.
Fort Bragg, North Carolina, one hundred and sixty-four units, $4,712,000.
Aberdeen Proving Ground, Maryland, eighty-one units, $2,762,000.
Fort Monmouth, New Jersey, three hundred and sixty-six units, $14,800,000.

(c) FAMILY HOUSING IMPROVEMENTS AT FORT MONMOUTH, NEW JERSEY.—The housing units specified in subsection (b) for Fort Monmouth, New Jersey, includes 135 units authorized in section 101 of this Act and 231 units authorized in section 101 of the Military Construction Authorization Act, 1985 (Public Law 98-407; 98 Stat. 1498).

SEC. 104. MADIGAN ARMY MEDICAL CENTER, FORT LEWIS, WASHINGTON

Section 601(c) of the Military Construction Authorization Act, 1985 (Public Law 98–407; 98 Stat. 1512), is amended by striking out "and the amount specified in subsection (b)" and inserting in lieu thereof ", the amount specified in subsection (b)(1), and $326,800,000 (the amount authorized for the construction of the Madigan Army Medical Center, Fort Lewis, Washington)".

TITLE II—NAVY

SEC. 201. AUTHORIZED NAVY CONSTRUCTION AND LAND ACQUISITION PROJECTS

(a) INSIDE THE UNITED STATES.—The Secretary of the Navy may acquire real property and may carry out military construction projects in the amounts shown for each of the following installations and locations inside the United States:

UNITED STATES MARINE CORPS

Marine Corps Logistics Base, Barstow, California, $530,000.
Marine Corps Air Station, Beaufort, South Carolina, $6,905,000.
Marine Corps Mountain Warfare Training Center, Bridgeport, California, $1,470,000.
Marine Corps Camp Detachment, Camp Elmore, Norfolk, Virginia, $3,995,000.
Marine Corps Base, Camp Lejeune, North Carolina, $24,140,000.
Marine Corps Base, Camp Pendleton, California, $25,175,000.
Marine Corps Air Facility, Camp Pendleton, California, $14,310,000.
Marine Corps Air Station, Cherry Point, North Carolina, $36,450,000.
Marine Corps Air Station, El Toro, California, $30,375,000.
Marine Corps Air Station, Kaneohe Bay, Hawaii, $17,420,000.
Marine Corps Air Station, New River, North Carolina, $10,780,000.
Marine Corps Recruit Depot, Parris Island, South Carolina, $3,610,000.
Marine Corps Air Station, Tustin, California, $17,970,000.
Marine Corps Air-Ground Combat Center, Twentynine Palms, California, $22,670,000.
Marine Corps Development and Education Command, Quantico, Virginia, $7,060,000.
Marine Corps Air Station, Yuma, Arizona, $16,750,000.

CHIEF OF NAVAL RESEARCH

Naval Research Laboratory, Washington, District of Columbia, $28,900,000.

OFFICE OF THE COMPTROLLER OF THE NAVY

Navy Finance Center, Cleveland, Ohio, $2,940,000.

CHIEF OF NAVAL OPERATIONS

Naval Academy, Annapolis, Maryland, $18,480,000.
Naval Space Command, Dahlgren, Virginia, $4,700,000.
Navy Regional Data Automation Center, Jacksonville, Florida, $10,300,000.
Naval Space Surveillance Field Station, Lewisville, Arkansas, $675,000.
Navy Tactical Interoperability Support Activity, Mayport, Florida, $470,000.
Navy Tactical Interoperability Support Activity, North Island, California, $585,000.
Navy Regional Data Automation Center, Norfolk, Virginia, $10,880,000.
Intelligence Center, Pacific, Pearl Harbor, Hawaii, $2,900,000.
Naval Space Surveillance Field Station, San Diego, California, $600,000.
Commandant Naval District, Washington, District of Columbia, $6,300,000.

COMMANDER IN CHIEF, ATLANTIC FLEET

Naval Air Station, Brunswick, Maine, $3,040,000.
Naval Air Station, Cecil Field, Florida, $29,835,000.
Naval Station, Charleston, South Carolina, $9,960,000.
Naval Air Station, Jacksonville, Florida, $5,800,000.
Naval Amphibious Base, Little Creek, Virginia, $16,370,000.
Naval Station, Mayport, Florida, $10,820,000.
Naval Submarine Base, New London, Connecticut, $365,000.
Naval Station, New York, New York, $33,160,000.
Naval Air Station, Norfolk, Virginia, $10,675,000.
Naval Station, Norfolk, Virginia, $800,000.
Naval Air Station, Oceana, Virginia, $16,940,000.

COMMANDER IN CHIEF, PACIFIC FLEET

Naval Facility, Adak, Alaska, $2,650,000.
Naval Air Station, Alameda, California, $8,650,000.
Naval Submarine Base, Bangor, Washington, $5,200,000.
Amphibious Task Force, Camp Pendleton, California, $9,020,000.
Naval Amphibious Base, Coronado, California, $16,150,000.
Naval Station, Everett, Washington, $17,640,000.
Naval Air Station, Fallon, Nevada, $36,500,000.
Naval Air Station, Lemoore, California, $2,300,000.
Naval Station, Long Beach, California, $16,000,000.
Naval Air Station, Miramar, California, $385,000.
Naval Air Station, North Island, California, $18,593,000.
Commander, Oceanographic System, Pacific, Pearl Harbor, Hawaii, $1,180,000.
Naval Submarine Base, Pearl Harbor, Hawaii, $2,900,000.
Naval Station, San Diego, California, $16,197,000.
Naval Submarine Base, San Diego, California, $14,120,000.
Naval Station Mare Island, Vallejo, California, $735,000.
Naval Air Station, Whidbey Island, Washington, $2,650,000.

CHIEF OF NAVAL EDUCATION AND TRAINING

Fleet and Mine Warfare Training Center, Charleston, South Carolina, $1,180,000.
Naval Amphibious School, Coronado, California, $9,330,000.
Surface Warfare Officers School Command Detachment, Coronado, California, $5,200,000.
Naval Air Station, Corpus Christi, Texas, $4,360,000.
Fleet Combat Training Center, Atlantic, Dam Neck, Virginia, $9,640,000.
Naval Explosive Ordnance Disposal School, Eglin, Florida, $13,700,000.
Naval Training Center, Great Lakes, Illinois, $20,740,000.
Naval Construction Training Center, Gulfport, Mississippi, $2,460,000.
Naval Amphibious School, Little Creek, Virginia, $420,000.
Naval Air Station, Memphis, Tennessee, $11,695,000.
Naval Air Station, Meridian, Mississippi, $450,000.
Naval Submarine School, New London, Connecticut, $13,300,000.
Naval Education and Training Center, Newport, Rhode Island, $19,580,000.
Naval Training Center, Orlando, Florida, $9,400,000.
Naval Air Station, Pensacola, Florida, $225,000.
Naval Technical Training Center, Pensacola, Florida, $5,670,000.
Naval Construction Training Center, Port Hueneme, California, $4,800,000.
Fleet Anti-Submarine Warfare Training Center, Pacific, San Diego, California, $7,850,000.
Fleet Combat Training Center, Pacific, San Diego, California, $305,000.
Fleet Training Center, San Diego, California, $4,750,000.
Naval Training Center, San Diego, California, $2,900,000.
Naval Technical Training Center, San Francisco, California, $1,570,000.
Naval Air Station, Whiting Field, Florida, $810,000.

NAVAL MILITARY PERSONNEL COMMAND

Navy Band, Washington, District of Columbia, $1,900,000.

NAVAL MEDICAL COMMAND

Naval Medical Clinic, Annapolis, Maryland, $12,540,000.
Naval Hospital, Groton, Connecticut, $8,720,000.
Naval Hospital, Jacksonville, Florida, $18,600,000.
Naval Hospital, Long Beach, California, $6,300,000.
Naval Hospital, Oak Harbor, Washington, $13,900,000.
Naval Hospital, Pensacola, Florida, $7,250,000.
Naval Hospital, San Diego, California, $450,000.

CHIEF OF NAVAL MATERIEL

Naval Air Rework Facility, Alameda, California, $22,780,000.
Puget Sound Naval Shipyard, Bremerton, Washington, $30,945,000.
Naval Supply Center, Bremerton, Washington, $1,520,000.
Naval Weapons Station, Charleston, South Carolina, $4,070,000.
Polaris Missile Facility, Atlantic, Charleston, South Carolina, $1,620,000.
Naval Air Rework Facility, Cherry Point, North Carolina, $1,720,000.
Naval Weapons Center, China Lake, California, $9,315,000.
Naval Weapons Station, Earle, New Jersey, $3,720,000.
Naval Construction Battalion Center, Gulfport, Mississippi, $2,550,000.
Naval Ordnance Station, Indian Head, Maryland, $1,570,000.
Naval Supply Center, Jacksonville, Florida, $1,555,000.
Naval Undersea Warfare Engineering Station, Keyport, Washington, $2,440,000.
Naval Submarine Base, Kings Bay, Georgia, $388,360,000.
Naval Air Engineering Center, Lakehurst, New Jersey, $600,000.
Long Beach Naval Shipyard, Long Beach, California, $7,160,000.
Naval Ordnance Station, Louisville, Kentucky, $16,950,000.
Naval Air Rework Facility, Norfolk, Virginia, $13,080,000.
Naval Supply Center, Norfolk, Virginia, $2,350,000.
Naval Air Rework Facility, North Island, California, $9,465,000.
Naval Supply Center, Oakland, California, $7,890,000.
Pearl Harbor Naval Shipyard, Pearl Harbor, Hawaii, $1,860,000.
Navy Public Works Center, Pearl Harbor, Hawaii, $13,700,000.
Navy Public Works Center, Pensacola, Florida, $8,430,000.
Pacific Missile Test Center, Point Mugu, California, $10,200,000.
Naval Construction Battalion Center, Port Hueneme, California, $23,650,000.
Naval Ship Weapon Systems Engineering Station, Port Hueneme, California, $10,780,000.
Naval Electronic Systems Engineering Center, Portsmouth, Virginia, $3,255,000.

Norfolk Naval Shipyard, Portsmouth, Virginia, $6,690,000.
Naval Supply Center, San Diego, California, $7,100,000.
Naval Electronic Systems Engineering Activity, Saint Inigoes, Maryland, $15,550,000.
Mare Island Naval Shipyard, Vallejo, California, $815,000.
Naval Air Development Center, Warminster, Pennsylvania, $4,220,000.
Naval Mine Warfare Engineering Activity, Yorktown, Virginia, $4,120,000.

NAVAL OCEANOGRAPHY COMMAND

Naval Oceanography Command Facility, Jacksonville, Florida, $390,000.
Naval Western Oceanography Center, Pearl Harbor, Hawaii, $4,500,000.

NAVAL TELECOMMUNICATIONS COMMAND

Naval Radio Station, Sugar Grove, West Virginia, $785,000.

NAVAL SECURITY GROUP COMMAND

Naval Security Group Activity, Adak, Alaska, $980,000.
Naval Security Group Activity, Northwest, Chesapeake, Virginia, $1,385,000.
Naval Security Group Activity, Skaggs Island, California, $395,000.
Naval Security Group Activity, Winter Harbor, Maine, $3,280,000.

(b) OUTSIDE THE UNITED STATES.—The Secretary of the Navy may acquire real property and may carry out military construction projects in the amounts shown for each of the following installations and locations outside the United States:

MARINE CORPS

Marine Corps Air Station, Iwakuni, Japan, $1,775,000.
Marine Corps Air Station, Futenma, Okinawa, Japan, $2,990,000.
Marine Corps Base Camp Smedley D. Butler, Okinawa, Japan, $2,250,000.

COMMANDER IN CHIEF, ATLANTIC FLEET

Naval Facility, Antigua, West Indies, $2,410,000.
Naval Facility, Argentia, Newfoundland, Canada, $700,000.
Naval Station, Guantanamo Bay, Cuba, $22,410,000.
Naval Station, Keflavik, Iceland, $21,780,000.
Atlantic Fleet Weapons Training Facility, Roosevelt Roads, Puerto Rico, $7,100,000.
Naval Station, Roosevelt Roads, Puerto Rico, $14,700,000.

COMMANDER IN CHIEF, PACIFIC FLEET

Navy Support Facility, Diego Garcia, Indian Ocean, $16,530,000.
Naval Air Facility, Diego Garcia, Indian Ocean, $22,450,000.
Naval Magazine, Guam, $11,270,000.
Naval Supply Depot, Guam, $6,550,000.
Naval Station, Guam, $10,200,000.
Naval Ship Repair Facility, Guam, $990,000.
Naval Magazine, Subic Bay, Republic of the Philippines, $250,000.
Naval Ship Repair Facility, Subic Bay, Republic of the Philippines, $13,270,000.

COMMANDER IN CHIEF, UNITED STATES NAVAL FORCES EUROPE

Naval Activities, London, United Kingdom, $7,635,000.
Naval Support Activity, Naples, Italy, $7,750,000.
Naval Air Station, Sigonella, Italy, $5,930,000.
Personnel Support Activity, London, United Kingdom, $450,000.

CHIEF OF NAVAL MATERIEL

Navy Public Works Center, Guam, $1,080,000.
Navy Public Works Center, Yokosuka, Japan, $4,400,000.

NAVAL TELECOMMUNICATIONS COMMAND

Naval Communication Area Master Station, Western Pacific, Guam, $8,945,000.
Naval Communication Station, Harold E. Holt, Exmouth, Australia, $2,690,000.

NAVAL SECURITY GROUP COMMAND

Naval Security Group Detachment, Diego Garcia, Indian Ocean, $3,700,000.

HOST NATION INFRASTRUCTURE SUPPORT

Various locations, $980,000.

SEC. 202. FAMILY HOUSING

(a) IN GENERAL.—The Secretary of the Navy may construct or acquire family housing units (including land acquisition) at the following installations in the number of units shown, and in the amount shown, for each installation:
Naval Air Station, Adak, Alaska, one hundred units, $15,500,000.
Marine Corps Air Station, El Toro, California, two hundred and eighty-two units, $29,800,000.
Marine Corps Air-Ground Combat Center, Twentynine Palms, California, one hundred units, $8,400,000.
Navy Public Works Center, San Diego, California, two hundred units, $15,200,000.
Fleet Training Group Pacific, Warner Springs, California, forty-four units, $4,400,000.
Naval Weapons Station, Earle, New Jersey, two hundred units, $15,400,000.
Aviation Supply Office, Philadelphia, Pennsylvania, one unit, $170,000.
Navy Public Works Center, Subic Bay, Republic of the Philippines, three hundred units, $24,180,000.

(b) NAVAL PUBLIC WORKS CENTER, SAN DIEGO.—The Secretary of the Navy may construct the two hundred housing units authorized by subsection (a) for the Navy Public Works Center, San Diego, California, at Telegraph Point or at any other suitable and available site.

SEC. 203. IMPROVEMENTS TO MILITARY FAMILY HOUSING UNITS

(a) AMOUNT AUTHORIZED.—Subject to section 2825 of title 10, United States Code, the Secretary of the Navy may make expenditures to improve existing military family housing units in an amount not to exceed $34,020,000.

(b) WAIVER OF MAXIMUM PER UNIT COST FOR CERTAIN IMPROVEMENT PROJECTS.—Notwithstanding the maximum amount per unit for an improvement project under section 2825(b) of title 10, United States Code, the Secretary of the Navy may carry out projects to improve existing military family housing units at the following installations in the number of units shown, and in the amount shown, for each installation:
Navy Public Works Center, San Diego, California, three hundred seventy-two units, $17,610,000.
Naval Air Station, Whidbey Island, Washington, one unit, $56,500.

SEC. 204. TRANSIENT HOUSING UNITS, CHINHAE, KOREA

The Secretary of the Navy may convert the four existing transient housing units contained in Building 706 in Chinhae, Korea, to family housing units.

SEC. 205. RESTRICTION ON FUNDING FOR NAVY STRATEGIC HOMEPORTING

Funds appropriated pursuant to an authorization in section 602 for Naval Strategic Homeporting may not be obligated or expended for such purpose until—
(1) the Secretary of the Navy has submitted to the Congress a report justifying the expenditure of the funds for such purpose; and
(2) a period of 90 days has elapsed after the day on which the report is received by the Congress.

TITLE III—AIR FORCE

SEC. 301. AUTHORIZED AIR FORCE CONSTRUCTION AND LAND ACQUISITION PROJECTS

(a) INSIDE THE UNITED STATES.—The Secretary of the Air Force may acquire real property and may carry out military construction projects in the amounts shown for each of the following installations and locations inside the United States:

AIR FORCE LOGISTICS COMMAND

Hill Air Force Base, Utah, $28,280,000.
Kelly Air Force Base, Texas, $39,749,000.
McClellan Air Force Base, California, $53,829,000.
Robins Air Force Base, Georgia, $7,350,000.
Tinker Air Force Base, Oklahoma, $31,500,000.
Wright-Patterson Air Force Base, Ohio, $21,890,000.

AIR FORCE SYSTEMS COMMAND

Brooks Air Force Base, Texas, $2,500,000.
Edwards Air Force Base, California, $7,250,000.
Eglin Air Force Base, Florida, $14,560,000.
Hanscom Air Force Base, Massachusetts, $24,700,000.
Sunnyvale Air Force Station, California, $2,700,000.

AIR FORCE RESERVE

Billy Mitchell Field, Wisconsin, $500,000.

AIR NATIONAL GUARD

Buckley Air National Guard Base, Colorado, $12,370,000.

AIR TRAINING COMMAND

Chanute Air Force Base, Illinois, $1,730,000.
Goodfellow Air Force Base, Texas, $27,500,000.
Keesler Air Force Base, Mississippi, $10,500,000.
Lackland Air Force Base, Texas, $22,750,000.
Laughlin Air Force Base, Texas, $1,900,000.
Lowry Air Force Base, Colorado, $6,850,000.
Mather Air Force Base, California, $2,700,000.
Randolph Air Force Base, Texas, $3,200,000.
Reese Air Force Base, Texas, $3,250,000.
Sheppard Air Force Base, Texas, $16,150,000.
Vance Air Force Base, Oklahoma, $4,210,000.
Williams Air Force Base, Arizona, $660,000.

AIR UNIVERSITY

Gunter Air Force Station, Alabama, $6,000,000.
Maxwell Air Force Base, Alabama, $12,000,000.

ALASKAN AIR COMMAND

Attu Research Site, Alaska, $910,000.
Eielson Air Force Base, Alaska, $44,950,000.
Elmendorf Air Force Base, Alaska, $5,000,000.
King Salmon Airport, Alaska, $8,600,000.
Shemya Air Force Base, Alaska, $45,900,000.

MILITARY AIRLIFT COMMAND

Altus Air Force Base, Oklahoma, $11,450,000.

Andrews Air Force Base, Maryland, $10,120,000.
Base 24, Classified Location, $6,170,000.
Bolling Air Force Base, District of Columbia, $250,000.
Charleston Air Force Base, South Carolina, $1,620,000.
Dover Air Force Base, Delaware, $16,890,000.
Eglin Auxiliary Field 9, Florida, $1,700,000.
Kirtland Air Force Base, New Mexico, $60,330,000.
McChord Air Force Base, Washington, $2,240,000.
McGuire Air Force Base, New Jersey, $14,550,000.
Norton Air Force Base, California, $4,570,000.
Pope Air Force Base, North Carolina, $440,000.
Scott Air Force Base, Illinois, $17,150,000.
Travis Air Force Base, California, $10,300,000.

PACIFIC AIR FORCES

Hickam Air Force Base, Hawaii, $480,000.
Wheeler Air Force Base, Hawaii, $2,850,000.

SPACE COMMAND

Cape Cod Air Force Station, Massachusetts, $600,000.
Cavalier Air Force Station, North Dakota, $950,000.
Clear Air Force Station, Alaska, $4,500,000.
Peterson Air Force Base, Colorado, $5,200,000.

SPECIAL PROJECT

Various Locations, $55,000,000.

STRATEGIC AIR COMMAND

Barksdale Air Force Base, Louisiana, $1,400,000.
Base 34, Classified Location, $8,920,000.
Beale Air Force Base, California, $5,850,000.
Belle Fourche Air Force Station, South Dakota, $4,080,000.
Blytheville Air Force Base, Arkansas, $3,750,000.
Carswell Air Force Base, Texas, $1,000,000.
Castle Air Force Base, California, $3,300,000.
Dyess Air Force Base, Texas, $16,950,000.
Ellsworth Air Force Base, South Dakota, $72,064,000.
Fairchild Air Force Base, Washington, $12,500,000.
F.E. Warren Air Force Base, Wyoming, $15,310,000.
Grand Forks Air Force Base, North Dakota, $62,730,000.
Griffiss Air Force Base, New York, $2,740,000.
Grissom Air Force Base, Indiana, $1,700,000.
K.I. Sawyer Air Force Base, Michigan, $22,580,000.
Malmstrom Air Force Base, Montana, $1,300,000.
March Air Force Base, California, $9,000,000.
McConnell Air Force Base, Kansas, $66,490,000.
Minot Air Force Base, North Dakota, $5,000,000.
Offutt Air Force Base, Nebraska, $10,440,000.
Pease Air Force Base, New Hampshire, $1,200,000.
Plattsburgh Air Force Base, New York, $1,050,000.
Vandenberg Air Force Base, California, $1,960,000.
Whiteman Air Force Base, Missouri, $4,650,000.
Wurtsmith Air Force Base, Michigan, $5,300,000.

TACTICAL AIR COMMAND

Bergstrom Air Force Base, Texas, $770,000.
Cannon Air Force Base, New Mexico, $12,500,000.
Davis-Monthan Air Force Base, Arizona, $5,730,000.
England Air Force Base, Louisiana, $2,600,000.
George Air Force Base, California, $5,240,000.
Holloman Air Force Base, New Mexico, $16,850,000.
Homestead Air Force Base, Florida, $7,015,000.
Langley Air Force Base, Virginia, $8,680,000.
Luke Air Force Base, Arizona, $14,780,000.
MacDill Air Force Base, Florida, $8,850,000.
Moody Air Force Base, Georgia, $24,030,000.
Mountain Home Air Force Base, Idaho, $14,600,000.
Myrtle Beach Air Force Base, South Carolina, $430,000.
Nellis Air Force Base, Nevada, $17,860,000.
Seymour-Johnson Air Force Base, North Carolina, $2,320,000.
Shaw Air Force Base, South Carolina, $13,300,000.
Tyndall Air Force Base, Florida, $8,780,000.

UNITED STATES AIR FORCE ACADEMY

Air Force Academy, Colorado, $10,310,000.

(b) OUTSIDE THE UNITED STATES.—The Secretary of the Air Force may acquire real property and may carry out military construction projects in the amounts shown for each of the following installations and locations outside the United States:

MILITARY AIRLIFT COMMAND

Lajes Field, Portugal, $25,285,000.
Rhein-Main Air Base, Germany, $1,500,000.

PACIFIC AIR FORCES

Camp Zama, Japan, $1,500,000.
Kadena Air Base, Japan, $27,650,000.
Misawa Air Base, Japan, $9,500,000.
Yokota Air Base, Japan, $10,400,000.
Kimhae Air Base, Korea, $10,400,000.
Kunsan Air Base, Korea, $9,000,000.
Kwang-Ju Air Base, Korea, $16,310,000.
Osan Air Base, Korea, $24,510,000.
Sachon Air Base, Korea, $310,000.
Diego Garcia Air Base, Indian Ocean, $5,300,000.
Clark Air Base, Republic of the Philippines, $15,050,000.

SPACE COMMAND

Thule Air Base, Greenland, $12,350,000.
Sondrestrom Air Base, Greenland, $5,750,000.
GEODSS Site 5, Portugal, $14,650,000.
Pirinclik Air Station, Turkey, $2,600,000.
BMEWS Site III, Fylingdales, United Kingdom, $3,100,000.

TACTICAL AIR COMMAND

Howard Air Force Base, Panama, $2,172,000.

UNITED STATES AIR FORCES IN EUROPE

Florennes Air Base, Belgium, $5,860,000.
Ahlhorn Air Base, Germany, $350,000.
Bitburg Air Base, Germany, $9,050,000.
Einsiedlerhof, Germany, $2,900,000.
Hahn Air Base, Germany, $8,160,000.
Hessisch Oldendorf Air Station, Germany, $1,230,000.
Kapaun Air Station, Germany, $900,000.
Leipheim Air Base, Germany, $350,000.
Marienfelde Communications Station, Germany, $2,550,000.
Norvenich Air Base, Germany, $350,000.
Pruem Air Station, Germany, $1,250,000.
Ramstein Air Base, Germany, $14,670,000.
Sembach Air Base, Germany, $6,460,000.
Spangdahlem Air Base, Germany, $14,860,000.
Various Locations, Germany, $940,000.
Vogelweh Air Station, Germany, $1,250,000.
Wenigerath Storage Site, Germany, $1,700,000.
Zweibrucken Air Base, Germany, $4,550,000.
Aviano Air Base, Italy, $5,070,000.
Comiso Air Station, Italy, $6,280,000.
Decimomannu Air Base, Italy, $2,800,000.
San Vito Air Station, Italy, $1,590,000.
Morocco, $3,100,000.
Camp New Amsterdam, The Netherlands, $2,710,000.
Keizerveer Air Base, The Netherlands, $270,000.
Woensdrecht Air Base, The Netherlands, $15,980,000.
Vught, The Netherlands, $310,000.
Torrejon Air Base, Spain, $2,900,000.
Ankara Air Station, Turkey, $950,000.
Incirlik Air Base, Turkey, $11,570,000.
Karatas, Turkey, $2,330,000.
RAF Alconbury, United Kingdom, $20,910,000.
RAF Bentwaters, United Kingdom, $12,050,000.
RAF Chicksands, United Kingdom, $1,630,000.
RAF Fairford, United Kingdom, $7,400,000.
RAF Greenham Common, United Kingdom, $2,200,000.
RAF Lakenheath, United Kingdom, $10,320,000.
RAF Mildenhall, United Kingdom, $4,080,000.
RAF Molesworth, United Kingdom, $21,063,000.
RAF Sculthorpe, United Kingdom, $2,350,000.
RAF Upper Heyford, United Kingdom, $4,640,000.
Various Locations, United Kingdom, $3,600,000.
Base 25, Classified Location, $4,500,000.
Base 29, Classified Location, $3,500,000.
Base 30, Classified Location, $4,830,000.
Base 33, Classified Location, $9,450,000.
Various Locations, Europe, $4,450,000.

SEC. 302. FAMILY HOUSING

The Secretary of the Air Force may construct or acquire family housing units (including land acquisition) at the following installations in the number of units shown, and in the amount shown, for each installation:

Florennes, Belgium, four hundred units, $29,200,000.
Hahn Air Base, Germany, four hundred and forty units, $33,000,000.
Ramstein Air Base, Germany, four hundred units, $30,000,000.
Osan Air Base, Korea, family housing support facilities, $1,200,000.
Camp New Amsterdam, The Netherlands, one hundred and forty units, $11,000,000.
Clark Air Base, Republic of the Philippines, four hundred and fifty units, $37,900,000.
Belle Fourche Air Force Station, South Dakota, fifty units, $4,000,000.

SEC. 303. IMPROVEMENTS TO MILITARY FAMILY HOUSING UNITS

(a) AMOUNT AUTHORIZED.—Subject to section 2825 of title 10, United States Code, the Secretary of the Air Force may make expenditures to improve existing military family housing units in an amount not to exceed $61,300,000, of which $19,939,000 is available only for energy conservation projects.

(b) WAIVER OF MAXIMUM PER UNIT COST FOR CERTAIN IMPROVEMENT PROJECTS.—Notwithstanding the maximum amount per unit for an improvement project under section 2825(b) of title 10, United States Code, the Secretary of the Air Force may carry out projects to improve existing military family housing units at the following installations in the number of units shown, and in the amount shown, for each installation:

Bolling Air Force Base, District of Columbia, twenty-four units, $1,200,000.

Scott Air Force Base, Illinois, eighty units, $4,006,000.

Offutt Air Force Base, Nebraska, thirty-two units, $2,873,000.

Kirtland Air Force Base, New Mexico, one hundred and ten units, $3,724,000.

Ramstein Air Base, Germany, two hundred and eighty units, $10,279,000.

Andersen Air Force Base, Guam, one hundred units, $6,605,000.

Kadena Air Base, Japan, two hundred and thirty-five units, $12,163,000.

Clark Air Base, Philippines, twenty-nine units, $1,042,000.

(c) IMPROVEMENT PROJECT AT PETERSON AIR FORCE BASE, COLORADO.—(1) To support the United States Space Command (USSPACECOM), the Secretary of the Air Force may carry out an improvement project at Peterson Air Force Base, Colorado, to add to and alter an existing facility and (notwithstanding section 2826 of title 10, United States Code) convert such facility to a family housing unit with a maximum net floor area of 3,100 square feet at a cost not to exceed $81,000.

(2) The amount authorized for the project by paragraph (1) shall not be considered an increase in the amount authorized to be appropriated by this Act for functions of the Department of the Air Force.

(3) For purposes of this subsection, the term "net floor area" has the same meaning given that term by section 2826(f) of title 10, United States Code.

SEC. 304. RESTRICTION ON USE OF FUNDS FOR CONSTRUCTION OF FACILITIES IN THE NETHERLANDS

Funds appropriated to the Air Force pursuant to an authorization in section 603 for the construction of facilities in The Netherlands to support ground launched cruise missiles (GLCM) may not be obligated or expended until the Government of The Netherlands has officially approved the deployment of such missiles in The Netherlands.

SEC. 305. SPECIAL IMPACT ASSISTANCE TO CERTAIN SCHOOL DISTRICTS

Of the funds appropriated to the Air Force for fiscal year 1986 for the acquisition of land to expand Melrose Air Force Range, New Mexico, the Secretary of the Air Force may use not more than $50,000 to provide assistance, by grant or otherwise, to school districts in communities near the Melrose Air Force Range for purposes of mitigating any adverse impact on the schools in such districts determined by the Secretary to result from expansion of the range.

TITLE IV—DEFENSE AGENCIES

SEC. 401. AUTHORIZED CONSTRUCTION PROJECTS AND LAND ACQUISITION FOR THE DEFENSE AGENCIES

(a) INSIDE THE UNITED STATES.—The Secretary of Defense may acquire real property and carry out military construction projects in the amounts shown for each of the following installations and locations inside the United States:

DEFENSE LOGISTICS AGENCY

Defense Property Disposal Office, Anchorage, Alaska, $1,390,000.

Defense Property Disposal Office, Alameda, California, $1,320,000.

Defense Property Disposal Office, Barstow, California, $825,000.

Defense Fuel Support Point, San Diego, California, $600,000.

Defense Fuel Support Point, San Pedro, California, $700,000.

Defense Property Disposal Office, Groton, Connecticut, $625,000.

Defense Fuel Support Point, Port Tampa, Florida, $595,000.

Defense Property Disposal Office, Fort Riley, Kansas, $965,000.

Defense Fuel Support Point, Newington, New Hampshire, $1,040,000.

Defense Fuel Support Point, Verona, New York, $1,395,000.

Defense Depot, Mechanicsburg, Pennsylvania, $470,000.

Defense Depot, Memphis, Tennessee, $8,085,000.

Defense Property Disposal Office, Texarkana, Texas, $2,635,000.

Defense Depot, Ogden, Utah, $3,825,000.

Defense Property Disposal Office, Hill Air Force Base, Ogden, Utah, $750,000.

Defense General Supply Center, Richmond, Virginia, $5,355,000.

Defense Property Disposal Office, Richmond, Virginia, $650,000.

Defense Fuel Support Point, Manchester, Washington, $565,000.

Defense Property Disposal Office, F.E. Warren Air Force Base, Cheyenne, Wyoming, $1,020,000.

DEFENSE MAPPING AGENCY

Repromat Secure Storage Facility, Mineral Wells, Texas, $900,000.

NATIONAL SECURITY AGENCY

Fort Meade, Maryland, $82,142,000.

OFFICE OF THE SECRETARY OF DEFENSE

Classified Location, $12,000,000.

Fort McNair, Washington, District of Columbia, $25,000,000.

Classified Location, $3,142,000.

DEPARTMENT OF DEFENSE SECTION 6 SCHOOLS

Fort Benning, Georgia, $1,693,000.

Fort Bragg, North Carolina, $5,660,000.

Camp Lejeune, North Carolina, $8,400,000.

Myrtle Beach Air Force Base, South Carolina, $1,400,000.

Quantico, Virginia, $3,500,000.

(b) OUTSIDE THE UNITED STATES.—The Secretary of Defense may acquire real property and may carry out military construction projects in the amounts shown for each of the following installations and locations outside the United States:

DEFENSE LOGISTICS AGENCY

Defense Property Disposal Office, Kaiserslautern, Germany, $360,000.

Defense Fuel Support Point, Chimu Wan, Okinawa, Japan, $8,160,000.

Defense Fuel Support Point, Pyongtaek, Korea, $5,820,000.

Defense Fuel Support Point, Uijongbu, Korea, $6,200,000.

NATIONAL SECURITY AGENCY

Classified Locations, $7,150,000.

DEPARTMENT OF DEFENSE SECTION 6 SCHOOLS

Fort Buchanan, Puerto Rico, $9,753,000.

Naval Station, Roosevelt Roads, Puerto Rico, $1,200,000.

DEPARTMENT OF DEFENSE OVERSEAS DEPENDENTS SCHOOLS

Florennes, Belgium, $7,420,000.

Babenhausen, Germany, $760,000.

Bamberg, Germany, $5,800,000.

Butzbach, Germany, $3,420,000.

Hanau, Germany, $7,480,000.

Heidelberg, Germany, $1,910,000.

Heilbronn, Germany, $2,520,000.

Pirmasens, Germany, $1,630,000.

Schweinfurt, Germany, $3,930,000.

Sembach Air Base, Germany, $2,170,000.

Vilseck, Germany, $6,680,000.

Sigonella, Italy, $5,360,000.

Misawa Air Base, Japan, $4,780,000.

Okinawa, Japan, $300,000.

Osan Air Base, Korea, $2,780,000.

Pusan, Korea, $1,540,000.

Taegu, Korea, $730,000.

Soesterberg Air Base, Netherlands, $4,460,000.

Clark Air Base, Republic of the Philippines, $7,190,000.

Bicester, United Kingdom, $4,570,000.

Upwood, United Kingdom, $3,240,000.

Woodbridge RAF Station, United Kingdom, $1,060,000.

SEC. 402. FAMILY HOUSING

The Secretary of Defense may construct or acquire twenty family housing units (including land acquisition) at classified installations in the total amount of $1,800,000.

SEC. 403. IMPROVEMENTS TO MILITARY FAMILY HOUSING UNITS

Subject to section 2825 of title 10, United States Code, the Secretary of Defense may make expenditures to improve existing military family housing units in an amount not to exceed $110,000.

TITLE V—NORTH ATLANTIC TREATY ORGANIZATION INFRASTRUCTURE

SEC. 501. AUTHORITY OF THE SECRETARY OF DEFENSE TO MAKE CONTRIBUTIONS

The Secretary of Defense may make contributions for the North Atlantic Treaty Organization infrastructure program as provided in section 2806 of title 10, United States Code, in an amount not to exceed the amount authorized to be appropriated in section 605 plus the amount collected from the North Atlantic Treaty Organization as a result of construction previously financed by the United States.

TITLE VI—AUTHORIZATION OF APPROPRIATIONS AND RECURRING ADMINISTRATIVE PROVISIONS

SEC. 601. AUTHORIZATION OF APPROPRIATIONS, ARMY

(a) IN GENERAL.—Funds are hereby authorized to be appropriated for fiscal years beginning after September 30, 1985, for military construction, land acquisition, and military family housing functions of the Department of the Army in the total amount of $3,312,803,000 as follows:

(1) For military construction projects inside the United States authorized by section 101(a), $1,063,432,000.

(2) For military construction projects outside the United States authorized by section 101(b), $429,140,000.

(3) For military construction projects inside the United States authorized by section 101 of the Military Construction Authorization Act, 1985, $26,000,000.

(4) For unspecified minor construction projects under section 2805 of title 10, United States Code, $31,000,000.

(5) For architectural and engineering services and construction design under section 2807 of title 10, United States Code, $136,100,000.

(6) For military family housing functions—

(A) for construction and acquisition of military family housing and facilities, $356,337,000; and

(B) for support of military family housing (including the functions described in section 2833 of title 10, United States Code), $1,270,794,000, of which not more than $2,520,000 may be obligated or expended for the leasing of military family housing units in the United States, the Commonwealth of Puerto Rico, and Guam, and not more than $131,047,000 may be obligated or expended for the leasing of military family housing units in foreign countries.

(b) AUTHORIZATION OF UNOBLIGATED FUNDS.—Funds appropriated to the Department of Defense for fiscal years before fiscal year 1986 for military construction functions of the Army that remain available for obligation are hereby authorized to be made available, to the extent provided in appropriation Acts, for military construction projects authorized in section 101 in the amount of $291,210,000 (which includes $82,500,000 for the construction of a utility project at Fort Drum, New York, and $56,000,000 for Pershing II security upgrade at various locations, Germany).

(c) LIMITATION ON TOTAL COST OF CONSTRUCTION PROJECTS AUTHORIZED IN TITLE I.—Notwithstanding the cost variations authorized by section 2853 of title 10, United States Code, and any other cost variation authorized by law, the total cost of all projects carried out under section 101 may not exceed—

(1) the total amount authorized to be appropriated under paragraphs (1) and (2) of subsection (a);

(2) the amount specified in subsection (b);

(3) $73,000,000 (the balance of the amount authorized for the construction of the Eastern Distribution Center, New Cumberland Army Depot, Pennsylvania); and

(4) $45,000,000 (the balance of the amount authorized under section 101(b) for Pershing II security upgrade at various locations, Germany).

SEC. 602. AUTHORIZATION OF APPROPRIATIONS, NAVY

(a) IN GENERAL.—Funds are hereby authorized to be appropriated for fiscal years beginning after September 30, 1985, for military construction, land acquisition, and military family housing functions of the Department of the Navy in the total amount of $2,408,184,000 as follows:

(1) For military construction projects inside the United States authorized by section 201(a), $1,304,480,000.

(2) For military construction projects outside the United States authorized by section 201(b), $201,185,000.

(3) For unspecified minor construction projects under section 2805 of title 10, United States Code, $21,560,000.

(4) For architectural and engineering services and construction design under section 2807 of title 10, United States Code, $139,260,000.

(5) For advances to the Secretary of Transportation for construction of defense access roads under section 210 of title 23, United States Code, $2,960,000.

(6) For military family housing functions—

(A) for construction and acquisition of military family housing and facilities, $154,000,000; and

(B) for support of military housing (including functions described in section 2833 of title 10, United States Code), $584,739,000, of which not more than $3,545,000 may be obligated or expended for the leasing of military family housing units in the United States, the Commonwealth of Puerto Rico, and Guam, and not more than $18,934,000 may be obligated or expended for the leasing of military family housing units in foreign countries.

(b) AUTHORIZATION OF UNOBLIGATED FUNDS.—Funds appropriated to the Department of Defense for fiscal years before fiscal year 1986 for military construction functions of the Navy that remain available for obligation are hereby authorized to be made available, to the extent provided in appropriation Acts, for military construction projects authorized in section 201 in the amount of $105,935,000.

(c) LIMITATION ON TOTAL COST OF CONSTRUCTION PROJECTS AUTHORIZED IN TITLE II.—Notwithstanding the cost variations authorized by section 2853 of title 10, United States Code, and any other cost variation authorized by law, the total cost of all projects carried out under section 201 may not exceed the total amount authorized to be appropriated under paragraphs (1) and (2) of subsection (a) and the amount specified in subsection (b).

SEC. 603. AUTHORIZATION OF APPROPRIATIONS, AIR FORCE

(a) IN GENERAL.—Funds are hereby authorized to be appropriated for fiscal years beginning after September 30, 1985, for military construction, land acquisition, and military family housing functions of the Department of the Air Force in the total amount of $2,700,991,000 as follows:

(1) For military construction projects inside the United States authorized by section 301(a), $1,147,207,000.

(2) For military construction projects outside the United States authorized by section 301(b), $415,550,000.

(3) For unspecified minor construction projects under section 2805 of title 10, United States Code, $22,000,000.

(4) For architectural and engineering services and construction design under section 2807 of title 10, United States Code, $144,096,000.

(5) For advances to the Secretary of Transportation for construction of defense access roads under section 210 of title 23, United States Code, $30,240,000.

(6) For military family housing functions—

(A) for construction and acquisition of military family housing and facilities, $212,600,000; and

(B) for support of military housing (including functions described in section 2833 of title 10, United States Code), $729,298,000, of which not more than $2,711,000 may be obligated or expended for the leasing of military family housing units in the United States, the Commonwealth of Puerto Rico, and Guam, and not more than $45,402,000 may be obligated or expended for the leasing of military family housing units in foreign countries.

(b) AUTHORIZATION OF UNOBLIGATED FUNDS.—Funds appropriated to the Department of Defense for fiscal years before fiscal year 1986 for military construction functions of the Air Force that remain available for obligation are hereby authorized to be made available, to the extent provided in appropriation Acts, for military construction projects authorized in section 301 in the amount of $100,000,000.

(c) LIMITATION ON TOTAL COST OF CONSTRUCTION PROJECTS AUTHORIZED IN TITLE III.—Notwithstanding the cost variations authorized by section 2853 of title 10, United States Code, and any other cost variation authorized by law, the total cost of all projects carried out under section 301 may not exceed the total amount authorized to be appropriated under paragraphs (1) and (2) of subsection (a) and the amount specified in subsection (b).

SEC. 604. AUTHORIZATION OF APPROPRIATIONS, DEFENSE AGENCIES

(a) IN GENERAL.—Funds are hereby authorized to be appropriated for fiscal years beginning after September 30, 1985, for military construction, land acquisition, and military family housing functions of the Department of Defense (other than the military departments), in the total amount of $258,595,000 as follows:

(1) For military construction projects inside the United States authorized by section 401(a), $95,149,000.

(2) For military construction projects outside the United States authorized by section 401(b), $104,146,000.

(3) For unspecified minor construction projects under section 2805 of title 10, United States Code, $4,000,000.

(4) For construction projects under the contingency construction authority of the Secretary of Defense under section 2804 of title 10, United States Code, $5,000,000.

(5) For architectural and engineering services and construction design under section 2807 of title 10, United States Code, $30,000,000.

(6) For military family housing functions—

(A) for construction and acquisition of military family housing and facilities, $1,910,000; and

(B) for support of military housing (including functions described in section 2833 of title 10, United States Code), $18,390,000, of which not more than $14,933,000 may be obligated or expended for the leasing of military family housing units in foreign countries.

(b) AUTHORIZATION OF UNOBLIGATED FUNDS.—Funds appropriated to the Department of Defense for fiscal years before fiscal year 1986 for military construction functions of the Defense Agencies that remain available for obligation are hereby authorized to be made available, to the extent provided in appropriations Acts, for military construction projects authorized in section 401 in the amount of $42,025,000.

(c) LIMITATION ON TOTAL COST OF CONSTRUCTION PROJECTS AUTHORIZED IN TITLE IV.—Notwithstanding the cost variations authorized by section 2853 of title 10, United States Code, and any other cost variations authorized by law, the total cost of all projects carried out under section 401 may not exceed the total amount authorized to be appropriated under paragraphs (1) and (2) of subsection (a), the amount specified in subsection (b), and $53,700,000 (the balance of the amount authorized for the construction of a research and engineering facility at Fort Meade, Maryland).

SEC. 605. AUTHORIZATION OF APPROPRIATIONS, NATO

Funds are hereby authorized to be appropriated for fiscal years beginning after September 30, 1985, for contributions by the Secretary of Defense under section 2806 of title 10, United States Code, for the share of the United States of the cost of construction projects for the North Atlantic Treaty Orga-

nization Infrastructure Program, as authorized by section 501, in the amount of $38,000,000.

SEC. 606. EXPIRATION OF AUTHORIZATIONS; EXTENSION OF CERTAIN PREVIOUS AUTHORIZATIONS

(a) EXPIRATION OF AUTHORIZATIONS AFTER TWO YEARS.—(1) Except as provided in paragraph (2), all authorizations contained in titles I, II, III, IV, and V for military construction projects, land acquisition, family housing projects and facilities, and contributions to the NATO Infrastructure Program (and authorizations of appropriations therefor contained in sections 601 through 605) shall expire on October 1, 1987, or the date of the enactment of the Military Construction Authorization Act for fiscal year 1988, whichever is later.

(2) The provisions of paragraph (1) do not apply to authorizations for military construction projects, land acquisition, family housing projects and facilities, and contributions to the NATO Infrastructure Program (and authorizations of appropriations therefor), for which appropriated funds have been obligated before October 1, 1987, or the date of the enactment of the Military Construction Authorization Act for fiscal year 1988, whichever is later, for construction contracts, land acquisition, family housing projects and facilities, or contributions to the NATO Infrastructure Program.

(b) EXTENSION OF AUTHORIZATION OF CERTAIN FISCAL YEAR 1984 PROJECTS.—Notwithstanding the provisions of section 607(a) of the Military Construction Authorization Act, 1984 (Public Law 98-115; 97 Stat. 780), authorizations for the following projects authorized in sections 101, 201, 301, and 401 of that Act shall remain in effect until October 1, 1986, or the date of enactment of the Military Construction Authorization Act for fiscal year 1987, whichever is later:

(1) Consolidated heating system in the amount of $1,850,000 at Stuttgart, Germany.

(2) Consolidated heating system in the amount of $1,750,000 at Stuttgart, Germany.

(3) Range modernization in the amount of $2,450,000 at Wildflecken, Germany.

(4) Unaccompanied personnel housing in the amount of $1,400,000 at Argyroupolis, Greece.

(5) Operations building in the amount of $370,000 at Argyroupolis, Greece.

(6) Multipurpose recreation facility in the amount of $480,000 at Argyroupolis, Greece.

(7) Unaccompanied Officer housing in the amount of $600,000 at Perivolaki, Greece.

(8) Operations building in the amount of $410,000 at Perivolaki, Greece.

(9) Multipurpose recreation facility in the amount of $620,000 at Perivolaki, Greece.

(10) Physical fitness training center in the amount of $1,000,000 at Elefsis, Greece.

(11) Operations control center in the amount of $7,800,000 at the Naval Air Station, Brunswick, Maine.

(12) Engine test cell modifications in the amount of $1,180,000 at the Naval Air Station, Cecil Field, Florida.

(13) Land acquisition in the amount of $830,000 at the Naval Weapons Station, Concord, California.

(14) Unaccompanied enlisted personnel housing in the amount of $10,000,000 at the Naval Air Station, Jacksonville, Florida.

(15) Electrical distribution lines in the amount of $7,200,000 at the Naval Shipyard Mare Island, Vallejo, California.

(16) Family housing in the amount of $33,982,000 at RAF Upper Heyford, United Kingdom.

(17) Air freight terminal in the amount of $10,200,000 at Elmendorf, Alaska.

(18) Sewage system in the amount of $2,760,000 at the Naval Training Center, Orlando, Florida.

(19) Physical fitness training center in the amount of $1,000,000 at Fort Hunter Liggett, California.

(20) Child care center in the amount of $3,000,000 at Fort Polk, Louisiana.

(21) Physical fitness training center in the amount of $2,200,000 at Sierra Army Depot, California.

(22) Special Process Laboratories Building in the amount of $39,100,000 at Fort Meade, Maryland.

SEC. 607. ESTABLISHMENT OF CERTAIN AMOUNTS REQUIRED TO BE SPECIFIED BY LAW

For projects or contracts initiated during the period beginning on the date of the enactment of this Act and ending on the date of the enactment of the Military Construction Authorization Act for fiscal year 1987 or October 1, 1986, whichever is later, the following amounts apply:

(1) The maximum amount for an unspecified minor military construction project under section 2805 of title 10, United States Code, is $1,000,000.

(2) The amount of a contract for architectural and engineering services or construction design that makes such a contract subject to the reporting requirement under section 2807 of title 10, United States Code, is $300,000.

(3) The maximum amount per unit for an improvement project for family housing units under section 2825 of title 10, United States Code, is $30,000.

(4) The maximum annual rental for a family housing unit leased in the United States, Puerto Rico, or Guam under section 2828(b) of title 10, United States Code, is $10,000.

(5)(A) The maximum annual rental for a family housing unit leased in a foreign country under section 2828(c) of title 10, United States Code, is $16,800.

(B) The maximum number of family housing units that may be leased at any one time in foreign countries under section 2828(c) of title 10, United States Code, is 32,000.

(6) The maximum rental per year for family housing facilities, or for real property related to family housing facilities, leased in a foreign country under section 2828(f) of title 10, United States Code, is $250,000.

TITLE VII—GUARD AND RESERVE FORCES FACILITIES

SEC. 701. AUTHORIZATION FOR GUARD AND RESERVE FACILITIES

There are authorized to be appropriated for fiscal years beginning after September 30, 1985, for the costs of acquisition, architectural and engineering services, and construction of facilities for the Guard and Reserve Forces, and for contributions therefor, under chapter 133 of title 10, United States Code (including the cost of acquisition of land for those facilities), the following amounts:

(1) For the Department of the Army—

(A) for the Army National Guard of the United States, $149,101,000, and

(B) for the Army Reserve, $70,700,000.

(2) For the Department of the Navy, for the Naval and Marine Corps Reserves, $51,800,000.

(3) For the Department of the Air Force—

(A) for the Air National Guard of the United States, $139,000,000, and

(B) for the Air Force Reserve, $70,650,000.

SEC. 702. ARCHITECTURAL AND ENGINEERING SERVICES RELATED TO CONSTRUCTION OF NATIONAL GUARD ARMORIES

(a) CONTRIBUTIONS TO STATES.—Subsection (e) of section 2233 of title 10, United States Code, is amended to read as follows:

"(e) The Secretary of Defense may procure, or contribute to any State such amounts as the Secretary determines to be necessary to procure, architectural and engineering services and construction design in connection with facilities to be established or developed under this chapter which are not otherwise authorized by law.".

(b) AMOUNT OF CONTRIBUTION.—Subsection (b) of section 2236 of such title is amended to read as follows:

"(b) A contribution made for an armory under clause (4) or (5) of section 2233(a) of this title may not exceed the sum of—

"(1) 100 percent of the cost of architectural, engineering and design services (including advance architectural, engineering and design services under section 2233(e) of this title); and

"(2) a percentage of the cost of construction (exclusive of the cost of architectural, engineering and design services) calculated so that upon completion of construction the total contribution (including the contribution for architectural, engineering and design services) equals 75 percent of the total cost of construction (including the cost of architectural, engineering and design services).

For the purpose of computing the cost of construction under this subsection, the amount contributed by a State, territory, the Commonwealth of Puerto Rico, or the District of Columbia, as the case may be, may not include the cost or market value of any real property that it has contributed.".

TITLE VIII—GENERAL PROVISIONS

PART A—MILITARY CONSTRUCTION PROGRAM PROVISIONS

SEC. 801. BUILD-TO-LEASE AND RENTAL GUARANTEE PILOT PROGRAMS

(a) RENTAL GUARANTEE PROGRAM.—(1) Subsection (h) of section 802 of the Military Construction Authorization Act, 1984 (10 U.S.C. 2821 note), is amended by striking out "September 30, 1985" and inserting in lieu thereof "September 30, 1986".

(2) Subsection (g) of such section is amended—

(A) by inserting "(1)" after "(g)"; and

(B) by adding at the end the following new paragraph:

"(2) In addition to the contracts authorized by subsection (f) and paragraph (1) of this subsection, the Secretary of each military department may enter into one or more agreements under this paragraph for not more than a total of 600 family housing units.".

(b) BUILD-TO-LEASE PROGRAM.—(1) Paragraph (9) of section 2828(g) of title 10, United States Code, is amended by striking out "October 1, 1985" and inserting in lieu thereof "September 30, 1986".

(2) Paragraph (8) of such section is amended—

(A) by inserting "(A)" after "(8)"; and

(B) by adding at the end the following new subparagraph:

"(B) In addition to the contracts authorized by paragraph (7) and subparagraph (A), the Secretary of each military department may enter into one or more contracts under this subparagraph for not more than a total of 600 family housing units.".

SEC. 802. FAMILY HOUSING OCCUPANT LIABILITY

(a) LIABILITY FOR FAILURE TO CLEAN SATISFACTORILY.—Subsection (a) of section 2775 of title 10, United States Code, is amended—

(1) by inserting "(1)" after "(a)"; and

(2) by adding at the end thereof the following new paragraph:

"(2) A member of the armed forces—

"(A) who is assigned or provided a family housing unit; and

"(B) who fails to clean satisfactorily that housing unit (as determined under regulations prescribed by the Secretary of Defense or the Secretary of Transportation with respect to the Coast Guard when it is not operating as a service in the Navy) upon termination of the assignment or provision of that housing unit,

shall be liable to the United States for the cost of cleaning made necessary as a result of that failure.".

(b) AUTHORITY OF SECRETARY OF TRANSPORTATION.—Section 2775 of such title is amended—

(1) in subsections (a) and (b), by inserting after "the Secretary of Defense" the following: "and the Secretary of Transportation when the Coast Guard is not operating as a service in the Navy"; and

(2) in subsection (d), by inserting after "or defense agency concerned" the following: ", or the operating expenses account of the Coast Guard, as appropriate".

(c) CONFORMING AMENDMENTS.—(1) Subsection (b) of such section is amended by inserting "(in the case of liability under subsection (a)(1))" after "including".

(2) Subsection (c)(1) of such section is amended by striking out "subsection (a)" and inserting in lieu thereof "subsection (a)(1), or the cost of any cleaning made necessary by a failure to clean satisfactorily a family housing unit referred to in subsection (a)(2),".

(3) Subsection (d) of such section is amended by inserting "or failure to clean satisfactorily a family housing unit" after "(or the equipment or furnishings of a family housing unit)".

(4) Subsection (e) of such section is amended to read as follows:

"(e) The Secretary of Defense, and the Secretary of Transportation when the Coast Guard is not operating as a service in the Navy, shall prescribe regulations to carry out this section. Such regulations shall include—

"(1) regulations for determining the cost of repairs and replacements made necessary as the result of abuse or negligence for which a member is liable under subsection (a)(1);

"(2) regulations for determining the cost of cleaning made necessary as a result of the failure to clean satisfactorily for which a member is liable under subsection (a)(2); and

"(3) provisions for limitations of liability, the compromise or waiver of claims, and the collection of amounts owed under this section.".

(d) CLERICAL AMENDMENTS.—(1) The heading of such section is amended to read as follows:

"§ 2775. Liability of members assigned to military housing".

(2) The item relating to such section in the table of sections at the beginning of chapter 165 of such title is amended to read as follows:

"2775. Liability of members assigned to military housing.".

SEC. 803. PREOCCUPANCY TERMINATION COSTS

Section 2828(d) of title 10, United States Code, is amended—

(1) by inserting "(1)" after "(d)"; and

(2) by adding at the end the following new paragraph:

"(2) The Secretary may enter into an agreement under this paragraph in connection with a lease entered into under subsection (c). Such an agreement—

"(A) shall be for the purpose of compensating a developer for any costs resulting from the termination of the lease during the construction of the housing units that are to be occupied pursuant to the lease;

"(B) may be for a period not in excess of three years; and

"(C) shall include a provision that the obligation of the United States to make payments under the agreement in any fiscal year is subject to the availability of appropriations.".

SEC. 804. ACTIVITIES INCLUDED WITHIN AUTHORIZATIONS FOR MILITARY FAMILY HOUSING

(a) CONSTRUCTION AND ACQUISITION OF FAMILY HOUSING.—Section 2821 of title 10, United States Code, is amended by adding at the end thereof the following new subsection:

"(d) Amounts authorized by law for construction and acquisition of military family housing and facilities include amounts for—

"(1) minor construction;

"(2) improvements to existing military family housing units and facilities;

"(3) relocation of military family housing units under section 2827 of this title; and

"(4) architectural and engineering services and construction design.".

(b) FAMILY HOUSING SUPPORT.—(1) Chapter 169 of such title is amended by adding at the end of subchapter II the following new section:

"§2833. Family housing support

"Amounts authorized by law for support of military family housing include amounts for—

"(1) operating expenses;

"(2) leasing expenses;

"(3) maintenance of real property expenses;

"(4) payments of principal and interest on mortgage debts incurred; and

"(5) payments of mortgage insurance premiums authorized under section 222 of the National Housing Act (12 U.S.C. 1715m).".

(2) The table of sections at the beginning of subchapter II of such chapter is amended by adding after the item relating to section 2832 the following new item:

"2833. Family housing support.".

SEC. 805. DOMESTIC FAMILY HOUSING LIMITATIONS

Section 2828(b)(3) of title 10, United States Code, is amended—

(1) by striking out "(3) Not" and inserting in lieu thereof "(3)(A) Except as provided in subparagraph (B), not"; and

(2) by adding at the end the following new subparagraph:

"(B) During fiscal years 1986 and 1987, the number of housing units that may be leased pursuant to the provisions of subparagraph (A) may be increased by 500 units for each such fiscal year. The Secretary concerned shall provide written notification to the Committees on Armed Services of the Senate and House of Representatives concerning the location, purpose, and cost of the additional units permitted by this subparagraph. Such notification shall be made periodically as the leases are entered into.".

SEC. 806. SALE-AND-REPLACEMENT TRANSACTIONS

(a) EXTENSION OF AUTHORITY FOR SALE-AND-REPLACEMENT TRANSACTIONS.—(1) Section 807(c) of the Military Construction Authorization Act, 1984 (Public Law 98-115; 97 Stat. 786), is amended by striking out "October 1, 1985" and inserting in lieu thereof "October 1, 1986".

(2) The amendment made by paragraph (1) shall take effect as of October 1, 1985.

(b) APPROVAL OF TRANSACTIONS.—The Secretary of Defense may carry out the following sale-and-replacement transactions under the provisions of section 2667a of title 10, United States Code:

(1) The sale and replacement of warehousing facilities at Schofield Barracks, Hawaii.

(2) The sale and replacement of a noncommissioned officers professional education center, a band center, and a combat operations center at March Air Force Base, California.

SEC. 807. TURN-KEY SELECTION PROCEDURES

(a) IN GENERAL.—Chapter 169 of title 10, United States Code, is amended by adding at the end of subchapter III the following new section:

"§ 2862. Turn-key selection procedures

"(a)(1) The Secretaries of the military departments, with the approval of the Secretary of Defense, may use one-step turn-key selection procedures for the purpose of entering into contracts for the construction of authorized military construction projects.

"(2) In this section, 'one-step turn-key selection procedures' means procedures used for the selection of a contractor on the basis of price and other evaluation criteria to perform, in accordance with the provisions of a firm fixed-price contract, both the design and construction of a facility using performance specifications supplied by the Secretary concerned.

"(b) The Secretary of a military department may not, during any fiscal year, enter into more than three contracts for military construction projects using procedures authorized by this section.

"(c) The authority under this section shall expire on October 1, 1990.".

(b) CONFORMING AMENDMENT.—The table of sections at the beginning of such subchapter is amended by adding after the item relating to section 2861 the following new item:

"2862. Turn-key selection procedures.".

(c) EFFECTIVE DATE.—The amendments made by this section shall take effect on October 1, 1986.

SEC. 808. PARTICIPATION IN DEPARTMENT OF STATE HOUSING POOLS

(a) AUTHORITY TO PARTICIPATE.—Chapter 169 of title 10, United States Code (as amended by section 804) is further amended by adding at the end of subchapter II the following new section:

"§ 2834. Participation in Department of State housing pools

"(a) The Secretary concerned may enter into an agreement with the Secretary of State under which the Secretary of State agrees to provide housing and related services for personnel under the jurisdiction of the Secretary concerned who are assigned to duty in a foreign country if the Secretary concerned determines—

"(1) that there is a shortage of adequate housing in the area of the foreign country in which such personnel are assigned to duty; and

"(2) that participation in the Department of State housing pool is the most cost-effective means of providing housing for such personnel.

The Secretary concerned shall reimburse the Secretary of State, as provided in the agreement, for housing and related services fur-

nished personnel under the jurisdiction of the Secretary concerned.

"(b) Agreements entered into with the Secretary of State under this section may not be executed until (1) the Secretary concerned provides to the appropriate committees of Congress written notification of the facts concerning the proposed agreement, and (2) a period of 21 days has elapsed after the day on which the notification is received by the committees.

"(c) In computing the number of leases for which the maximum lease amount may be waived by the Secretary concerned under the second sentence of section 2828(e)(1) of this title, housing made available to the Department of Defense under this section shall be included.".

(b) CONFORMING AMENDMENT.—The table of sections at the beginning of such subchapter (as amended by section 804) is amended by adding at the end thereof the following new item:

"2834. Participation in Department of State housing pools.".

SEC. 809. UNSPECIFIED MINOR CONSTRUCTION

Section 2805 of title 10, United States Code, is amended—

(1) in subsection (a), by striking out "Within" and inserting in lieu thereof "Within an amount equal to 125 percent of"; and

(2) in subsection (c), by striking out "Only funds authorized for minor construction projects may be used to accomplish unspecified minor construction projects, except that the" and inserting in lieu thereof "The".

SEC. 810. ACQUISITION OF INTEREST IN LAND

(a) IN GENERAL.—Section 2672 of title 10, United States Code, is amended—

(1) by striking out "The" at the beginning of such section and inserting in lieu thereof "(a) Subject to subsection (b), the";

(2) by redesignating clauses (1) and (2) as clauses (A) and (B), respectively;

(3) by striking out "$100,000" each place it appears and inserting in lieu thereof "$200,000"; and

(4) by adding at the end thereof the following new subsection:

"(b) The Secretary of a military department may not enter into a contract under this section for the acquisition of any interest in land the cost of which exceeds $100,000 unless—

"(1) the Secretary has notified the appropriate committees of Congress of his intent to acquire such interest, the cost of the interest, and the reasons for acquiring the interest; and

"(2) a period of 21 days has elapsed from the date the notification is received by the committees.".

(b) CONFORMING AMENDMENTS.—(1) The heading of such section is to read as follows:

"§ 2672. Acquisition: interest in land when cost is not more than $200,000".

(2) The item in the table of sections at the beginning of chapter 159 of such title relating to section 2672 is amended to read as follows:

"2672. Acquisition: interests in land when cost is not more than $200,000.".

SEC. 811. TEST OF LONG-TERM FACILITIES CONTRACTS

(a) AUTHORITY TO ENTER INTO LONG-TERM CONTRACTS.—Chapter 169 of title 10, United States Code, is amended by adding at the end of subchapter I the following new section:

"§ 2809. Test of long-term facilities contracts

"(a)(1) The Secretary concerned may enter into contracts for the construction, management, and operation of facilities on or near military installations in the United States for the provision of child care services, waste water treatment or depot supply activities in cases in which the Secretary concerned determines that the facilities can be more efficiently and more economically provided under long-term contracts than by other appropriate means.

"(2) Each contract entered into under subsection (a) shall be awarded through the use of competitive procedures as provided in chapter 137 of this title.

"(3) A contract under this section may be for any period not in excess of twenty years, excluding the period for construction. A contract under this section shall include a provision that the obligation of the United States to make payments under the contract in any fiscal year is subject to the availability of appropriations for that purpose.

"(4) A contract may not be entered into under this section until—

"(A) the Secretary concerned submits to the appropriate committees of the Congress, in writing, a justification of the need for the facility for which the contract is to be awarded and an economic analysis (based upon accepted life cycle costing procedures) which demonstrates that the proposed contract is cost effective when compared with alternative means of furnishing the same facility; and

"(B) a period of 21 calendar days has expired following the date on which the justification and the economic analysis are received by the committees.

"(b) Each Secretary concerned may enter into not more than 5 contracts under the authority of subsection (a) of this section, other than contracts for child care centers.

"(c) The authority to enter into contracts under this section shall expire on September 30, 1987, but shall not affect the validity of any contract entered into under the authority of this section before that date.".

(b) CONFORMING AMENDMENTS.—The table of sections at the beginning of subchapter I of such chapter is amended by adding at the end the following new item:

"2809. Test of long-term facilities contracts.".

SEC. 812. AVAILABILITY OF APPROPRIATIONS

(a) IN GENERAL.—Section 2860 of title 10, United States Code, is amended—

(1) in subsection (a), by striking out "(a)" and "and except as otherwise provided under subsection (b)"; and

(2) by striking out subsection (b).

(b) EFFECTIVE DATE.—The amendments made by subsection (a) shall apply to funds appropriated after September 30, 1985.

PART B—MISCELLANEOUS PROVISIONS

SEC. 821. INTERSERVICE EXCHANGES

Section 2571 of title 10, United States Code, is amended by adding at the end the following new subsection:

"(d) No agency or official of the executive branch of the Federal Government may establish any regulation, program, or policy or take any other action which precludes, directly or indirectly, the Secretaries concerned from exercising the authority provided in this section.".

SEC. 822. PLAN FOR CLEANUP OF ROCKY MOUNTAIN ARSENAL

(a) IN GENERAL.—The Secretary of the Army shall develop and transmit to the Congress, by September 1, 1986, a report setting forth a comprehensive plan for completing, not later than September 30, 1993, the cleanup of contaminated sites, structures, equipment, and natural resources at or near the Rocky Mountain Arsenal near Denver, Colorado.

(b) SPECIFIC REQUIREMENTS.—In such plan, the Secretary shall—

(1) describe in detail the various phases for the project, along with the completion dates and a priority ranking of the goals for each such phase;

(2) provide cost estimates for each such phase and for the total project;

(3) provide findings and conclusions reached as a result of consultation, before the transmittal of the plan, with State and local officials (including officials of water districts) and the general public;

(4) provide that consultation and coordination with such officials and the general public will be carried out throughout the process of cleaning up the Arsenal;

(5) provide for priority cleanup of—

(A) the most seriously contaminated areas at the Arsenal, including the areas known as Basin F, Basin A, the South Plants Area, and section 36;

(B) other areas at the Arsenal which should be afforded priority treatment for the benefit of the general public, including the areas known as sections 7, 8, 11, and 12; and

(C) any sites, structures, equipment, or natural resources located outside the Arsenal that have been contaminated by activities carried out at the Arsenal;

(6) provide for the cleanup of the areas described in paragraph (5) without regard to whether a final disposal site for hazardous substances from the Arsenal has been selected;

(7) establish, as a priority, the use of waste-treatment technologies that will reduce significantly the amount and toxicity level of hazardous substances at or near the Arsenal;

(8) provide for selection of a final disposal site for hazardous substances from the Arsenal in a manner that will take into consideration sites, within and outside of Colorado, that—

(A) are geologically suitable to serve as such a disposal site; and

(B) are located within areas the governing bodies of which have expressed a willingness to have such a disposal site located therein;

(9) provide that all activities in the plan will be carried out in compliance with the requirements of applicable Federal and State environmental laws;

(10) provide findings and conclusions reached as a result of studying the feasibility and cost of cleansing groundwater on an expedited basis at the sources of contamination on the Arsenal; and

(11) include a statement concerning any reprogramming or supplemental appropriation of funds that may be necessary for fiscal year 1987 in order to assure an expeditious implementation of the plan.

SEC. 823. COMMUNITY PLANNING ASSISTANCE

The Secretary of Defense may use funds appropriated to the Department of Defense for fiscal year 1986 for planning and design purposes to provide planning assistance to local communities if the Secretary determines that the financial resources available to the community (by grant or otherwise) are inadequate. The Secretary may use such funds as follows:

(1) To assist communities located near newly established Light Infantry Division Posts at Fort Drum, New York, and Fort Wainwright, Alaska, $500,000.

(2) To assist communities located near newly established homeports under the Naval Strategic Dispersal Program at Staten Island, New York, and Everett, Washington, $500,000.

SEC. 824. PLAN FOR TRANSFER OF SECTION 6 SCHOOLS

(a) PLAN REQUIREMENT.—(1) The Secretary of Defense shall submit to the Committees on Armed Services of the Senate and the House of Representatives a plan which provides for the orderly transfer, not later than July 1, 1990, of all Section 6 Schools to the appropriate local school districts of the States in which such schools are located.

(2) As used in paragraph (1), the term "Section 6 Schools" means schools of the Department of Defense established under section 6 of Public Law 81-874.

(b) DEADLINE FOR SUBMISSION OF PLAN.—The plan required by subsection (a) shall be submitted not later than March 1, 1986.

SEC. 825. FURNISHING OF BEDDING FOR HOMELESS

Section 2546 of title 10, United States Code, is amended—

(1) by redesignating subsection (d) as subsection (e); and

(2) by inserting after subsection (c) the following new subsection:

"(d) The Secretary concerned may provide bedding for support of shelters for the homeless that are operated by entities other than the Department of Defense. Bedding may be provided under this subsection without reimbursement, but may only be provided to the extent that the Secretary determines that the provision of such bedding will not interfere with military requirements.".

SEC. 826. USE OF WATERFRONT FACILITIES AT PORT HUENEME, CALIFORNIA

Notwithstanding any other provision of law, funds received by the Navy from its license agreement with the Oxnard Harbor District for use, on an as-available basis, of the waterfront facilities at the Naval Construction Battalion Center, Port Hueneme, California, may be used for operation and maintenance of waterfront facilities at that installation.

SEC. 827. MATERIAL AT NAVAL BASE, NORFOLK, VIRGINIA

The Secretary of the Navy may provide, without compensation, to the City of Norfolk, Virginia, not more than 50,000 cubic yards of dredged material located at the Naval Base, Norfolk, Virginia, if such city agrees to bear all costs and liabilities associated with loading, transporting, using, or otherwise handling such material.

SEC. 828. ALTERATION IN TRAILER PARK EXPANSION, HANSCOM AIR FORCE BASE, MASSACHUSETTS

(a) AUTHORITY TO ENTER INTO AGREEMENT.—In providing for the trailer park at Hanscom Air Force Base, Massachusetts, and the expansion of such park as authorized by section 302 of the Military Construction Authorization Act, 1985 (Public Law 98-407; 98 Stat. 1508), the Secretary of the Air Force may enter into an agreement with the Massachusetts Port Authority to terminate leasehold rights of the Department of the Air Force with respect to such trailer park in exchange for—

(1) leasehold rights to other land held by such Authority and acceptable to the Secretary; and

(2) the construction, by such Authority, of roads, utilities, and trailer pads on such other land in accordance with specifications of the Secretary.

(b) LIMITATION.—The termination of the leasehold rights by the Secretary shall not become effective until the completion of the construction described in subsection (a)(2).

PART C—REAL PROPERTY TRANSACTIONS

SEC. 831. LAND CONVEYANCE, DAVIS-MONTHAN AIR FORCE BASE, TUCSON, ARIZONA

(a) CONGRESSIONAL FINDINGS.—The Congress finds that—

(1) the highest and best use of the lands described or identified in subsection (b) is public park and recreational use or public health use;

(2) the city of Tucson, Arizona, has indicated a willingness to extend the existing lease between such city and the Air Force for the lands described in subsection (c) for an additional 50 years commencing in 2002 at the existing rental rate of $773 per year;

(3) the Administrator of General Services should—

(A) assign to the Secretary of the Interior lands described in subsection (b)(1) for use as a park or recreational area; and

(B) assign to the Secretary of Health and Human Services lands described in subsection (b)(2) for public health use;

(4) the Secretary of the Interior or the Secretaries of the Interior and Health and Human Services, as the case may be, should, simultaneously with the acceptance of the extension of the lease for the lands described in subsection (c), convey to the city of Tucson, Arizona—

(A) the property described in subsection (b)(1) for use as a park or recreational area through a public benefit discount conveyance under section 203(k)(2) of the Federal Property and Administrative Services Act of 1949 (40 U.S.C. 484(k)(2)); and

(B) such land as is described in subsection (b)(2) for public health use through a public benefit discount conveyance under section 203(k)(1)(B) of such Act (40 U.S.C. 484(k)(1)(B)).

(b) DESCRIPTION OF LAND SUITABLE FOR PARK OR RECREATIONAL USE AND FOR PUBLIC HEALTH USE.—(1) The property referred to in clauses (3)(A) and (4)(A) of subsection (a) is 61 acres of real property adjacent to Golf Links/Craycroft Intersection, Davis-Monthan Air Force Base, Tucson, Arizona.

(2) The property referred to in clauses (3)(B) and (4)(B) of subsection (a) is such portion (not exceeding eight acres) of the land described in paragraph (1) as the Secretary of Health and Human Services, with the concurrence of the Secretaries of the Interior and Defense, determines to be suitable for public health use.

(c) DESCRIPTION OF PROPERTY SUBJECT TO LEASE.—The property referred to in subsection (a)(2) is 4,348.81 acres of real property owned by the city of Tucson, Arizona, at Davis-Monthan Air Force Base.

(d) SURVEYS OF PROPERTY.—The exact acreage and legal descriptions of the property to be conveyed under this section shall be determined by surveys that are satisfactory to the Secretary of the Interior or the Secretaries of the Interior and Health and Human Services, as the case may be. The cost of such surveys shall be borne by the city of Tucson, Arizona.

SEC. 832. LAND CONVEYANCE, MARCH AIR FORCE BASE, CALIFORNIA

(a) REMOVAL OF REVERTER.—Section 835 of the Military Construction Authorization Act, 1985 (Public Law 98-407; 98 Stat. 1527), is amended—

(1) by striking out subsection (d); and

(2) by redesignating subsections (e), (f), and (g) as subsections (d), (e), and (f), respectively.

(b) TECHNICAL AMENDMENTS.—(1) Subsection (a) of such section is amended—

(A) by striking out "Village West Foundation" and inserting in lieu thereof "Air Force Village West"; and

(B) by striking out " 'Foundation'), of San Bernardino" and inserting in lieu thereof " 'Corporation'), of Riverside".

(2) Subsection (b) and subsections (d) and (f), as redesignated by subsection (a), of such section are amended by striking out "Foundation" each place it appears and inserting in lieu thereof "Corporation".

SEC. 833. LAND CONVEYANCE, NAVAL AIR STATION, MIRAMAR, SAN DIEGO, CALIFORNIA

(a) AUTHORITY TO SELL OR EXCHANGE.—The Secretary of the Navy (hereafter in this section referred to as the "Secretary") is authorized to sell or exchange approximately 475 acres of land lying south of proposed highway SR-52 which comprises a portion of the Naval Air Station, Miramar, California. The lands sold or exchanged may not include lands authorized to be conveyed under section 837 of the Military Construction Authorization Act, 1985 (Public Law 98-407; 98 Stat. 1529).

(b) SALE OR EXCHANGE REQUIREMENT.—The sale or exchange shall be conducted in accordance with competitive bidding procedures prescribed in section 2304 of title 10, United States Code. In no event may the land described in subsection (a) be sold or exchanged for less than the fair market value thereof.

(c) CONSIDERATION.—In consideration for the sale or exchange authorized in subsection (a), the Secretary may accept cash or land in the San Diego area, or both. Any land received shall be a suitable site (as determined by the Secretary) for military family housing.

(d) USE OF FUNDS.—(1) The Secretary is authorized to use any proceeds from the sale of lands made under this section solely for the purpose of acquiring in the San Diego area a suitable site for military family housing.

(2) Any funds received by the Secretary under this section and not used for the acquisition of a site for military family housing within 30 months after the receipt of such funds shall be deposited into the general fund of the Treasury.

(e) LEGAL DESCRIPTION OF LAND.—The exact acreage and legal description of the property sold or exchanged under this section shall be in accordance with surveys that are satisfactory to the Secretary.

(f) ADDITIONAL TERMS.—The Secretary may require such additional terms and conditions under this section as the Secretary considers appropriate to protect the interests of the United States.

SEC. 834. LAND CONVEYANCE, COLORADO SPRINGS, COLORADO

(a) AUTHORITY TO CONVEY.—Subject to subsections (b) and (c), the Secretary of the Air Force (hereafter in this section referred to as the "Secretary") is authorized to convey to the United States Olympic Committee, without consideration, all right, title, and interest of the United States in and to the approximately 3.98 acres of land (together with improvements thereon) near Colorado Springs, Colorado, which are occupied by such Committee under a lease entered into by the Secretary with such Committee pursuant to section 806 of the Military Construction Authorization Act, 1980 (Public Law 96-125; 93 Stat. 949).

(b) CONDITIONS.—The conveyance described in subsection (a) shall be subject—

(1) to the condition that the property conveyed shall be used by the United States Olympic Committee solely for activities of such Committee;

(2) to the condition that if the property conveyed is not used for the purpose de-

scribed in clause (1), all right, title, and interest in and to the property shall revert to the United States, which shall have the right of immediate entry thereon; and

(3) to such other terms and conditions as the Secretary considers appropriate to protect the interests of the United States.

(c) DESCRIPTION OF LAND.—The exact acreage and legal description of the property to be conveyed under subsection (a) shall be determined by a survey that is satisfactory to the Secretary. The cost of the survey shall be borne by such Committee.

SEC. 835. LAND TRANSFER, NAVAL AIR STATION, PENSACOLA, FLORIDA

(a) TRANSFER.—The Secretary of the Navy shall transfer, without reimbursement, to the Administrator of Veterans' Affairs a tract of land consisting of approximately 15.31 acres, together with improvements thereon, at the Naval Air Station, Pensacola, Florida.

(b) USE OF LAND.—The real property transferred pursuant to subsection (a) shall become part of the Barrancas National Cemetery and shall be administered by the Administrator of Veterans' Affairs as part of the National Cemetery System under chapter 24 of title 38, United States Code.

(c) CONDITION.—If the real property transferred pursuant to subsection (a) is not used for the purpose described in subsection (b), the Administrator of Veterans' Affairs shall transfer such property, without reimbursement, to the Secretary of the Navy.

(d) DESCRIPTION OF LAND.—The exact acreage and legal description of the property to be transferred under subsection (a) shall be determined by a survey approved by the Secretary.

SEC. 836. NAVIGATION RIGHTS ON SANTA ROSA ISLAND, FLORIDA

The Act entitled "An Act to authorize the Secretary of the Army to sell and convey to Okaloosa County, State of Florida, all right, title, and interest in the United States in and to a portion of Santa Rosa Island, Florida, and for other purposes", approved July 2, 1948 (62 Stat. 1229), is amended by adding at the end thereof the following new section:

"SEC. 5. The prohibition contained in subdivision d. of the first section against the erection of any structure or obstacle on the land conveyed under this Act in excess of seventy-five feet above mean low-water level shall be deemed to be a prohibition against the erection of a structure or obstacle in excess of two hundred feet above mean low-water level in the case of that portion of such land on Santa Rosa Island which is east of the Destin East Pass and known as Holiday Isle.".

SEC. 837. TERMINATION DATE FOR CERTAIN LAND CONVEYANCE AUTHORITY AT EGLIN AIR FORCE BASE, FLORIDA

Section 808 of the Military Construction Authorization Act, 1983 (Public Law 97-321; 98 Stat. 1575), is amended by adding at the end the following new subsection:

"(d) The authority of the Secretary under this section shall terminate on October 1, 1990.".

SEC. 838. LAND EXCHANGE, JACKSONVILLE, FLORIDA

(a) IN GENERAL.—Subject to subsections (b) through (f), the Secretary of the Navy (hereafter in this section referred to as the "Secretary") is authorized to convey to the NEW MET Company (hereafter in this section referred to as the "Company") all right, title, and interest of the United States in and to approximately 39.5 acres of unimproved land comprising a portion of the Naval Station, Mayport, Florida, located adjacent to the Ribault Bay Village Navy housing area.

(b) CONSIDERATION.—In consideration for the conveyance by the Secretary under subsection (a), the Company shall convey to the United States a parcel of land consisting of approximately 31.7 acres located in the vicinity of the Ribault Bay Village Navy housing area.

(c) OBLIGATIONS OF PARTIES.—The specific obligations of the Secretary and the Company shall be those set forth in a memorandum of understanding between the parties dated February 19, 1985.

(d) PAYMENT BY THE COMPANY.—If the fair market value of the land conveyed to the Company under subsection (a) exceeds the fair market value of the land conveyed to the United States under subsection (b), as determined by the Secretary, the Company shall pay the difference to the United States.

(e) SURVEY.—The exact acreages and legal descriptions of the lands to be conveyed under this section shall be determined by surveys which are satisfactory to the Secretary. The cost of any such survey shall be borne by the Company.

(f) ADDITIONAL TERMS AND CONDITIONS.—The Secretary may require such additional terms and conditions in connection with the transaction authorized by this section as the Secretary considers appropriate to protect the interests of the United States.

SEC. 839. LAND CONVEYANCE, FORT WILLIAM H. HARRISON, MONTANA

(a) AUTHORITY TO CONVEY.—Subject to subsection (b), the Secretary of the Army (hereafter in this section referred to as the "Secretary") is authorized to convey, without consideration, to the State of Montana all right, title, and interest of the United States in and to approximately 65.4 acres of unimproved land located in the southeast corner of Fort William H. Harrison, Montana, and presently under license to the State of Montana for National Guard use.

(b) CONDITIONS.—(1) The conveyance authorized by subsection (a) shall be subject to the condition that the property conveyed by the Secretary be used by the State to establish a State veterans' cemetery.

(2) If the property conveyed pursuant to subsection (a) is not used for the purposes described in paragraph (1), all right, title, and interest in and to such property shall revert at no cost to the United States, which shall have the right of immediate entry thereon.

(3) The Secretary shall reserve to the United States in the property conveyed by the Secretary a waterline easement for use by the Veterans' Administration Hospital near Fort William H. Harrison.

(c) LEGAL DESCRIPTION OF LAND.—The exact acreage and legal description of the property to be conveyed under subsection (a) and of the easement to be reserved under subsection (b)(3) shall be determined by surveys that are satisfactory to the Secretary. The cost of such surveys shall be borne by the State.

(d) ADDITIONAL TERMS AND CONDITIONS.—The Secretary may require such other terms and conditions with respect to the conveyance as the Secretary considers appropriate to protect the interests of the United States.

SEC. 840. LAND CONVEYANCE, FORT JACKSON, SOUTH CAROLINA

(a) AUTHORITY TO SELL.—Subject to subsections (b) through (g), the Secretary of the Army (hereafter in this section referred to as the "Secretary") may sell all or any portion of that tract of land which comprises a portion of Fort Jackson, South Carolina, known as the Gregg Circle Area, consisting of 300 acres more or less.

(b) CONDITIONS OF SALE.—Before the Secretary enters into a contract for the sale of all or a portion of the property referred to in subsection (a), the prospective buyer shall be required—

(1) to submit to the Secretary a master plan for the development of the land that is acceptable to both the Secretary and the appropriate officials of the city of Columbia, South Carolina; and

(2) at the option of the Secretary, to enter into an agreement with the Secretary under which the prospective buyer agrees that if all or a portion of the land referred to in subsection (a) is conveyed to the buyer, the buyer will be required—

(A) to construct, at the option of the Secretary, on a portion of the land to be conveyed or on a portion of the land not conveyed up to 400 units of family housing in accordance with specifications and standards prescribed by the Secretary at the time the land is offered for sale;

(B) to have the housing units ready for occupancy not later than 2 years after the date of the conveyance of such land to the prospective buyer; and

(C) at the option of the Secretary—

(i) lease the housing units to the Army pursuant to section 2828(g) of title 10, United States Code; or

(ii) set aside the housing units for military personnel in exchange for a guarantee by the Secretary of the rental of the set-aside housing units in accordance with section 802 of the Military Construction Authorization Act, 1984 (10 U.S.C. 2821 note).

(c) COMPETITIVE BID REQUIREMENT; MINIMUM SALE PRICE.—(1) The sale of any of the land referred to in subsection (a) shall be carried out under publicly advertised, competitively bid, or competitively negotiated contracting procedures.

(2) In no event may any of the land referred to in subsection (a) be sold for less than its fair market value.

(d) REPORT REQUIREMENTS.—(1) The Secretary may not enter into any contract for the sale of any or all of the land referred to in subsection (a) unless—

(A) the Secretary has submitted a report to the appropriate committees of Congress containing the information required in section 2828(g)(6)(A) of title 10, United States Code; and

(B) a period of 21 days has expired following the date on which the economic report referred to in such section is received by those committees.

(2) Any report submitted under paragraph (1) shall include—

(A) a description of the price and terms of the proposed sale;

(B) a description of the procedures used in selecting a buyer for the land; and

(C) all pertinent information regarding the family housing to be made available for military personnel under this section.

(e) USE OF PROCEEDS OF SALE.—(1) The Secretary may use the proceeds from the sale of any of the land referred to in subsection (a)—

(A) to provide for military family housing for military personnel stationed at Fort Jackson in the manner prescribed in subsection (b)(2) or in such other manner as the Secretary may prescribe;

(B) to provide for security and access routes to facilities at Fort Jackson for military personnel housed or to be housed in the housing units to be constructed on such land; and

(C) to construct necessary facilities for up to 100 mobile trailer home sites at Fort Jackson.

(2) Any proceeds of the sale not used for such purposes shall be covered into the general fund of the Treasury.

(f) LEGAL DESCRIPTION OF LAND.—The exact acreage and legal description of the land to be conveyed under this section shall be determined by a survey approved by the Secretary.

(g) ADDITIONAL TERMS.—The Secretary may require such additional terms and conditions in connection with any transaction authorized by this section as the Secretary considers appropriate to protect the interests of the United States.

(h) ADDITIONAL AUTHORITY.—The military family housing authorized under this section is in addition to any military family housing otherwise authorized by law.

SEC. 841. LAND CONVEYANCE, NAVAL WEAPONS STATION, CHARLESTON, SOUTH CAROLINA

(a) AUTHORITY TO CONVEY.—Subject to subsections (b) through (h), the Secretary of the Navy (hereafter in this section referred to as the "Secretary") is authorized to convey to the Westvaco Corporation of New York (hereafter in this section referred to as the "Corporation") all right, title, and interest of the United States in and to approximately 47.83 acres of land, together with improvements thereon, which comprise that portion of the Navy Weapons Station, Charleston, South Carolina, located at Remount Road and Virginia Avenue.

(b) CONSIDERATION.—In consideration for the conveyance authorized by subsection (a), the Corporation shall—

(1) pay for the cost of construction of suitable replacement facilities to be constructed in a manner and at a site determined by the Secretary;

(2) pay for the cost of removing any existing improvements on the replacement site; and

(3) pay for the cost of relocating from the facilities located on the land to be conveyed by the Secretary to the replacement facilities.

(c) AUTHORITY TO USE FUNDS.—The Secretary is authorized to receive, obligate, and disburse any funds received under subsection (b) to cover design, construction, relocation and related costs specified in the memorandum of understanding referred to in subsection (d).

(d) OBLIGATIONS OF PARTIES.—The specific obligations of the Secretary and the Corporation shall be those set forth in a memorandum of understanding between the parties that became effective April 17, 1985.

(e) VACATING PROPERTY.—Upon completion and occupancy of the replacement facilities by the Navy and payment of all costs by the Corporation, the Navy shall promptly vacate the property described in subsection (a) and convey the property by quitclaim deed to the Corporation.

(f) PAYMENT OF ANY EXCESS.—If the fair market value of the property conveyed under subsection (a) exceeds the consideration paid under subsection (b), as determined by the Secretary, the Corporation shall pay the difference to the United States.

(g) LEGAL DESCRIPTION OF LAND.—The exact acreage and legal description of any land conveyed under this section shall be determined by a survey which is satisfactory to the Secretary. The cost of such survey shall be borne by the Corporation.

(h) ADDITIONAL TERMS.—The Secretary may require such additional terms and conditions under this section as the Secretary considers appropriate to protect the interest of the United States.

SEC. 842. PROPERTY MANAGEMENT

(a) FORT MCNAIR.—The Administrator of General Services shall transfer approximately 10.5 acres of surplus land adjacent to Fort McNair, Washington, D.C., to the Secretary of the Army, without reimbursement, for use by the Secretary in connection with the National Defense University.

(b) ARLINGTON HALL STATION.—Upon the relocation of the Army Intelligence and Security Command and other Defense activities from Arlington Hall Station to new quarters, the Secretary of the Army shall transfer approximately 72 acres of the tract of land known as Arlington Hall Station, together with improvements thereon, to the Secretary of State, without reimbursement, to be used as a center for the training and instruction of personnel in the field of foreign relations, as authorized by chapter 7 of the Foreign Service Act of 1980 (22 U.S.C. 4021-4026), and for such other purposes as the Secretary of State may consider appropriate.

And the House agree to the same.

JOINT EXPLANATORY STATEMENT OF THE COMMITTEE OF CONFERENCE

The managers on the part of the House and the Senate at the conference on the disagreeing votes of the two Houses on the amendment of the House to the bill (S. 1042) to authorize certain construction at military installations for fiscal year 1986, and for other purposes, submit the following joint statement to the House and the Senate in explanation of the effect of the action agreed upon by the managers and recommended in the accompanying conference report:

The House amendment struck out all of the Senate bill after the enacting clause and inserted a substitute text.

The Senate recedes from its disagreement to the amendment of the House with an amendment which is a substitute for the Senate bill and the House amendment. The differences between the Senate bill, the House amendment, and the substitute agreed to in conference are noted below, except for clerical corrections, conforming changes made necessary by agreements reached by the conferees, and minor drafting and clarifying changes.

COMPARISON OF HOUSE AND SENATE BILLS

As passed by the Senate, S. 1042 provided $8,831,012,000 in new authorization.

The House amendment provided $9,200,000,000 in new authorization.

The Department of Defense and the respective military departments requested $10,309,471,000.

SUMMARY OF RESOLUTION OF DIFFERENCES

As a result of the conference between the House and Senate on S. 1042, the conferees agree to an authorization for appropriations for military construction and family housing for fiscal year 1986 of $9,199,824,000.

Authorization for appropriations conference agreement, fiscal year 1986

Section 601 (Army):	
Inside the United States.	$1,089,432,000
Outside the United States	429,140,000
Unspecified minor construction	31,000,000
Planning and design	136,100,000
Family housing construction	356,337,000
Family housing support..	1,270,794,000
Subtotal	3,312,803,000
Section 602 (Navy):	
Inside the United States.	1,304,480,000
Outside the United States	201,185,000
Unspecified minor construction	21,560,000
Planning and design	139,260,000
Defense access roads	2,960,000
Family housing construction	154,000,000
Family housing support..	584,739,000
Subtotal	2,408,184,000
Section 603 (Air Force):	
Inside the United States.	1,47,207,000
Outside the United States	415,550,000
Unspecified minor construction	22,000,000
Planning and design	144,096,000
Defense access roads	30,240,000
Family housing construction	212,600,000
Family housing support..	729,298,000
Subtotal	2,700,991,000
Section 604 (Defense Agencies):	
Inside the United States.	95,149,000
Outside the United States	104,146,000
Unspecified minor construction	4,000,000
Contingency construction	5,000,000
Planning and design	30,000,000
Family housing construction	1,910,000
Family housing support..	18,390,000
Subtotal	258,595,000
Section 605 (NATO Infrastructure)	38,000,000
Section 701 (Guard and Reserve Force):	
Army National Guard	149,101,000
Army Reserve	70,700,000
Naval and Marine Corps Reserve	51,800,000
Air National Guard	139,000,000
Air Force Reserve	70,650,000
Subtotal	481,251,000
Total authorization of appropriations	$9,199,824,000

GENERAL TOPICS

CONFERENCE GUIDELINES

There were several hundred projects or language items in dispute between the House and Senate versions of the military construction authorization bill. To facilitate the resolution of these differences the conferees established the following conference guidelines:

1. A target of $9.2 billion in budget authority was determined to represent the amount that the conferees could authorize for appropriations to stay within the $302.5 billion defense function adopted by the Congress in the budget resolution for fiscal year 1986.

2. Within this target, priority was given to restoring those adequately justified projects that had been included in the budget request but deferred by either the House or the Senate for budgetary reasons.

3. Prior year savings that are expected to result from a strong dollar against NATO currencies and from a good bidding climate in the construction industry were used to reduce the authorization for appropriations.

BASE CLOSURES

It has been estimated that millions of dollars could be saved annually if non-essential bases throughout the United States were closed. In February of 1985, the Secretary of Defense released to the Senate a "notional" list of the types of bases that could be closed if the Department of Defense had sufficient legislative authority. Although the "notional" list was never officially submitted to the House of Representatives, hearings were conducted on this issue and related legislation. The conferees believe that the streamlined provisions contained in the fiscal year 1986 defense authorization act will permit the Secretary of Defense to close non-essential bases. The Secretary of Defense is strongly encouraged to take aggressive action in this area.

The conferees expect to see the Secretary's decisions to close bases as a part of the upcoming fiscal year 1987 budget request. In the meantime, no project in this year's budget was deferred due to base closure consideration. The Department of Defense is directed not to obligate or expend funds authorized in this act for bases that are under serious consideration for closure.

HOMEPORTING

The conferees agree to provide $17,640,000 to initiate land acquisition for the aircraft carrier battle group homeport at Everett, Washington and $21,460,000 to begin construction for the surface action group homeport at Staten Island in New York. This is part of an overall plan to develop homeports along the east, west and gulf coasts.

The conferees have serious concerns that at a time when the defense budget is under severe constraints, the Navy is starting a billion dollar construction program. Such a program could make modernization of our existing bases unaffordable. Therefore, the conferees direct the Secretary of the Navy to prepare a detailed report that justifies the homeporting program on the basis of military necessity and cost effectiveness. The report should describe by year the number and type of ships planned for each port and the overall plan for facility development, including costs. The plan should describe the entire deployment as well as that portion necessary for initial operating capability (IOC). No funds authorized by this act may be obligated or expended until 90 days after the Congress receives this report.

SECTION 6 SCHOOLS

The Senate bill authorized $31,606,000 for section 6 dependent schools in the United States. The House amendment contained no authorization for this purpose. The House recedes.

Section 6 schools are dependent schools on military bases within the United States and its territories that are operated and maintained by the Secretary of Defense. The conferees agree to fund the Defense Department's request for construction, recognizing that the requirements are valid. However, the objective of the Secretary of Defense is to ultimately transfer these schools to local education districts and the conferees strongly agree.

The General Accounting Office (GAO) has been asked to study the problem and report back to the Committees on Armed Services of the Senate and the House of Representatives by March 1986. Preliminary indications are that while impediments exist, transfer is feasible. The Secretary of Defense is directed, therefore, to submit a plan by March 1, 1986 to the Committees on Armed Services of the Senate and the House of Representatives that will provide for the orderly transfer of all section 6 schools in the United States by July 1, 1990. Such a plan should take into consideration the findings of GAO. Future requests for construction funds should be consistent with this plan for transfer.

THIRD PARTY FINANCING

The Senate bill contained a provision (sec. 817) that would authorize construction of child care centers, waste water treatment and depot facilities with private sector financing. The House bill contained no similar provision.

The House recedes.

The conferees are convinced that third party financing can provide a supplement to military construction funds to meet some of the services' requirements. However, the Department of Defense has not pursued this avenue vigorously enough.

Some of the problems in using this approach come from acquisition regulations that are not suited to this method of contracting. Other problems result from the government's interpretation of risk and liabilities. The Department of Defense should carefully review how best to develop a workable and cost effective way to accomplish third party contracting and report its findings to the Committees on Armed Services of the Senate and the House of Representatives by March 1, 1986.

CHILD CARE CENTERS

The Senate bill denied funding for child care centers in CONUS, despite their need, because at the time of the Senate's consideration of the military construction authorization bill the services had not completed the previously authorized test seeking third party financing as required by the fiscal year 1985 military construction authorization act. The House amendment authorized $24.7 million for Army child care centers but prohibited obligation of funds until after review of the bids which were being received while the bill was under consideration.

The Army has since reported the results of its effort and has identified some real concerns regarding issues of subsidies, guaranties and other operational impediments to a successful third party effort.

The conferees agree to authorize $23,600,000 for Army child care centers, based on the need at the proposed sites to provide safe and adequate facilities. Although the Army pilot effort was unfavorable, the conferees believe that a third party financing approach may still be a viable option, given statutory relief. Therefore, the Secretary of Defense is directed to evaluate the Army effort, as well as the other service efforts underway, to determine what statutory relief and what concept for third party financing would make private sector funding for child care centers more competitive. A report of this evaluation must be provided by March 1, 1986 with suggested legislative language that would be required for implementation.

The requirement to test the third party approach on a base belonging to the Navy and Air Force remains; however, this effort should be coordinated to ensure that the Navy and Air Force tests make use of the experience gained in the Army test to remove any unnecessary non-statutory impediments to a successful third party contract.

The Senate recedes.

MEDICAL FACILITIES CONSTRUCTION PROGRAM

Many military medical facilities are antiquated and in need of either modernization or replacement. Construction over the next five years is expected to cost $4 billion. Last year, Congress directed the Secretary of Defense to establish a "Blue Ribbon Panel on Sizing Department of Defense Medical Treatment Facilities" to review, among other things, the appropriate sizing and utilization of military medical facilities. The Blue Ribbon Panel issued its final report on June 28, 1985. Unfortunately, the report came too late to be of substantial benefit to the Committees on Armed Services of the Senate and the House of Representatives during consideration of the bill.

However, the conferees agree to authorize $157,760,000 for certain medical facilities inside the United States, and $79,620,000 for medical contingency facilities in several overseas locations.

Future requests for authorization for medical facilities will be carefully matched against the comments and recommendations of both the Blue Ribbon Panel and the Assistant Secretary of Defense for Health Affairs. In addition, the conferees intend to continue their own independent review of the sizing of medical treatment facilities.

U.S. FORCES IN SPAIN

The Department of Defense requested $19.2 million in projects for U.S. Naval and Air Force bases in Spain. The Senate approved the request in its bill. The House deferred the projects.

The conferees agree to defer all but one of the projects because the United States and Spain are currently engaged in talks on whether the number of U.S. forces in Spain should be reduced. The conferees believe it is prudent to postpone the projects—with one exception—for this fiscal year to provide time for the force-size question to be resolved. The exception is a $2.9 million medical contingency complex at Torrejon Air Base.

LEASING AND RENTAL GUARANTEE TEST PROGRAM FOR MILITARY FAMILY HOUSING

The Department of Defense requested the continuation, without limitation, of the Military Family Housing Leasing Program and the Military Housing Rental Guarantee Program (sec. 801 and sec. 802, respectively, of the military construction authorization act of fiscal year 1985, Public Law 98-115).

The House amendment extended for one year the existing programs but did not provide additional leasing authority. The Senate bill extended the program for one year but removed any restrictions on the number of units that could be leased or the number of contracts that could be entered into.

The conferees continue to support these test programs in the belief that they may be

able to provide urgently needed military family housing quicker and at a lower cost than the military construction alternative. However, the conferees are concerned that the economic analyses that have been submitted to support these projects may not be providing complete and accurate information to the Congress. To assist in the analysis of these programs, the General Accounting Office (GAO) has been requested to provide the committees with a report that evaluates the current methodology employed in the economic analysis prepared by the services giving particular attention to the triservice family housing model, the accuracy of other cost estimates and the advisability of having the government enter into long-term lease agreements.

As soon as a project has been totally constructed, the General Accounting Office is to examine the quality of these houses as opposed to military housing constructed through the conventional military construction process. The GAO report is to be presented to the Committees on Armed Services of the Senate and the House of Representatives by March 15, 1986. At that time, the committees will reexamine whether these test programs should be continued and if so, what, if any, changes are required to make the program more successful.

Pending receipt of this report, the conferees agree to extend the present test program for one additional year and provide for the services to enter into 600 additional leases for the military family housing leasing program and an additional 600 units under the military housing rental guarantee program with no limitation on the number of contracts that can be entered into.

TURN-KEY SELECTION PROCEDURES

The House amendment contained a provision that would allow the Secretaries of the Military Departments, with the approval of the Secretary of Defense, to enter into three contracts per service per year for the construction of authorized military construction projects using one-step turn-key, competitive selection procedures. The Senate bill contained no similar provision. The Senate recedes with an amendment that would delay the effective date for one year and shorten the time period for the use of this pilot authority.

The conferees intend that the phrase "authorized military construction projects" means projects which have been subjected to the normal authorizing and appropriating process. This language provides no independent authority to enter into military construction contracts, but only authority to enter into a single contract for both design and construction once Congress has approved those projects during the normal budget process.

The conferees further expect the Department of Defense to explicitly indicate in its budget request for each fiscal year those projects that have been selected for construction under the turn-key selection procedures. The Committees on Armed Services of the Senate and the House of Representatives will consider the merits of each project recognizing the request to use this special contracting procedure.

PLAN FOR THE CLEANUP OF ROCKY MOUNTAIN ARSENAL

In section 811, the House approved a provision that would direct the Secretary of the Army to develop and provide by December 31, 1985, a report setting forth a comprehensive plan for the cleanup of all contamination at Rocky Mountain Arsenal, Colorado, by September 30, 1993.

To meet the requirements of the National Contingency Plan, which provides Federal guidelines for the effective cleanup of contaminated sites, the conferees agree to extend the submission date for the plan until September 1, 1986. This nine month extension will permit the Department of the Army to complete and fully analyze the results of the Remedial Investigation Feasability Study, required by the National Contingency Plan, and submit a plan to Congress that will be supported by substantiated technical data.

LAND TRANSFER MIRAMAR NAVAL AIR STATION

The Senate bill included a provision (sec. 818) that would give the Secretary of the Navy authority to sell certain designated property at Miramar Naval Air Station, San Diego, California and to retain the proceeds for use in obtaining additional military family housing in the San Diego area. No similar provision was contained in the House Amendment.

The House recedes.

The conferees direct the Secretary of the Navy to notify the appropriate committees of the Congress before any funds derived from the sale of the property are expended for the acquisition of additional family housing sites.

INCREMENTAL FUNDING

The conferees agree to authorize the service Secretaries or Directors of Defense Agencies to enter into contracts for the full amount of the design and construction for the following three projects: The Eastern Distribution Center, New Cumberland Army Depot; Madigan Army Medical Center; and the Research and Engineering Facility for the National Security Agency.

The conferees expect the Department of Defense to phase the requests for funding over the next several years.

LAND TRANSFERS

Both the Senate and House bills contain a variety of porposals to transfer property between and from the various services. While the conferees have considered each of those projects on their merits, we are concerned that land transfer requests lack any standardize dormat. The conferees intend to develop standard statutory language for all land transfers, and place a heavy responsibility on proponents of a legislative land transfer using a differing format.

TITLE I—ARMY

The Senate bill provided $3,141,513,000 in authorization for the Department of the Army military construction and family housing programs. The House amendment provided authorization of $3,410,786,000 for such purposes. The conferees agree to authorize appropriations for projects in Title I in the amount of $3,312,803,000 which is $97,983,000 below the House figure and $171,290,000 above the Senate figure. Among the items considered in conference and acted upon by the conferees were the following:

AVIATION MUSEUM, FORT RUCKER, ALABAMA

The House amendment contained $2,500,000 in authorization as the Federal share of a project to construct an aviation museum at Fort Rucker, Alabama. Private funds are being raised to match the proposed Federal contribution. The Senate bill contained no similar provision.

The Senate recedes.

The conferees agree to authorize an appropriation of $2,500,000 for the Fort Rucker aviation museum. However, the Secretary of the Army may not obligate the funds until an equal amount of matching funds is on hand from other sources. The conferees further direct the Secretary to report to the Committees on Armed Services of the senate and the House of Representatives when the matching funds are available.

MADIGAN ARMY MEDICAL CENTER

The conferees carefully reviewed the findings of the Blue Ribbon Panel on Sizing Department of Defense Medical Treatment Facilities with respect to the proposed replacement hospital for Madigan Army Medical Center at Fort Lewis, Washington.

In its final report, the Blue Ribbon Panel found that the number of occupied beds required for the replacement hospital is not appreciably larger than the number required today. The panel suggested that only a 375-bed hospital would be justified, 103 beds fewer than the 478 beds recommended by the Army and used in the design of the Madigan facility. While that panel did not recommend reducing the size of the new hospital, it did state that it lacked sufficient time and comprehensive data to "perform a more precise analysis of the requirements for the replacement of Madigan."

Based on patient load projections reported by the Army and the Assistant Secretary of Defense for Health Affairs and the declining average daily patient load at Madigan during the past several years, the conferees direct the Army to reduce the previously approved replacement hospital to one of approximately 400 beds. Based on information supplied to the conferees, this can be achieved by reducing the size of the currently designed nursing tower by one floor and making minor adjustments to lower floors.

With these directions, the conferees agree to approve the House provision relating to Madigan.

NEW CUMBERLAND ARMY DEPOT, PENNSYLVANIA

The House authorized $88 million for the Eastern Distribution Center at New Cumberland Army Depot, New Cumberland, Pennsylvania with an accompanying authorization for appropriations of $15 million and continuing contract authority. The Senate deferred this project pending the Army's review for a potential third-party contract.

The Senate recedes.

Although the conferees believe that third-party contracting is a viable alternative, they believe that the delay for such a review might cost the government more than it would save. However, it is the understanding of the conferees that the Army is also considering the Red River Depot in Texas for modernization. The Committees on Armed Services of the Senate and the House of Representatives will not consider any request for military construction funds for the Red River project until the Secretary of the Army has reviewed its potential for third-party contracting and has reported back to the Committees on Armed Services of the Senate and the House of Representatives.

SECURITY UPGRADE AT PERSHING II MISSILE SITES

The House amendment authorized $101,000,000 for the construction of facilities necessary to increase the security and safety for Pershing II missile sites at various locations in Germany. Of this amount, $56 million was authorized from prior year savings. The remainder was authorized to be funded from future savings or from available appropriations resulting from cancelled

programs. The Senate bill contained no similar provision.

The Senate recedes.

The conferees agree that the lack of security at Pershing II missile sites is a serious problem and must be corrected as quickly as possible. However, the conferees are concerned that there be proper oversight of the projects to be constructed under this authority. The Secretary of the Army is, therefore, directed to provide a complete explanation and justification for the security upgrade program and to notify the Committees on Armed Services of the Senate and the House of Representatives not less than 21 days before the initial obligation of funds for such construction. Notification is also to be made 21 days prior to the cancellation of any authorized project for the purpose of funding this program.

TITLE II—NAVY

The Senate bill provided $2,345,003,000 in authorization for the Department of the Navy military construction and family housing programs. The House amendment provided authorization of $2,602,234,000 for such purposes. The conferees agree to a new total in Title II of $2,408,184,000 which is $194,050,000 below the House figure and $63,181,000 above the Senate figure.

BRIGADE ACTIVITIES CENTER, NAVAL ACADEMY, ANNAPOLIS, MARYLAND

The Senate bill authorized $21,600,000 for the brigade activities center at the Naval Academy. No authorization was provided by the House.

The conferees agree to authorize for appropriations $16.6 million for the project based on the understanding that the Naval Academy Alumni Association has agreed to provide additional funds for the project.

The Navy is, therefore, directed to seek non-appropriated funds to augment the military construction appropriations in order to complete this project.

MODERNIZATION OF NAVY BRIGS

The Senate bill authorized three brigs requested for Jacksonville, Florida, Memphis, Tennessee, and Seattle, Washington. The House deferred the three brigs without prejudice, recommending that the Department of the Navy study the possibility of consolidating its brig system.

The Navy has subsequently advised the Committees on Armed Services of the Senate and the House of Representatives that it has revised its brig system to consider consolidation and a less costly alternative to those that were requested in the budget; however, these three alternative brigs are still under design.

In order to allow the Navy sufficient time to implement its revised brig system, the conferees agree to defer the requested brigs. The conferees also agree that the new brig system is a worthwhile improvement and suggest that the Navy include these re-designed brigs in the fiscal year 1987 budget request.

NAVAL POST GRADUATE SCHOOL PROJECT, MONTEREY, CALIFORNIA

The Navy requested $13 million for an ocean sciences building at the Naval Post Graduate School in Monterey, California. This project was authorized in the House amendment; however, the request for additional facilities at the Naval Post Graduate School was deferred by the Senate pending justification of this building based solely on the academic needs at the Naval Post Graduate School as opposed to Naval oceanographic requirements which the committee feels should be consolidated at the Naval Oceanography Command headquarters located elsewhere.

The House recedes.

The conferees expect the Navy to resubmit the project in its fiscal year 1987 military construction program.

SEWERAGE TREATMENT FACILITY, NAVAL SHIPYARD, MARE ISLAND, CALIFORNIA

The House bill authorized $5,100,000 to pay for the Navy's share of improvements to the Vallejo Sanitation and Flood Control District's municipal sewer system. The Senate did not authorize the improvements.

The Vallejo Sanitation and Flood Control District is currently in the process of advertising for the construction of the improvements and has sufficient funds to cover the construction contract. The conferees understand that the funds for the Navy share are not required until the construction is completed in fiscal year 1988. The conferees therefore, direct the Navy to include this project in a budget that will facilitate the payment of the Navy's share prior to the completion of the construction.

NAVAL AIR REWORK FACILITY, CHERRY POINT, NORTH CAROLINA

The House amendment authorized $15.9 million for construction of an aircraft engine blade/vane rework facility at Cherry Point, North Carolina. No authorization was included in the Senate bill for this purpose.

The conferees agree to defer this project because of budget constraints. The fiscal year 1985 military construction appropriations report (House Report 98-850) directed that funds to construct the aircraft engine blade/vane rework facility at Cherry Point, North Carolina be included in the fiscal year 1986 budget request. However, it as not included. The conferees, therefore, believe that the Navy should include this project in its fiscal year 1987 budget submission.

TITLE III—AIR FORCE

The Senate bill provided $2,624,041,000 for military construction and military family housing for the Department of the Air Force. The House amendment provided $2,809,561,000. The conferees agree to a new total of $2,700,991,000, which is $108,570,000 below the House figure and $76,950,000 above the Senate figure.

REGIONAL WASTEWATER CONNECTION, MCCLELLAN AIR FORCE BASE, CALIFORNIA

The House amendment authorized $5.1 million to construct a trunk line that would connect McClellan Air Force Base to the Sacramento Regional Sanitation System. The Senate bill did not authorize this project.

The conferees agree to defer authorization for this project due to budget constraints; however, they recognize it as an important project that is required in order for the base to comply with state regulations. The base is currently under order by the California Regional Water Quality Control Board to "cease and desist" the discharge of its wastewater ito Magpie Creek by August 1987.

Therefore, the Secretary of the Air Force is directed to submit this project in the fiscal year 1987 budget request.

TITLE IV—DEFENSE AGENCIES

The Senate bill authorized $269,000,000 in new construction for Defense Agencies while the House amendment provided $203,025,000. The conferees agree to a new total of $258,595,000, which is $55,570,000 above the House figure and $10,405,000 below the Senate figure.

TITLE V—NATO INFRASTRUCTURE

The Senate bill authorized $38,000,000 for the NATO Infrastructure program.

The House amendment provided authorization in the amount of $55,000,000 for the NATO fund.

Believing that the U.S. dollar will continue to be strong against foreign currencies through fiscal year 1985, the conferees agree to $38,000,000 authorization for the program.

TITLE VI—AUTHORIZATION OF APPROPRIATIONS AND ADMINISTRATIVE PROVISIONS

OVERSEAS HOUSING LEASES

In section 607, the House amendment provided authority to lease up to 34,000 units of family housing at any one time in foreign countries. The Senate bill approved the Defense Department's request for 32,000 units, which is 2,000 units above the authorized level for fiscal year 1985.

The House recedes.

The conferees agree to authorize 32,000 units in the belief that the requirement for leased housing in foreign countries should be reduced as a result of the new construction of family housing authorized in fiscal year 1986 and prior years.

TITLE VII—GUARD AND RESERVE

The Senate bill provided a lump sum authorization of $413,455,000 for the Guard and Reserve construction program. The House amendment contained authorization of $496,840,000. Included in this amount was $40 million added by the House for minor construction projects to reduce the backlog in training and storage facilities as a result of increased mission requirements.

The conferees agree to authorize $481,251,000 which is $67,796,000 above the Senate figure and $15,589,000 below the House figure.

HIGH PRIORITY PROJECTS

In addition to the projects approved in the budget request, authorization is included to construct the following high priority items from the lump-sum authorization:

[Dollars in thousands]

Army National Guard:	
Armories, AL—Construct four armories:	
Demopolis, AL	647
Oneonta, AL	853
Double Springs, AL	593

LEAVE OF ABSENCE

By unanimous consent, leave of absence was granted to:

Mr. McKINNEY (at the request of Mr. MICHEL), for today, on account of illness.

Mr. HARTNETT (at the request of Mr. MICHEL), for today, on account of a death in the family.

Mr. BOLAND (at the request of Mr. WRIGHT), for today, on account of a death in the family.

SPECIAL ORDERS GRANTED

By unanimous consent, permission to address the House, following the legislative program and any special orders heretofore entered, was granted to:

(The following Members (at the request of Mr. COBLE) to revise and extend their remarks and include extraneous material:)

Mr. GILMAN, for 60 minutes, today.

Mr. DELAY, for 60 minutes, today.

Mr. DORNAN of California, for 60 minutes, November 19.

Mr. DORNAN of California, for 60 minutes, November 20.

Mr. DORNAN of California, for 60 minutes, November 21.

Mr. LUNGREN, for 60 minutes, November 13.

Mr. LUNGREN, for 60 minutes, November 14.

Mr. MOLINARI, for 5 minutes, today.

Mr. FRENZEL, for 30 minutes, today.

Mr. IRELAND, for 5 minutes, November 13.

Mr. WALKER, for 60 minutes, today.

Mr. MACK, for 60 minutes, today.

Mr. BROWN of Colorado, for 15 minutes, today.

(The following Members (at the request of Mr. DYMALLY) to revise and extend their remarks and include extraneous material:)

Mr. FORD of Tennessee, for 5 minutes, today.

Mr. NELSON of Florida, for 5 minutes, today.

Mr. ANNUNZIO, for 5 minutes, today.

Mr. HUTTO, for 5 minutes, today.

Mr. RANGEL, for 5 minutes, today.

Mr. GONZALEZ, for 60 minutes, today.

Mr. HUTTO, for 5 minutes, November 13.

Mr. DYMALLY, for 60 minutes, November 13.

SENATE ENROLLED BILL AND JOINT RESOLUTION SIGNED

The SPEAKER announced his signature to an enrolled bill and joint resolution of the Senate of the following titles.

S. 1570. An act to amend the Fair Labor Standards Act of 1938 to authorize the provision of compensatory time in lieu of overtime compensation for employees of States, political subdivisions of States, and interstate governmental agencies, to clarify the application of the act to volunteers, and for other purposes, and

S.J. Res. 47. Joint resolution designating the week beginning "National Women Veterans Recongition Week."

ADJOURNMENT

Mr. BROWN of Colorado. Mr. Speaker, I move that the House do now adjourn.

The motion was agreed to; accordingly (at 9 o'clock and 30 minutes p.m.) the House adjourned until tomorrow, Wednesday, November 13, 1985 at 10 a.m.

EXECUTIVE COMMUNICATIONS, ETC.

Under clause 2 of rule XXIV, executive communications were taken from the Speaker's table and referred as follows:

2236. A letter from the Secretary of Defense, transmitting the fiscal year 1984 annual report of the Reserve Forces Policy Board [RFPB], pursuant to 10 U.S.C. 133(c); to the Committee on Armed Services.

2237. A letter from the Chairman, Council of the District of Columbia, transmitting D.C. Act 6-101, "Georgetown University Higher Education Facilities Revenue Bond Act of 1985", and report, pursuant to Public Law 93-198, section 602(c); to the Committee on the District of Columbia.

2238. A letter from the Chairman, Council of the District of Columbia, transmitting D.C. Act 6-99, "Wastewater System Regulation Temporary Act of 1985," pursuant to Public Law 93-198, section 602(c); to the Committee on the District of Columbia.

2239. A letter from the Chairman, Council of the District of Columbia, transmitting D.C. Act 6-100, "Limitation of the Use of the Chokehold Act of 1985," and report, pursuant to Public Law 93-198, section 602(c); to the Committee on the District of Columbia.

2240. A letter from the Assistant Attorney General, Civil Rights Division, transmitting a report on activities of the council, pursuant to Public Law 93-112, section 507 (92 Stat. 2983); to the Committee on Education and Labor.

2241. A letter from the Director, Defense Security Assistance Agency, transmitting a copy of the agreement between the United States and the Government of Australia concerning the pricing of military training, pursuant to 22 U.S.C. 2761(g); to the Committee on Foreign Affairs.

2242. A letter from the Acting Archivist of the United States, transmitting notice of a new Federal records system, pursuant to 5 U.S.C. 552a(o); to the Committee on Government Operations.

2243. A communication from the Clerk, U.S. House of Representatives, transmitting his quarterly report of receipts and expenditures of appropriations for the period July 1, 1985, through September 30, 1985, pursuant to 2 U.S.C. 104a (H. Doc. No. 99-125); to the Committee on House Administration and ordered to be printed.

2244. A letter from the Corporation Agent, Legion of Valor of the United States of America, Inc., transmitting the annual report and financial audit dated April 30, 1985, pursuant to Public Law 88-504, section 3 (36 U.S.C. 1103); to the Committee on the Judiciary.

2245. A letter from the Special Counsel, U.S. Merit Systems Protection Board, transmitting a report on the results of the Secretary of Agriculture's investigation into allegations of violations of law and regulations, mismanagement and abuse of authority by officials of the Food Safety and Inspection Service, pursuant to 5 U.S.C. 1206(b)(5)(A) (92 Stat. 1125); to the Committee on Post Office and Civil Service.

2246. A letter from the Administrator, Federal Aviation Administration, transmitting the semiannual report on effectiveness of procedures for screening passengers and property for weapons, pursuant to Public Law 85-726, section 315(a) (88 Stat. 415); to the Committee on Public Works and Transportation.

2247. A communication from the Assistant Secretary of the Army (Civil Works), transmitting a report dated February 5, 1985, from the Chief of Engineers, Department of the Army, on Lorain Harbor, OH, together with other pertinent reports (H. Doc. No. 99-124); to the Committee on Public Works and Transportation and ordered to be printed.

REPORTS OF COMMITTEES ON PUBLIC BILLS AND RESOLUTIONS

Under clause 2 of rule XIII, reports of committees were delivered to the Clerk for printing and reference to the proper calendar, as follows:

Mr. FASCELL: Committee on Foreign Affairs. S.J. Res. 228. A resolution relating to the proposed sales of arms to Jordan (Rept. 99-364). Referred to the Committee of the Whole House on the State of the Union.

Ms. OAKAR: Committee on House Administration. H.R. 1609. A bill to authorize the Smithsonian Institution to plan and construct facilities for the Cooper-Hewitt Museum, and for other purposes. with amendments (Rept. 99-365, Pt. 1). Ordered to be printed.

Mr. DELLUMS: Committee of conference. Conference report on S. 1042 (Rept. 99-366). Ordered to be printed.

Mr. BROOKS: Committee on Government Operations. FEMA's purchase of a radiological training package: an avoidable disaster (Rept. 99-367). Referred to the Committee of the Whole House on the State of the Union.

Mr. DERRICK: Committee on Rules. H. Res. 317. A resolution providing for the consideration of H.R. 3722, a bill to extend until December 14, 1985, the application of certain tobacco excise taxes, trade adjustment assistance, certain medicare reimbursement provisions, and borrowing authority under the railroad unemployment insurance program (Rept. 99-368). Referred to the House Calendar.

Mr. PEPPER: Committee on Rules. H. Res. 318. A resolution providing for the consideration of H.R. 3721, a bill to temporarily increase the limit on the public debt and to restore the investments of the Social Security Trust Funds and other trust funds (Rept. 99-369). Referred to the House Calendar.

Mr. HOWARD: Committee on Public Works and Transportation. H.R. 2817. A bill to amend the Comprehensive Environmental Response, Compensation, and Liability Act of 1980, and for other purposes; with an amendment (Rept. 99-253, Pt. 5). Referred to the Committee of the Whole House on the State of the Union.

PUBLIC BILLS AND RESOLUTIONS

Under clause 5 of rule X and clause 4 of rule XXII, public bills and resolutions were introduced and severally referred as follows:

By Mr. ROSTENKOWSKI (for himself, and Mr. DUNCAN):

H. Res. 300: Mr. KEMP, Mr. BROOMFIELD, Mr. MCCAIN, Mr. SMITH of New Jersey, Mr. FRENZEL, Mr. FAUNTROY, Mr. WOLF, Mrs. VUCANOVICH, Mr. HUGHES, Mr. ZSCHAU, Mr. HENDON, Mr. EMERSON, Mr. BRYANT, Mr. GREGG, Mr. ROE, Mr. DIOGUARDI, Mr. ECKERT of New York, Mr. COURTER, Mr. ACKERMAN, Mr. HUNTER, Mr. WILSON, Mr. MCGRATH, Mr. WORTLEY, Mr. RITTER, Mr. MONSON, Mr. LANTOS, Mr. GINGRICH, Mr. LEVIN of Michigan, Mr. ROGERS, Mr. WEBER, Mr. FROST, Mr. REID, Mr. SCHUETTE, Mr. HILLIS, Mr. SILJANDER, Mr. FISH Mr. PETRI, Mr. BILIRAKIS, Mr. SOLOMON, Mr. DORNAN of California, Mr. WHITTAKER, Mr. FRANK, Mr. PORTER, Mr. CAMPBELL, Mr. MADIGAN, Mr. LEVINE of California, Mr. SKEEN, Mr. DEWINE, Mr. SAXTON, Mr. HUTTO, Mr. DAUB, Mr. SWINDALL, Mr. BURTON of Indiana, Mr. DELAY, and Mr. BEREUTER.

PETITIONS, ETC.

Under clause 1 of rule XXII, the following petition and papers were presented as follows:

250. The SPEAKER presented a petition of the Hawaii State Association of Counties, relative to the spraying of toxic herbicides; which was referred to the Committee on the Judiciary.

AMENDMENTS

Under clause 6 of rule XXIII, proposed amendments were submitted as follows:

H.R. 1616

By Mr. BROWN of Colorado:

—On page 9, at the end of line 8, add the following new section:

"SEC. 8. Sections 1 through 7 of this Act shall not apply when the notice of plant closing would adversely effect the credit available for the continued operation of the plant." And renumber the following sections accordingly.

—On page 9, at the end of line 8, add the following new section.

"SEC. 8. Sections 1 through 7 of this Act shall not apply when the notice of plant closing would adversely effect the sales of the products produced by the plant." And renumber the following sections accordingly.

—On page 9, at the end of line 8, add the following new section:

"SEC. 8. Sections 1 through 7 of this act shall not apply when the notice of the plant closing would adversely affect the sales of

the products produced by the plant and thereby endanger the continued operation of the plant."

And renumber the following sections accordingly.

H.R. 1616

(Amendment in the Nature of a Substitute)

By Mr. JEFFORDS:

—Strike out all after the enacting clause and insert in lieu thereof the following:

SECTION 1. SHORT TITLE.

This Act may be cited as the "Community and Dislocated Worker Notification and Assistance Act".

SEC. 2 DEFINTIONS.

As used in this Act, the term—

(1) "employer" means any business enterprise that employs—

(A) 200 or more employees at a single site, or

(B) 50 or more employees at a single site in an area outside of a metropolitan statisical area, as defined by the Office of Management and Budget pursuant to its authority under section 3504(d) of title 44, United States Code;

(2) "plant closing or mass layoff" means an employment loss for the greater of (A) 60 percent of the full-time employees, or (B) 50 full-time employees, of an employer at any site during any 90-day period;

(3) "representative" means an exclusive representative of employees as determined under the National Labor Relations Act (29 U.S.C. 141 et seq.) or under the Railway Labor Act (45 U.S.C. 151 et seq.);

(4) "affected employees" means employees who have been employed full-time by an employer for more than 6 months and who may reasonably be expected to experience an employment loss as a consequence of a proposed plant closing or mass layoff, but does not include any seasonal worker or other worker for whom there is no reasonable expectation of permanent employment;

(5) "employment loss" means—

(A) an employment termination, other than a discharge for cause,

(B) a layoff of indefinite duration, or

(C) a layoff of definite duration exceeding 6 months;

(6) "Secretary" means the Secretary of Labor;

(7) "Task Force" means the National Task Force on Economic Adjustment and Worker Dislocation established by section 7 of this Act.

SEC. 3. NOTICE REQUIRED BEFORE PLANT CLOSINGS AND MASS LAYOFFS.

(a) NOTICE TO EMPLOYEES.—An employer shall not order a plant closing or mass layoff until the end of a period of 60 days after the employer serves written notice of a proposal to issue such an order to the representative or representatives of the affected employees with respect to such order or, if there is no such representative, to each affected employee with respect to such order.

(b) REDUCTION OF NOTIFICATION PERIOD.—An employer may order a plant closing or mass layoff before the conclusion of the 60-day period described in subsection (a), if, as a consequence of unforeseeable business circumstances, the employer, in the exercise of prudent business judgment, must implement such order prior to the end of such period.

SEC. 4. ADMINISTRATION AND ENFORCEMENT OR REQUIREMENTS

(a) INVESTIGATIONS BY DEPARTMENT OF LABOR.—Within 10 days after receipt of a complaint alleging that an employer has ordered a plant closing or mass layoff in violation of this Act, the Secretary shall investigate the allegation. If the Secretary determines that there is reasonable cause to believe such allegation is true, the Secretary shall request the employer and the complainant and the representative of the affected employees, if any, to file formal statements in writing concerning the alleged violation.

(b) CIVIL DAMAGES.—(1) If the Secretary determines, after notice and an opportunity for a hearing, that the employer has ordered a plant closing or mass layoff in violation of this Act, the Secretary may petition any district court of the United States for any district—

(A) in which the violation is alleged to have occurred, or

(B) in which the employer transacts business,

for damages in accordance with paragraph (2).

(2) Damages under this paragraph shall be an amount not to exceed the sum of the pay and related benefits of affected employees for each day that the employer is in violation of this Act, not to exceed a total of 60 days.

(3) The remedy provided by this subsection shall constitute the exclusive remedy with respect to violations of this Act.

SEC. 5. PROCEDURES IN ADDITION TO OTHER RIGHTS OF EMPLOYEES.

The rights and remedies provided to employees by this Act are in addition to, and not in lieu of, any other contractual, statutory, or other legal rights and remedies of the employees, but the rights afforded to employees under this Act may be waived as a permissive subject of bargaining pursuant to a collective bargaining agreement entered into under the National Labor Relations Act or the Railway Labor Act.

SEC. 6. NATIONAL TASK FORCE ON ECONOMIC ADJUSTMENT AND WORKER DISLOCATION.

(a) DUTIES.—The National Task Force on Economic Adjustment and Worker Dislocation established by the Secretary shall, among other things, analyze—

(1) the personal, social, and economic costs associated with plant closings and mass layoffs;

(2) the causes of, and the nature of decisionmaking with respect to, such closings and layoffs;

(3) existing domestic and foreign governmental policies and programs for responding to such closings and layoffs;

(4) existing Federal programs directed at assisting the dislocated worker;

(5) existing and potential government programs, including potential incentives to employers, to assist business, labor, and communities to respond to the problems resulting from plant closing and dislocation; and

(6) current voluntary activities within business and industry aimed at assisting the dislocated worker in making the transition to new work opportunities.

(b) TASK FORCE REPORT.—The Task Force shall report its findings directly to the Secretary not later than December 31, 1986.

SEC. 7. WORKER READJUSTMENT AND PLACEMENT SERVICE.

(a) REGIONAL ASSISTANCE.—The Secretary shall identify individuals, who shall include but not be limited to employees of the Department of Labor, who shall be available on a regional basis to provide planning, operational, and technical assistance to worker readjustment and placement committees described in subsection (b).

(b) WORKER READJUSTMENT COMMITTEES.—(1) A worker readjustment and placement committee may be established by an employer who has provided notice as required under section 3.

(2) The purpose of the committee shall be to facilitate and coordinate the readjustment or relocation of the workers through retraining, counseling, placement, human resource, community, education, and other services.

(3)(A) The committee shall be composed of the employer or the employer's representative, representatives of the affected employees, and any other individual selected by mutual agreement between such parties.

(B) In any case in which there is no such employee representative, employees shall choose individual employees to represent them on the committee.

(c) FINANCIAL ASSISTANCE.—(1) Subject to the availability of funds for such purpose from funds appropriated after the date of enactment of this Act, including funds available for use in the Secretary's discretion from other applicable programs, the Secretary may provide financial assistance, to any worker readjustment and placement committee.

(2) Such assistance may not exceed—

(A) 50 percent of the operating costs of the committee; and

(B) 50 percent of the costs incurred by the committee in relocating affected employees.

(d) REGULATIONS.—The Secretary shall prescribe regulations establishing conditions and requirements for eligibility by worker readjustment and placement committees to the financial assistance authorized in subsection (c).

(e) VOLUNTARY PARTICIPATION.—Formation of and participation in worker readjustment and placement committees by any employer, employee representative, or employee shall be completely voluntary.

(f) NO DISCRIMINATION BASED ON EMPLOYEE REPRESENTATION.—In administering the assistance authorized under this section, the Secretary shall not discriminate on the basis of employee representation or the lack thereof.

(g) ASSISTANCE MAY NOT BE CONDITIONED ON ACCEPTANCE OF SECRETARY'S ADVICE.—In no case shall the continuation of assistance under this section be conditioned upon the acceptance of any advice or recommendation offered to a worker readjustment and placement committee by the Secretary or the Secretary's representative.

SEC. 8. EFFECTIVE DATES.

This Act shall take effect on July 1, 1987, except that sections 6 and 7 shall take effect on the date of the enactment of this Act.

EXTENSIONS OF REMARKS

A DEFEAT FOR JUSTICE

HON. JIM COURTER

OF NEW JERSEY

IN THE HOUSE OF REPRESENTATIVES

Tuesday, November 12, 1985

Mr. COURTER. Mr. Speaker, we have recently been treated to an extraordinary series of espionage outrages, the most recent being the startling return of Vitaly Yurchenko to the Soviet Union after his apparent defection. However, the case that still sends the largest shock waves is that of the Walker family, especially, the father, John A. Walker, and his son, Michael. As the attached editorial from the Asbury Park Press points out, the surprising disposition of this case sends a "clear and damaging message * * * If you're a spy, be a good one. It's the surest way to escape the punishment your perfidy deserves." I urge my colleagues to consider the points made in the following excellent editorial:

The editorial follows:

[From the Asbury Park Press, Nov. 5, 1985]

A DEFEAT FOR JUSTICE—UNSAVORY PLEA BARGAIN LETS SPIES OFF TOO EASILY

If federal prosecutors are to be believed, John A. Walker Jr. created a spy ring that may have done more damage to this nation than any other in history. One thing already is clear, as authorities continue to sort things out: The former Navy man, imprisoned and facing a life term, continues to inflict body blows to U.S. security and pride.

U.S. Justice Department and military officials have agreed to a plea bargain that could lead to an earlier-than-normal release for Walker, and is certain to mean less jail time for his son, Michael L. Walker, whom he recruited into the ring.

Prosecutors in the case argued that Walker's ring was so prolific during a 17-year spying spree that the only way the security breach could be fully assessed is through the elder Walker's detailed accounts. Walker also agreed to testify against another member of the ring, Jerry A. Whitworth, a retired Navy radioman.

Walker was, by all accounts, a very good spy. He gave the Soviet Union much information about communication codes, and one Navy official said his disclosures may have helped the North Vietnamese track aircraft-carrier-based fighters on bombing runs during the Vietnam War.

But it seems Walker is also a concerned father. He sold his country out for 17 years and lured his son and friends into a treasonous lair, but now he's a changed man. He's remorseful and wants to undo what he has done.

Move over, Benedict Arnold. You've dropped down a notch on the list of the most despicable and disloyal figures in U.S. history.

The consummate spy set up one last deal, using his stolen secrets to extract the fullest concessions possible from a government that should be outraged.

The real crime here is that prosecutors apparently had little choice but to offer this revolting plea bargain. Navy Secretary John F. Lehman Jr. said this week Walker's confessions would be of little use to the government, and other senior defense officials apparently agree with him. But a majority of the Pentagon's and the administration's upper echelons believe Walker's information is vital to damage-control efforts.

It looks like Walker will spend most of his life behind bars, but thanks to his secrets, his son may not.

The clear and damaging message from this case: If you're a spy, be a good one. It's the surest way to escape the punishment your perfidy deserves.

A more subtle message goes out to those who lost husbands, brothers and sons on bombing flights in Vietnam: John Walker can protect his family, even if you couldn't protect yours.

RESOLUTION DESIGNATING SEPTEMBER 19, 1985 "NATIONAL POW/MIA RECOGNITION DAY"

HON. STEPHEN J. SOLARZ

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Tuesday, November 12, 1985

Mr. SOLARZ. Mr. Speaker, today I rose with my distinguished colleagues GERALD SOLOMON and BEN GILMAN to sponsor a resolution that designates September 19, 1985 "National POW/MIA Recognition Day".

This resolution is of particular importance to me because as chairman of the Subcommittee on Asian and Pacific Affairs, of the House Foreign Affairs Committee, I have been involved in the issue of POW/MIA's in Southeast Asia for several years. I have worked closely with authorities both here and in Asia in an effort to achieve a full accounting of our missing men.

It is therefore with great pleasure that I can report that we have made substantive progress over the past few months in our negotiations with Vietnam and Laos.

NEGOTIATIONS WITH LAOS

We have made significant progress with the Government of Laos. The U.S. Government successfully negotiated with the Lao Government the Joint excavation of the Pakse crash site, which uncovered the remains of thirteen U.S. aviators. This diplomatic breakthrough is extremely encouraging, and I commend both the United States and Lao officials involved in the excavation. We are now planning an additional excavation with the Lao for the coming dry season and look forward to continued cooperation with Laos.

The administration, recognizing Laos' commitment toward a satisfactory resolution of this issue, recently asked the Appropriations Committees of both the House and Senate to remove it from the list of countries ineligible for U.S. aid. While the removal of Laos from this list will not necessarily result in a foreign aid program of Laos, it is a significant and symbolic gesture to Laos that we acknowledge and appreciate its efforts to cooperate with us in this endeavor.

PROGRESS WITH THE VIETNAMESE

In August, a high-level delegation, led by Richard Childress, of the National Security Council staff, and accompanied by Ann Mills Griffiths, of the National League of Families, met with Vietnamese officials in Hanoi to discuss the POW/MIA's. The meetings were very successful, as the Vietnamese agreed to discuss the issue without linking it to other issues, including Cambodia, between our two countries.

Vietnam recently returned to the United States the remains of 26 servicemen—the largest single turnover of remains to the United States. Nearly all the remains have been identified and returned to the families. Last month Hanoi agreed to allow the United States to excavate a crash site jointly with the Government of Vietnam. This will be the first joint excavation with Vietnam, though we held one with the Government of Laos last year. We look forward to establishing a pattern of progress and cooperation with Vietnam, as it is apparent that the Vietnamese have finally seen it in their best interest to help us resolve this issue.

ROLE OF THE CONGRESS

While the administration has been busy negotiating with Vietnam and Laos, Congress has also played a significant role. On June 27, the Subcommittee on Asian and Pacific Affairs conducted a very successful and informative hearing on POW/MIA's, at which we heard from administration witnesses, including top officials from the State Department, Defense Department, and Defense Intelligence Agency [DIA], as well as from former director of the DIA Eugene Tighe. The subcommittee also heard from former POW Robert Garwood, and plans to continue interviewing him.

In July, both the House and Senate adopted a resolution (H. Con. Res. 37; S. Con. Res. 46) expressing the sense of Congress that the President should ensure that officials of the U.S. Government consciously and fully carry out his pledge of highest national priority to resolve this issue, and to work for the immediate release of Americans who may still be held captive in Indochina, and of those who have died in Southeast Asia whose remains have not been returned. The resolution also request-

ed that the President make every effort to secure the further cooperation of the Lao People's Democratic Republic and the Socialist Republic of Vietnam in resolving this humanitarian issue.

NEED FOR THIS RESOLUTION

It is important that the administration and the Congress continue to press Vietnam and Laos to continue to cooperate with us. This resolution, which is supported by the administration, and which commands broad bipartisan support in the Congress, sends a strong and clear signal to Hanoi and Vientiane that the United States will not cease to pursue a resolution to this issue unless and until we reach the fullest possible accounting of our missing.

By adopting this resolution, however, we do more than signal Vietnam and Laos; we underscore our debt to our servicemen and civilian personnel who dedicated their lives to defend our freedom, and who were either captured by enemy forces, or were declared missing in action by our government. This resolution pays tribute as well to those who were captured by the enemy, and who were returned from imprisonment.

By adopting this resolution, we also recognize the tremendous sacrifice made by the families of our missing men and of the continued debt we owe these brave men, women and children.

Over the past several years, "National POW/MIA Recognition Day" has been commemorated across the Nation, with appropriate ceremonies at the local, State and national level. The designation of this day as "National POW/MIA Recognition Day" coincides with activities planned by the National League of Families and other veterans and community organizations. Such events are not just ceremonies; they serve to increase awareness in the United States, and throughout the world, that Congress is committed to achieving the fullest possible accounting of these men.

This resolution is worthy of our support: it reaffirms our dedication to our missing men and their families, and reaffirms our intention to resolve this issue, which remains a highest national priority.

A SALUTE TO JUDGE PERRY JACKSON

HON. LOUIS STOKES

OF OHIO

IN THE HOUSE OF REPRESENTATIVES

Tuesday, November 12, 1985

Mr. STOKES. Mr. Speaker, thank you for providing me with this opportunity to salute a man who has made an indelible mark on the lives on countless Clevelanders—my good friend Judge Perry B. Jackson. Mr. Speaker, on September 15, a testimonial dinner was held in his honor in Cleveland. I would like to take this opportunity to share some of the many highlights of his judicial career with my colleagues.

For over 40 years, Judge Jackson has been an integral part of the judicial system in Cleveland. In 1942, he became the first black ever to be appointed to the Cleveland Municipal Court. He was elected to three 6-year terms on the court. Starting this month, Judge Perry will return to the bench as acting judge over choice cases for the court.

In addition to his long and celebrated career in the judicial system, Judge Jackson has been a strong voice with many civic organizations. He has been involved with the Elks, the Boy Scouts, and the Citizens League. Through his affiliations with these organizations, Judge Jackson has earned the respect and admiration from people from various walks of life.

At this time, Mr. Speaker, I insert an article which appeared in the Call and Post newspaper on Judge Perry Jackson in the RECORD. On behalf of the residents of the Cleveland metropolitan area, I salute Judge Perry for his achievements and noted public service career.

The article follows:

"THIS IS YOUR LIFE" JUDGE PERRY B. JACKSON

(By Wilhelmina Ingram)

"Soviety is like a lawn, where every roughness is smoothed, every bramble eradicated, and where the eye is delighted by the smiling verdure of a velvet surface. He, however, who would study nature in its wildness and variety, must plunge into the forest, must explore the glen, must stem the torrent, and dare the precipice."—Washington Irving

According to many scholars Washington Irving's quote refers to a special caliber of mankind that fears not the challenges of life and society. To many, Judge Perry Books Jackson, renowned jurist and social servant, has been among that caliber of mankind for over half a century.

Reportedly Jackson first arrived in Cleveland in 1914, with just one bag of clothes, after graduating from his hometown high school with honors. The Zanesville, Ohio native had aspirations of attending Adelbert College of Western Reserve University. Thus, his first goal was to find work, in order to afford his education.

"When I first arrived in Cleveland my uncle, Linwood Hogan, found me a job with a catering company. Then, I found work at different places, waiting on tables and such, until I was able to attend college and while I was attending," acknowledges Judge Jackson, during a recent interview in his Park Center apartment.

His perseverance resulted in him graduating magna cum laude from Wastern Reserve University in 1919 and receiving his Bachelor of Laws degree in 1922, the same year that he was admitted to the bar.

"It makes me feel good to know that I have been an instrument of good to so many people. Especially when lawyers come to me and tell me that they are inspired by me," said Judge Jackson. With this in mind, and after over 66 years of what is described by his friends and peers as "never ending dedication to people," the 89-year-old activist still works at keeping a level head. "It makes me feel good to hear compliments, but I don't want to get a big-head about things that I have done. I do them because I am concerned about people and the community," he added.

The modesty he expresses is reflected in his home, which seems to welcome visitors with a decor of simplicity and warmth. It is hard not to realize that his life has not been one of simplicity. The numerous plaques, awards and commendations that adorn the walls of his home, along with those packed in boxes and stacked in his den, waiting to be hung, indicate just how deep in society's forest he has plunged, throughout his career. In addition to those, the Western Reserve Historical Museum houses a great deal more of his awards and commendations.

There were several avenues open to Jackson as a young man, when the time came for a decision on his career choice. Yet, according to Jackson, the legal profession offered the best opportunities. "My involvement with politics and working in the community began with work I did with various civic organizations, such as the Citizens League. I chose law because it offers the best opportunity to help my fellow man. I never resist an opportunity to help other people," said Judge Jackson.

From all indications, Jackson chose a suitable career to exercise his talents. It also prompted others to support him in several endeavors. In 1942 Governor John W. Bricker appointed him Judge of the Municipal Court, making him the first black ever to hold such a position. Subsequently, he was elected to three six-year terms on the court. Along with these duties, he has served as director and officer of various corporations and organizations. His involvement with the Improved Benevolent Protective Order of Elks of the World (IBPOE) has been intensive. He served as its grand treasurer for many years.

Throughout his lifetime, Judge Jackson has been involved with or held office with such a vast number of organizations, that to list them all would require much more space than available. At one time he served as editor of the Cleveland Call, the predecessor of today's Call and Post.

While accomplishing his many feats, Jackson received support not only from peers and friends but family as well. His strongest family support came from his wife of 50 years, until her death in 1983, Fern Josephine (Payne). According to Judge Jackson's sister, Fern Jackson was the only woman she knew that accompanied her husband in everything that he did. "There was never a time when she wasn't right there on those podiums with him. She supported him in every way," said Mrs. Margaret (Jackson) Lennox.

Judge and Mrs. Jackson wedded August 22, 1933, shortly after Jackson had been appointed Councilman. At the time, she was a cashier at Grand Central Theatre. The couple was married by the Justice of Peace in New Castle, Pa.

Reportedly, the wedding was the result of a three-year courtship, which began after she had accompanied her sister to Jackson's law office to get some papers signed. Immediately, he asked her to dinner, which became the first of many dates.

During a 1958 interview, concerning their silver wedding anniversary, Judge Jackson was asked why it took him so long to propose. "I was young and poor when I met her and I wasn't thinking about marriage. We went around on dates and discovered we both like people, civic work, sports and politics, but I didn't have money to get married," said Judge Jackson.

During that same interview Mrs. Jackson admitted that "lawyers didn't make much money in those days and we both knew it would be a struggle."

Officially Judge Jackson is retired. Unofficially, according to his sister, Mrs. Lennox, he doesn't know the meaning of the word.

"We (the family) always knew that he was involved in a lot of things but I had no idea to what extent until I moved here. At least three days out of the week he is speaking, or attending a meeting for this organization or another," said Mrs. Lennox, who has been sharing the apartment with her brother for the last three years. "I don't know where he gets all of his energy and inspiration from," she added.

While talking about her brother, the Judge, Mrs. Lennox's eyes never seem to lose that gleam of pride and respect that appears to be synonymous with Judge Jackson. "We grew up with an entrepreneur way of thinking. Our father was a very good business man. He always said it was very important that we remember that there are ways out there to make money, but it must be done within the law—that was his rule," said Mrs. Lennox.

Judge Jackson admits that he has not abandoned his duties on the bench. Starting sometime in October he will return to the bench as acting judge, over choice cases for the Court.

He views the City of Cleveland as a city going in positive directions. Yet, he acknowledges that parents need to become more involved in the public school system. "Parents need to become more involved in the schools. They need to become more active in what is the future of their children," said Judge Jackson. He also adds that he has great admiration for Atty. Stanley Tolliver. "He is building community confidence in the school system. He seems more concerned about other people—not just himself."

One thing that the Judge strongly proposes for the future of today's children is a chance for them to have greater and better contact with leaders of the community. "We need to give our children a chance to see these leaders and to come in contact with them, so that they can see what can be accomplished and be inspired to do greater themselves," said Judge Jackson, citing Dr. Zelma Watson-Geroge as an example.

Judge Jackson attributes much of his accomplishments to being "inherited with my interest in God." He has been a member of St. John A.M.E. Church for over fifty years. As a member he has been superintendent of the Sunday school, trustee, assistant pianist, assistant teacher, member of the Lay Organization and Missionary Society, among many other positions.

The church, which as designated September 15 as "Judge Jackson Day," will honor him with a testimonial at the Bond Court Hotel at 6:30 o.m. on that day in Cleveland. The pastor, Rev. J.G. Harris invites the public to attend.

FATHER THEODORE HESBURGH OPPOSES NEW UNITED STATES-UNITED KINGDOM SUPPLEMENTARY EXTRADITION TREATY

HON. MARIO BIAGGI

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Tuesday, November 12, 1985

Mr. BIAGGI. Mr. Speaker, for the past several months, the Senate Foreign Relations Committee has been considering a controversial supplementary extradition treaty between the United States and the United Kingdom of Great Britain and Northern Ireland. A total of three hearings have been held on the treaty by the Foreign Relations Committee and one this week by the Senate Judiciary Subcommittee on the Constitution.

In my capacity as chairman of the bipartisan Ad Hoc Congressional Committee for Irish Affairs I testified at the second hearing of the Foreign Relations Committee on September 18. At that time I expressed my opposition to the proposed treaty and urged the committee to end their consideration of this document. I later introduced House Resolution 271 which makes the same recommendation and so far 29 of my House colleagues have joined as cosponsors.

The gist of the arguments that have been raised in opposition to the treaty by witnesses are threefold in nature:

"The treaty would end the so called 'political offense' exemption to extradition which is common to some 90 extradition agreements between the United States and foreign nations including the existing United States–United Kingdom Extradition Treaty.

"It would be retroactive upon ratification.

"It represents the renegotiation of an existing extradition treaty which should be done through a more comprehensive legislative approach."

One of the other major concerns relates to the system of justice in Northern Ireland. It clearly lacks sufficient guarantees of due process for a person who might face extradition as a result of this treaty.

One of the more eloquent and comprehensive positions against the treaty has been developed by the distinguished president of Notre Dame University, Rev. Theodore M. Hesburgh. Father Hesburgh with a lifelong commitment to the causes of human and civil rights has written two letters to Chairman RICHARD LUGAR conveying his concerns about the supplementary treaty. I wish to insert them into the RECORD at this time in an effort to continue to focus attention on this treaty.

SEPTEMBER 18, 1985.

Hon. RICHARD G. LUGAR,
Dirksen Building, Washington, DC.

DEAR DICK: It has come to my attention that there is presently pending before your Committee a Supplementary Extradition Treaty between the United States and the United Kingdom which, among other things, provided that a long list of crimes shall not be regarded as non-extraditable offenses of "a political character." That language, if approved by the Senate, might well open the door to the possibility of the British government demanding the extradition of certain people who have sought asylum in the United States, but who have been charged with the commission of any one of a long list of acts of violence against people or property.

It is proposed by the Administration that such a change in the language and character of the existing extradition treaty would pose no threat to any individual's human or civil rights, because the other party to the treaty is a democratic nation with fair and just political and judicial systems. I think that that proposition deserves, indeed demands, the closest and most rigorous scrutiny by the distinguished members of your Committee, before they decide whether or not to give their approval to this treaty. It is one thing to say that England provides to English citizens the protections of a fair and just political and judicial system; it is quite another thing to attempt to describe either the judicial or the political system currently in force in Northern Ireland as either fair or just to all of its citizens.

I think you know that I have spent a substantial part of my adult life engaged in the effort to secure the protection of American law for the full human and civil rights of all of our citizens, and I have spent almost as much time and energy in the defense of the rights of others who are not American citizens, but who deserve our compassionate concern whether or not they happen to live in societies that are loosely termed democratic—in Lebanon, or South Africa, or the Philippines, or South Korea, or Northern Ireland.

Our American courts have, over the years, performed most admirably in the defense of human rights, and they have been as conscientious in such matters in regard to aliens as to American citizens. I would far rather continue to trust our courts and our judicial system with this responsibility than turn over to a faceless bureaucracy the decisions about which people seeking asylum in our country are common criminals deserving extradition, and trial in their native land, and which are patriots struggling, sometimes even violently, against a tyrannical regime.

By allowing such decisions to be made by our courts, operating within the American system of respect for individual rights and political dissent, it seems to me that we advance the cause of human rights eveywhere. I truly hope that you and your distinguished colleagues on the Committee on Foreign Relations will agree with that position and that you will reject the effort to amend the existing treaty.

Best personal regards.

Sincerely yours,

(Rev.) THEODORE M. HESBURGH, C.S.C.,
President.

UNIVERSITY OF NOTRE DAME,
Notre Dame, IN, October 25, 1985.

Hon. RICHARD LUGAR,
U.S. Senate, Washington, DC.

DEAR DICK: Thank you for your very courteous and thoughtful response to my letter of September 18 in which I raised some questions that have troubled me concerning the amendments to the extradition treaty with Great Britain which are currently under consideration in your Committee.

I would not want to be misunderstood in this matter. While I certainly would agree that our courts may have a "mixed record" in deciding extradition cases that are brought before them, it could hardly be otherwise, since we cannot realistically expect perfect justice from our judicial system. But when we compare the manner in which our courts operate, and the way that the criminal justice system in Northern Ireland has been abused in the past decade or so, it raises a real question of whether or not one can without compunction turn over to such a system a refugee who may have been accused of crimes of violence and who has sought political asylum in the United States.

Under the Emergency Provisions Act, as I am sure you know, the right of the accused to trial by jury has been abolished; the committal proceedings have been converted into pure formalities; people may be detained

without trial for as long as 18 months; bail can be, and often is, arbitrarily denied; the confidentiality of communication between the accused and his legal counsel is routinely violated by the insistence of police that they be present during any interviews, and sometimes even the right of the accused to speak with his solicitor is simply rejected by the police. Moreover, contrary to established practice in our American courts, confessions of guilt, even those given under duress and later withdrawn, are admissable as evidence and the judge who rules on the admissability of the evidence later decides as well the guilt or innocence of the accused.

Probably the most egregious examples of the distortion of the criminal justice process for political purposes have been the so-called Supergrass cases, when the testimony of witnesses who have been granted immunity, and often given large sums of money for their statements, has been accepted in court and, on more than one occasion, a number of people have been convicted of very serious crimes on the uncorroborated evidence of one such witness—whose testimony would, in most instances, be thrown out of an American court.

It seems to me, therefore, that the question which confronts American courts and legislators is not whether certain refugees on our shores have been *accused* of various heinous crimes, but rather whether they can and will be accorded a fair trial if extradited to their native land. Clearly, many countries—even some who profess to share our values and our respect for civil rights—do not provide to political dissenters what we would consider the irreducible minimum of legal safeguards and guarantees. That it seems to me is the basic question at issue in the proposed treaty which is before your Committee.

Thank you again for your willingness to consider these and other views when coming to grips with these very difficult problems.

Best personal regards.

Sincerely yours,

(Rev.) THEODORE M. HESBURGH, C.S.C.
President.

ZIONISM IS NOT RACISM

HON. ROBERT GARCIA

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Tuesday, November 12, 1985

Mr. GARCIA. Mr. Speaker, Kenneth J. Bialkin, chairman of the Conference of Major American Jewish Organizations, wrote an excellent op-ed piece on the absurdity and the danger of the proposition that Zionism is racism. Mr. Bialkin eloquently states the case on how wrong that proposition is. I ask that my colleagues take a moment to read his thoughtful essay.

[From the New York Times, Nov. 10, 1985]

THE "ZIONISM-RACISM" CANARD

(By Kenneth J. Bialkin)

Ten years ago today, the United Nations General Assembly, in one of its mindless flights from rational discourse, adopted the infamous canard that "Zionism is a form of racism." Attacks on Israel and on Zionism have consumed more time and attention of the United Nations and its various bodies than any other subject—more time than the problems of world hunger, poverty, genocide, human rights violations, the threat of nuclear war, terrorism or the fight against disease and social disorder.

Why the focus on Zionism and Israel? Of all the issues facing the conscience of the world, why this one? It is not enough to say that the Middle East is an important region, or that Jerusalem and the holy places are important to all peoples of the world. That would not explain the concentration of hostility, or the refusal of the nations of the region to address their differences with Israel through peaceful negotiation.

The attack on Zionism and Israel derives from a fundamental hostility to a Jewish presence in the Jews' ancient homeland. It is fueled above all by anti-Jewish prejudice. The "Zionism is Racism" slogan is grounded in anti-Semitism and its propagation is itself a manifestation of racism.

The slogan's supporters have transformed a political issue—the dispute between Israel and its neighbors—into an intensely emotional crusade against an entire people and religion.

The Arab states, with the exception of Egypt, refuse to accept the legitimacy of Israel or to resolve differences through negotiation. Their media and government spokesmen maintain a drumbeat of anti-Semitism, sometimes crude, sometimes subtle, that poisons the minds and inflames the passion of their peoples. Little free expression, debate or disagreement is permitted in these countries. With few exceptions, the small Jewish communities that remain in Arab nations live in fear of persecution.

Moreover, the anti-Semitism of the Arab world has spread beyond the Middle East, into the third world and the Soviet bloc, which, to its eternal discredit, lends its full weight to these calumnies.

The Soviet Union practices its brand of anti-Semitism with cat-like perversity. It torments those Jews who wish to live a Jewish life in the Soviet Union yet refuses to let them emigrate. Jews whose only "offense" is to ask to leave risk being sent to internal exile and labor camp. The authorities arrest teachers of the Hebrew language and contrive other, even flimsier charges to persecute Jewish activists. Jews live in an atmosphere of fear and intimidation, and they are regularly denied decent jobs, housing opportunities and places in universities. The Soviet press criticizes Israel and Zionism in blatantly propagandistic tones, encouraging deceit, hypocrisy and passionate hatred.

This policy of harassing Jews yet refusing to permit them to emigrate is one of the most puzzling aspects of Soviet conduct. At once irrational and counterproductive, it violates the Helsinki agreement and embarrasses Soviet representatives wherever they go. For these reasons, it may be reasonable to expect some change in Soviet policy, but until that happens the Russians must expect to suffer the scorn and ostracism of the free world.

Anti-Semitism is a negative force that saps the energy of the hater, clouds his mind, fouls his mouth and weakens his community. The campaign against Zionism has consumed its enemies and prevented them from progressing toward a better life for their people.

Why, then, can these enemies not face the reality of modern Zionism? Why can't they accept that the Jewish people have a right to live in peace and dignity in their ancient places—and that the right-thinking peoples of the world will support them in that endeavor? Zionism provides a model for democratic living that offers hope for progress to those who would accept it and provides a promise of good will and respect for those who respect it. It is not too late, even 10 years later, to stop living by slogans and slander. It is not too late for truth and reconciliation.

WORD WARS WITH THE SOVIET UNION

HON. JIM COURTER

OF NEW JERSEY

IN THE HOUSE OF REPRESENTATIVES

Tuesday, November 12, 1985

Mr. COURTER. Mr. Speaker, those in the West who were appalled by President Reagan's evil empire speech in 1983 would do well to read the essay "Word Wars," by Andrew Nagorski from Newsweek magazine, which appeared in the October 28 issue of the New Republic. The essay provides a hair-curling taste of the kind of rhetorical abuse that the United States, under both Democratic and Republican administrations has had to endure, including, the Soviet version of the evil empire speech.

As Mr. Nagorski points out, Soviet propaganda seems never to have been moderated or toned down out of any concern for United States-Soviet relations; rather, the propaganda themes appear to be dictated by world events or as responses to U.S. statements or policies, such as Jimmy Carter's human rights policy. In 1982, Soviet commentators even began advancing the theme that the Reagan administration was pursuing Hitlerite policies and entertained mad, Hitlerite ideas of world domination, at about the same time that President Reagan was moving to open arms reduction talks with the Soviets.

Other Soviet charges have ranged from the outrageous to the absurd, including reports of almost 200,000 political prisoners being held in our country, with plans afoot to build 10 concentration camps to hold even more such prisoners. Reports of this kind are familiar to anyone who reads the FBIS transcripts of Soviet news media broadcasts and articles, and should serve to allay any fears that occasional Presidential outbursts of candor could in any way poison an atmosphere already soured by Soviet propaganda.

[From the New Republic, Oct. 28, 1985]

WORD WARS

(By Andrew Nagorski)

The Moscow Radio commentator searched desperately for suitable abusive language: "I am trying to find the most appropriate terms to expose the foul, human-hating nature of the present-day cannibals, and I can't find them, because the most accusatory words in the human lexicon seem too feeble and mild for this," he declared. "Gangsters, pirates, vultures, people-eaters, barbarians—these are all appropriate, but to be honest they are too weak if you remember and imagine how may hellish torments, sufferings, grief, and human sacrifices there are behind every step of the American instigators of war. And can one possibly forget that it was precisely the United States

which was the initiator or participant in the majority of military conflicts? * * * Now the American hawks are threatening socialism with a new crusade."

That commentary, on Radio Moscow's domestic service on November 2, 1984, was exceptional only in its rhetorical effusion. With various embellishments, Soviet propagandists have been steadily pounding away at the same message: the United States, and specifically the Reagan administration, is the successor to Hitler's Third Reich, a warcrazed power that threatens mankind with imminent annihilation. Moscow's rhetoric about America has never been noted for its subtlety, but even seasoned Western analysts have been struck by the shrill pitch of the current campaign. This may sound surprising in this pre-summit season of enthusiasm for Gorbachev. (See "The Teflon Comrade" by Christopher J. Matthews, page 16.) Yet while the new leader has been delivering a more polished, conciliatory message to the Western public, the rhetoric about the United States designed for Soviet consumption remains as strident as ever. What's going on?

This propaganda blitz is generally attributed either to Moscow's current foreign policy goals (it wants to encourage a fallingout between Western Europe and Washington on defense issues) or to its determination to repudiate—and outdo—the Reagan administration's "evil empire" rhetoric about the Soviet Union. Yet the intensified Soviet barrage began well before Reagan was elected. Far from being a straightforward response to mounting foreign threats, real and rhetorical, it reflects above all Moscow's efforts to deal with its mounting domestic problems. This kind of propaganda, which has always played an important role in legitimizing the Soviet regime, has acquired new importance as the persuasive power of economic promises and ideological principles has dwindled.

The truth is that Soviet rhetoric provides ample antecedents for Reagan's most controversial statements. There is no need to go back as far as the Stalinist or even most of the Khrushchev era, when Soviet vitriol was unmatched. The evidence is there in statements from leaders associated with more moderate policies, and it disproves Gorbachev's recent claim that "we have never accused the U.S. of being an 'evil empire.'" On June 12, 1970, for example, Brezhnev declared that no one should be under the illusion that the Kremlin's policy of peaceful coexistence meant "nonresistance to evil, the kind of evil that the imperialist aggressors bring to the people."

If Reagan's evil empire formulation wasn't original, neither were his statements about working to hasten the disintegration of the Soviet system. Moscow indignantly denounces this as an unparalleled attempt to destabilize the world by undermining socialism. Actually, a parallel could easily be found—for an assault on capitalism. On April 22, 1970, Brezhnev said: "Imperialism will not collapse by itself automatically. No, it is still strong. Active and determined action by all the revolutionary forces is needed to overthrow it."

The more pointed and personally insulting rhetoric began to rise in Carter's administration. During détente Nixon and Ford got gentler treatment, which ended as relations soured after the Soviet invasion of Afghanistan and Washington's grain embargo and boycott of the Olympics. In early 1980 Tass charged that Carter "shatters all records of fantasy, losing no chance to show bellicosity toward the Soviet Union." Pravda complained of the "lack of stability" under Carter, broadly hinting that it was his mental stability that was in question. And Warsaw Pact commander Marshal Viktor Kulikov invoked the Nazi analogy that has now become commonplace, charging that Carter was trying to achieve "world domination" as Hitler did before World War II.

With Reagan, such assaults have dramatically intensified. In a book published in 1982, then-chief of staff Nikolai Ogarkov launched the campaign equating Reagan with Hitler, arguing that Reagan's quest for military superiority was similar to Hitler's and would meet with the same results. Since Ogarkov's salvo, the Soviet press has routinely referred to Reagan's "Hitlerite" policies and "mad Hitlerite ideas of world supremacy." Krasnaya Zvezda, the Defense Ministry daily, not only argued that "the history of militarism" is repeating itself but drew parallels between "the ex-Hollywood actor" and Hitler, "the artist unrecognized in his time." In cartoons, Reagan is depicted as a Nazi-like figure with nuclear missiles as fangs.

This campaign was soon taken a step further: Reagan now ranks as a greater evil than Hitler. Komsomolskaya Pravda declared that the Reagan administration is composed of liars and crooks "worse than Hitler and Eichmann." Politburo member Boris Ponomarev wrote in the December 1963 issue of Problemy Mira i Sotsializma that the current American administration constitutes "the main danger for humanity": where Hitler's "anticommunism and anti-Sovietism" led to a conventional war, Reagan's threaten a nuclear war "pushing the whole world toward catastrophe." Not surprisingly, the Bitburg controversy offered an occasion for the Soviet press to refine its fascist portrait of the president. (Imagine the outcry in this country if top Reagan administration officials began depicting Gorbachev as a reincarnation of Hitler or, to make the analogy accurate, as a super-Hitler.)

In its portrayals of American domestic affairs, Soviet propaganda has been even more consistent. Détente or no détent, the United States has been depicted as a country that proves Marxist dogma about "the rotten way of life." Capitalism is "a world that lives by the laws of the jungle," according to a 1978 book titled Imperialism: The Enemy of Humanity. Dire poverty, unemployment, slums, crime, violence, and Ku Klux Klan rallies are the staple items in Soviet accounts of America. Political prisoners" such as Angela Davis and Eldridge Cleaver receive prominent play when they resume a normal life. Natural disasters and industrial or airplane accidents also get full coverage, presumably to convey the message that these are specifically capitalist tragedies. Like crime, similar events go largely unreported when they occur within the Soviet Union.

At the same time, however, Soviet rhetoric features a paradoxical twist. It denounces totalitarian evils, not just corrupt capitalist ones, in American life. During Carter's presidency, the Soviet media were full of indignant accounts of the trampling of human rights in the United States and the persecution of "dissidents." Under Reagan, that counteroffensive has expanded. "Today about 500,000 people, more than one-third of them political prisoners, are in detention in the U.S.A.," Tass reported last year, adding that guards "use clubs and whips at the slightest provocation" against them. For the past year, the Soviet press has been reporting that the United States is preparing to build ten huge concentration camps for political prisoners, an Izvestia cartoon showed Uncle Sam receiving advice from Heinrich Himmler on how to carry out this project. Police state tactics? "The United States is like a gigantic X-ray machine on which one can see a man's every step—in the street, in stores, even in his own kitchen. . . . The American secret services have everything at their disposal," Sovetskaya Rossiya reported. As for state-sponsored terrorism, Washington and "Zionists" have long collaborated in this field.

Clearly one goal of such rhetoric is to rebut, however feebly, Western criticism of Soviet society. Without acknowledging that there is any basis for the accusations, the Soviets immediately assert that the same situations exist in the United States. It's in the old "And what did you do to your Indians?" tradition. The other crucial goal is to convince the average Soviet citizen that he enjoys a superior form of life or, failing that, at least to confuse him. "Who really lives better, you Americans or us?" is a question many Russians, particularly in the provinces, ask American correspondents, with genuine uncertainty.

The campaign to portray the United States as the supreme warmonger is part of that same campaign to diminish domestic discontent. Moscow has always needed to invoke an external threat to justify the harsh measures taken by the regime, but in the past this was one element in a threepart mix. Ideology and, since World War II, a painfully slow but steady increase in living standards also helped legitimate the regime. Stalin relied on ideology and the external threat; the notion of an improvement in living standards was merely an abstract future promise based on the premise that socialism was inevitably destined to produce a better life for its citizens than capitalism.

In the postwar era, the goal of an improvement in living standards became more important than fading ideology, which of itself inspired little enthusiasm anymore. Brezhnev in particular justified his regime on the grounds that it was building more housing, increasing agricultural production, and trying to provide at least some consumer goods, however shoddy. The external threat was never forgotten, but it was presented in slightly less alarmist terms.

In the latter part of Brezhnev's tenure and under his successors, the external threat has reemerged at its now familiar hysterical pitch. Andropov explained most clearly that this was a deliberate policy decision. "The threat of nuclear war hanging over the world prompts us to make a fresh assessment of the basic purpose of the activity of the whole Communist movement," he said in June 1983. The motive for putting matters in such stark terms is the situation within the Soviet Union itself, where economic setbacks have caused living standards to stagnate or actually decline. If in an earlier period ideological slogans helped explain away such failures, they were hardly convincing in the 1970s and 1980s. In neighboring Poland, events appeared to be fulfilling Western prophecies that the Soviet system's economic failures would lead to its eventual political disintegration as well.

Kremlin leaders reached for the only self-justification they had left: their "peace mission. To make that credible enough to compensate for faded ideological beliefs and economic hopes, the threat of war had to be inflated, pinning responsibility for any

problems inside the Soviet Union or its empire on the external enemy. It is no accident that in July 1984 the Central Committee published a decree reviving the Stalinist notion of instilling hatred in the young: "A feeling of love toward the motherland, and a feeling of hatred toward its enemies, must be instilled in young people with ever-increasing persistence." Although Reagan has been a convenient bogeyman, that process began before his election and would have continued regardless of who occupied the White House. Just how well entrenched and effective this campaign is became clear to me in Vologda, a Russian provincial city in a dairy and livestock region I visited in October 1981—when Reagan had barely begun to make his mark on the conduct of foreign policy. "We don't have enough food here because America is attacking us," an old woman told me. What, I asked, had that to with the shortage of Vologda's, own butter? "It goes elsewhere," she replied. "To the army."

SANCTUARY FRAUD

HON. ROBERT J. LAGOMARSINO

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, November 12, 1985

Mr. LAGOMARSINO. Mr. Speaker, the "sanctuary movement" in the United States has claimed that thousands of illegal Salvadoran immigrants are victims threatened by political violence if they return to El Salvador. The actual truth of the matter is that the vast majority of illegal Salvadoran immigrants, and illegal immigrants from other countries, too, for that matter, are in the United States because they are seeking economic enrichment, not political freedom.

A recent commentary in the Washington Times by columnist Michael Novak describes clearly the sham being perpetrated by well-meaning religious leaders in the name of political freedom. I urge my colleagues to read the following article entitled "Sanctuary Fraud."

SANCTUARY FRAUD

(By Michael Novak)

Nobody has noticed, but the "sanctuary movement," after more than three years of frenetic and deceptive organizing, isn't going anywhere. There are 339,843 churches and synagogues in the United States. Of these 253 have offered "sanctuary."

The chief reason is the fraud on which the movement is based. At great expense, with careful screening, and with intensive indoctrination, the "movement" ushers a tiny band of dissident Salvadorans (and Guatemalans) before compassionate audiences. It never helps refugees from Nicaragua.

Why this double standard? The reason is explicit in the literature of the sanctuary movement. The aim of the movement is not to help needy individuals. Its aim is to oppose Reagan administration policy in Central America. For that purpose, Nicaraguan refugees don't count.

Millions today seek refuge in the United States. A total of 1.7 million persons worldwide, immigrant visas to the United States already granted, now stand waiting the opportunity to enter. The United States, writes one immigrant writer, is like a Broadway smash: "People are lined up around the block waiting to get in."

This is generous country. During the 1970s more immigrants entered it than in any decade except two in our history. During 1984 alone, 430,000 were accepted as immigrants: a rate of 4.3 million this decade.

About 70 percent of all Salvadorans in El Salvador said in an recent poll that they "would emigrate to the United States to work." By overwhelming majorities, those here say they have not come for political reasons.

Still, every year the United States admits tens of thousands of persons from around the world who have a well-founded fear that they will suffer unjust persecution in the country where they now reside. In 1984 alone, some 70,000 refugees entered the United States on that basis. In addition, anyone who reaches U.S soil may apply for political asylum. If he meets the "well-founded fear" requirement, he will be allowed to stay as a refugee. U.S. law puts no limit on the number who may be granted asylum. Beyond the Salvadoran refugees who entered this country in 1984, 328 Salvadorans residing here were also granted political asylum—possibly a higher number than the sanctuary movement brought in.

Cruelly, the sanctuary movement does not permit its victims to use these legal channels.

A writer for The Nation, Rob Huesca, recently reported sympathetically on the sanctuary movement for the Los Angeles Times (Dec. 28, 1984). He describes how he learned "exactly who the refugees are and where they come from."

"To begin with, refugees are always referred to the group by teachers, or church or union workers from their countries. After extensive interviews, only endangered refugees and potential political activists are extended sanctuary. Those bound for the United States in flight from poverty are not given aid. They have to demonstrate political persecution and voice opposition to American involvement in their countries. Furthermore, they have to express a willingness to relate their experiences publicly on arriving in the United States."

No wonder the sanctuary movement—out of hundreds of thousands of immigrants—has found so few persons to bring forward, despite assiduous recruitment. No wonder even willing churches have to wait months for "their" refugee—who usually stays only a day or two, before being trundled off to another speech. Only those are brought in who are willing propagandists and political agents.

Once here, legal refugees have every opportunity for the free speech accorded all American citizens, even Marxists. There is no need for "an underground railroad." The above-ground railroad brings in millions of persons every decade, legal and illegal.

In the United States today, there are already 500,000 Salvadorans; 350,000 of them arrived *before* the outbreak of hostilities in 1979. The vast majority do not come here for political reasons. They send back to El Salvador $30 million a month. A substantial majority of them *support* U.S. policy in El Salvador.

Some have fled from the terror inflicted by the Salvadoran guerrillas, who in recent months kidnapped more than 30 duly elected Christian Democratic mayors, murdered two, and kidnapped the daughter of President Jose Napoleon Duarte.

Consider these facts as well:

During 1984, U.S. Immigration officers arrested 18,000 persons for violating immigration law. Of these only 20 involved the sanctuary movement.

During all of 1984, there were 771 violent deaths among civilians in El Salvador. In a nation of 4.5 million persons, this is fewer than in a U.S. city that size.

The people of the United States are not as gullible as the extreme religious left. The sanctuary movement is a fraud that has failed.

REAL WORLD CONSEQUENCES OF U.S. TRADE POLICY

HON. PAUL B. HENRY

OF MICHIGAN

IN THE HOUSE OF REPRESENTATIVES

Tuesday, November 12, 1985

Mr. HENRY. Mr. Speaker, every Member of Congress agrees that the consequences of our international trade imbalance are severe—higher unemployment, a lower gross national product, and pressures for protectionist legislation.

But there is little agreement over the proper remedial actions to take. It is widely acknowledged that our dangerous fiscal policy—if it can be called a policy—of escalating Federal deficits is a strong contribution factor. But not all of the trade deficit problem can be laid at the door of fiscal irresponsibility. It is also clear the rules of the international trade game have changed greatly since World War II, and the free trade policy, quite appropriate then, must be reconsidered in light of changing market dynamics.

The argument for a new and more realistic view of international trade and its consequences upon U.S. trade policy is outlined in the following speech delivered by Mr. Marshall Wright, vice president for corporate affairs of the Eaton Corp. I commend it to my colleagues' attention as an important addition to the trade debate.

LIGHT A MATCH—OR CURSE THE DARKNESS

The national debate on trade seems to me crippled by a faulty perception of the issue. As a result, the protagonists continue to pass each other in the night, and although the debate has been both long and intense, it has also been remarkably unproductive.

As navigational beacons in the search for a workable trade policy, I would like to suggest five truths which seem to me self-evident.

The first is that the terms of the argument need to be honestly defined. It is foolish to argue about whether United States trade policy should aim for free trade, or for protectionism, and it is intellectually dishonest to pose the question that way. I am not simply making the obvious point that in this imperfect world no country has a pure free trade policy. Rather, I am making the point that even in a perfect world, no rational person would support a pure free trade policy, nor for that matter a policy of autarchy.

To illustrate with an extreme example, even the most passionate believer in the beauty of comparative advantage would turn pale at the suggestion that the nuclear weapons used by the Strategic Air Command ought to be manufactured in whatever country can demonstrate comparative

advantage in their production. South Africa? China? Libya?

Nor can any rational person defend the proposition that social cost is an irrelevant factor in trade policy. Surely there is for all of us an acceptance that at least theoretically the social costs of free trade could exceed its economic benefits. For example, the Burmese economy is singularly dependent upon an inefficient rice and teak industry. A substantial part of Burma's domestic needs for these products could doubtless be met by imports from the more efficient rice and teak industries in neighboring Thailand. No one, however, who has spent as much as a week in Burma could conceivably suggest that comparative advantage is the controlling consideration on that possibility.

Thus, the question is not whether our national policy should be free trade, or protectionism. Protection of at least some domestic production—perhaps a very small part, but at least some—is, must be, and will always be a feature of United States policy, and of the policy of every trading country in the world.

The question, therefore, is one of balance, how much and what form of protectionism most benefits U.S. society and the world trading system.

The second self-evident truth is that the correct answer to that question changes as time and circumstances change. For some 50 years, U.S. policy has aimed generally toward the reduction of trade barriers—because we were convinced that U.S. society benefited from a reduction in barriers to the freer international movement of goods. Therefore, as a matter of national policy, we were prepared to go more than halfway in negotiations aimed at the removal of trade barriers.

It is important to understand that we did not adopt that policy for ethical or moral reasons. We adopted it because we were convinced that the vigor, size, efficiency, and technological strength of our economy was such that we would inevitably benefit from the freer play of competitive forces. Our policy was precisely based on our perception of where our national interests lay. It was only with the passage of time—and the passage of generations through the fervid economics taught at many of our educational institutions—that the freer trade policy took on theological overtones. The structure of the international trading system is not an ethical issue, and we befog our minds when we permit ourselves to treat it as such.

For the greater part of our national existence, we followed trade policies that were more protectionist than not, and they did not prove fatal to our national development. In the 30's we changed our policy because we believed then that the health of our economy would be served by the reduction of the then existing barriers to international trade. That was unquestionably a correct perception then, and it unquestionably continued to be correct for most of the next half century.

The question now is whether it continues to be true, and I suspect that the debate would proceed more fruitfully if everyone started off by admitting that there is now a plausible argument—perhaps not the winning argument, but certainly a strong one—that with the current shape and nature of the world economy, the U.S. national interest is not served by continuing to facilitate freer access to our domestic markets for foreign producers.

My third point is a truism. Although the United States cannot design alone the international trading system, we have an extremely strong asset to bring to bear in shaping that structure. That asset is our control of access to our extraordinary and unequaled domestic market. The central question which always lies at the core of United States trade policy is simply this: How should we use that asset in helping to shape the international trading system?

For most of this century, we have taken the lead in offering access to our market in exchange for the reduction of barriers maintained by other less important and desirable markets. Is that still the best use of this great national asset, or should we now deploy it in a more defensive manner? That is not an intellectually disreputable question, and those who pretend that it is are substituting emotion for thought. They are also rapidly losing the debate by default.

My fourth point is, I think, too frequently ignored in the current debate. The U.S. domestic market is now simply too rewarding and too accessible not to attract the concentrated attention of every competent and aggressive company in the world. Our domestic market is, therefore, their prime target. That fact takes on sharp relevance when it is considered in the context of the changes that have taken place in the world economy since the 1930's. The U.S. economy no longer enjoys advantages which permit it to assume with confidence that it is the inevitable winner in a freer system. Indeed, the evidence seems to me overwhelming that there are few things that today cannot be made somewhere in the world as well as, and frequently cheaper than, they are made in the United States. The evidence also seems to me overwhelming that the other principal trading nations of the world are not, at the present time, prepared to accept the social disruption involved in free access to their markets of American goods in quantities and of types which significantly damage their domestic structure.

In a multiparty transaction, it is reckless to ignore the motives and intentions of other parties in the transaction.

My fifth point is that the theory of comparative advantage, though elegant and intellectually difficult to attack, is a theory. It is therefore based on a number of assumptions, not all of which obtain in the real world. To the extent that those assumptions do not obtain, of course, the theory of comparative advantage is untrue.

One of the more important of those assumptions is that there is no cost of exit or entry from and into industrial production. That assumption is, of course, wildly inaccurate in our world. The fact is that modern industry requires a very heavy cost of entry, a consideration which is chilling to any would-be challenger to an established market leader. It follows therefore that a domestic U.S. market, once captured by foreign producers, will seldom be recaptured by a domestic producer precisely because the cost of entry will seem too high for so risky an undertaking.

Those five points seem to me demonstrably true, and I suspect that a debate based upon an acceptance of them might shed a good deal more light, even if no less heat, than the current caterwaulings are likely to do. In any event, I would like to move now to the area of personal bias.

I hope it is not narrowly nationalistic of me, but I find that I cannot believe it to be in the interests of a sane and stable world that the United States economy lose, for the time being, its central and prime role. When I consider the security implications of that, when I contemplate its implications for the survival of the free economic, political and cultural institutions which characterize western civilization, I am not content to say that the world can yet accept a continuously diminishing role for the United States. In time, it will come, of course, but I do not now see what will replace it. And I am not prepared to say that the values of which American society is now the main support are sacrificeable to anything, much less to the theoretical charms of a freer trading system.

I am therefore prepared to argue that the time has come when the rational policy for the United States is to use access to our domestic markets as a valuable privilege which we bestow on those who prove to us that it is advantageous for us to bestow it.

I would be quick and unapologetic about reducing access to U.S. markets for those who are unable or unwilling to provide such proof. I would not, for the time being, go at least half-way in trade negotiations because the cards that we hold are better than that, and they deserve to be played intelligently. I would not continue the degrading practice of trooping over to Tokyo every 6 months or so to inform them that we have discovered another batch of their nontariff tricks, and we will do something awful if they don't abandon them.

They can and do invent such barriers much faster than we can detect them, and I would change the game to one in which it is up to them to do whatever they wish with their domestic practices, and up to us to do whatever we wish with ours. When the real-life effects of what they do are not satisfactory, then the real-life effects of what we do will be adjusted in order to bring about that happy balance for which the Japanese have worked so hard, so publicly, and so unsuccessfully.

Unless I am very mistaken, such a policy would have a miraculous effect on the nontariff barriers which inhibit American exports to Japan. It would also save the Federal Government much in international air travel costs and it would restore a little sorely needed dignity to the United States-Japanese dialogue on trade.

I should add that I find my prescription a joyless one. I wish that I believed that the advantages of U.S. production in general were today what they were yesterday, sufficient to outweigh our higher wages and more broadly shared standard of living.

But I do not believe that to be true. I also do not believe that Japanese culture means that Japan can buy American logs, but cannot buy American plywood. I do not believe that the requirements of European stability preclude substantial access to that market for American agricultural products. I see no merit in freely permitting foreign competitors to enjoy to the full the immense advantages of scale provided by our domestic market in such fields as biophysics and semiconductors. To the contrary, I believe it is literally irrational, in current circumstances, to share equally with the rest of the world the advantages of scale which our domestic market uniquely provides. To do so is to transform our national trade policy into a charitable undertaking.

I see no reason why it should be particularly difficult to shape a national trade policy which reflects these realities without slopping over into irresponsible beggar-thy-neighbor practices. All it requires is the will to do it. I am by no means certain that much—if any—new legislation would be required to put such a policy into effect. It

could be largely accomplished, I suspect, through the vigorous and speedy administration of our current laws. Certainly, it would not require the passage of any of the current clutch of hectoring, self-righteous and unseemly bills which are currently before the Congress.

Probably, we should include in the policy some vigorous package of incentives for greater productivity. Certainly we should ensure that U.S. exporters have access to credit upon terms no less advantageous than those available to any foreign company. In general, we should work vigorously toward reestablishing a domestic economic prowess that would permit us to return as quickly as possible to the easy assumption that we can, without unacceptable cost, trade freer access to our market for freer access to lesser foreign markets.

But if the proponents of a liberal trade policy continue to pretend that there is no problem save that caused by ignorance and the self-interest of the smokestack industries, then we will certainly get protectionist legislation, which once enacted, will be defended like a tiger by every affected interest. The result will be a rigidity which will probably be permanent, and which certainly will be damaging to the long-run interests of both the United States and the world economy.

OIL OVERCHARGE REFUND

HON. EDWARD J. MARKEY

OF MASSACHUSETTS

IN THE HOUSE OF REPRESENTATIVES

Tuesday, November 12, 1985

Mr. MARKEY. Mr. Speaker, over the past few years Department of Energy investigations have led to successful litigation against oil companies which have violated Federal price and allocation controls. The funds recovered through these cases are then returned to the people who were overcharged. In cases where specific injured parties cannot be identified, the revenue is often distributed directly to the States by the DOE for energy-related programs. In this manner, the overall purpose of restitution for illegally high energy prices has been preserved.

Recently, the administration has tried to change the rules. Instead of making restitution to the consumers through the States, it would require the Federal Government apply the funds toward deficit reduction. That is nonsense; this money belongs to the people who were overcharged and is not tax revenue.

The Southern Governors' Association agrees. During its recently completed annual meeting, they adopted a resolution proposed by Texas Gov. Mark White.

I have included that policy position paper, and urge my colleagues to review it.

POLICY POSITION REGARDING OIL OVERCHARGE REFUNDS

(Submitted by Gov. Mark White, Texas)

(Adopted at the 1985 annual meeting of the Southern Governors' Association; also adopted by the Southern Legislative Conference.)

BACKGROUND

Federal price and allocation controls were imposed on crude oil and refined petroleum products between 1973 and 1981. An investigation by the United States Department of Energy resulted in allegations that several oil companies had violated the price controls by overcharging consumers during that period of time.

Some cases have been settled out of court and refunds have been distributed directly to injured consumers. Where injured parties cannot be identified, some of the refunds have been given to the states for energy related activities. Other refunds have been placed in escrow by the Department of Energy for subsequent distribution. A number of cases remain in litigation. It is estimated that about $5 billion to $6 billion in alleged violations are yet to be resolved.

The administration and some congressional members have proposed to offset federal expenditures with oil overcharge revenues by using the refunds to supplant federal expenditures for energy related programs. Additional legislation may be proposed to place the oil overcharge refunds in the general Treasury without earmarking for specific purposes.

RECOMMENDATION

The Southern Governors' Association supports budget deficit reductions but opposes any attempt to substitute oil overcharge refunds for existing energy related appropriations. Oil overcharge refunds provide restitution to identified injured parties for past oil price and allocation control violations and to the public when injured parties cannot be identified. The role of the federal government is to hold these refunds temporarily. Oil overcharge refunds belong to affected consumers and are not tax dollars. The use of oil overcharge refunds to replace federal tax dollars does not provide restitution to injured parties. Where injured parties cannot be identified, refunds should be distributed to states for appropriate energy related programs. States should apply interest derived from the oil overcharge refunds to the restitution programs.

UNPLUG COMPUTER SNOOPING PLAN

HON. DON EDWARDS

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, November 12, 1985

Mr. EDWARDS of California. Mr. Speaker, the following editorial from the October 19, 1985, Atlanta Constitution is a thoughtful, hard-hitting analysis of the White House's plan for nationwide computer snooping.

I commend this excellent editorial to my colleagues.

[From the Atlanta Constitution, Oct. 19, 1985]

UNPLUG COMPUTER SNOOPING PLAN

The idea is frightfully tempting to a government that is buried in debt. Why not use tax information to ensure that ineligible applicants are denied, say, student loans? And why shouldn't officials peruse private insurance records to detect people who shouldn't get Medicare?

The White House is preparing legislation that would authorize such practices, made possible by miracles of modern computer wizardry. Congress should pull the plug on this plan in a microflash.

First, electronic fishing expeditions do not promise massive savings. Waste, fraud and mismanagement—while they happen—are not the governmental problems they are cracked up to be. Any cash that Big Brother recoups likely would be just a tiny portion of government's $400 billion or so in outlays. Americans are more honest and diligent than is commonly supposed.

While computer snooping offers a small financial return, though, it poses a mighty big danger to personal privacy. Any expanded use of tax records is questionable because citizens are required to submit this data. Some law-enforcement uses might be reasonable, but involuntarily submitted tax records must not evolve into a federal dossier.

Worse yet is the proposal to tap private insurance records. It would be a small step from collecting insurance data to gathering, say, credit information. From cradle to grave, lives today are laid out in intimate detail through information in public and private computer banks. Lack of centralization has assured a modicum of personal privacy. If enacted by Congress, the Reagan administration's plan would erode that assurance.

Besides, who will guard against misinformation? Will citizens have ready access to their files? One faulty entry—perhaps a missed digit in a Social Security number or a wrong initial in a name—could plague some hapless Medicare applicant or student for an eternity.

Accuracy is no small issue. Already, the FBI says misinformation mars 6 percent of warrant entries fed to it daily by the states. Consider, then, the amount of erroneous data likely contained in the 35 million automated criminal records that were recently counted in a survey of 44 states.

Unfortunately, the White House has moved to compound this problem, too. It wants the FBI to set up a computer bank, available to the nation's 64,000 law enforcement agencies, that would detail activities of people police fancy to be white-collar criminals. Suspects would not need to be formally accused to merit inclusion.

The idea may have accomplished the unthinkable: It has rallied the American Civil Liberties Union, the National Rifle Association and the American Bankers Association to the same side—as opponents.

If these White House plans become law, the nations will edge closer to a society that functions not on trust but suspicions, checks and double-checks. It remains unclear who will check the suspecters and checkers.

Congress might save the Treasury a few bucks by turning the nation's data banks into auditors of its citizens' affairs, but the losses incurred from such a folly might someday be immeasurable.

ENTERPRISE ZONES ARE WORKING IN NEW JERSEY

HON. JIM COURTER

OF NEW JERSEY

IN THE HOUSE OF REPRESENTATIVES

Tuesday, November 12, 1985

Mr. COURTER. Mr. Speaker, New Jersey's evolution in recent years from an economic basket case to an economic magnet can, in large part, be attributed to the implementation of urban enterprise zones in some of the State's most troubled cities. What is unique about this program is that it creates job and business opportunities

through incentives rather than through large Government expenditures. The following outline of the program, as it is being expanded by Gov. Tom Kean, further explains the exciting success of urban enterprise zones in the Garden State:

DESIGNATION OF URBAN ENTERPRISE ZONES

Governor Thomas H. Kean today announced the designation of urban enterprise zones (UEZs) in Jersey City, Kearny, Elizabeth and Orange.

The designations, which are expected to promote economic growth in those cities, were made at a meeting of the New Jersey Urban Enterprise Zone Authority in Trenton today.

The authority also agreed to create a zone in portions of Millville and Vineland. According to State Commerce Commissioner Borden R. Putnam, who chairs the Authority, the designation would be held jointly by the two Cumberland County municipalities, contingent upon approval of legislation now pending that would enable two cities to share a single designation.

Businesses within a UEZ are allowed to take advantage of a number of tax exemptions and tax credits, and are offered various job training programs and opportunities to cut "red tape," to expedite job growth.

There are five zones currently in operation in New Jersey, in Newark, Camden, Trenton, Bridgeton and Plainfield. In less than one year, $125 million in private funds have been committed for investment in the State's five UEZs, which will result in creation of more than 8,300 permanent, full-time jobs over the next two years.

Under State law, the Authority is only allowed to create a total of ten zones in New Jersey. However, the Authority unanimously adopted a resolution calling on the Legislature to consider legislation that would authorize creation of additional zones. It also will be seeking legislative support for a bill that would allow the Authority to permit additional sales tax reductions in needy zones.

Twelve cities competed for the zone designations made today: Jersey City, Kearny, Elizabeth, Orange, Millville, Vineland, Bayonne, Paterson, Passaic, East Orange, Asbury Park and Long Branch.

"We based our selections on a number of criteria, such as the unemployment rates and other indicators of economic need, and after great consideration, numerous consultations and site visits, the choices became clear," said Putnam.

"This is a program where success depends greatly upon the local business owners," Governor Kean said. "No State funds or grants are used to rejuvenate these business districts, under the UEZ program. The UEZ program is a grassroots effort. The fact that the program is working so well in New Jersey, in such a short time, is a tribute to this State's business community."

"The number of business owners who are keenly interested in participating in a UEZ program was a key factor in the selection process," said Putnam. "However, as the many benefits of operating in UEZ become known in New Jersey, we foresee the need—and the desire—to have more zones created in this State." The Governor and the Commissioner plan to ask the Legislature to consider authorizing the creation of additional zones.

Serving with Putnam on the Authority are State Community Affairs Commissioner John P. Renna, State Labor Commissioner Charles Serraino, State Treasurer Michael M. Horn, Richard Messner of Skillman, Frank Nero of Plainsboro and Herbert Tate, Jr., of East Orange, who abstained on the vote on the East Orange application. Assistant Commerce Commissioner Henry Blekicki is responsible for overseeing the operation of the UEZ program Statewide, and presented the staff recommendations to the Authority.

PHILIPPINE INSURGENCY

HON. ROBERT GARCIA

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Tuesday, November 12, 1985

Mr. GARCIA. Mr. Speaker, William Branigin of the Washington Post wrote an excellent article on the Philippine insurgents. As the problems in that nation are becoming more and more involved, it is important that we fully understand the situation. In that light, I am submitting the article for my colleagues' perusal.

The article follows:

[From the Washington Post, Nov. 11, 1985]

PHILIPPINE INSURGENCY SAID TO BE SELF-RELIANT—MOST FOREIGN COMPARISONS MISS MARK

(By William Branigin)

MANILA.—The Philippines' long-running Communist insurgency has been billed lately as the "Reagan administration's Iran. Other U.S. observers, old Asia hands for the most part, draw comparisons with Vietnam. But for Filipinos closely involved in the insurgency, either in waging it or fighting against it, the closet comparison is with Nicaragua.

Except as a metaphor for a U.S. foreign policy crisis, Iran has little relevance here, and comparisons between the two countries come as something of a surprise.

Less surprising, but still somewhat perplexing, is word from the U.S. Congress that the Soviet Union is moving to exploit the turmoil in the Philippines by making contacts with the insurgents.

In fact, the Communist Party of the Philippines and its armed wing, the New People's Army, have been seeking foreign support openly for years for their battle against the government of President Ferdinand Marcos but, by all accounts, have received precious little. Rebels and military sources say none has come from the Soviets, who have angered the Philippine Communists by trying to curry favor with Marcos.

According to Communist publications and interviews during the past several months with rebels and their supporters, the Communist rebellion is a home-grown movement that borrows concepts and doctrines from a variety of sources but tends to be cautious. Making a virtue of necessity, it places great stock in its self-reliance and sees its situation as unique in the world.

Certainly, comparisons between the Philippines, a predominantly Roman Catholic archipelago where well-organized, disciplined Communist rebels have been fighting the government for the past 16 years, and Iran, where a largely spontaneous Islamic revolution overwhelmed the monarchy of shah Mohammed Reza Pahlavi, generate more differences than similarities.

In Iran, opposition to the shah, an aloof, almost alien figure, was channeled by Ayatollah Ruhollah Khomeini into a religious revolt that mobilized the overwhelming majority of the people and paralyzed the country with strikes. This made Iran virtually impossible to govern, and there was nothing the shah or any outside power could do about it.

In the Philippines, the opposition to Marcos is much more fragmented and by no means universal. While he is often described as out of touch with the situation in the country, Marcos always has been intensely political and has been credited with knowing how to play on the sentiments of the Filipino people like a virtuoso.

Never quite the "dictator" that his enemies have portrayed him to be, he has always seemed able to sense when to crack down and when to ease up on his opponents.

As in Vietnam, a U.S.-backed government faces a determined Communist insurgency, but the similarities seem to end there. The Vietnamese Communists benefited from large-scale foreign support from the Soviets and Chinese, had supply lines through neighboring countries and recourse to a powerful conventional army, the North Vietnamese regulars.

The Philippines, by contrast, not only has an isolated insurgency, but the country enjoys a democratic tradition that, although battered under Marcos, still appears salvageable and may yet provide an elected alternative to Marcos. In fact, there are indications that this is what the Communists fear most.

A former Spanish colony in which the Roman Catholic Church wields great influence, the Philippines, on the face of things, would seem to have more in common with Nicaragua. Indeed, the Communists' own literature raises the prospect that, as in Nicaragua, the political struggle could outpace the armed insurgency if efforts to develop a "broad united front" against Marcos—including businessmen, professionals and political moderates—are successful.

It is a prospect that also is taken seriously by the moderate opposition and even some military sources. Former president Diosdado Macapagal, for example, has warned for years that the Philippines could go the way of Nicaragua if Marcos remained in power.

"Unfortunately, there seems to be a merging effort of the Communist Party with the legitimate opposition," said Marine Col. Rodolfo Biazon in the southern city of Davao recently. "I liken this to the situation of Nicaragua, where the noncommunist anti-Somoza factions allied themselves with the Sandinistas."

Here, the Communist guerrillas he has encountered were "lousy fighters," he said, "but their edge is their ability to manipulate legitimate groups."

Independent observers tend to agree, however, that the outcome in the Philippines, a far bigger (population 54 million) and more developed country than Nicaragua, will be unique.

"Anything that happens here is going to be different," said an American missionary who has lived in the Philippines for more than a decade. "It's going to be an awfully tough country to govern no matter what happens."

To make that job easier in the event it comes to power, the revolutionary movement devotes much of its energy to "political struggle." Through organizations that are essentially Communist fronts, it even plans to participate selectively in local elections scheduled for May 1986.

"We never delude ourselves that we can achieve power through elections," one activist in a front organization admits. "We only

look at elections as one of the possible ways of strengthening our forces."

Among the Communists' primary aims now is the creation of a "broad united front" of opposition forces to complement the New People's Army guerrilla war with an "open, legal struggle," primarily in the cities.

"The battle must not only be won militarily," said a New People's Army supporter in Manila. "The battle must be won politically."

He added, "We have already consolidated our army and laid the foundation for a broad united front," which he said was based on "an alliance of workers and peasants." This front, however, is "inherently unstable" and requires an army to "attract other sectors" to it, he said.

In fact, some observers believe that the guerrillas, whose weapons are almost entirely captured from the Philippine military, may have great difficulty expanding their operations from the current hit-and-run raids to the more conventional battles envisioned in a "strategic stalemate."

"I think the NPA has gone about as far as it can unless it receives outside assistance," said a parish priest working in a remote area of the troubled southern island of Mindanao. "The NPA is simply outgunned—M16s and bolos [knives] are not enough."

It is clear that the insurgents would welcome support from the Soviets—or anybody else for that matter—but they tend to doubt that it will be forthcoming.

"The Russians have always looked at Marcos as a sincere nationalist who can be befriended," said a rebel supporter in Manila. "They look at the NPA as an adventurist movement."

For the Philippine rebels, the suspicions have been mutual. Supporters of the insurgency reacted with disgust earlier this year when a Soviet envoy visited Marcos at his Malacanang presidential palace and awarded him a medal. Nor was Moscow's invitation to Marcos' wife, Imelda, to visit the Soviet Union last month greeted favorably by the Philippine left.

During the visit, the Soviets requested access to Philippine ports in an apparent attempt to exploit differences between Marcos and his critics in Washington. It was a ploy that appeared to run counter to any effort to develop relations with the insurgents.

In fact, said a leading member of a Communist front organization in Manila, most of the NPA's foreign support comes from leftist groups in Western Europe. "The European people are more sympathetic to us than the Socialist Bloc," he said.

If the revolutionaries' literature is any indication, it already may be too late for the Soviets to make inroads with the insurgents that would lead to a major presence in the country if and when the Americans were forced to leave two large military bases on the northern island of Luzon.

According to a revised program issued this year by the National Democratic Front, an organization of the Communist Party, "no foreign power shall be allowed to set up military bases on Philippine soil, nor to carry by any means of transport nuclear weapons into Philippine territory."

The document states that the people's war" in the Philippines "is part of the worldwide struggle against imperialism" and that "we seek the political and material support of other countries and revolutionary movements and organizations abroad."

However, the rebellion is being waged "on the fundamental principle of self-reliance," the program says, and "in no instance will become so beholden to any foreign entity that we would even consider sacrificing the sovereignty, national independence and democratic rights our people are fighting so hard to attain."

According to a party activist, a key mistake of the party in the 1970s was reliance on foreign support, notably from China. When Chinese aid stopped, he said, the movement was hurt, but it gradually became self-sufficient.

Nevertheless, rebel sources say, the Soviets have continued to view the Communist Party of the Philippines and the New People's Army as creatures of the Chinese, accounting for their suspicion if not hostility.

Moscow's support instead has been directed toward the 55-year-old Philippine Communist Party, which waged an unsuccessful rebellion in the 1950s but formally renounced armed struggle in 1974 and reached a settlement with the Marcos government.

The Communist Party of the Philippines was founded on Dec. 26, 1968, by a group of young militants who had been expelled from the established party for criticizing strategic and doctrinal mistakes that led to the defeat of its guerrilla force, known as the Hukbalahap. In March of the following year, the New People's Army was founded.

It claims to have started out with fewer than 100 fighters armed with 35 old rifles and handguns and to have grown since then into a force of 30,000 "full-time and part-time guerrillas" armed with about 10,000 "high-powered rifles." The Marcos government puts guerrilla strength at 12,500, two-thirds of them armed.

CHEMICAL CONTAMINATION AND LARGE CHEMICAL DISASTERS

HON. DENNIS M. HERTEL

OF MICHIGAN

IN THE HOUSE OF REPRESENTATIVES

Tuesday, November 12, 1985

Mr. HERTEL of Michigan. Mr. Speaker, amid the debate on toxic chemical contamination and large chemical disasters, I think it is important to point out the human element in this problem and the human solution. Education and training of chemical workers is a major factor in the safe use of these materials. The finest safety features are of little value, it is the human operators who do not know how to use them. I submit the following Wall Street Journal article which discusses this question.

Under Public Pressure, Chemical Firms Push Plant Safety Programs

(By Barry Meier)

LINDEN, N.J.—When American Cyanamid Co. held worker training classes at its plant here last year, employees often missed them.

Not this year. Officials are blocking out time for classes and telling workers to be there, "A lot more people are on my back to make sure I follow up," says Anthony Saccone, a maintenance supervisor.

After four recent accidents, including one that spread a cloud of malathion insecticide and hospitalized scores of area residents, state officials stepped in. They demanded that, for the first time, independent experts inspect the plant and recommend safety improvements.

American Cyanamid also conducted a rare, two-month study of the plant. And the drug and chemicals company didn't like what it found. Workers were often ill-trained. Broken instruments sometimes weren't fixed. Factory officials hadn't planned for potential dangers. "We came up with a lot of shortfalls in the way we were doing things," says Jeremy B. Halladay, the recently appointed plant manager.

MOUNTING CONCERN

Public concern over chemical-plant safety has been mounting, spurred by the poison-gas disaster at a Union Carbide plant in India that killed more than 2,000 people last December and an accident at one of Carbide's West Virginia plants that injured scores last August despite $5 million of recent safety measures there. A report commissioned by the Federal Environmental Protection Agency shows that 135 people were killed and about 1,500 injured in some 7,000 accidents over the past five years at chemical production and storage facilities in several states.

Battered by bad publicity and facing growing regulatory pressure, the companies are taking a fresh look at plant hazards. They are reducing stockpiles of dangerous chemicals, installing sophisticated equipment to detect escaping chemicals and working with local officials to develop evacuation plans for nearby residents.

Yet, throughout the industry, major safety concerns remain.

"What chemical companies do about safety problems always lags behind what they know they can do," says Ian Swift, the research director at Fike Metal Products Corp., a producer of plant-safety equipment in Blue Springs, Mo.

MANY SYSTEMS TOO SMALL

Industry-sponsored studies by the American Institute of Chemical Engineers in the late 1970s confirmed, for example, that many safety systems were too small to neutralize large chemical leaks, says Mr. Swift, who headed the study. In addition, the quality of valves and other basic parts vital to safety seems to be declining, and the growing role of cost-conscious purchasing managers in choosing equipment may be cutting quality.

In its time, the American Cyanamid plant here has fallen victim to such ills. For 70 years, it has sat on the Arthur Kill waterway separating New Jersey and New York City's Staten Island, and on a clear day the towers of Manhattan's World Trade Center loom in the distance. Miles of pipeline snake around the 30-acre site. Giant vats and kettles violently brew compounds in reactions creating new substances. More than 300 different chemicals may be kept here on a given day. A stream of trains and trucks hauls away insecticides as well as chemicals for making detergents, mining supplies, tires and other products.

Regulators acknowledge that American Cyanamid operated this plant without a major accident for more than a decade. But on the first Saturday of October 1984, the company's luck ran out. Salt water from the cooling system leaked through pipes into a storage tank holding 12,000 gallons of malathion. A runaway reaction ensued. Heat and pressure building up within the tank went undetected for lack of an automatic alarm, and the skeleton crew on weekend duty didn't check the tank's temperature, Mr. Halladay says.

SERIOUS ACCIDENT

Malathion gas erupted with explosive force and spread an amber cloud of insecticide for 20 miles. Over 20 crew members on nearby tankers felt a burning sensation in their eyes and skin. More than 140 people sought hospital treatment for nausea, breathing difficulties and other symptoms. "I can't remember an incident in this area as serious as the malathion leak," says Richard J. Hills, an air-pollution official with the Middlesex County (N.J.) Department of Health.

Then, equipment or instrument failures caused three less serious accidents here last January, triggering the state call for an outside investigation. (An independent safety review of a Du Pont Co. plant here also is underway following two chemical leaks last year, including one that sickened 40 workers on a nearby bridge.)

But American Cyanamid, which agreed to the state's action, is trying to clean up its act before the investigators make their report. Workers interviewed during the company's own two-month study showed, for example, that past training methods gave factory personnel little information about how chemical reactions occur. As a result, workers couldn't always detect a contaminated process, such as when the salt water mixed with the malathion.

"The 'what's really happening' part of training wasn't taking place," says John V. Carnall, a company safety manager.

Under a new program, workers will get 10 hours of additional classroom training, including courses in basic chemistry to help them better understand plant processes. A $20,000 control-panel simulator is on order to help plant operators learn to identify dangerous conditions promptly. Plant officials also are drafting new guidelines to ensure that workers are trained for new assignments.

Equipment and maintenance procedures also are changing. After the malathion leak, a multipoint temperature sensor and alarm system replaced the single thermometer at the bottom of the tank that leaked. The new device measures heat throughout the tank.

In the past, maintenance checks were often noted on slips of paper kept in production supervisors' shirt pockets. Now, plant officials are installing a computer to organize such records. The goal is to develop a new preventive-maintenance plan and increase accountability, Mr. Halladay, the plant manager, says.

In addition, production has been slowed. Under an agreement with state officials after the malathion leak, process temperatures in that unit were lowered 20 degrees to 120 degrees Fahrenheit, says Richard B. Tabakin, the manager of technical services. The cooler malathion takes longer to heat to a runaway reaction. But because many chemical reactions go faster with greater heat, the temperature drop cut the malthion production rate 18%, Mr. Tabakin says.

Safety reviews also have been stepped up. Such "what if" accident planning now will take place every two years rather than every five. The reviews are also likely to be more intensive, Mr. Halladay says. In the malathion case, for example, plant officials had never analyzed what would happen if salt water entered the storage tank. "It would be fair to say we were complacent," Mr. Halladay adds.

Meanwhile, Boston-based Stone & Webster Engineering Corp. is carrying out the independent inspection demanded by the state. Though Stone & Webster officials decline to be interviewed, public filings show that their investigation focuses on how American Cyanamid processes, handles and stores malathion and nine other dangerous chemicals.

RELIANCE ON WORKERS

In a preliminary report, the consulting firm's investigators said they believe that the plant is well maintained. However, they added that because many of its operations are controlled by workers rather than computers, "the skill and knowledge of the operators . . . is essential for proper operation." American Cyanamid says the survey is costing more than $200,000.

Nonetheless, chemical companies such as American Cyanamid are only beginning to grapple with studies questioning the adequacy of plant safety systems. For example, emergency systems on chemical-plant tanks traditionally have been designed to neutralize only escaping gases. But industry-supported studies by the American Institute of Chemical Engineers confirmed that chemcial liquids also escape from tanks in runaway reactions.

"It's like opening a champagne bottle," says Mr. Swift, the safety expert. Because larger control units are needed to neutralize a liquid-gas mixture, industry researchers concluded that some safety systems may be 10 times too small and easily overwhelmed during an accident, he adds.

POOR EQUIPMENT

Chemical-company officials also say an increasing number of such basic plant units as valves are failing to meet specifications. In a paper presented at a recent meeting of the American Petroleum Institute, H. Curt Ball, and Exxon Corp. engineer, said problem valves are "widespread in the chemical and [oil] industries." Recent Du Pont tests showed that up to 30% of new valves delivered to the company were defective.

Substandard valves have caused several accidents at Du Pont facilities in recent years, according to James B. Arant, a company engineering consultant. Mr. Arant says cost cutting by economically strapped valve producers has probably caused the problem. "This business of quality is like a roller coaster, and the perception is that we are stuck on the bottom," he adds.

Chemical companies' own moves to cut costs by switching more equipment-buying decisions to purchasing agents from engineers are also raising concern. "The single most hazardous part of the chemical industry is the purchasing agent. They don't have any idea how to judge quality," says Jay A. Young, a chemical-industry safety consultant in Silver Spring, Md.

The switchover affects more than safety. Some years ago, for example, purchasing agents used by Union Carbide to buy boiler equipment for one of its Puerto Rican facilities ordered liquid-level measuring devices other than those specified, a company engineer says. Soon after installation, the devices caused and equipment breakdown and about $1 million in damages, he adds.

At the American Cyanamid plant here, officials say they have already spent about $250,000 of a $2 million budget to fix the plant's problems. They expect a better notion of the final price tag when Stone & Webster issues its report, probably by year-end. Under the agreement with the state, the company is required to adopt any recommended changes unless it presents acceptable alternatives.

Local regulatory officials aren't expecting miracles, but they hope the work here serves as model of one way to make a chemical plant safer.

"Short of God, there isn't any way to prevent accidents," says Mr. Hill, the health official. "But if you've had four accidents in a year and you can cut that down to two, you've done a lot."

GODOY CALLS FOR NATIONAL UNITY

HON. ROBERT J. LAGOMARSINO

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, November 12, 1985

Mr. LAGOMARSINO. Mr. Speaker, 2 days before Daniel Ortega announced sweeping new repressive measures in Nicaragua, a leading opposition figure made a dramatic appeal for national unity and dialog among all Nicaraguans. The statements made by Independent Liberal Party leader Virgilio Godoy were intended for publication in the Nicaraguan newspaper La Prensa, but were censored by the Sandinistas which prevented the story from being printed.

I urge my colleagues to read the story which the Nicaraguan people were not allowed to read.

INDEPENDENT LIBERAL PARTY MEETS IN ESTELI

Overcoming the fear existing among the people of La Trinidad, Department of Esteli, the Independent Liberal Party [PLI] held a great municipal assembly in that city, which last 1 August was the scene of large-scale warlike incidents, which according to official figures caused a total of more than 100 casualties.

Members of the national leadership arrived early on the morning of Sunday, 13 October, headed by Dr. Virgilio Godoy Reyes, who made a dramatic and patriotic appeal once more for national unity as a step prior to a dialogue among all Nicaraguans. He said: "We must stop this fratricidal war, it is definite that we must resolve the underlying problems that assail us. Indeed, the present is black but if we do not do something to try to change this tragic and gloomy picture, the future will be gray.

"A worthy and self-sacrificing effort is necessary, which has already been done generously by democratic groups and forces supported by all the people in 1978 and beginning of 1979, and which culminated with the government program written in San Jose 6 years ago," said national leader Dr. Godoy Reyes. He added: "Unfortunately, from that time until now, the political parties have been cornered in an attempt to make them disappear, threatened with the loss of the legal status they had won because of their refusal to submit, retreat or officially collaborate or coexist."

Throughout the interesting political speech by the esteemed and well-known president of the PLI, among other things, he said: "No one is personally safe today, and much less of the future of his house, property, companies, and so forth. We no longer produce what we eat. Nicaragua had never in its history purchased basic grains; the cordoba of 6 years ago is now worth 100 times less. Every child, before it is born, has a minimum debt of a million cordobas. We have a foreign debt which exceeds $5 billion

and in order to bring our priority requirements up to date, there is a negative balance of $1.2 billion." In conclusion, national leader Dr. Godoy said: "Because of a lack of foresight or technical capability the only two projects of domestic economic salvation implemented left us with astronomical losses. The new Victoria de Julio mill produces sugar at 30 centavos per pound and exports it at 4 centavos. The Chiltepe Project will process milk at a cost of more than 1,000 cordobas per liter."

If we are honest, we must admit that the cause of all this is noncompliance with the promise made in San Jose. Nations, like individuals, should honor their signatures, commented the members of the August meeting.

ROBERT STAPP

HON. PATRICIA SCHROEDER

OF COLORADO

IN THE HOUSE OF REPRESENTATIVES

Tuesday, November 12, 1985

Mrs. SCHROEDER. Mr. Speaker, Bob Stapp, a former aid to Congressmen Byron Rogers and Roy McVickers, Denver newspaper reporter, and Stapleton Airport public affairs director, died earlier this month.

Stapp will go down in history on many achievements, but one that stands out was his deflation of a Colorado politician by an outrageous device. He quoted him accurately.

Gene Amole in the Rockey Mountain News and Tom Gavin in the Denver Post wrote fondly of their good friend Bob Stapp.

[From The Rocky Mountain News. Nov. 3, 1985]

REMEMBERING A SUPERB WRITER

(By Gene Amole)

Anarchy.

When Ben Bezoff learned he had cancer in 1978, Bob Stapp and I began to have lunch with him every week or so to help keep up his spirits. We'd meet at the Golden Ox, spend a couple of hours eating, talking, and having a few.

After Ben died, we were two.

Bob and I kept the tradition. It had a lot to do with our affection for Ben. But of course we had always enjoyed each other. Have you noticed that as you grow older how difficult it is to find people you can really talk to?

Maureen Stapp, Bob's wife of 44 years, called Friday to tell me he had died the night before of a heart attack. He was 71. She was grateful there was no suffering.

Now we are one.

What a superb writer he was! As a reporter for The Denver Post and the Rocky Mountain News, Bob crafted some of the sharpest, funniest satire any one has ever done in this or any other town.

He was particularly deft at deflating puffed politicos. Bob caused the defeat of a powerful Colorado congressman simply by accurately quoting him in a story for the News. Bob put in every pause, every stumble, each snortle and every incomplete sentence the old boy uttered in a speech.

Of government in general, Bob once asked Charlie Roos, "Over the years everybody has badmouthed anarchy, but have we really given it a chance?"

The circumstances of Bob's resignation from the Post are worth remembering. After promising him he would cover the Democratic National Convention, Post management decided at the last minute to send the son of the publisher instead.

Angry and hurt, Bob told City Editor Will Haselbush he was quitting and stalked out of the newsroom. Not wanting to lose one of his most talented writers, Haselbush sent another reporter, Thor Severson, to Bob's house to try to talk him into coming back.

Bob was still in a rage when Severson arrived. They went to the kitchen to talk. The more Bob thought about it, the angrier he got. It wasn't long before Severson became as furious at the injustice as Bob. An hour later, Severson picked up the telephone, called the city desk and also quit.

After leaving "the newspaper game," as Bob called it, he wrote a novel, "A More Perfect Union," and worked in Washington as an administrative assistant to Congressmen Roy McVicker and Byron Rogers. He was director of information at Stapleton International Airport and a political confidante and strategist for former Denver Mayor William McNichols.

For the record, his name was Robert R. Stapp. But the name for which the middle initial stood was not. He hated it and never told anyone what it was.

Memorial services will be held 11 a.m. Monday at the Church of the Risen Christ, 3090 S. Monaco Parkway.

Quote courtesy Tom Gavin: "I have been trying to live down my newspaper record for 20 years, but somebody always dredges it up again. Actually, it wasn't even my fault in the first place. Because I grew up in a poor neighborhood, it was natural I would drift into petty crime and then into the newspaper business."—Bob Stapp.

[From The Denver Post, Nov. 3, 1985]

HIS DROLLERY LIVES AFTER HIM

(By Tom Gavin)

Bob Stapp dead? Nah. People like Bob Stapp don't die.

Oh, he is dead all right. Gone. Shuffled off this mortal coil. Gone to glory. Clasped in the arms of Jesus. Choose your own euphemism.

Robert R. Stapp. Former newspaperman. Former congressional aide. Former PR man for Stapleton International Airport. Dead at 71 of an apparent heart attack.

He's not dead for me, though, and never will be. Someone said we never die so long as we are remembered and, whew, I'd hate to think how many people have lively memories of this jasper.

No, make that laughing memories.

Say the word "Stapp" to an acquaintance of Bob Stapp and probably that person will smile. And then grin. And then laugh aloud as recall of some drollery works its way clear of the memory bank and breaks into the open.

The last time I saw him he announced at lunch that he'd been dieting and that he'd lost 11 pounds and a ring from his finger and went right into an entirely different conversational line. With Stapp you had to pay attention. You also had to keep your left up and your chin tucked in to keep from being tagged, for, like a lot of my friends, now that I think of it, he could pink you with a little personal thrust, too, and never change expression then, either.

ALL IN OUR PLACES

I'll be at Bob Stapp's memorial service at 11 a.m. Monday at the Church of the Risen Christ, 3090 S. Monaco. You bet. If there's one thing I like it's a good laugh.

Sounds dreadful, doesn't it? Yeah. Excuse me. But, listen, most of my friends are newspapermen and they are a peculiar bunch. They are seldom solemn at funerals. They whisper wry, puckish things to one another, usually about the dear departed, while in the church proper, and, once outside, say pretty much the same things aloud. There are chortles and laughs. It is most unseemly.

It's also healthy, I think, for tears and chuckles are never far apart in this life, are they? Does it hurt? Only when I laugh.

I didn't bring you here to talk about friends who make you smile, though. Probably you've got your own set. What I wish to do is share a few of the remarks of Robert R. Stapp, recorded here and there over the years.

LIKE THESE

As a candidate for mayor in 1959: "My campaign has contributed something to the moral of the people. it's been a source of limitless merriment. I feel there is now greater solidarity among the citizens than at any time since Pearl Harbor. Everyone's against me."

Addressing a meeting of newspaper editors: "it is a high honor to be here with you molders of public opinion. I must say you've done a wonderful job. I doubt if public opinion has ever been as moldy as it is today."

Addressing his own Stapleton retirement party: "I see some of my ex-colleagues here from my old newspaper days. These people are implacable. I've retired four or five times since then, but I can see they're going to hound me to my grave. I've been trying to live down my newspaper record for 20 years, but somebody always dredges it up. And acutally it wasn't even my fault in the first place, because I grew up in a poor neighborhood and it was natural that I would drift into petty crime and then into the newspaper business."

Miss him? Yes. A lot. But he is not dead. Forget that "dead" business.

Bob Stapp may live forever.

FOREIGN AGENTS COMPULSORY ETHICS IN TRADE ACT OF 1985

HON. HOWARD WOLPE

OF MICHIGAN

IN THE HOUSE OF REPRESENTATIVES

Tuesday, November 12, 1985

Mr. WOLPE. Mr. Speaker, at a time when our Nation is struggling with a whole range of trade problems that demand our immediate attention, it is deeply troubling to find that many of our former top-level Government officials are on the payrolls of foreign governments and foreign corporations. People who have had the privilege to serve at the highest levels of our Government have chosen to use the status, insider's knowledge and special access they acquired in office on behalf of foreign interests.

William Eberle, a former U.S. Trade Representative, has represented Japan. Clark Clifford, our former Secretary of Defense, has represented the Mexican Foreign Ministry and Australian business interests. William Colby, former Director of the Central

Intelligence Agency, has worked on behalf of Japan and Singapore.

And what is even more troubling is that this activity is not only permitted by current law, but reaches far beyond these few names. This list is just the tip of a very dangerous iceberg. What happened is that the American Government has become a finishing school for highly paid lobbyists for foreign interests. And in the process, the integrity of a host of Federal agencies has been compromised—and a shadow has been cast over the administration of all programs and activities that affect international trade.

We need to understand clearly how serious this problem is.

STATUS

These top-level American officials bring enormous prestige acquired from their former governmental positions.

INSIDER'S KNOWLEDGE

People who have served in these key positions have a unique understanding of the workings of our bureaucracy and political institutions.

ACCESS

Their past Government positions give these people special access to power and the "right people" both in Government and the media.

It is no wonder that high-ranking American officials are so sought after by foreign interests.

As Joel Lisker, former chief of the Justice Department's foreign agents unit has noted:

By hiring the elite lobbyists, foreign governments can manipulate the Administration and Congress to act against our own national interests. If not against our national security, against our economic health, with the current trade imbalance as the best example.

But it is not only that foreign interests gain a manipulative advantage by hiring former officials. What is also at stake is the integrity and effectiveness of those agencies and institutions that are charged with the responsibility of protecting American interests. How, for example, can we be confident that our trade representative is negotiating aggressively on behalf of America's interests when he may well have his eye on lucrative future employment opportunities with those on the other side of the table? And this is not an idle concern. We know of at least one instance in which a former member of the ITC admitted to negotiating his own employment contract with a foreign interest while still on the Federal payroll.

Moreover, many trade officials have expressed concern about the rapid rate of staff turnover that is encouraged by these lucrative foreign opportunities. Clearly, this trend threatens our ability to effectively promote American interests.

We think that the American people deserve better. We think it is simply wrong that former top-level American officials should be for sale to the highest foreign bidder. The purpose of the legislation I am introducing with Representative KAPTUR is to end this practice. Our bill, the Foreign Agents Compulsory Ethics in Trade Act, has one simple objective: To ensure the effectiveness and integrity of our national institutions by prohibiting any top-level official from representing or advising a foreign interest for at least 10 years after leaving Government service.

This is only a beginning. This legislation is the bare minimum that must be done to protect our national interest. We are also requesting a study from the General Accounting Office to examine this problem in greater depth and to report back to us within 6 months with their findings and recommendations for additional steps that may be required.

Let me just add one final note. No one is asserting that our legislation is a cure-all for our trade woes. What we are facing is a terribly complex and long-term problem—and certainly we are all aware of this. But any solution will require the most aggressive advocacy of American interests—and it is to insure this kind of advocacy that Congresswoman KAPTUR and I are today introducing the Foreign Agents Compulsory Ethics In Trade Act of 1985 [FACE IT].

A summary of our legislation follows and we invite our colleagues to join us as cosponsors:

[Summary]

FOREIGN AGENTS COMPULSORY ETHICS IN TRADE ACT OF 1985 [FACE IT]

The bill has one principal objective:

To prohibit any former high-level Federal employee or high-ranking officer of a uniformed service from representing or advising a foreign principal for a period of at least ten years after leaving Government service.

I. RESTRICTIONS ON ACTIVITIES

Establishes a ten year period during which any former high-level Federal employee or high-ranking officer of a uniformed service is prohibited from representing or advising a foreign principal in connection with any transaction with the United States Government;

Invests the Secretary of State and the Secretary of Commerce with the authority to extend this prohibition if they jointly determine that a longer period is in the interest of our national security;

Sets penalties at a fine of not more than $250,000 or imprisonment of not more than two years, or both;

II. DEFINITIONS

A "foreign principal" includes the government of a foreign country, a foreign political party, any foreign business or economic entity—as defined in the U.S. Code provision requiring registration of foreign propagandists;

A "high-level Federal employee" includes the top 25 advisors of the President, the top 5 advisors to the Vice-President, all Cabinet Members, and other key officials in Executive Agencies, Departments and Independent Establishments;

"High-ranking officer of a uniformed service" means a general officer or flag officer—those at the rank of general, lieutenant general, major general or brigadier general and those at the rank of admiral, vice admiral, real admiral or commodore;

III. EFFECTIVE DATE

This legislation is not retroactive and will only affect individuals who are in a high-level position at the time of enactment or who accept such a position after that date.

H.R. 3733

A bill to amend chapter 11 to title 18, United States Code, to prohibit any former high-level Federal civilian officer or employee or high-ranking officer of a uniformed service from representing or advising a foreign principal for a period of at least 10 years after leaving Government service

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SECTION 1. SHORT TITLE.

This Act may be cited as the "Foreign Agents Compulsory Ethics in Trade Act of 1985".

SEC. 2. CRIMINAL PENALTY FOR FORMER HIGH-LEVEL FEDERAL CIVILIAN OFFICER OR EMPLOYEE OR HIGH-RANKING OFFICER OF A UNIFORMED SERVICE WHO REPRESENTS OR ADVISES A FOREIGN PRINCIPAL.

(a) IN GENERAL.—Chapter 11 of title 18, United States Code, is amended by inserting after section 224 the following new section:

"§ 225. Former high-level Federal civilian officer or employee or high-ranking officer of a uniformed service representing a foreign principal

"(a)(1) Any person who is employed as a high-level Federal civilian officer or employee, or serves as a high-ranking officer of a uniformed service, shall not (during the applicable period under paragraph (2) of this subsection), in connection with any transaction with the United States Government, act as an agent or attorney for or othewise represent or advise—

"(A) a government of a foreign country or a foreign political party;

"(B) a person outside of the United States, unless it is established that such person is an individual and a citizen of and domiciled within the United States, or that such person is not an individual and is organized under or created by the laws of the United States or of any State or other place subject to the jurisdiction of the United States and has its principal place of business within the United States; or

"(C) a partnership, association, corporation, organization, or other combination of persons organized under the laws of or having its principal place of business in a foreign country.

"(2) The period referred to in paragraph (1) of this subsection is the 10-year period beginning on the last day of the employment or service involved, or such longer period beginning on that day as the Secretary of State and the Secretary of Commerce may jointly determine to be in the interest of national security.

"(b) Whoever violates subsection (a) of this section shall be fined not more than $250,000 or imprisoned not more than two years, or both.

"(c) As used in this section, the term—

"(1) 'high-level federal officer or employee' means an individual who—

"(A) is appointed by the President under section 105(a)(2)(A) of title 3, United States Code;

"(B) is appointed by the Vice President under section 106(a)(1)(A) of title 3, United States Code;

"(C) serves in a position in level I, level II, level III, or level IV of the Executive Schedule (under section 5312, section 5313, section 5314, or section 5315 of title 5, United States Code, respectively); or

"(D) serves in any of the following positions in level V of the Executive Schedule (under section 5316 of title 5, United States Code): Administrator, Agricultural Marketing Service, Department of Agriculture; Administrator, Agricultural Research Service Department of Agriculture; Administrator, Agricultural Stabilization and Conservation Service, Department of Agriculture; Administrator, Foreign Agricultural Service, Department of Agriculture; Associate Administrators, National Aeronautics and Space Administration (7); Associate Deputy Administrator, National Aeronautics and Space Administration; Deputy Associate Administrator, National Aeronautics and Space Administration; Assistant and Science Adviser to the Secretary of the Interior; Chairman, Foreign Claims Settlement Commission of the United States, Department of Justice; Chairman of the Military Liaison Committee to the Atomic Energy Commission, Department of Defense; Chief Counsel for the Internal Revenue Service, Department of the Treasury; Commissioner of Customs, Department of the Treasury; Commissioner, Federal Supply Service, General Services Administration; Director, United States Fish and Wildlife Service, Department of the Interior; Commissioner of Food and Drugs, Department of Health and Human Services; Commissioner of Patents, Department of Commerce; Director, Advanced Research Projects Agency, Department of Defense; Director, Bureau of Mines, Department of the Interior; Director, Geological Survey, Department of the Interior; Director, National Bureau of Standards, Department of Commerce; Director of Science and Education, Department of Agriculture; Deputy Commissioner of Internal Revenue, Department of the Treasury; Assistant Directors, National Science Foundation (4); Deputy Director, Policy and Plans, United States Information Agency; Deputy General Counsel, Department of Defense; Assistants to the Director of the Federal Bureau of Investigation, Department of Justice (2); Assistant Directors, United States Arms Control and Disarmament Agency (4); Fiscal Assistant Secretary of the Treasury; General Counsel of the Agency for International Development; General Counsel of the Department of the Air Force; General Counsel of the Department of the Army; General Counsel of the Nuclear Regulatory Commission; General Counsel of the Department of the Navy; General Counsel of the United States Arms Control and Disarmament Agency; General Counsel of the National Aeronautics and Space Administration; Deputy Under Secretaries of Defense for Research and Engineering, Department of Defense (4); Director, United States Travel Service, Department of Commerce; Associate Director (Policy and Plans), United States Information Agency; Deputy Director, National Security Agency; Director, Bureau of Land Management, Department of the Interior; National Export Expansion Coordinator, Department of Commerce; Special Assistant to the Secretary of Defense; Director, Bureau of Narcotics and Dangerous Drugs, Department of Justice; Inspector General, Agency for International Development; Vice Presidents, Overseas Private Investment Corporation (3); Deputy Inspector General, Department of Energy; additional officers, Department of Energy (14); General Counsel, Commodity Futures Trading Commission; Administrator, Animal and Plant Health Inspection Service, Department of Agriculture; Administrator, Federal Grain Inspection Service, Department of Agriculture; additional officers, Nuclear Regulatory Commission (5); Executive Director, Commodity Futures Trading Commission; and additional officers, Office of Management and Budget (6);

"(2) 'high-ranking officer of a uniformed service' means a general officer or a flag officer, or an officer of a uniformed service (other than a service of the armed forces) who serves on active duty in a grade equivalent to a general officer grade or a flag officer grade;

"(3) 'general officer' means an officer of the Army, Air Force, or Marine Corps who serves on active duty in the grade of general, lieutenant general, major general, or brigadier general;

"(4) 'flag officer' means an officer of the Navy or Coast Guard who serves on active duty in the grade of admiral, vice admiral, rear admiral, rear admiral (lower half), or commodore; and

"(5) 'armed forces' has the meaning given that term in section 2101 of title 5, United States Code.".

(b) TECHNICAL AMENDMENT.—The table of sections for chapter 11 of title 18, United States Code, is amended by inserting after the term relating to section 224 the following new item:

"225. Former high-level Federal civilian officer or employee or high-ranking officer of a uniformed service representing a foreign principal.".

SEC. 3. EFFECTIVE DATE.

The amendments made by section 2 shall apply to employment or service performed after the date of the enactment of this Act.

GUATEMALA'S ELECTIONS

HON. ROBERT GARCIA

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Tuesday, November 12, 1985

Mr. GARCIA. Mr. Speaker, an article in the November 11 edition of the New York Times discusses the recent Guatemalan elections. Whether or not those elections will mark a turning point in Guatemalan history remains to be seen. Much depends on the ability of the new Government, whomever leads it, to turn around Guatemala's economic crisis. In addition, ever present in the shadows is the Guatemalan military, waiting to take over at the first misstep by the civilian government. It is too early to predict Guatemala's future, but it is, nonetheless, important that we remain informed of democracy's progress. I am, therefore submitting for the RECORD the Times article on Guatemala.

AFTER 30 YEARS DEMOCRACY GETS A CHANCE IN GUATEMALA

(By Stephen Kinzer)

GUATEMALA—Only five years ago, Marco Vinicio Cerezo Arevalo was a virtual prisoner in his home. Death squads believed to be linked with Government security forces had repeatedly tried to assassinate him, and it was widely assumed that he was high on their hit list. They had killed the country's two most promising politicians, Alberto Fuentes Mohr, a former Foreign Minister, and Manual Colom Argueta, who had been Mayor of Guatemala City. Mr. Cerezo's home was surrounded by armed guards. "If I step outside my front door," he once said, "I'll be killed before I get to the corner."

But Mr. Cerezo survived the violence during the Government of Gen. Fernando Romeo Lucas García. As terrorism against politicians diminished, he set to work rebuilding the Christian Democratic Party. Last Sunday, running as its presidential candidate, he got 39 percent of the vote in an eight-man field—nearly twice as many votes as his nearest rival, Jorge Carpio Nicolle of the National Union of the Center. In the runoff on Dec. 8, many Guatemalans believe, Mr. Cerezo's victory over Mr. Carpio is all but certain.

After Mr. Cerezo's impressive showing, words like "historic" and "profound" cropped up in conversations and newspaper columns. Guatemala has lived under the dominance of military officers and a tiny elite of wealthy landowners for more than 30 years. Mr. Cerezo promised to destroy that partnership and bring democracy to his long-suffering countrymen. "The voters," he said, "have chosen us to bring deep social and economic change to Guatemala."

Mr. Carpio, a wealthy businessman and newspaper publisher, calls Mr. Cerezo a leftist, and argues that the voters will reject the Christian Democrats when they learn more about the party's ideology. But Alfonso Cabrera Hidalgo, a principal Cerezo adviser, contends that the election was "an irreversible demonstration that Guatemalans want fundamental change."

Mr. Cabrera's view was widely shared here last week. Recent studies have shown that Guatemala has Latin America's most unequal structure of land ownership and income distribution. In the last year, Guatemala's currency lost more than half its value and unemployment reached 40 percent. "In Guatemala we have passed from poverty to misery, and we have fallen into a pit of crisis and desperation," said Mario David Garcia, one of the losing presidential candidates.

Besides the acute economic problems, the civilian Government will face the equality daunting task of forcing the military to surrender political and economic power. The change, all acknowledge, cannot be abrupt. Mr. Cerezo has conceded that the new president will have to choose a defense minister from among senior officers acceptable to the high command. Asked if the military would readily give up authority, he replied, "We do not believe in magic."

Said Oscar Marroquin Rojas, a newspaper publisher and veteran political columnist: "What happened Sunday was transcendental for our people. Without a doubt, it was the most important national election in our recent history. But I would advise Vinicio Cerezo to move slowly in his social reforms. There are very powerful people in this country who will move heaven and earth to prevent land reform, tax reform and other changes that the nation is demanding."

As if these dangers were not enough, Mr. Cerezo was reminded last week that there are other factors that could destabilize the civilian government which is to assume power in January. Relatives of people who disappeared during military rule staged a sit-in at the Metropolitan Cathedral in the capital and demanded an audience with Mr. Cerezo. They called for full investigations of past human rights abuses and trials of these responsible, a demand that military leaders find troubling, to say the least. In addition, a low-level guerrilla insurgency is continuing in several parts of the country. The

army may be displeased if the new president opens talks with Marxist insurgents.

By surrendering the presidency to civilians, however, the military is defusing a situation that was becoming explosive. "If the military had stayed in power, they would have provoked a state of war," Mr. Cerezo asserted. He hopes to attract desperately needed foreign aid by changing Guatemala's reputation as a feudal state where terrorists rampage freely. But some analysts here believe the elements of the military will strike against a civilian regime if their institutional power or personal status seem threatened. The former military leader, Gen. Lucas Garcia, and his brother and former army chief of staff, Benedicto, for example, are living on an estate in the highlands, appearing to challenge anyone who might seek to take legal action against them for past abuses.

One night recently, Mr. Cerezo was entering a hotel in the capital and passed through a metal detector at the door. As the detector started to beep loudly, an attendant jumped to his feet. But upon recognizing the Christian Democratic leader, he waved the dignitary through. It is still considered quite understandable that Mr. Cerezo carries a pistol in his belt.

A SALUTE TO WILLIAM BURRUS

HON. LOUIS STOKES

OF OHIO

IN THE HOUSE OF REPRESENTATIVES

Tuesday, November 12, 1985

Mr. STOKES. Mr. Speaker, I would like to take this opportunity to join with the Cleveland Chapter of the American Postal Workers Union [APWU] in saluting Mr. William Burrus—the national executive vice president of the Union. Mr. Burrus will be honored on November 23, 1985 at a testimonial dinner in Cleveland. On behalf of the residents of the 21st Congressional District of Ohio, I salute Bill Burrus on this auspicious occasion.

Bill Burrus was elected executive vice president of the American Postal Workers Union in November 1980. On that day, he made history as the first black man to be elected to such a high position with the American Postal Workers Union.

Those of us from Cleveland, point to Bill Burrus' achievement with special pride. Prior to his election to the national post, Burrus was the president of the Cleveland area local union for 6 years. He has a long history of involvement and achievement with the American Postal Workers Union. During that time, he earned the respect and admiration of his colleagues. At this time, Mr. Speaker, I would like to share some information on the honoree with my colleagues.

Bill Burrus first assumed a position with the U.S. Postal Service in Cleveland in 1958 as a distribution clerk. He became active with the American Postal Workers Union shortly after entering the postal service as a clerk in Cleveland. In 1971, William Burrus was elected director of research and education of the Ohio State APWU. He was also appointed to the national human relations committee.

In 1978, Bill Burrus was elected chairman of the APWU Local President's Conference. He was appointed regional representative for the maintenance craft in 1980.

As a result of his career with the postal service and the union, Mr. Burrus is regarded as a strong advocate of rights of postal employees. He also has been a key spokesman for the union in the 1981 and 1984 negotiations with the U.S. Postal Service. Moreover, he is regarded as the union's "point man" in addressing national labor-management issues.

In addition to his work with the American Postal Service Union, Burrus has served as a delegate to the Cleveland AFL-CIO for 7 years. In 1980, Burrus became a member of the Ohio Advisory Board of the U.S. Civil Rights Commission. Four years later, he won election to the National Board of the A. Philip Randolph Institute. In the midst of this activism with the union, William Burrus found the time to author several instructional books on labor representation and negotiation. Additionally, he has been the subject of articles in Business Week, Jet, Black Enterprise, and Who's Who in Black America.

As a result of his involvement, Mr. Burrus has been the recipient of numerous awards. Earlier this year, he was the winner of the A. Philip Randolph Achievement Award. This coveted honor is bestowed each year to a black person in the field of organized labor who has been outstanding.

At this time, Mr. Speaker, I would like to join with my friends with the Cleveland local union of the American Postal Workers Union in saluting a former Cleveland and current vice president of the American Postal Workers Union—Mr. William Burrus.

SECRETARY DOLE'S RECORD ON SAFETY

HON. BUD SHUSTER

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, November 12, 1985

Mr. SHUSTER. Mr. Speaker, Secretary Elizabeth Dole has really made a mark in the area of transportation safety during her tenure at the Department of Transportation. Many Americans can feel safer as they travel as a result of Mrs. Dole's initiatives.

I am putting into the RECORD a speech made by Secretary Dole before the highway users federation for safety and mobility on the issue of truck and bus safety. It describes many of DOT's current activities in achieving greater truck and bus safety. One thing that is obvious in looking at many of these activities is that a joint effort was necessary between the legislative and executive branches to insure their implementation.

For example, Congress passed the Motor Carrier Safety Act of 1984 late last year. Now DOT under Secretary Dole is beginning to implement the provisions of that act. Using that act as a basis, and through continued cooperation with the Congress, Secretary Dole will be able to greatly improve highway safety.

My colleagues and I on the Public Works and Transportation Committee are committed to working for better highway safety. Thus, we will continue to work with Secretary Dole to protect our citizenry who travel on the Nation's highways.

I commend this speech to my colleagues who seek to know what is being done to improve highway safety.

REMARKS PREPARED FOR DELIVERY BY SECRETARY OF TRANSPORTATION ELIZABETH HANFORD DOLE

May I say how much I have looked forward to this occasion. It presents an opportunity to engage you who represent the millions of Americans who use and profit from the nation's highways in a dialogue about the future of those highways—and the commitment of my own Department of Transportation to exert leadership in solving the problems and realizing the potential of these, our nation's lifelines.

The Highway Users Federation continually serves as a strong voice to promote highway safety, preservation and improvement. This group and its leaders have rendered outstanding service in past campaigns to encourage safety belt usage, combat the scourge of drunk drivers, and support a wide range of community-based safety programs. For all the membership of this organization has done, I am grateful. But today, my purpose is to look ahead, to what we must do together in the months to come. I am here to describe several initiatives on which I have been working with John Clements and others from your membership. John is a proven national transportation leader—especially in the area of highways and highway safety—and he was one of the individuals who was most helpful when we worked together to secure a clean "ICE" bill.

The initiatives I want to outline today are designed to make what is the finest system of highways in the world better yet. Most of all, I am here today to offer leadership in enhancing truck safety along four million miles of American roads.

It's been said that a journey of ten thousand miles must begin with a single step. The journey which we must travel together, now and in the months to come, will involve many steps, taken on many fronts. One such step was the introduction of legislation yesterday to designate the week of January 26 as National Truck and Bus Safety Week. I harbor no illusions about the long-range impact of such observances—but I am convinced that they can serve to educate, heighten public awareness, and promote legislative responsibility.

During the final week of September, the Department—in cooperation with the states participating in the Motor Carrier Safety Assistance Program and those member states of the Commercial Vehicle Safety Alliance—conducted a nationwide joint inspection effort of commercial trucks. For the first time, all inspectors—federal and state—used the same inspection procedures and vehicle safety criteria, providing nationwide uniformity, increased efficiency and a greater focus on important safety problems. What we found gives cause for concern. Some 41 percent of all vehicles inspected by state personnel were grounded by serious defects, another 15 percent of all drivers

were put out of service due to improper documentation and log book problems. Such numbers are not final. Even so, they suggest the dimensions of a problem we can hardly ignore.

Meanwhile, there is another serious problem we must address, namely the fact that in 20 of our states, any person who is licensed to drive an automobile can also legally drive a tractor-trailer without first meeting any formal state training, testing or operator licensing requirements. Quite frankly, this is outrageous. It should worry any American who drives or rides as a passenger on the same roads shared with tractor-trailer vehicles.

Nor does this exhaust my concerns. What about the ease with which drivers can obtain multiple licenses and records to match? In fact, we have evidence that some drivers—including truck and bus drivers—may possess licenses in several states at the same time. Why? To hide accidents and traffic violations and avoid state enforcement action, such as license revocation. The National Transportation Safety Board has found that three separate levels of commercial driver screening notwithstanding, states continue to license problem drivers to operate heavy trucks.

Consider the case of the tractor-trailer which struck—from the rear—three parked vehicles. The truck driver had two driver's licenses in his possession: one from Colorado and one from New York. His Colorado license had two violations: one for failing to observe a traffic sign and one for speeding. His license issued from New York was under suspension. The co-driver also had two driver's licenses in her possession: one from the State of Louisiana, containing one speeding violation, and one from Kansas, currently suspended because of no fewer than six moving violations. The truck driver and three other people died in the accident. His co-driver and another person was injured.

In another case, no less tragic, a truck passed a stopped school bus displaying its flashing lights and struck and killed a child, who had just left the bus. The driver of this particular truck carried two licenses: one from Pennsylvania with a record of 10 violations, presently suspended, and another from Virginia, with no record of violations. These are but two examples of what can and does happen when unqualified or unsafe drivers are permitted to travel our highways. These are examples of what you and I must move vigorously to clear from the roads of America—now, before they kill or injure more innocent victims.

The Department has already begun acting to make trucks and buses safer. Recently, I gave the motor carrier safety program within the Federal Highway Administration a stronger internal voice by appointing Dick Landis—for many years a senior Highway Patrol Commander in Arizona's Department of Public Safety—to the newly created position of Associate Administrator for Motor Carriers. Our regional officers around the country will now report directly to Dick, who brings extensive experience in state truck safety issues to this new and vitally important position.

One of Dick's first priorities is to take necessary steps to increase safety enforcement activities at the state and local levels to identify unsafe drivers and vehicles. These day-to-day operations are more efficiently conducted at the community—rather than national—level. We are eager to provide the assistance—through federal funds and training—to local people who are out there every day conducting inspections, officials who are more knowledgeable about the conditions in their own communities, who make sure the work is done and who follow a historic American tradition of state control over state roads.

The states have a crucial role—in administering driver licensing programs, truck safety inspection and enforcement through the Motor Carrier Safety Assistance Program (MCSAP) and, of course, through normal safety activities entrusted to state police. At the same time, the federal government has its work cut out for it if we are to achieve more uniform enforcement nationwide. To Washington falls responsibility for better data collection and safety audits, which in turn can define broad patterns of violation. The federal government must provide the tools to help the states get the job done, such as civil penalty actions against persistent violators and effective federal safety regulations.

Another important tool to bolster state enforcement efforts is SAFETYNET, designed by DOT in 1983. SAFETYNET's data base system will make available to state enforcement agencies the BMCS's motor carrier census, safety ratings and enforcement history. It will also act as a repository for information gathered by the states. That information will be available to computer terminals in state agency offices. Even now, there are four states testing the system. And within this fiscal year, we expect to see funding eligibility for necessary hard and software—with SAFETYNET fully operational in all 50 states within the next three to five years.

In order to strengthen our nationwide truck safety system, the Administration called for a state Motor Carrier Safety Assistance Program as part of the milestone highway legislation of 1982. Rather than building a federal police force, we sought to expand state efforts. Under MCSAP, states that enforce federal or compatible state motor carrier and hazardous materials regulations may be reimbursed for up to 80 percent of the cost of expanding these programs. In turn, BMCS personnel and resources can be redirected to audit problem carriers identified by state terminal and roadside inspections, to train state inspectors and to bring civil enforcement penalties against persistent violators.

Since the program began last year, over 2,100 state inspectors have been trained and an additional 650 inspectors have completed courses in the safe transportation of hazardous materials. We expect to train another 500 state inspectors and 250 more hazardous materials inspectors—for a total of 3,500 new inspectors by the end of September 1986. In short, we're getting results. We are finding out what and where the problems are.

State officials are not just pinpointing the problems; they are fixing them. They are giving federal auditors help in identifying repeat offenders. And I will request a 150 percent increase in funding for the Motor Carrier Safety Assistance Program in fiscal year 1987. I am seeking an authorization of $50 million and will make all of this money available to the states, for I believe the states are now ready to put those funds to work. They have, overall, completed the development of programs and are ready for the more costly implementation stage. Equally important, I am asking that these funds be available on a contract authority basis. This will give MCSAP added stability by assuring multi-year funding. It will give states the assurance they need for long-term planning and hiring.

With this increased funding, starting in 1987 the focus will change from recruiting and training to increasing the states' presence on the highways. This will lead to two million additional roadside inspections and 10,000 safety compliance audits of intrastate motor carrier companies.

And there is a smaller, but extremely important, group of drivers and vehicles—those which carry hazardous materials. I have directed the Federal Highway Administration to step up the emphasis on hazardous materials transportation in its administration of the MCSAP program. While the safety record in this field generally has been excellent, there are no laurels to be rested upon—not while the potential remains for a single disastrous accident.

Fortunately, the Department has already taken a big first step by fostering state enforcement capability with our recent and highly successful State Hazardous Materials Enforcement Development Program. Today, through the efforts of some 25 state participants, we have been able to dedicate resources, guidance, and training support toward enhanced safety and improved enforcement procedures. In the process, states have demonstrated their own capacity to more effectively enforce hazardous materials regulations, achieve a greater sharing of the data needed for enforcement purposes and move closer to regulatory uniformity.

To maintain and hopefully accelerate the momentum generated by this program, I have asked the Research and Special Programs Administration, its original sponsor, to hold a series of four regional workshops early next year. These workshops, held in conjunction with BMCS, will enable federal and state officials responsible for hazardous materials transportation to identify solutions to enforcement, training, routing and emergency response problems.

Meanwhile, I want to make sure we are organized to make the best possible use of newly allocated resources. My Safety Review Task Force, which has released reports on the Federal Aviation and Federal Railroad Administrations, is now reviewing the Federal Highway Administration, with a particular emphasis on motor carrier safety and report back to me on what, if any, further steps need to be taken. I am going to take a hard look at our method of auditing and whom we audit—and if additional resources are required we will use them.

Nor will I wait before tackling the issue of problems bus drivers. The Department is scheduling a series of strategy meetings, also in January, to plan a federal/state inspection of the nation's bus fleet. Those states in MCSAP, as well as those in the Commercial Vehicle Safety Alliance along with BMCS, are targeting the safety of commercial bus operations in an intensified inspection effort of passenger carriers. It will be nationwide in its scope.

To improve the Department's ability to enforce federal motor carrier laws, the Motor Carrier Safety Act of 1984 provided for civil penalties of up to $10,000 for each truck safety violation which could lead to a serious injury or death. Thanks to the leadership of Senator Danforth—a pioneer in motor carrier safety—and Representatives Bud Shuster and Glenn Anderson, Congress wisely provided the Department with this civil penalty authority. And I will not hesitate to use it to get deficient vehicles and negligent drivers off our roads. Already, the Department has begun to assess civil penal-

ties. Such violations are not isolated human errors. Rather they are patterns of equipment violations or operating conduct that any responsible business could detect and correct if it were properly fulfilling its safety responsibility to the public. I am pleased to note that this vital legislation was supported by many in the room today.

Another key element is a comprehensive review of BMCS regulations for trucks and commercial buses. And by mid-1986, I look forward to completion of these regulations, ranging from drivers' hours of service and general driving rules, to parts and accessories requirements, inspection, repair and maintenance of vehicles, safety fitness determinations that will apply to all carriers, and notification and reporting of all accidents. We are also considering more stringent qualifications for those who transport hazardous materials. I assure you this review will have my close scrutiny and I have asked the Chairman of my Safety Review Task Force to personally monitor its progress. It will not be "business as usual."

Just this past September, I proposed new rules to improve the safety of tank trucks that carry hazardous gases and liquids, including gasoline. These rules, which are now in the comment period, would require that a large segment of the nation's fleet of truck cargo tanks be retrofitted with stronger manhole cover assemblies and improved pressure relief valves. This will reduce substantially the risk of fire, major leakage and other hazards in overturn accidents. At the same time, tighter requirements for maintenance, repair and inspection will further improve the quality and safety of cargo tanks. We will move expeditiously, upon the closing of the comment period, to analyze these comments and finalize the rules.

I have spoken to partnerships. Trucking companies also share responsibility for ensuring that their drivers are well trained. Therefore, the Department has just issued a proposed minimum federal standard for training tractor trailer drivers. Unfortunately, there has been no such standard until now. We believe that development of such standards is a major step toward instilling the basic knowledge and skills required to operate these large vehicles safely. And by mid-December, the Government Printing Office will have copies of the model curriculum—which contains a complete, ready to teach, 320-hour course.

The inspection and enforcement programs I have discussed this morning are crucial to our safety effort. They alone will not suffice, not so long as there is an inherent problem in the licensing system in this country. In truth, the state driver licensing systems are the only programs which reach all drivers routinely and, in most states, at regular intervals. These systems stand out for their potential to manage at least somewhat the general driving population, as well as identified problem and impaired drivers.

Currently, 31 states have some form of classified licensing system. Thirty states and the District of Columbia have joined the Driver License Compact, an association of states which have agreed to support the concept of one license and one record for each driver and to provide license records to member states. The compact is a major step forward, but each of us in this room committed to truck safety must tackle this problem. After all, offenses such as drunk or reckless driving, or deaths caused by accidents are no less serious for being committed in some jurisdiction other than the driver's home state.

This abuse signals a crucial need for *all* states to have single and classified licensing systems. This is appropriate as a state responsibility, but the Department and the private sector must join together to educate the public to encourage state governments to enact legislation to implement these systems—now.

Recently, we discussed this problem with representatives of the private sector, including the Highway Users Federation, the American Trucking Associations, the Private Truck Council of America and the Teamsters. I am pleased to report that they all are eager to join our efforts in support of single and classified licensing.

The next step in that process is a big one—development of a national coalition with affiliates in target states. With the resources of my office, and those of the entire Department solidly behind this effort, I call on you here today to join with me in encouraging states to take seriously their responsibility to improve highway safety by acting now to ensure that only qualified drivers operate the nation's trucks and buses, and to guarantee that violators are taken off our highways and no longer permitted to hide behind multiple licenses. We can no longer sit by and allow needless deaths to occur at the hands of drivers who, by any standard, have forfeited their right to sit behind the wheel.

I am delighted that you have agreed to cosponsor, along with the American Association of Motor Vehicle Administrators (AAMVA), a one-day workshop devoted to licensing issues. During the workshop, private and public sector organizations across the board—such as the Department, the National Governors' Association, the National Conference of State Legislatures and trucking groups—will be working to create a more effective driver licensing system and to encourage full participation by the states in the Driver Licensing Compact. For my part, I am writing to every Governor in the nation, informing them of our efforts and urging them to strongly support the adoption of classified driver license systems. In a few days, I will also meet with the Executive Committee of AAMVA to discuss truck safety issues and urge the adoption of single and classified license systems. And I'll be meeting early next month with the Council of State Governments to talk with leaders of state governments to enlist their support in this important effort.

I want to point out that there is one group whose commitment and support to truck safety has been second to none—the trucking industry itself. Just last month, the American Trucking Associations launched an impressive—and comprehensive—driver safety program. I was delighted to welcome ATA's President, Tom Donohue, as a member of our National Motor Carrier Advisory Committee, and I appreciate the opportunity to work with Tom, whose education and determination are unquestioned.

Ladies and gentleman, we have a problem to address. And I want you to know how much I care about this and how dedicated I am to resolving it—with your input and your assistance. How often is it that any of us have the kind of opportunity before us now to make that positive difference for people?

There is no one easy answer to the problem of truck safety, and we can't fix it overnight. But what we do know is that you can't do it alone and we can't do it alone. I welcome your suggestions and ideas and I look forward to the opportunity to work with you. Only together can we comprehensively address the issue of truck safety and make our roads safer for all our citizens. An extensive, combined effort of federal involvement, state enforcement, private sector initiatives and public concern is sure to win results.

Together, we can convey the importance of our message to the users of our highways. From the bottom of my heart, I thank you for your hard work and your commitment. I rely on your support.

Thank you very much.

ORTEGA'S OMINOUS OFFENSIVE

HON. ROBERT J. LAGOMARSINO

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, November 12, 1985

Mr. LAGOMARSINO. Mr. Speaker, the repressive measures adopted by the Sandinista regime in Nicaragua are continuing evidence that further consolidation of that government's power must be opposed. The Democratic Resistance in Nicaragua is attempting to pressure the Sandinistas to moderate their regime and to accept democratic rules for governing. The reality, however, is the Sandinistas refuse to abide by their promises to the Organization of American States made in July 1979 to protect human rights, promote democratic government and economic pluralism.

Cord Meyer describes in a recent commentary in the Washington Times the need for assistance to the Democratic Resistance that is not restricted only to nonlethal purposes.

ORTEGA'S OMINOUS OFFENSIVE

At the cost of alienating many of their sympathizers in the United States and Western Europe, the Sandinista comandantes in Managua have decided that the time has come to intimidate, disorganize, and finally disperse the growing internal opposition to their repressive rule.

In a revealing interview in New York, President Daniel Ortega admitted that his sudden suspension by decree on Oct. 15 of nearly all remaining constitutional rights and freedoms in Nicaragua was based on a determination to avoid the mistakes made by Salvador Allende in Chile in 1973. Complaining that Mr. Allende's extreme respect for "legal forms and juridical niceties" led to the overthrow of his Marxist regime, Mr. Ortega made it clear that he would use whatever force was necessary to prevent the growth of organized, lawful opposition.

In fact, the Sandinista regime is already engaged in a pre-emptive crackdown on every serious challenge to the consolidation of a one-party police state. The few remaining small democratic parties allowed to survive for appearance's sake after last fall's carefully rigged election are being ruthlessly pressured into conformance.

For example, the two principal leaders of the small, surviving Social Christian Party were recently summarily arrested and held for five hours of hostile interrogation by Lenin Cerna, head of the Sandinista security apparatus. After being threatened with physical harm to their children if they did not toe the line, they were let go.

Similarly, Virgilio Godoy, leader of the small Liberal Party, stated recently, "We

cannot get people out of their houses to a rally because we cannot give them a guarantee that nothing will happen to them afterward."

Fearing free-labor demands for wage increases, the Sandinistas have harassed the non-Communist unions, broken their strikes, and threatened their leadership. Even the one surviving bulwark of a free press, *La Prensa*, has been so riddled by continuous censorship that it has become a shadow of its former self.

As Mr. Ortega admitted in his New York interview, the one source of widespread popular opposition to Sandinista rule that has not yet been cowed is the Roman Catholic Church under the courageous leadership of Cardinal Miguel Obando y Bravo. The cardinal ignores government orders to remain in Managua, and wherever he goes, even to the primarily Protestant east coast, huge crowds gather.

The cardinal has taken up the popular cause of opposing the drafting of seminary students and has questioned the right of a one-party dictatorship to draft citizens into an army that is not national but party-dominated. Confiscation of church newspapers, police raids on church offices to seize documents, and denial of the right to broadcast church services are the initial hard-line reactions of the Sandinistas.

As a logical extension of this suppression of democratic liberties, Mr. Ortega has turned to the Soviet bloc not only for weapons and technicians to equip his oversized army, but also for the funds and supplies to keep the civilian economy going.

At a recent meeting in Managua of Comecon, the Soviet bloc's economic organization, new economic commitments to Nicaragua were made by the Soviets, who are prepared to pay a high price for the consolidation of a Marxist regime in a Central American country which offers potential naval bases on both the Atlantic and Pacific Oceans.

In the shadow of this pre-emptive destruction of what remains of democratic rights in Nicaragua, the decision of the U.S. Congress last June to restrict the Nicaraguan guerrillas to only $27 million of humanitarian and non-lethal assistance seems in retrospect to have been naive in the extreme.

As Alfonso Robelo, one of the leaders of the "contras," pointed out in an interview in Costa Rica, an effect of this official U.S. grant was to reduce the amount of private funding that had previously been available for the purchase of weapons.

In the meanwhile, the Soviets have completed delivery of Mi-24 Hind helicopter gunships to the Sandinista forces. With their mobility and firepower, they have proved formidably effective against the attempts of the "contras" to expand the territory they control inside Nicaragua.

Compared with no official American aid of any kind, the $27 million worth of food, clothing, and medicine that the Congress is providing has proved a useful holding operation. The funds have been intelligently administered to strengthen the unity and democratic orientation of the "contra" leadership.

But Reagan officials admit that time is on the side of the Sandinistas as they take advantage of the refusal of the U.S. Congress to grant badly needed military assistance. The only real hope for the internal opposition and the external resistance is recognition by a bipartisan congressional majority that non-lethal aid is not enough.

THE NICARAGUAN EMBARGO

HON. ROBERT GARCIA

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Tuesday, November 12, 1985

Mr. GARCIA. Mr. Speaker, Clyde Farnsworth of the New York Times wrote an article for the Sunday edition on the effect of the U.S. embargo of Nicaragua. It seems as if it may be helping them more than hurting them. I submit the article for my colleague's perusal.

[From the New York Times, Nov. 10, 1985]

EMBARGO ON NICARAGUA APPEARS OF LITTLE EFFECT

(By Clyde H. Farnsworth)

WASHINGTON, Nov. 9.—The embargo on United States trade with Nicaragua, imposed in early May, has yet to result in more than a ripple in Nicaraguan economic activity.

Not one other country has followed up President Reagan's action with an embargo of its own. Spain, France, Canada and other countries have replaced the United States as buyers of Nicaraguan exports.

Nicaragua's public transportation system, sugar processing plants and electric power stations have yet to break down because of a failure to obtain American spare parts.

The embargo decision was justified as punishment of the Sandinista Government for its "aggressive activities in Central America."

But the United States did not have much trade left with Nicaragua to embargo after a progressive worsening of relations over six years of Sandinista rule. Imports from Nicaragua, last year were only $57 million, about a quarter of 1980's figure. Exports fell to $110 million, half the 1980 level.

After imposition of the sanctions, Nicaragua's President, Daniel Ortega Saavedra, who had been in Moscow when the sanctions were announced, reported that the "U.S.S.R., the socialist community and Yugoslavia" had made $202 million in aid commitments. He said he received $200 million more in commitments from Western Europe.

THE BACKGROUND

Economic sanctions are a widely used, hotly debated tool of international diplomacy going back at least to ancient Greece. President Carter's grain embargo against the Soviet Union and Mr. Reagan's restrictions against the Soviet-West European natural gas pipeline are recent examples. The Administration recently introduced mild sanctions against South Africa.

When the League of Nations moved to apply sanctions against Italy after its invasion of Abyssinia in 1935, a former British Prime Minister, David Lloyd-George, said jokingly that they "came too late to save Abyssinia, but they are just in the nick of time to save the Government," meaning the British Government.

The Nicaraguan embargo is just the latest in a series of hostile acts against the Sandinistas, who the Administration says have sought to "destabilize" their Central American neighbors and refused to introduce democratic changes.

Through a Central Intelligence Agency covert operation, the United States mined Nicaraguan harbors. It has tried to stop international lending to Nicaragua and has actively supported anti-Sandinista rebels.

When the Sandinistas came to power on July 19, 1979, after an insurrection against Anastasio Somoza Debayle, the story was much different.

The new Government told the Organization of American States that it favored a democratic, pluralistic system, and the United States not only offered $120 million in aid but also supported loans from institutions such as the World Bank.

In its last months, the Carter Administration warned Managua against sending weapons to guerrillas in El Salvador. The Reagan Administration suspended the aid program as relations began to deterioriate.

The embargo followed rejection by the House of President Reagan's request for $14 million in nonmilitary aid to the anti-Sandinista rebels. Many House members were embarrassed to learn later of Mr. Ortega's visit to Moscow.

That was one of the factors in the House about-face on June 13, when it voted, 248 to 184, to send $27 million in nonmilitary aid to the rebels.

A parallel measure had passed the Senate, and the aid program is now under way. In recent weeks, there has been a Sandinista offensive against rebel forces and a crackdown on civil liberties. Administration officials said last week that there had been a "serious increase" in Soviet arms shipments to Nicaragua.

FOR SANCTIONS

The principal argument in favor of sanctions is that they are needed to punish the Sandinista Government both for its failure to provide political freedom, end censorship and otherwise liberalize and for what the White House calls its "increased aggressive behavior" against its neighbors—Honduras, Costa Rica, El Salvador and Guatemala.

When the House initially denied aid to the rebels, some Democrats argued that economic pressures would be preferable to military ones, a point the Administration now makes in defending the sanctions.

Even if Nicaragua neutralizes the trade embargo by stepping up its trading with other countries, including the Soviet Union, advocates say the sanctions are an added cost for the already strained Nicaraguan economy and thus hurt the Sandinista cause.

The inability to get American spare parts for machinery, for example, would cause further economic dislocation and political ferment, which might induce the regime to carry on more exchanges with the political opposition, according to this argument.

If there is no change in Sandinista behavior, the United States is still seen to be "doing something," proponents say, and from the perspective of American leadership in the world the psychological factor is important.

AGAINST SANCTIONS

Those opposing the embargo say that rather than weaken the Government and spur talks with the opposition, it will undermine the opposition and further drive Managua into the hands of Moscow.

The lack of spare parts, they argue, will bankrupt the few private companies left, leading the Sandinistas to tighten their grip on the economy and reinforce their political control.

In fact, the argument continues, sanctions impose only a marginal cost on the economy, which is easily absorbed. Nicaragua has already found the new markets for its bananas, coffee, shrimp and other products in

Europe and Canada, regions that can readily supply its industrial needs.

Several Governments, including those of Canada, Italy and France, pointedly reminded the United States after the embargo was imposed that they did not support it.

For the embargo to have any bite, opponents say, it needs broad international backing.

In the seven months that the embargo has been in effect, there has been little measurable impact. "It can't be helping them, but to what degree it's hurting we can't say," a Commerce Department official said. A Western diplomat stationed in Managua said recently that as far as he could tell, Nicaragua had not been damaged "at all" by the embargo.

In arguing that sanctions drive Managua into the arms of Moscow, embargo opponents note that the Russians, in addition to stepping up arms shipments, recently promised to supply practically all of Nicaragua's oil needs. The Russians delivered on a similar promise to Cuba 24 years ago.

In fact, sanction opponents note that Nicaragua has done quite well with his Soviet connection. They cite a figure used by Mr. Reagan in mid-May when he said the "Soviets and their friends" had pumped $2 billion into Nicaragua since 1981.

Nicaragua recently reached agreement with its private bank creditors on a one-year stretch-out of $295 million in overdue loan and interest payments. About half of the 130 banks involved are American. The deferral is a sign, embargo opponents say, that the sanctions have not had any effect on Managua's creditor relationships.

THE OUTLOOK

The one thing on which both opponents and supporters of Nicaraguan sanctions agree is that they will be in place a long time.

The principal reason is that no important domestic constituency has been seriously hurt by the trade rupture, and therefore no one is arguing strenuously that it be mended.

Importers of bananas have incurred some losses, but by and large leading multinational companies have not been affected. Pressure from multinational companies led to suspension of the sanctions against the Soviet-West European pipeline after protracted negotiations in 1982.

For their part, the Sandinistas expect to gain more in aid from the Soviet bioc than they lose from the severing of trade ties with the United States. They appear to be in no hurry to make concessions.

"I can see it going on for years," said an expert on sanctions, Gary Hufbauer, a former Assistant Secretary of the Treasury and now the Wallenberg Professor of International Finance at Georgetown University.

THE STATELY HOMES OF FLUSHING

HON. JAMES H. SCHEUER

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Tuesday, November 12, 1985

Mr. SCHEUER. Mr. Speaker, a recent column by one of our Nation's most widely read humorists, Art Buchwald, recently focused on a community in my congressional district. Flushing, one of New York City's most historic and vibrant neighborhoods, is home to an ethnically diverse and sophisticated residential population.

So sophisticated, in fact, that I think they as well as my colleagues from New York and elsewhere will enjoy Mr. Buchwald's "Guide to Stately Homes of Flushing."

[From the New York Post, Nov. 7, 1985]

GUIDE TO STATELY HOMES OF FLUSHING

(By Art Buchwald)

Years ago when Jackie Onassis was the first lady of our land, she conducted a TV tour of the White House. My sister was so inspired by the event that she gave me a tour of her three-room apartment in Queens.

I was under the impression that she had retired from the stately home business until I received a call from her the other day.

"The British swells have sent their greatest art treasures to the National Gallery in Washington this month," she said. "What are we sending them in return?"

"Nothing special that I know of," I said.

"That's what I thought. My girlfriends and I have a great idea. In exchange for the English lending us their heirlooms we would like to ship them treasures from the homes of Flushing."

"You told me the people of Flushing would never let their heirlooms out of their houses."

"We're now willing to do it provided they are insured by Lloyds of London."

"Who is we?"

"A few homeowners in my neighborhood. We call ourselves the 'Magnificent Six.' We would have been the 'Magnificent Seven' except Martha Bordinsky's slipcovers won't be ready for months.

"The thought we had is that if the British are willing to display what they have in their stately homes we should give them some idea of what we have in ours."

"What art treasures are you prepared to send to them?"

"I'm willing to lend 'The Blue Boy'—the one I bought in a garage sale in Astoria last year."

"Did you ever find out if it's the original 'Blue Boy' or not?"

"The man who sold it to me said if it wasn't the original it came awfully close. I'm not the only one willing to part with treasures. Doris Dembow wants to send a needlepoint sampler which she made herself, titled 'God Bless Our Home.'"

"That's classy. The only place I've ever seen anything like it was in a Hallmark greeting card shop."

"Barbara Lupin has offered to part with a color photo of her grandchild. She says it has never been shown in public before. But she won't lend it unless a guard is stationed in front of it day and night."

"The Tate Gallery has plenty of guards. What other treasures would you like to send to London?"

"Laura Brown has a pair of Ron and Nancy Toby mugs which she purchased in Atlantic City. They were crafted by skilled artisans in Hong Kong, and the shopkeeper told Laura that they were already collector's items."

"I may be wrong, but I don't believe the British have ever seen a Hong Kong Toby mug before."

"What we're trying to do is organize our treasures so that it gives the English some idea of how the bluebloods live in Flushing.

"We have Myra Stieglits' nearly talked into parting with her queen-size sleeper sofa. It's an heirloom because it has been used by three generations in her family."

"What is so special about it?"

"In the daytime it can seat three people, and at night all you have to do is remove the cushions and it turns into a bed."

"Why is Myra hesitating?"

"She's afraid that if the Tate Gallery borrows it, her kids' friends won't have anyplace to sleep when they come home on school vacation."

"You seem to have everything under control. Why did you call me?"

"The girls wondered if you would contact Prince Charles and Princess Di and ask them to stop by to preview our art treasures on their way to Kennedy airport."

"I would be happy to. One more thing. I'm curious about how you selected the masterpieces for the exhibit."

"We all closed our eyes and thought of England."

A SALUTE TO CHET MAKOSKI

HON. LOUIS STOKES

OF OHIO

IN THE HOUSE OF REPRESENTATIVES

Tuesday, November 12, 1985

Mr. STOKES. Mr. Speaker, thank you for giving me this opportunity to join with the Cleveland Trade Union Council for Histadrut in saluting Mr. Chet Makoski, international vice president and business manager of the Amalgamated Clothing and Textile Workers Union. Mr. Makoski will be honored at a testimonial dinner for his contributions to the labor movement in Cleveland and the community at large in Cleveland on Sunday, November 17, 1985.

At this time, I would like to share with my colleagues some of the details of Chet Makoski's noted career with the union in Cleveland. He is clearly one of the most popular labor leaders in Cleveland and the State of Ohio. This is a result of his unswerving dedication through the years to improving the lives of union members.

Mr. Speaker, Chet Makoski seemed destined to work with the union movement. Before moving to Cleveland, his family lived in the southeastern coal fields of Ohio. His father was an activist with the United Mine Workers Union. By watching his father, Chet Makoski learned a great deal about the importance of labor unions.

After serving in the U.S. Marine Corps, Chet Makoski returned to his job in Cleveland with the Willard Storage Battery Co. and became the union steward and trustee for UAW Union Local 88. Mr. Makoski later was elected local union president and full-time representative for 10 consecutive terms. He became the first president of the Intra-Corporation Council, senior vice president of the National Council of Battery Workers and won national bargaining rights and a national contract with Electric Storage Battery Co.

In 1960, he was appointed to the position of international union representation and organizer with the Cleveland Joint Board, Amalgamated Clothing and Textile Workers Union, AFL–CIO, CLC. As an organizer, Makoski was successful in bringing into

the union more than 1,000 members. His responsibilities included negotiating contracts in the Cleveland area and also in Central and Southwestern Ohio.

Because of his achievements, in 1979, Chet Makoski was elected joint board manager. In April 1984, he was elected international vice president, ACTWU, AFL-CIO, CLC and is a member of its general executive board.

Mr. Speaker, in addition to his primary union duties, Chet Makoski is the vice president and executive board member of the Cleveland Federation of Labor and is chairman of the Federation COPE Scanning Committee. Since 1978, Makoski has been the vice president and an executive board member of the Ohio AFL-CIO. In 1979, he became chairman of the Cleveland Trade Union Council for Histadrut. Finally, he is a committee member of the Labor Education and Research Department and Advisory Committee of Ohio State University.

In addition to these numerous positions with the union, Chet Makoski has given of his time and talents to many civic and community groups. He is an active member of the Cleveland Roundtable, Labor Management Forum and a trustee of the Northeast Ohio Epilepsy Foundation. In 1984, he was reappointed by Ohio Governor Richard Celeste to the Air Quality Development Authority. Currently, Chet Makoski is the vice chairman of the Authority.

At this time, Mr. Speaker, I ask my colleagues to join with me in saluting Mr. Chet Makoski.

BILINGUAL EDUCATION: CONSTITUENTS RESPOND TO SEC. BENNETT

HON. ROBERT GARCIA

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Tuesday, November 12, 1985

Mr. GARCIA. Mr. Speaker, recently Secretary of Education William Bennett attacked the new Bilingual Education Act, passed by an overwhelming bipartisan majority in Congress last fall. The responses from people who administer this program—and who know best the performance of the program—have been coming in from all over the country. I want to share with my colleagues a letter that represents the feelings of the people writing these letters. I think the content of the letter will help to demonstrate that Congress should continue to support this program.

SLINGLERLANDS, NY,
October 31, 1985.

Congressman ROBERT GARCIA,
Cannon House Office Building,
Washington, DC.

DEAR CONGRESSMAN GARCIA: In the past several weeks, as a result of comments made by William Bennett, Secretary, U.S. Department of Education, the bilingual education program (and the Congress which has supported this) has come under attack in the media.

Attached is a copy of a letter I prepared responding to Mr. Bennett. This is the first time in my life that I have written a personal letter to a public official. After nearly 15 years of working with children and linguistic minority communities this is how strongly I feel about this issue.

I urge you to review the attached. I think its contents will help to demonstrate that Congress should continue to support this program.

Sincerely,

THOMAS E. HOGAN.

SLINGERLANDS, NY,
October 17, 1985.

Dr. WILLIAM BENNETT,
Secretary of Education, U.S. Department of Education, Washington, DC.

DEAR SECRETARY BENNETT: Your recent comments concerning bilingual/bicultural education and many of the editorials that followed undermining the value of languages and cultures other than English encouraged me to reflect back over my 15 year career as a historian and educator involved in public education—on a New York State Indian reservation, with Hispanics, and with programs serving limited English proficient children from over 90 other linguistic minority backgrounds.

In the early 1970's I was employed a Home-School Coordinator by the Salamanca, New York, City Central School District. The source of funds was the Indian Education Act of 1972. The goal of the program was to reduce an incredibly high dropout rate among secondary Native American students from the Allegany Reservation of the Seneca Nation of Indians' and, to increase the incredibly low average daily attendance of these students. My first year's activities were those of a truant officer—except that I had a fancier title.

As a former historian it soon became apparent to me that the dropout and attendance situations were *symptoms* and that the *problems* were the result of over 100 years of implementation by Federal, State and church officials of an "English only" policy similar in many ways to the one you are now espousing. That is, policy sought to rapidly assimilate all members of linguistic minority communities. The crucible in which everyone was to be "melted" was the American educational system.

The effects of this policy were explained to me one evening in the Seneca Nation community building at Steamburg, New York when dozens of senior citizens—many of them elders from Coldspring Longhouse—told how they had been spanked, slapped, and sent to the coatroom for speaking Seneca, their native language. Middle-aged Seneca conveyed how they had been ridiculed and called "pagans' by both teachers and classmates. Seneca then of school age were treated in a more subtle fashion. By that time there was nothing in the school curriculum that dealt with their language or culture and their contributions to the American heritage. The great paradox to me was the fact that much of the school system the Allegany Seneca attended was built on their land.

That evening I decided to do what I, a non-Indian educator, could to initiate change. With the support and assistance of many Indian and non-Indian teachers, administrators and community members the Seneca language, culture and history were incorporated into the school's curriculum and extra curriculum. Hundreds of thousands of State, Federal, tribal and local dollars were expended over the next decade in support of these activities.

Once, as these changes were being made, I sat in the Denver, Colorado airport awaiting a flight back to the reservation from an educational conference. A well dressed businessman seated next to me struck up a conversation asking "What do you do for a living?" I responded "I work in bilingual education." He said "If those people don't want to speak English why don't they go back to where they came from." Needless to say, he had a very sheepish look when I told him that I worked in American Indian bilingual education!

Back in Western New York, Native American children reacted to our initiatives by coming to school more frequently and dropping out less often. A significant factor in this was that they no longer felt that they were second class citizens, or, that what they were—Native Americans—was something of little of no value in the eyes of their teachers and fellow students.

I was very gratified this past summer (1985) when a local teacher in Salamanca told me that despite the fact that these programs are now being eliminated due to fiscal constraints that there was one glaring benefit. She said, "A whole generation of Indian and non-Indian students have been taught not to hate." I was also extremely pleased when in mid-October 1985 another Western New York teacher showed me a clipping from the local newspaper concerning the newly elected king and queen of the high school homecoming—BOTH WERE SENECA INDIANS. Both were selected by their peers—of which about 2/3 are non-Indians. He remarked that this would never have happened in the past.

These are but a few of the positive effects on children of bilinqual/bicultural education and the funds spent. These are, I think, some of the things the Congress had in mind over the last decade when they made this possible. Things like these have been the correct American response to the 1969 U.S. Senate report entitled "American Indian Education: National Tragedy, National Dilemma."

For my friends in the private business sector I would also like to point out that your reference to the millions of dollars spent nationally in efforts such as this also implicates them. At the local level we bought a xerox machine and an IBM typewriter. Countless numbers of companies benefited when we, as a program, purchased equipment and supplies, conducted meetings and traveled for program purposes. Our staff members did likewise when they cashed their payroll checks and bought groceries, gasoline, etc.

Did we preserve the native language through these efforts Mr. Secretary? Unfortunately for the New York State and American Heritage we did not. With students coming to school more frequently and staying for more years and displaying more interest in school we accelerated the assimilation process. When considering education policy for linquistic minority communities I recommend that you consider this example from the first Americans. What you are proposing has been tried. It doesn't work and, it costs more money in the long run—in terms of low educational achievement and thwarted opportunities for chilren to participate fully in the American society and work force.

Respectfully submitted,

THOMAS E. HOGAN.

THE 1985 BOOBY PRIZE FOR THE NOBEL COMMITTEE

HON. JIM COURTER

OF NEW JERSEY

IN THE HOUSE OF REPRESENTATIVES

Tuesday, November 12, 1985

Mr. COURTER. Mr. Speaker, as the following essay by Steve Forbes points out, the Norwegian Nobel Prize Committee must have been feeling a bit out of sorts the day they voted to award the 1985 Nobel Peace Prize to the International Physicians for the Prevention of Nuclear War [IPPNW]. Otherwise, such a distinction would never have been awarded to a group which has made its name promoting Soviet propaganda objectives, most notably, an inequitable and totally unverifiable moratorium on nuclear weapons testing. Surely there are a myriad of groups and individuals in the world who are more worthy and deserving of the Nobel Peace Prize. The most charitable point that could be made about the United States and Soviet doctors who head the group is that they have demonstrated it is possible for ordinary Americans and Soviets to agree on arms control matters: They both agree that the United States is to blame for the arms race and the current impasse in the arms reduction negotiations in Geneva, which is the same kind of arms control tonic that the Soviet Union has been prescribing for many years. The reputation and credibility of the Nobel Prize Committee has not been so seriously in question since Henry Kissinger shared the Peace Prize with the North Vietnamese Foreign Minister. I urge my colleagues to read the article from Forbes magazine that follows:

The 1985 Booby Prize goes to the Norwegian Nobel Committee for awarding its peace prize to the International Physicians for the Prevention of Nuclear War. The IPPNW was founded five years ago by U.S. and Soviet physicians to warn the world that nuclear war poses hazards to people's health.

What is unsavory is the notion that this is simply a group of like-minded physicians from around the world. Nothing could be further from the truth. No Soviet doctor could join an organization like this unless he and it were vetted by the Communist Party. Genuine activists languish in Russian jails.

Thus it is no surprise to learn, as the *Wall Street Journal* recently revealed, that one of the leading Soviet physicians in this organization has been a vigorous defender of the practice of psychiatric torture of dissidents. No surprise, either, that while the group's antinuclear literature is available in the West, is it proscribed in Russia.

These medicine men are more eager to pounce on Uncle Sam than on the Red Bear. For example, when the award was announced, the committee's American head called upon the Reagan Administration to follow the Soviet lead for a moratorium on nuclear testing for the remainder of the year. No mention was made that the Soviet move came after it had completed its own extensive tests.

The Norwegian Nobel Committee blew it, this year they should have taken a powder.

PUBLIC FCC HEARINGS ON LICENSE TRANSFERS

HON. JOHN BRYANT

OF TEXAS

IN THE HOUSE OF REPRESENTATIVES

Tuesday, November 12, 1985

Mr. BRYANT. Mr. Speaker, today I introduced a bill which will require the Federal Communications Commission to hold public hearings, in certain instances, before it acts to transfer or assign broadcast licenses involving waiver requests. With the rash of hostile and friendly takeovers in the broadcast industry reaching a fever pitch, it seems appropriate to remind the FCC of its responsibilities to the public interest and this is the driving force behind my proposal.

For the past several months, I have been communicating my concerns to the FCC particularly with regard to its handling of the license assignment request filed by Rupert Murdoch's News America Television, Inc. None of my correspondence has been fully and satisfactorily answered. My requests for a public hearing in the Murdoch case have been ignored, as have similar petitions from responsible consumer groups. The time has come to let the FCC know that it must meet its obligations to the American public.

License transfers in and of themselves are not detrimental to the public interest, but transfers hidden behind closed doors at the FCC make me question whether the public trust can be properly served by either the FCC or the potential licensee.

I also have serious reservations, in the case of the FCC-Murdoch relationship, about possible double-standard treatment afforded Murdoch's license transfer application. Several years ago, the same FCC which is breaking all track records to approve the Murdoch deal, summarily dismissed a license application filed by a resident legal alien because, although he had applied, he was not yet a citizen. Although Mr. Murdoch was not granted citizenship until September 4, 1985, the FCC accepted his application when it was filed on June 24. At best, this apparent double standard smacks of favoritism.

Along with the broad public policy concerns which can only be addressed in a full evidentiary hearing conducted in public, questions of favoritism and unseemly haste can be aired only when the Commission is required to hold such sessions. The bill I am introducing today simply requires the FCC to hold an open, public hearing when a license transfer and waiver application is filed and a petition to deny that license assignment or transfer has also been filed.

I do not consider that this legislation will be a burden on the Commission, but rather that it is a means to guarantee a continuation of FCC precedent in such matters and to assure the public that those persons granted the public trust embodied in a broadcast license will know that trust is well-placed. I commend this measure to my colleagues' attention and seek their cosponsorship.

H.R. 3723

A bill to amend the Communications Act of 1934 to require that the Federal Communications Commission hold hearings prior to the granting of any license transfer that involves a request for waiver of Commission ownership rules

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That section 310(d) of the Communications Act of 1934 is amended—

(1) by inserting "(1)" after "(d)"; and

(2) by adding at the end thereof the following new paragraph:

"(2) The Commission shall designate for hearing pursuant to section 309(e), any application seeking to acquire a license by transfer subject to paragraph (1) of this subsection, if such application includes a request for waiver from any Commission rule, and a petition to deny has been filed, relating to the ownership of communications properties under sections 63.54, 73.3555, and 76.501 of title 47 of the Code of Federal Regulations.

ROLLINS AGENCY, INC. FETED ON 75 YEARS' SERVICE

HON. JOSEPH J. DioGUARDI

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Tuesday, November 12, 1985

Mr. DIOGUARDI. Mr. Speaker, one of the driving forces behind our great Nation has been our citizens' quest to achieve the American dream, to build success through sweat, innovation, and pride in their work and business.

Seventy-five years ago, a man who was the embodiment of this dream opened an insurance agency in Bronxville, NY. Today, the dream of this man lives on and his family is now celebrating the diamond anniversary of his company, the Rollins Agency, Inc.

Founded in 1910 by Marland W. Rollins as a local insurance agency located in Bronxville, NY, Marland ran the company for 40 years and took it from nothing to a company with a premium volume of $400,000. He incorporated it as Marland W. Rollins, Inc. in 1929, and operated under the same name until 1966.

Marland resigned in 1945 but remained as consultant until his death 5 years later. His son, Markham F. Rollins, Sr., took over as president in 1945 and stayed with the business until 1966 at which time it was sold to his son, Markham F. Rollins, Jr. When Markham, Sr. sold the business the premium volume was up to $600,000.

Markham, Jr. took the operation over in 1966 and has been its president to this day. The agency is now known as the Rollins Agency, Inc., and boasts a 1985 premium volume of $17 million.

The fourth generation Markham F. Rollins III, has been working with his father for 5 years and has recently been joined by his brother, Charles J. Rollins. They both look forward to the responsibility of continued growth and service to the community.

Rollins is one of the oldest families in Bronxville. They are all very proud of their family history and place in Bronxville. All of the Rollins have been very active in the local community. Marland and Markham, Sr. were both very active in the Bronxville Engine Company, Bronxville Boy Scouts, and village affairs. Marland was also one of the founders of Christ Church in Bronxville. Markham, Jr. is past president of Bronxville Rotary Club and chamber of commerce.

The agency has undergone many changes since its inception in 1910. The most drastic changes and growth have taken place since Markham F. Rollins, Jr. took over in 1966. Through a combination of hard work, aggressive market activities and dedication he has accomplished this growth. At the same time he has been able to offer the high quality of service that the clients and community deserve.

Mr. Speaker, I would like to extend my congratulations to the Rollins family and I am sure the people of Westchester can look forward to another 75 years of dedicated service.

THE ROSMAN FAMILY OF ODESSA

HON. ESTEBAN EDWARD TORRES

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, November 12, 1985

Mr. TORRES. Mr. Speaker, I would like to bring to the attention of my colleagues a Soviet Jewish family who is seeking permission to emigrate to Israel.

The Rosmans—Victor Ilich, Lina Nathanovna, and Yevgeny Vyctorovich applied for permission to join a sister living in Israel in 1979. Permission was not granted in spite of the fact that Lina Rosman's sister, who lives in Israel, sent a personal invitation for the siblings to be reunited. In 1983, Victor Rosman's son, who lives in Israel, sent an invitation to his father seeking their reunification in their homeland, Israel. When Victor again applied for permission to emigrate, it was denied.

The case is clearly one of family reunification and repatriation to the Jewish homeland of Israel. Refusal to allow the Rosmans to emigrate to Israel is contrary to the consensus at Madrid to strenghthen the provisions of the Helsinki Final Act.

I call on President Reagan to take a list of names of Soviet Jews, including the Rosmans, to the Geneva summit conference later this month. The President should make the issue of Soviet Jewry a high priority on the agenda of the summit. I would encourage the President to stress to Mr. Gorbachev the need for substantial improvement in human rights conditions and the release of Soviet refuseniks and prisoners of conscience.

PERSONAL EXPLANATION

HON. HERBERT H. BATEMAN

OF VIRGINIA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, November 12, 1985

Mr. BATEMAN. Mr. Speaker, I would like to explain my absence from two recent votes. On October 17, I missed a vote on the rule to consider the Daylight Saving Time Extension Act. At the time of the vote I was meeting with Assistant Secretary of the Army Robert K. Dawson, and representatives from the Gloucester County, VA, Board of Supervisors. We were discussing the permitting problems which the county has faced regarding the Beaverdam Reservoir. Construction of this reservoir is of crucial importance to the county, and I was not able to leave the discussions of this project to vote. If I had voted, I would have voted in favor of the rule.

On October 31, I missed a vote on approving the Journal. At the time of the vote I was participating with my colleague from Maryland, ROY DYSON, and with Senators WARNER and SARBANES in a panel discussion of the role of the Congress in the cleanup of the Chesapeake Bay. The discussion took place at a seminar on the bay sponsored by the Secretary of the Army. Since I consider the bay cleanup to be of great significance, I felt that it was important for me to participate in the seminar. If I had been able to vote, I would have voted to approve the Journal.

NATIONAL ORGAN AND TISSUE DONOR AWARENESS WEEK

HON. SID MORRISON

OF WASHINGTON

IN THE HOUSE OF REPRESENTATIVES

Tuesday, November 12, 1985

Mr. MORRISON of Washington. Mr. Speaker, today I have the privilege of introducing a joint resolution authorizing and requesting that our President issue a proclamation designating April 20 through April 26, 1985 as "National Organ and Tissue Donor Awareness Week."

Mr. Speaker, I honestly can't think of a better time of the year to introduce a bill which is intended to focus attention on the greatest gift of all, that of life, than at the start of the holiday season that we Americans most associate with giving. Thanksgiving is just a few short weeks away and Christmas and Hanukkah are not far behind.

Donation is a gift of time, a gift of life. For many folks receiving a transplant, it is a second chance to do all the things they just hadn't gotten to yet. Things like raising a family. There are others, though, for which the donation of an organ or tissue, is the key to their entire lives, to everything. I refer to the little ones, the children. The babies and toddlers who come into this world with the promise of life but the unlikeliness of ever living it. Youngsters whose lives are just out of their reach, unless someone gives.

The irony of it, though, is that while an organ or tissue donation is priceless, if the donor is available and the gift is not made, it is worth less than nothing. Now I know that there are a lot of truly generous folks out there who would consider making this lifesaving gift if they just knew how easy it was. And that's the real tragedy.

That is why I am again introducing this measure, for if it encourages just one more person to sign a donor card, or be ready to say yes if they are asked for their loved one, then observing this commemorative is made all worthwhile. So, Mr. Speaker, I ask my colleagues to join the over 200 cosponsors in supporting National Organ and Tissue Donor Awareness Week.

PRAISING THE WAYS AND MEANS COMMITTEE

HON. JOSEPH J. DioGUARDI

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Tuesday, November 12, 1985

Mr. DIOGUARDI. Mr. Speaker, I rise to commend the recent action taken by the Ways and Means Committee to oppose the taxation of professional service providers by the accrual method. I have spoken in the past of my opposition to this proposal because I believe that it is a wrongful attempt to raise funds by treating unfairly one segment of our economy. I am greatly heartened by the sagacious decision of the committee in this matter.

There is no good reason to collect taxes on professional service income that has yet to be received. I had communicated my opposition to this proposal to the members of the committee in the past and am pleased by their decision. I still fear, however, that tax reform legislation could pass the Senate which includes this onerous provision unless the greater attention is paid to this matter. That is why I have chosen to make this statement.

Professional service providers should be taxed in a manner that clearly reflects income. The Government has traditionally recognized this and has allowed them to pay taxes on their income as it is received (basically, the cash basis). It is only fair to allow them to continue to do so. In addition, the service sector is the fastest growing portion of the economy and the most competitive in the world market. It would be the height of folly to burden it with unjustifiable requirements.

Again, I praise the Ways and Means Committee members for their action and urge my House colleagues to support them in this matter. Thank you, Mr. Speaker.

HUMAN RIGHTS: MICHAEL NOVAK'S VIEW

HON. ROBERT H. MICHEL

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Tuesday, November 12, 1985

Mr. MICHEL. Mr. Speaker, our colleagues DAN MICA and JOHN MILLER, as cochairmen of Human Rights, Democratization, and U.S. Foreign Policy, a bipartisan seminar, recently sent to Members a summary of remarks made by scholar Michael Novak at seminar No. 1. Novak's theme, "Defining 'Human Rights,'" is an important one and he brings to the subject the historical, theological, and political depth and breadth of learning for which he is famous. I recommend his views on human rights to all our colleagues because he avoids the emotional rhetoric that usually accompanies discussions of human rights and gives us a clear and persuasive argument for one view of human rights policy.

At this point I wish to insert in the RECORD, Mr. Novak's incisive and stimulating views on "Defining 'Human Rights.'"

DEFINING "HUMAN RIGHTS"

(By Michael Novak)

THEMES IN MR. NOVAK'S PRESENTATION

1. In contemporary intellectual life, the "human rights" argument is in considerable disarray. Some modern philosophers even question whether there is anything properly definable as a "human right." Since our experiment in democratic pluralism is based on the certrality of human rights in a morally-worthy political community, definitional precision is very important.

2. The Western human rights tradition, which focuses on civil liberties and political freedoms, is grounded in Judaeo-Christian notions of sin. Since everyone sins, no one is to be trusted, especially with power. The French essayist Montaigne made the same point in an essay on cruelty; the human propensity for cruelty and the will to power lead inevitably to torture.

The pressure for "human rights" in the Western tradition grows from this experience: the pressure is for liberation from torture, liberation from poverty, liberation of conscience. These three liberations—democracy, capitalism, pluralism—taken together comprise what we call the "liberal state." But the root of it all is our sense that all men and women are sinners (whether we use explicitly religious language to express that intuition or not).

3. The Western human rights tradition is also distinguished by its emphasis on institutions for liberation. As James Madison taught, the rights of Americans are not defended by paper, but by habits, associations, and institutions. The Bill of Rights is made real in a world of cruelty by those habits of mind, associations of individuals, and institutions of governance. One way to appreciate this point is to compare the experience of the American civil rights movement and the Polish trade union Solidarity.

4. While adherence to some of the claims catalogued in the 1948 Universal Declaration of Human Rights is merely a matter of rhetoric in some societies and for some governments, there are a number of abuses that are so widely condemned that we can speak of "universal human rights." The abuses include the massacre of innocents, deliberate abandonment to starvation, systematic torture and "disappearances," mass expulsions from homes, enslavement or forced labor, forced breakup of families (by removing either the father or the children), desecration of religious symbols, destruction of ethnic institutions and other institutions of memory.

All of these abuses routinely occur in the world today; yet even repressive states feel impelled to disparage and condemn them. Some moral institutions do seem to be universal; and in this sense, we can speak of "universal human rights."

5. Why are these abuses "routine?" Because the modern state is distinctive.

The *systemic* capacities of the modern state make the *reach* of cruelty much longer. Poland's government, for example, shut down Solidarity by cutting off the national telephone grid.

The breakdown of the role of customs and the claims of kinship in the modern state are also factors in the distinctively modern repressive capacities of governments today.

6. The Western human rights tradition insists that "human rights" in here in persons, not in the state. This is what the Declaration of Independence means by "inalienable rights."

This is, admittedly, a question of belief. The empirical evidence suggests that Hegel was right in calling history a "butcher's block." But if people believe that there is such a thing as a *person*, then life will be ordered differently. To be a person means to have a value and dignity that precedes one's citizenship or position in the state. To believe that this is true of persons leads to the definition of civil liberties and political freedoms. And it leads to the creation of *institutions* of governance worthy of human beings, of persons.

In this sense, civil liberties and political freedoms are the most basic of human rights.

7. The current trend toward the assertion of "cultural rights" in the West—"Women's rights," "gay rights," "children's rights," "animal rights"—is perceived by many non-Westerners as sheer decadence. To some Westerners, on the other hand, this trend is the height of progress. However that argument sorts out, these claims are different from civil liberties and political freedoms.

8. "Economic rights" are frequently asserted by many governments, (often Marxist in orientation) and increasingly by some Western religious intellectuals and leaders. Again, there are important differences to be noted. Civil liberties and political freedoms *prevent* the state from doing things; the notion of "economic rights" means that the state *provides* some things, and thus can set *conditions* for that provision (e.g. those to be provided for may not challenge the power of the state).

9. The argument over a related issue, the "right to development," opens up an important opportunity for the United States and the West at the United Nations.

The U.S. delegations to the U.N. Human Rights Commission in Geneva argued that there was an *obligation* to development. No nation need be a poor nation any longer. Wealth could be created. Not even natural resources were required (how many natural resources does Japan have?).

Every person in the world therefore had a right to a country that made the escape from possible. This is a right *against* the state, which is usually in the way of development. And it is a right *to* association, for it is out of free associations (trade unions, cooperatives, credit unions, small and large business enterprises) that wealth is created.

THEMES IN THE DISCUSSION

1. Must the *source* of human rights be ascribed to God or some form of Supreme Being if there are to be "human rights" as we've understood them in the West?

Some philosophers defend the Western human rights tradition without reference to religious belief. The evidence, on the other hand, suggests that the shortest, clearest route to the defense of human rights is the Judaeo-Christian tradition.

Twentieth-century prison literature is an important resource for thinking about the source of human rights. Dissenters in prison, even religious, agnostic or atheists, often find that their bottom-line stand is the inviolability of conscience.

There's an important "embarrassment index" to be consulted on these matters as well. Many Chileans, for example, are profoundly embarrassed by the abuse of human rights in their country. Soviet diplomats, on the other hand, tend not to be embarrassed at all. "Who," they ask, "is Sakharov? Let's get on to more serious matters."

2. There are, however, points of contract with the Soviets that ought to be pursued in the argument over human rights. Family is one. The notion of "personhood" is hard to avoid when you look into the eyes of your grand-daughter. This is a common human experience. These kinds of experiences (as well as our experiences of cruelty, noted above) have given rise to the Western human rights tradition. Our arguments with the Soviets on human rights issues need not be simply abstract; the arguments can be brought down to, or rooted in, human experience.

3. There are other changes in Soviet human rights practice that can be pursued. An abuse like psychiatric torture is a systemic problem, not simpy a matter of cruel individuals; and the system can be altered by the decision of one man. Were Mr. Gorbachev to give the word, psychiatric torture would be abandoned. The West has a responsibility to make it clear that this kind of change is required if there is going to be an improvement in relations.

4. Fostering the communications revolution in the USSR is another human rights strategy that should be explored. Radios, Xerox machines, and personal computers break down the regime's information monopoly.

5. On the "quiet diplomacy" vs. "public protest" argument over human rights tactics, the test should be *results:* is the number of abused persons lowered, or not? In most countries, quiet diplomacy works best; the abusing government is not forced to publicly assert its sovereignty. It can back off of particular abuses quietly. On the other hand, the only way to get some governments attention is to build a bonfire under them.

The question, in short, is not an either/or proposition. Both tactics are needed. The criteria for choosing between them should be pragmatic and empirical: what works in reducing the number of abused persons?

REPEAL ZIONISM-IS-RACISM RESOLUTION

HON. THOMAS J. MANTON

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Tuesday, November 12, 1985

Mr. MANTON. Mr. Speaker, Sunday, November 10 marked the 10th anniversary of the United Nation's General Assembly passage of a resolution equating Zionism with racism. This resolution was pushed through the General Assembly, by Arab nations with the strong support of the Soviets. The United States voted against this resolution in 1975, and has been a strong opponent of the resolution and its sentiments.

Mr. Speaker, the United States has never, and must never support this offensive resolution. On the occasion of the 10th anniversary, I join many of my colleagues in calling for a repeal of this resolution.

Zionism, rather than being a racist idea, is an idea of hope and freedom. It is an idea that has been an integral part of the Jewish religion and culture since the destruction of the Second Temple, over 1,900 years ago. To equate Zionism with racism, is to belittle and insult the sacrifices and accomplishments of a nation and its people. It also condones the actions of those who call for the destruction of Israel because it is the Jewish homeland. And it also legitimizes the actions of terrorists.

The United Nations is indeed a forum for the discussion of different ideas. However, this resolution flies in the face of the ideals, goals and purposes of the United Nations. The United States must continue its outspoken opposition to this resolution and to other efforts to assault the foundations and the legitimacy of the State of Israel.

Mr. Speaker, I urge my colleagues to take this opportunity to reaffirm and restate the commitment of the Congress and the American people to the sovereignty of the State of Israel. Ten years ago, the United States strongly stated its opposition to an infamous resolution. That commitment must continue.

HONORING SYLVIA SWANSON'S RETIREMENT FOR THE LITTLE LAKE SCHOOL DISTRICT

HON. ESTEBAN EDWARD TORRES

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, November 12, 1985

Mr. TORRES. Mr. Speaker, I want to bring to the attention of my colleagues in Congress the retirement of Sylvia Swanson from the Little Lake School District after 18 years on the school board.

On November 26, 1985, Sylvia will attend her last district meeting after having served with distinction for 18 years on the board of education. She has served as the school board president, vice-president and secretary. Sylvia has also been a legislative representative to the California School Board, representative to the Los Angeles County school trustees, and a representative to the Whittle Area School Trustees Association.

Mr. Speaker, Sylvia has been an active member of the city of Santa Fe Springs which I represent. She is past president of the Santa Fe High School PTA and the Santa Fe Springs Woman's Club. She is a Den Mother for the Cub Scouts and a member of the Santa Fe Springs Sister City Committee, Friends of the Liberty and Traffic Study Committee.

In recognition for her outstanding service to the community she was voted Santa Fe Springs Citizen of the Year.

She has lived in Santa Fe Springs for more than 30 years with her husband Eugene where they raised three children, Marty, Guy and Dana. Her hobbies include painting, quilt making, reading and creative writing.

Mr. Speaker, I ask my colleagues to join me in commending Sylvia Swanson for her dedication and commitment to the people of the city of Santa Fe Springs.

FLEET SUBSIDIES ARE COSTING AMERICAN AUTOMOTIVE CONSUMERS MONEY

HON. GENE TAYLOR

OF MISSOURI

IN THE HOUSE OF REPRESENTATIVES

Tuesday, November 12, 1985

Mr. TAYLOR. Mr. Speaker, I am today introducing a bill designed to bring fairness back to the automotive marketplace and ultimately could save new car and truck buyers several hundred dollars each when they make these substantial purchases.

During the past several years, sales to leasing companies and other fleets by domestic manufacturers have steadily increased and today over 1.25 million cars are sold to fleet companies annually. On a great number of these cars the manufacturers gave subsidies to the fleets of between $500 and $1,000 below the price at which a franchised dealer could buy the car. These subsidies take many forms including direct rebates, free options, cash discounts, and advertising payments. If the total subsidies amount to hundreds of million of dollars, as many estimates indicate, a serious question arises as to whether the automobile consumers of this Nation are footing the bill.

Equally important, the subsidies, in their present form, also threaten the existing dealer franchise system. Because of the subsidies, large leasing companies easily underbid the dealers in sales and leases to other businesses which have fleets in their business operations. The dealer is put at a competitive disadvantage not only because of the difference in the vehicle purchase price, but again when he meets the subsidized vehicle in the used car market. Many leasing companies frequently find themselves overstocked by hundreds of vehicles. When this happens, they sell the cars as new vehicles or keep the cars only 2 or 3 months and sell them as very low-mileage used cars. Both of these transactions compete directly with the small business dealer's new market. Consumers who have used cars to sell or trade will also suddenly find their cars worth several hundred dollars less.

The result is not good for consumers of small business dealers. As the percentage of subsidies given fleet buyers by the manufacturers rises, the effect on automobile and truck dealers increases. The consumer, ultimately, pays the price. The most immediate effect is that individual consumers pay a higher price for the new cars they buy. The more long term effect is that the dealers, especially small dealers in rural areas, will be driven out of business because they cannot compete with the large leasing companies and fleets which buy cars at a substantially lower price than the dealer can buy the car. As these dealers are driven out of business, individual consumers will be forced to drive many more miles to obtain warranty and other service work. This, in many cases, will require the individual to rent a car while his car is being repaired. The result is not only a great inconvenience for the individual, but a cost burden as well.

I believe that the legislation I have introduced today will protect the franchised dealer from unfair price discrimination by the manufacturer of new cars and trucks, and would save the consumers of this Nation hundreds of millions of dollars.

A TRIBUTE TO THE AMERICAN VETERAN

HON. ROY DYSON

OF MARYLAND

IN THE HOUSE OF REPRESENTATIVES

Tuesday, November 12, 1985

Mr. DYSON. Mr. Speaker, I rise today to honor the brave men and women, both living and dead, who have served in uniform as protectors of our great Republic.

It was on a blustery morning 65 years ago—the 11th hour of the 11th day of the 11th month—that the bloodstained battlefields of France and Germany fell quiet. And as the victors and the vanquished ventured to Versailles to sign the historic document marking the end of the war to end all wars, the world rejoiced at the prospect of a prolonged period of peace and prosperity.

Much has happened since that hopeful day when the armistice was signed. The world has not been made safe for democracy. Swords have not been turned into plowshares. Peace does not reign supreme.

We live in troubled times. The forces of darkness, the yoke of tyranny and oppression, still engulfs much of humanity. Young Americans still make the ultimate sacrifice in defense of freedom.

Yes, we live in troubled times. But we also live in a land of unparalleled opportunity. A land where our rich and diverse culture flourishes. A land where the flame of democracy burns bright.

Our Nation does not and will not forget those who have given so much to preserve and protect our way of life. The sacrifices of the American veteran have been great. More than 1 million have died in the service of their country; many more have become disabled in our defense.

So I believe, Mr. Speaker, it is altogether fitting that we pay tribute today to the American veteran. We thank them for their sacrifices. We honor their memory. We do this not only out of a sense of respect and remembrance for those who have gone before us, but also for the benefit of future generations who should know the pride of being an American.

Never content to rest upon the laurels of past achievement, Rear Admiral Hogan has somehow found the time to earn a master of science degree in international affairs from George Washington University in 1965 and a master of business administration from the American University in 1982. By demanding more of himself in the service of his country, Rear Admiral Hogan has strengthened our Nation, and for this I commend him.

In many ways, Rear Admiral Hogan exemplifies that which has made our country what it is today—a belief that through diligence, determination and dedication we can accomplish almost anything. So it is with a sense of deepfelt pride, Mr. Speaker, that I share these words of praise for a great American, Rear Adm. Edward J. Hogan, Jr.

GOVERNOR DEUKMEJIAN SPEAKS OUT ON CALIFORNIA ENERGY PROJECTS

HON. WILLIAM E. DANNEMEYER

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, November 12, 1985

Mr. DANNEMEYER. Mr. Speaker, California Gov. George Deukmejian devoted his weekly radio program, "California Report," to the subject of the key energy facilities in our State. He reported on his statewide tour of everything from the Geysers geothermal project near Santa Rosa in the northern part of our State to the dispatch center operated by the San Diego Gas & Electric Co. to the south. This was done as part of Energy Awareness Week.

California is a large energy consuming State, but it also has a wide diversity of energy projects, large and small, which span the range from traditional oil, natural gas and hydropower to solar, wind, geothermal and coal gasification. Given the importance of protecting air quality and other environmental considerations, California must balance energy development and the environment. The track record in our State is that this can be done successfully.

It is my pleasure to serve as the ranking minority member of the Energy and Commerce Subcommittee on Fossil and Synthetic Fuels. In that capacity, I want to echo the Governor's statement that—

In recent years, we have learned the hard way that we cannot bury our heads in the sand when it comes to energy. The security of our nation and the prosperity of our state depend on a stable, affordable supply of power.

I commend the rest of the Governor's remarks to my colleagues' attention:

STATEMENT BY GOV. GEORGE DEUKMEJIAN

Energy is the lifeblood of our economy and our way of life. This week, California has been observing Energy Awareness Week of highlight this fact. It is a time to learn more about our state's energy supply and the important relationship between continued energy development and a strong, prosperous economy.

Most of us are familiar with more traditional energy resources such as oil, nuclear and hydroelectric power. Yet within a decade, we expect that more than 25 percent of our state's electrical needs will be met by some of the less well known energy sources, such as geothermal, wind and solar power. This will give California the most diverse energy system in the world and provide us with an important insurance policy against future disruptions in supply and price.

This week, I had the opportunity to visit some of California's dynamic energy production facilities. In northern California, I visited the Geysers, the world's largest geothermal complex. Here, the earth's heat turns underground water into steam, which is used to drive turbine generators that produce low-cost energy.

More than half of all of California's oil reserves are in Kern County. I toured the Kern River Cogeneration Plant, which produces both electricity and the steam needed to recover the heavy oil from beneath the earth's surface.

In the Mojave Desert near the city of Daggett, I toured two state-of-the-art power facilities: a coal gasification plant, which turns coal into a synthetic gas that is burned to produce electricity; and Solar One, the world's largest solar-powered central receiver.

The last stop on this educational journey was a visit to San Diego Gas and Electric's Dispatch Center. This vast communications complex insures the delivery of an efficient and stable power supply to more than 2 million Southern California residents.

In recent years, we have learned the hard way that we cannot bury our heads in the sand when it comes to energy. The security of our nation and the prosperity of our state depend on a stable, affordable supply of power.

I'm very proud of California's energy industry. With determination and innovation, the scientists, engineers and companies of this industry have put California in a leadership position. The energy industry not only accounts for nearly half a million direct jobs, but it powers our homes, offices, schools and factories and enables our economy to grow.

In my State of the State message last January, I said that an historic agreement was near which will allow us to construct a major transmission line to purchase low-cost hydroelectric power from states in the Northwest. These states have a surplus of power. California needs that power which can help meet our needs and lower our energy costs. I am pleased to announce that the agreement, which is called the California-Oregon Transmission Project, has been approved by Congress, signed by President Reagan, and we are now moving ahead to implement it.

Once in place, this project will save consumers up to $250 million in energy costs each year. It is good for the environment as well, because the project could reduce the need for constructing additional energy plants.

While our policies emphasize production, we fully recognize the importance of energy conservation. Wasting energy not only costs you money, but it costs your neighbors as well—because greater energy demand puts more upward pressure on energy rates.

It's interesting to stop and think just how much you and your family depend on electricity in the home, workplace and schools, not to mention gasoline for your car. Imagine what life would be like without it. I am determined to make sure that Californians have a secure and affordable energy supply. That's why we must continue to develop a broad diversity of energy resources. We cannot slam the door on any promising method of production as long as it is efficient and environmentally safe.

I am confident that California will maintain its leadership and diversity in the energy field. This is the challenge we have put to our scientists, engineers and energy companies, and I believe they are meeting this challenge. We will continue to encourage the most creative minds in the state to scale even greater heights in producing safe, clean and affordable energy.

Please join me next week for another California Report. This is Governor George Deukmejian. Thanks for listening.

CHAIRMAN G.V. (SONNY) MONTGOMERY SPEAKS FOR AMERICA'S VETERANS

HON. DOUGLAS APPLEGATE

OF OHIO

IN THE HOUSE OF REPRESENTATIVES

Tuesday, November 12, 1985

Mr. APPLEGATE. Mr. Speaker, I would like to take this opportunity to place into the CONGRESSIONAL RECORD the remarks that were made by the distinguished chairman of the House Veterans' Affairs Committee, Hon. G.V. (SONNY) MONTGOMERY, on the occasion of Veterans Day, 1985. His remarks were given on nationwide radio in the Democratic response of last Saturday, November 9.

Let me just say, Mr. Speaker, that there is no finer individual in the House of Representatives when it comes to doing the very best for our former servicemen and women. Chairman MONTGOMERY has been and always will be a true inspiration to the membership of the Veterans Affairs Committee and to the millions of veterans and their families in our Nation who have benefitted because of his generous deeds. I ask that every Member of the House take the time to read the words of Chairman MONTGOMERY of Mississippi.

DEMOCRATIC RESPONSE TO PRESIDENT REAGAN'S RADIO ADDRESS, DELIVERED BY REP. G.V. (SONNY) MONTGOMERY (D-MS), CHAIRMAN, HOUSE COMMITTEE ON VETERANS' AFFAIRS

(November 9, 1985)

Hello, I'm Congressman Sonny Montgomery of Mississippi, chairman of the House Veterans' Affairs Committee.

As we enter this weekend of honoring our veterans, it is only fitting in the Democratic response that I talk about veterans and veterans' programs.

But first, I want to send a special greeting to American service personnel listening around the world today over the Voice of America. We appreciate the job you're doing to help protect our freedoms here at home.

Monday marks the Nation's annual observance of veterans day. Across the country, appropriate events have been scheduled to pay tribute to the 28 million living veterans and to the more than 1 million who have died fighting for this country. As always, the highlight will be the traditional wreath-laying ceremony at Arlington National Cemetery at the Tomb of the Unknowns.

Attending ceremonies, listening to speeches, displaying the flag, visiting a veteran's gravesite, and sharing time with a veteran in the hospital * * * they're all excellent ways to honor our veterans.

But we must also show our appreciation daily by exercising our most precious freedoms—voting, worshipping, traveling and speaking freely. Without our veterans, these rights would not be possible.

I am pleased to say that, in the Congress, we don't play politics with veteran's benefits. Veterans issues are kept nonpartisan.

Veterans have a true friend in the Congress of the United States. In this time of need to cut back on Government spending, the Congress has protected the essential veterans' programs of medical care, compensation and pensions.

However, this does not mean that we don't have problems holding back attacks on these programs.

Veterans are participating in the effort to trim Government spending. They are concerned about the deficit. When they've been asked to tighten their belts, they've done it. Since 1980, veterans have contributed more than $2 billion to deficit reduction.

Our veterans are not asking for anything more than what they have earned.

It's my job, as well as the job of other Members of Congress, to see to it that the veteran is not hit any harder than other groups receiving Federal benefits.

We on the Veterans' Affairs Committee have always felt that if you treat all people receiving Government benefits the same * * * then you are being fair and veterans agree.

But, when you put other groups above the veteran and, in effect, make the veteran a second-class citizen, that's not right.

We realize that a number of aged veterans from World War II, Korea, and Vietnam are coming into the health care system, but we can handle it. We are not going to panic.

The VA has the largest hospital system in the free world. We have 172 VA hospitals, 228 outpatient clinics, 105 nursing homes, and a good system of home health care. We are conducting research in the area of health care for the aged. What we are learning will be shared with other groups working in this same area.

With 11 thousand doctors and 31 thousand nurses working for the VA the quality of VA health care is second to none, and we are going to continue to maintain these high standards.

By the year 2000, two out of every three American males over the age of 65 will be veterans. Many will require medical care.

It will be a challenge, but not a crisis. We're going to be ready.

When your sons marched off to war, they left behind family, friends, homes and jobs. They were heroes then and they should be treated as heroes now.

No Nation can take greater pride than the United States in the manner in which it honors and cares for its veterans. We must hold fast to this tradition. It plays a major role in how we are judged by the rest of the world and how we will be remembered by future generations.

On November 11 and, in fact, everyday, our Nation should show its gratitude to the veteran and to his or her family for the hardships they have endured * * * For the sacrifices they have made * * * and for a job well done. So please say thanks to a veteran on Monday.

And also, thanks to our servicemen and women, wherever you are, for helping keep our Nation free.

TRIBUTE TO HUNTINGTON BEACH/FOUNTAIN VALLEY BOARD OF REALTORS

HON. ROBERT E. BADHAM

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, November 12, 1985

Mr. BADHAM. Mr. Speaker, I would like to take this opportunity to recognize a fine organization in my district, the Huntington Beach/Fountain Valley Board of Realtors, on the 25th anniversary of its formation.

In large part, the modern history of Orange County, CA, is marked by urban and suburban development and the influx of tens of thousands of people seeking to share the wonderful attributes that makes this region so special to the more than 2 million residents who live and work there today.

Real estate is one of many industries that has grown and prospered right along with the people of Orange County. In fact, historians tell us that even the name "Orange County" was chosen and fostered by entrepreneurial realtors of the late 1880's, not in honor of the citrus that later made it famous, but because it projected an image of a balmy Mediterranean climate conducive to settlers, their families and their businesses. That appeal today is as strong as ever.

The Huntington Beach-Fountain Valley Board of Realtors was founded on December 31, 1960, under the name "Huntington Beach Board of Realtors." The original organization consisted of 23 members in seven offices. The name was changed in 1968 to include Realtors from the neighboring city of Fountain Valley and, by that time, membership had grown to more than 500.

Today, as the board marks a quarter-century of service, it boasts 1,715 members in nearly 500 offices.

Throughout its history, a primary concern to the board has been participation in community activities. Over the past few years, members have raised more than $93,000 through annual fund-raisers to buy new equipment for paramedic units in the two cities. The board also was an active participant in the restoration of Newland House, a historic Huntington Beach residence, and joined in the 1976 Bicentennial Parade.

The board's community activities extend to the preservation of private property rights and advocacy for home ownership and, in 1982, it gained national recognition as the first board in the Nation to access mortgage revenue bonds for resale housing. Through this pilot program, the board was able to provide 11.5 percent, fixed-rate financing for low-to-moderate income buyers of resale homes which met Federal guidelines.

Through the years, Mr. Speaker, the Huntington Beach/Fountain Valley Board of Realtors has taken an active interest in many issues of concern to local property owners and its members have gained a well-deserved reputation as people who contribute to the communities in which they live and work.

A SALUTE TO DAVE BRODY

HON. MEL LEVINE

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, November 12, 1985

Mr. LEVINE of California. Mr. Speaker, although I might not be the first, I wish to be among those who call to my colleagues attention the marvelous and appropriate article about my old and close friend, Dave Brody, in a recent issue of the National Journal.

I have had the privilege of working with Dave for some 15 years, and have watched him engineer successfully legislative feats which are the envy of many others.

Dave has proved himself to be tireless and creative, while always retaining his idealism and enthusiasm.

Because so many of my colleagues, on a bipartisan basis, have already brought Dave and his accomplishments to the attention of my colleagues, I will at this point refrain from further detail and simply ask unanimous consent to have inserted the September 14, National Journal article about Dave in the RECORD.

[From the National Journal, Sept. 14, 1985]

DAVID A. BRODY: MAKING MATCHES MEANS ACCESS

Most Washington lobbyists boast about having connections. David A. Brody takes pride in making them.

The veteran Washington representative of the B'nai B'rith Anti-Defamation League is an inveterate matchmaker who wends his way through the capital's power circles on the lookout for people who ought to know one another.

No sooner do his antennae pick up a nugget of conversational information about somebody's past or present interests than

the next words out of his mouth are invariably, "I'd like to put you together with . . . ."

The very next day, if not later the same day, Brody will be on the telephone proposing a luncheon involving himself and the two people he wants to bring together. Invariably, they are people who would have gotten together on their own at some point but, as Brody said in an interview, he finds that it advances his long-term interests if he can be the "facilitator or catalytic force."

"I do it so that the two people will know each other, so they will not be strangers when they need to deal with one another. Both parties usually welcome it," he explained. Those involved may run the gamut from Members of Congress, White House aides and ambassadors to reporters, fund raisers and constituents.

Twenty years at his job has taught Brody that at some point, his gestures of good will are likely to be returned in some form. "It's not so much that people are beholden to me, as it's a matter of providing greater access for me," he said, stressing the golden word of the lobbyist's trade—access.

The autographed pictures on the wall of Brody's office attest to his success in gaining access at the very highest levels. They also attest to his skill at hearing what people say and sensing what makes them tick and what their current concerns are.

"In this town, so many people talk rather than listen," explained Brody, giving away a major secret of his success. It also helps to be quick-witted enough to put information to immediate use. "If I happen to be in a Member's office and a name comes up, we'll often set up a lunch right then."

Brody is constantly on the lookout for likely connections, two Members of Congress who haven't met each other yet, a reporter who is starting out a on a project involving principals he hasn't met, new arrivals at the Israeli Embassy who need to meet the people they will be dealing with in Washington.

"It's just a matter of having almost an intuitive sense about people's needs," Brody said. "I guess it is just a matter of knowing how to relate to people. I will occasionally bring Members of Congress together whose views may be divergent. In bringing them together, they find that they are able to work together on other issues."

Those other issues, with luck, may turn out at some point to be the very ones upon which Brody is lobbying. And, even if their votes do not always go his way, Brody at least gets a chance to have his say. In 1981, when Congress approved the sale of military aircraft to Saudi Arabia, Brody recalled, "a number of good friends of mine voted for the sale, but I still had the opportunity to sit down and talk to the principal—to the man who cast the vote."

That statement is also revealing. In lobbying, as in matchmaking, the permanence of relationships is important. Accordingly, significance attaches to Brody's reference to "good friends" who voted against his position. They still are his good friends, and maybe next time they will be with him.

Besides putting his lunch hour to regular use, Brody and his wife, Bea, entertain at their home, throwing dinner parties that may bring anywhere from a dozen to three dozen Washington notables together to trade information and get to know one another better.

"From time to time, press people are invited to my parties at home as friends," Brody explained. What goes on is not intended for publication, Brody noted, but it is recognized "a reporter may pick something up at a party." But, he added, "the story won't be that I had that group of people to dinner."

Brody added that he has never hesitated to bring politicians and journalists together in a social setting. "I don't draw any lines," he said. "When I find it useful to play that catalytic role, I do it." With reference to the politicians, he observed, "I think they welcome the opportunity too, otherwise they wouldn't agree to it."

To the best of his recollection, Brody over the years has never become a matchmaker in the romantic sense. He says that he knows of no marriages that have resulted between people he has brought together and quickly adds in a businesslike tone that "if it has happened, that would not be the purpose that the meeting started out with."

There is more than a bit of a Horatio Alger aspect to Brody's career. The man who now wines, dines and facilitates friendships among the high and mighty started out in life as the son of an immigrant garmet worker who entered this country through Ellis Island. He grew up in Brooklyn, attended public schools and ended up studying law at Columbia University on a scholarship. He came to Washington in 1940 to work as a lawyer for the government and has been with the Anti-Defamation League since 1949.

Brody said he has developed his skills as a lobbyist-social connecter as he has gone along. "I like to say that the things I do, I never learned in law School." Nonetheless, the 69-year-old lobbyist makes it clear that he enjoys what he does. "I have no plans to retire," he said.

The matchmaker is obviously well matched to his calling.—**Dick Kirschten**

NATIONAL FAMILY WEEK, NOVEMBER 24-30

HON. JOHN T. MYERS

OF INDIANA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, November 12, 1985

Mr. MYERS of Indiana. Mr. Speaker, the President has recently signed a resolution passed by Congress that requests a proclamation be issued proclaiming the week of November 24-30 as "National Family Week."

We cannot overemphasize the importance of the family unit in the fabric of American life. On this basic institution rests the stability of our society and much we hold dear in our traditional American values. I have introduced the National Family Week resolution each year since 1970.

I am inserting President Reagan's 1985 National Family Week proclamation into the CONGRESSIONAL RECORD.

NATIONAL FAMILY WEEK, 1985

[A proclamation by the President of the United States of America]

America's families are America's greatest strength. Just as American society is more than the sum of its parts, families are more than just collections of individuals.

It is within the family that we first gain an understanding of who we are; that we learn to give and receive love; that we learn to respect the individuality of others; that we grow to be strong, healthy adults able to take our place in the larger families of community, country, and the world. Through the family we pass on our traditions, our rituals, and our values. From our families we receive the love, encouragement, and education needed to meet life's challenges. Family life also provides a stimulus for the spiritual growth that fosters probity of character, generosity of spirit, and responsible citizenship.

It is important that we dedicate oursleves to the promotion of strong families for, with their strength, commitment, and loyalty, they form the hearth and heart of our national life. As an eminent American educator has wisely observed: "The security and elevation of the family and of family life are the prime objects of civilization, and the ultimate ends of all industry." Special concern is due to troubled families, for we recognize that any chain is only as strong as it weakest link. At their best, strong families are small communities of love. Let us help them prosper.

National Family Week gives us a chance to honor all families and especially to honor those Americans who have extended the love and support of their families to a child through adoption or foster care. By giving the shelter of their loving arms to such a child on a temporary or permanent basis, these Americans demonstrate in a special way the unconditional love that only families can provide.

The Congress, by Senate Joint Resolution 31, has designated the week of November 24 through 30, 1985, as "National Family Week" and authorized and requested the President to issue a proclamation in observance of this week.

Now, therefore, I, Ronald Reagan, President of the United States of America, do hereby proclaim the week of November 24 through November 30, 1985, as National Family Week. I invite the Governors of the several States, the chief officials of local governments, the leaders in industry, and all Americans to observe this week with appropriate ceremonies and activities. As we celebrate this Thanksgiving Week, I also invite all Americans to give thanks for the many blessings that they have derived from their family relationships and to reflect upon the importance of maintaining strong families.

In witness whereof, I have hereunto set my hand this twenty-eighth day of October, in the year of our Lord nineteen hundred and eighty-five, and of the Independence of the United States of America the two hundred and tenth.

RONALD REAGAN.

NATIONAL WILDLIFE FEDERATION SUPPORTERS PUBLIC WORKS SUPERFUND BILL

HON. BOB EDGAR

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, November 12, 1985

Mr. EDGAR. Mr. Speaker, as the House moves toward consideration of legislation to reauthorize the Superfund Program, we will face some hard choices on some extremely important issues that will determine the future of this vital environmental program.

As my colleagues are aware, two different versions of the legislation have been re-

ported by the key committees responsible for overseeing the program. In general, the Public Works Committee's version of the bill resembles much more closely the strong and effective Superfund bill approved overwhelmingly—323 to 33—by the House last year. The bill, crafted under the excellent leadership of Representatives HOWARD, ROE, SNYDER, and STANGELAND, was reported unanimously by the committee.

We recently received the following letter from the National Wildlife Federation explaining why that organization strongly supports the Public Works version of the bill. I commend this thoughtful letter to my colleagues' attention.

NATIONAL WILDLIFE FEDERATION,
Washington, DC, November 6, 1985.

Hon. ROBERT W. EDGAR,
Washington, DC.

DEAR MR. EDGAR: The National Wildlife Federation (NWF) strongly urges you to support key bipartisan provisions of the Superfund bill reported by the Public Works Committee (H.R. 2817). These provisions are essential if our nation is to clean up its hazardous waste sites and protect human health and the environment.

The Public Works Committee unanimously adopted the following critically important provisions which are substantially weaker in the bill reported by the Energy and Commerce Committee:

Cleanup Deadlines—The Public Works bill requires EPA to begin cleanup at 150 sites per year in four of the next five years. Under the Energy and Commerce bill, EPA doesn't even have to start cleanup until 1991—a full year after the law expires.

Environmental Standards—The Public Works bill requires cleanup to meet standards and criteria set by other environmental statutes, including the Clean Water Act. The Energy and Commerce version allows EPA to waive other environmental laws.

Citizens Suits—The Public Works and Judiciary Committee bills give citizens the right to sue in federal court to stop toxic releases that pose imminent and substantial endangerment to their health. The Energy and Commerce bill does not.

Liability for Leaking Tanks—The Public Works bill contains more equitable liability limits for leaking underground storage tanks. Liability is capped at $50 million for large oil companies and $1 million for operators who do not own the facilities they manage. The Energy and Commerce bill limits liability to $3 million regardless of the size or ownership of the facility.

Right-To-Know—The Public Works and the Energy and Commerce bills require owners and operators of facilities to file material safety data sheets on the hazardous chemicals they handle. The Public Works bill also requires that communities be supplied with an inventory of the emissions of acutely hazardous chemicals. The Public Works version improves the right-to-know provision by including that inventory, but still needs to be strengthened by including emissions data on chronically hazardous chemicals—those that manifest their effects over time—in addition to the acutely toxic chemicals.

Natural Resource Damage—The Public Works bill maintains current law allowing EPA to use Superfund money to assess natural resource damage and to finance restoration and rehabilitation. The Energy and Commerce bill weakens this provision.

On behalf of the Federation's 4.5 million members and supporters, I urge you to help solve one of our nation's most serious problems by supporting these provisions. Vote for a Superfund law that offers the protection all Americans deserve.

Sincerely,

JAY D. HAIR.

VARO, INC. APPLAUDS DOD ON PROCUREMENT

HON. JOHN BRYANT

OF TEXAS

IN THE HOUSE OF REPRESENTATIVES

Tuesday, November 12, 1985

Mr. BRYANT. Mr. Speaker, as one who has participated in congressional investigations that have revealed some of the least desirable elements of defense procurement, I was gratified to receive a copy of a letter written by Mr. James F. Gero, president and chief executive officer of Varo, Inc. of Garland, TX, applauding the fairness, efficiency, and integrity of Defense Department employees working on a procurement contract for night vision equipment.

As Mr. Gero aptly observes, taxpayers, business people, government suppliers, and the defense and security of our Nation are best served by a procurement system that demands and rewards quality and efficiency—something many of us in the House have been seeking through the passage of realistic, cost-cutting defense procurement reforms.

It should be noted, however, that there are those in the Pentagon and in its supplier firms who share that commitment, and I commend to my colleagues Mr. Gero's comments.

OCTOBER 31, 1985.

Hon. JOHN BRYANT,
Dallas, TX.

DEAR REP. BRYANT: We at Varo want to bring to your attention to the outstanding performance of a task force of Defense Department employees. With efficiency and fairness, they completed negotiation of a major contract for night vision equipment that our company has recently received in a joint venture with ITT Corp.

As the enclosed letter to Under Secretary of the Army James Ambrose describes, this group was able to complete their work of the major phase of a complicated procurement program on schedule. The program, to extend over five years, was unprecedented in the night-vision industry. The technology was complex. But the negotiation was completed by the September 30 deadline, and the final terms reflect an evenhandedness to both the suppliers and the public interest.

We respectfully request that this letter be entered into the Congressional Record as recognition of the team's achievement. In this era of sometimes questionable performance in the defense procurement process, our experience with this negotiating team stands apart as one of absolute integrity, balance and efficiency.

Sincerely,

JAMES F. GERO,
President.

OCTOBER 31, 1985.

Hon. JAMES R. AMBROSE,
Under Secretary of the Army, Department of the Army, The Pentagon, Washington, DC.

DEAR MR. UNDER SECRETARY: I have hesitated to write this letter for fear that it might be misunderstood as a self-serving device. I have concluded that I must take the risk.

Varo, Inc., as a joint-venture partner with ITT's Electro-Optical Products Division, was recently awarded a contract to supply the U.S. Army with night vision equipment (DAAB07-85-C-E032). The contract award was the result of nine months' work, which began with the issuance of a request for proposal (DAAB07-85-C-E008) by the U.S. Army Communications-Electronics Command (CECOM) at Fort Monmouth, New Jersey. After the proposals were submitted we worked in extensive negotiation with individuals from CECOM, the Product Manager's Office (PM-NVD) and the Night Vision and Electro-Optical Laboratory (NVEOL) at Fort Belvoir, Virginia.

I have been with Varo for just about 13 months and have been the company's chief executive officer for two months. So I had never had the opportunity to work with the staff at these organizations. In fact, during my 16 prior years with Allied Corporation, I had little direct contact with any U.S. government personnel. But I do read newspapers and see the television news. I am familiar with stories about high-priced aircraft toilet seats and coffee pots. I suppose this is the stuff that makes news. Good news is no news, I guess.

This will be a "no news" letter, written with the hope that you will pass it along to the individuals who worked on our contract. The "no news" is that the entire process of reviewing our proposal and negotiating the contract was conducted in a highly professional, business-like manner. I was especially impressed on three counts:

FIVE-YEAR PROCUREMENT

Unlike past years, when we supplied the Army with night vision equipment on an as-needed basis, this contract is over a five-year period. By providing us with this length of time to plan our production, you enable us to operate at our optimum efficiency. This, of course, translates into savings for the taxpayer.

PROFESSIONAL CONDUCT

Your team was comprised of individuals from the CECOM contracting office, the Product Manager's Office and the NVEOL. The CECOM people brought contracting expertise to the table and both the Product Manager's Office and the night vision laboratory people provided an impressive depth of technical expertise. The Army team had both a thorough understanding of the government's requirements and the technology involved. Alice A. Allen, contracting officer, headed the CECOM team. Major Carl L. Messinger, deputy product manager, represented Product Manager Kenneth S. Solinsky in all phases of negotiation. The major was assisted by Mack Farr, chief, Engineering Division of the Product Manager's Office, who showed an excellent understanding of the technology involved in night vision. The active cooperation of the NVEOL enabled us to efficiently arrive at fair conclusions on a number of negotiating points. Fair for both sides, I might add. Your team included some very tough negotiators.

HARD WORK

We know, from first-hand experience, that the members of your team worked nights and weekends to finish this project on time.

Not just as the president of a small government-supplier company, but also as a businessman-taxpayer, I congratulate you and your people for a job completed with competency and professionalism.

In an effort to ensure that the other, less sensational, side of the government procurement story is told, I am sending copies of this letter to the following:

Our Congressman, Rep. John Bryant, with the request that this letter be inserted into The Congressional Record;

Our two U.S. Senators;

The Southwest Bureau of The Wall Street Journal, Dallas-area business publications and Dallas general circulation newspapers;

Trade publications that cover our industry.

Sincerely,

JAMES F. GERO,
President.

CHAMPUS ALCOHOLISM TREATMENT POLICY

HON. DON BONKER

OF WASHINGTON

IN THE HOUSE OF REPRESENTATIVES

Tuesday, November 12, 1985

Mr. BONKER. Mr. Speaker, I rise today to emphasize language in the committee report of the Department of Defense Appropriations bill for fiscal year 1986 which calls upon the Secretary of Defense to reevaluate CHAMPUS policy on the coverage of chemical aversion therapy for the treatment of alcohol abuse.

The need for this strong directive and similar language in the report for the defense authorization bill is to respond to the revised regulations, published by CHAMPUS last year, which dropped chemical aversion therapy from its list of covered treatments. This decision by CHAMPUS to discontinue coverage runs counter to the coverage policies of most commercial insurance carriers and Government health programs—from Medicare to Blue Cross. Furthermore, it appears contrary to the purpose of CHAMPUS, as described by Congress, which is to offer members of the military comparable health care to that available outside of the armed services.

In their September 14, 1985, final regulation which changed their coverage policy, CHAMPUS conceded that "support for the efficacy of aversion therapy has grown," and they made clear a willingness to reconsider their policy, both in the regulation and in a meeting with experts in the field last fall in Colorado. In the final regulation they state:

We will be asking interested professionals in the field to meet with us to determine whether it is possible to establish standards and criteria for the review of claims for aversion therapy. We will be particularly interested in determining whether we can develop standards for providers of aversion therapy to assure that adequate safeguards, including informed consent, exist for the patient undergoing aversion therapy. If such standards can be developed and a mechanism can be created for assuring that providers meet the standards, an amendment of the Regulation to authorize coverage would be considered.

Unfortunately, since that time, CHAMPUS has not shown any interest in attempting to develop such standards and ensure adequate safeguards. Instead, there appears to be a strong disposition against this form of treatment with providers of this form of treatment being saddled with an impossible burden of proof requirement to justify reimbursement.

While nearly every other major health care insurer covers this treatment, CHAMPUS has repeatedly told aversion therapy providers that no evaluation of the treatment will be considered until new evidence from a well designed, independently financed study is offered. Unfortunately, competition for research grants is fierce and it is highly unlikely that research money would go to evaluate a long-established form of treatment that is not on the "cutting edge" of new medical technology and treatment. The hands of the aversion therapy providers are essentially tied, as CHAMPUS refuses to consider evidence based on the providers own track records.

I am pleased that both the Appropriations Committee and the Armed Services Committee have instructed CHAMPUS to reevaluate their policy and ideally to work with the aversion therapy providers to satisfy all their concerns. It is my hope that the Secretary of Defense will act swiftly on the committees' recommendations and take the necessary steps to bring about reevaluation of CHAMPUS policy in this area. It is clear that failure to do so will only lead to stronger action being taken by Congress.

A CONGRESSIONAL SALUTE TO A.B. "AL" HERBOLD

HON. GLENN M. ANDERSON

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, November 12, 1985

Mr. ANDERSON. Mr. Speaker, I take this opportunity to honor Al Herbold, whose recent retirement caps more than 50 years of dedicated service to the southern California maritime industry.

Upon completion of schooling at Woodbury College and the University of Southern California in 1935, Al gained his first employment at General Steamship Corp. and remained there until 1941, when he joined the Indies Terminal Co.

In 1942, Al received a commission as an ensign in the U.S. Navy and served on active duty in the Naval Transportation Services and the Seabees Specials—stevedoring unit—in the Pacific until 1946. He retired as commander after 30 years of service in the Naval Reserve.

Upon his release from the Armed Forces, Al obtained a position as traffic manager at Crescent Wharf and Warehouse Co. in San Diego. Shortly thereafter, he transferred to Crescent's main office at Terminal Island and became the company's executive vice president. Al has also served as a consultant for Stevedoring Services of America since its purchase of Crescent in the Spring of 1983.

Al has also held membership in many professional organizations with close ties to the maritime community. These include: Los Angeles Steamship Association, president, 1962; Propeller Club of the Ports of Los Angeles and Long Beach, president, 1976–77; Foreign Trade Association of Southern California; Los Angeles Transportation Club; Fresno Cotton Exchange; World Trade Club of San Francisco; World Trade Club of Greater Los Angeles; Huntington Harbor Yacht Club; and the Tuna Club of Avalon.

My wife, Lee, joins me in congratulating Al Herbold on this special occasion. We wish him and his wife, Virginia, and their son, Jim, continued success and happiness in all their future endeavors.

A TRIBUTE TO REAR ADM. EDWARD J. HOGAN, JR.

HON. ROY DYSON

OF MARYLAND

IN THE HOUSE OF REPRESENTATIVES

Tuesday, November 12, 1985

Mr. DYSON. Mr. Speaker, I would like to take this opportunity to salute a man who for over 30 years has served our great Nation with valor and distinction, Rear Adm. Edward J. Hogan, Jr.

On October 31, 1985, Rear Admiral Hogan assumed the position of the Navy's Chief of Legislative Affairs, succeeding Rear Adm. Dudley Carlson, who has been nominated for appointment to the grade of vice admiral and assignment to Depty Chief of Naval Operations and Chief of Naval Personnel. Prior to this assignment, Rear Admiral Hogan was commander, Naval Air Test Center, as well as the Navy's chief test pilot at Patuxent River in Maryland's First Congressional District.

Mr. Speaker, Rear Admiral Hogan's career as a naval aviator has been marked by an enduring commitment to excellence. Among his many assignments, Rear Admiral Hogan has served as landing signal officer in Fighter Squadron 33 on U.S.S. *Intrepid* from 1956–59; flying qualities and performance project test pilot in the flight test division at the Patuxent River Naval Air Test Center from 1961–62; senior landing signal officer, carrier air wing 8 on U.S.S. *Forrestal* and U.S.S. *Shangri-La* from 1965–66; commanding officer of Fighter Squadron 92 from 1968–69; operations officer, U.S.S. *Kitty Hawk* from 1971–72; commanding officer U.S.S. *Kawishiwi* from 1974–75; commanding officer U.S.S. *Kitty Hawk* from 1976–78; and director, aviation manpower, training, and aircraft carrier programs in the Office of the Chief of Naval Operations from 1980–82.

A true American patriot and hero, Rear Admiral Hogan has received the Distinguished Service Medal, Bronze Star with Combat V, Meritorious Service Medal, and Air Medal. These high honors stand as a

living testament to Real Admiral Hogan's courage, compassion, and character.

TRUST FUNDS PROTECTION LEGISLATION

HON. MARY ROSE OAKAR

OF OHIO

IN THE HOUSE OF REPRESENTATIVES

Tuesday, November 12, 1985

Ms. OAKAR. Mr. Speaker, Today I am introducing a bill, along with Congressman JOHN MYERS of Indiana, which would prohibit the Secretary of the Treasury from using retirement trust funds moneys for any reason other than paying beneficiaries. The bill specifically applies to the Social Security's Old-Age and Survivors Insurance Trust Fund, the Federal Disability Insurance Trust Fund, the Federal Hospital Insurance Trust Fund, the Federal Supplementary Medical Insurance Trust Fund, the Railroad Retirement Account, the Civil Service and Disability Fund, and the Department of Defense Military Retirement Fund.

For the past several weeks, the Secretary of the Treasury has disinvested trust fund money from the Social Security systems, the Federal Hospital Insurance Program, the Civil Service, Military and Railroad Retirement Systems, and the Federal Supplementary Insurance Program. On Friday, November 1, $17 billion was taken from these trust funds after the Senate failed to pass the House version of House Joint Resolution 372, or a short-term extension of the debt limit.

Hearings held in both the House and the Senate have revealed that these actions are unprecedented and harmful to the trust funds. Interest lost to the Social Security trust funds alone is estimated at $1.3 billion over the next 5 years. Deputy Secretary for the Treasury, John Niehenke, told my Subcommittee on Compensation and Employee Benefits, in hearings last week, that in the past month, $5 billion from the civil service retirement trust fund had not been invested, $11.1 billion had been invested in the Federal Financing Bank instead of the special Treasury notes in which the funds normally placed, and $65 million in interest will be lost.

Mr. Speaker, I am hopeful that we can resolve the issue of ensuring that the moneys and interest to these funds will be returned in a timely fashion. Congressman JIM JONES and I offered a provision to the House-approved version of House Joint Resolution 372 to accomplish this purpose. I have also sponsored separate legislation to restore the trust fund moneys. What remains at issue is whether the Secretary of the Treasury can gain access to the trust funds at will, for reasons other than to pay benefits. Certainly, it was never the intention of Congress that these funds would be disinvested to meet the general operating expenses of the Government or that the beneficiaries would suffer a loss of income on the trust funds because of a debt limit crisis.

Mr. Speaker, our Nation's retired workers had no role in precipitating the chaos that is threatening the financial integrity of our Government and should not be required to place their retirement security at risk. They have paid into these trust funds and they should be assured of their full payments, free of worries about stability of their trust funds. The legislation that I am introducing today will prevent disinvestments, transfers, and redemptions. It will protect the trust funds from manipulation and unwarranted instrusions.

Mr. Speaker, I am very pleased that Congressman JOHN MYERS of Indiana, the ranking minority member of my Subcommittee on Compensation and Employee Benefits has joined me introducing this bill. I believe that protecting the trust funds is truly a bipartisan issue, and I encourage all my colleagues to support this bill to ensure once and for all that retirement funds are used solely to benefit retirees and their families.

THE PALM BEACH CLINIC FOR AFGHANS

HON. TOM LEWIS

OF FLORIDA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, November 12, 1985

Mr. LEWIS of Florida. Mr. Speaker, a year ago I appeared with Dr. Khalid Akram of Afghanistan and others at a regular meeting of the Palm Beach Round Table forum in my district to discuss the Afghan war with the Russians. Dr. Akram, who received his medical training at Kabul University and has been practicing medicine in that country since 1982, testified before the Congressional Task Force on Afghanistan in March of this year.

Little did I know during that panel discussion less than a year ago that I would have this opportunity to relay a tremendous success story to my colleagues. I can tell this story because of the commitment, initiative, and generosity of Richard and Sue Williams and Frank Wright of Palm Beach and many other contributors to the Palm Beach Clinic for Afghans.

The Williamses and Wright initiated a boot passing, fundraising drive that netted about $8,000 in medical supplies and $12,000 in cash to establish this medical clinic to treat the wounded and sick in that beleaguered, war-torn country. The clinic is located in a manmade cave, hidden from Soviet artillery, in the remote, shellshocked village of Azra, about a day's walk from the capital city and Soviet stronghold of Kabul. Since late July, Dr. Akram and his colleagues have treated more than 2,000 refugees and rebels.

In an effort to break the spirit of the Afghan rebels, the Soviet occupation force has destroyed medical supplies and facilities and Dr. Akram says 5,000 of his country's doctors have been murdered. Dr. Akram recently told me that to be wounded in Afghanistan, where malaria, tuberculosis, and other diseases are spreading rapidly through the population, "is to be dead."

The kind of voluntarism that the Williamses, Wright, and the other supporters of the Palm Beach Clinic for Afghans has exhibited is uniquely American, because in no other country in the world do private citizens take on a project of this magnitude. In all other countries, citizens look to their government to do this kind of work.

These constituents of mine have earned the respect of this body, of all people who care about their fellow man and human dignity. They also have earned the support of our Government in order for the clinic to be able to continue helping Afghan refugees whose lives have been devastated by Soviet occupation.

The clinic can only remain operational about 3 more months on the supplies and funds raised by its friends in Palm Beach County, FL. Because of that, I have solicited the support of the President and Secretary Shultz, for there is no question in my mind that this is an instance where government can come to the rescue.

As you know, Congress has overwhelmingly approved a 1985 fiscal year authorization of $78 million for the specific purpose of providing educational and medical assistance to Afghan refugees. The State Department may find it difficult to determine how to distribute this money because of the Soviet occupation, but I submit that the Palm Beach Clinic for Afghans is just the kind of project for which those funds were intended.

Mr. Speaker, I respectfully request your support and that of my other colleagues in helping the Palm Beach Clinic for Afghans remain in operation.

IT'S THIRD DOWN AND LONG FOR A BALANCED BUDGET

HON. DEAN A. GALLO

OF NEW JERSEY

IN THE HOUSE OF REPRESENTATIVES

Tuesday, November 12, 1985

Mr. GALLO. Mr. Speaker, the Washington political football season is paralleling the professional football season, with many upsets and very few undefeated teams after midseason.

The Washington political football, of course, is legislation to require a balanced Federal budget. As the 99th Congress reaches its midpoint, this now-famous football has been kicked back and forth between the House and Senate in a major contest over an idea that almost everyone seems to support in principle. When you start to talk about the details, however, support seems to erode quickly, at least among House Democrats.

This contest is harder to follow than professional football, because the rules of the game are not well-defined.

In fact, that is what the current battle in Congress is all about—the current budget-making rules are not working and no one can agree on changes that must be made so the process will work again.

Proof that the budget process is not working is everywhere. We are currently

paying $110 billion each year—one-tenth of the entire Federal budget—just for interest payments on the national debt we have already created. That is roughly $10,000 for every man, woman, and child in the country.

This money is no longer available to pay for program that help the people.

Every day that we delay in efforts to stop this unproductive drain on the Treasury, we put at risk the future of more and more Federal programs.

The trend is clear. We cut programs to lower the debt, then we face the need to cut more programs to pay the interest on the existing debt. Unable to make up the difference, we allow the debt to rise, then must cut more programs to pay the additional interest on the higher debt.

If we do not stop mortgaging our future to pay the debts of the past, our budget problems will continue to worsen.

As a suppporter of both the Gramm-Rudman proposal and a constitutional amendment to require a balanced Federal budget, I believe that Members of Congress who are dragging their feet on Gramm-Rudman are acting irresponsibly.

As a Member of Congress who voted on November 1 to stay in session to solve the current debt crisis, I find it hard to believe that Democrats in the House chose instead to go home, allowing this crisis to drag on.

On November 1, when the Federal Government began borrowing from the Social Security Trust Fund, we should have stayed in session to hammer out an agreement on Gramm-Rudman. Instead, we sent the bill back to the Senate.

The Senate amended the bill to require across-the-board budget cuts and to make the original proposal more accountable to its critics.

The House voted against the amendments, and sent the measure back to a conference committee.

The clock is ticking. On November 15, the Federal Government will run out of places to borrow and we will go broke, if Congress fails to act.

There is no reason for this phony crisis over Gramm-Rudman. We face a real crisis if we do not bring the deficit down and begin paying our national debt, which has topped $2 trillion.

With less than 2 minutes to go, it's third and long for Congress, which is down by four points. Stay tuned.

TRIBUTE TO SPENCER W. KIMBALL, PRESIDENT OF THE CHURCH OF JESUS CHRIST OF LATTER-DAY SAINTS

HON. TOM LANTOS

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, November 12, 1985

Mr. LANTOS. Mr. Speaker, last week Americans throughout our land were saddened by the death of Spencer W. Kimball, president of the Church of Jesus Christ of Latter-day Saints (Mormon). He died on November 5 at the age of 90. On Saturday, a special memorial service was held in the historic Tabernacle in Salt Lake City, UT, at which his accomplishments and life were remembered.

Latter-day Saints will keenly miss this outstanding leader, who has directed the destiny of Mormons in the United States and throughout the world for more than a decade. Under his leadership many important achievements have been recorded in the growth and success of the church, but one action of historic significance stands out. In 1978 under his leadership, the church leadership approved the decision to permit all males, without regard to race or color, to hold the Mormon priesthood. The decision to end the prohibition against blacks participating fully in church activity was welcomed by Latter-day Saints and by all Americans.

President Kimball's life demonstrated his tenacity in facing and overcoming obstacles. He suffered chronic heart disease and underwent open-heart surgery. He also suffered cancer of the throat and underwent surgery which left him almost speechless. His distinctive, raspy voice was the result of that medical treatment. He conquered these illnesses and then went on to assume the heavy responsibilities as presiding officer of the church.

Although he was nearly 80 before he became head of the church, he instilled a vigor and vitality to church activities that would be the envy of women and men half his age. In the 12 years of his stewardship, membership in the church grew from 3.8 million to almost 6 million around the world. He presided over the construction of 47 new temples in the United States and around the world.

Mr. Speaker, I join with millions of Americans—both Mormons and non-Mormons alike—who mourn his passing. His dedication to the importance of family, his courage and determination in overcoming physical obstacles, and his vigorous leadership are an inspiration to all of us. He was a great man; he will be missed by all of us.

ABEX AEROSPACE DIVISION'S 25 YEARS IN OXNARD

HON. ROBERT J. LAGOMARSINO

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, November 12, 1985

Mr. LAGOMARSINO. Mr. Speaker, today I would like to call to the attention of my colleagues, the declaration of October 19, 1985 as "ABEX Day" in Oxnard, CA. This is in celebration of ABEX Aerospace division's 25th anniversary in that city.

ABEX Aerospace manufacturers airborne hydraulic equipment today, but had its beginnings in 1902 as American Brake Shoe Co., supplying the country's railroads with brake shoes, castings and forgings. Headquarters were in New York City with production facilities in Mahwah, NJ.

American Brake Shoe grew with the growth of the railroad industry but gradually entered other lines of business, earning a well deserved reputation as a respected manufacturer.

In 1939 the company acquired Kellogg Manufacturing Co., of Rochester, NY, whose primary product was air compressors. This fit in well with Brake Shoe's railroad and industrial orientation. Kellogg had by then diversified into the emerging field known as aerospace. In fact, in 1919 the Navy NC–4, which was the first to cross the Atlantic, was equipped with a Kellogg windmill-type pump moved fuel from tanks to engines. This being in effect, the very first ram air turbine pump. One of these units can be seen in the Aerospace division's marketing display.

Subsequently, Brake Shoe acquired Denision Engineering Co., which was engaged in the manufacture of industrial hydraulic products. Denison engineers gave the jet age a boost in 1952 with the development of an engine-driven pump still in use today.

As a matter of fact, ABEX pumps were in the F–14 aircraft that forced down the aircraft carrying the terrorist hijackers of the *Achille Lauro.*

In 1959 Brake Shoe purchased the Permanent Filter property in Oxnard, CA., as a new home for the Aerospace division. The move was completed in 1960 and the product line was complemented in 1962 with an electro-hydraulic servovalve, product of the newly acquired Atchely Co.

As aerospace technology outpaced railroad technology, a name change for American Brake Shoe was decided on. In 1966, ABEX became the official company name.

The aerospace division is actively involved in a specialized area of hydraulics. Other divisions serve most forms of transportation, mining, construction, processing, manufacturing and general industry.

I appreciate the contributions ABEX has made to the county of Ventura and wish them success in future endeavors.

TRIBUTE TO THE NATIONAL ITALIAN AMERICAN FOUNDATION—10 YEARS OF SERVICE AND COMMITMENT TO THE ITALIAN AMERICAN COMMUNITY

HON. MARIO BIAGGI

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Tuesday, November 12, 1985

Mr. BIAGGI. Mr. Speaker, it is with a sense of great pride that I today pay tribute to the National Italian American Foundation on their 10th anniversary year. Several weeks ago in Washington, the foundation capped its 10th year anniversary with a gala weekend which included a spectacular dinner at the Washington Hilton on October 19. This event was graced by the presence of both President and Mrs. Reagan and featured the awarding of a life achievement award to Frank Sinatra.

In 1975, the National Italian American Foundation was officially established. It was the culmination of years of effort

aimed at establishing a national organization dedicated to advancing the concerns and interests of our Nation's large and influential Italian American community. It was designed to compliment the many local and State organizations which exist which serve the Italian American community. It was purposely based in Washington, DC, so as to better achieve its mandate of being a national organization as well as to maintain regular liaison with elected officials in Congress as well as those in the executive branch who are of Italian heritage.

What is remarkable about the National Italian American Foundation is the fact that a number of those who were the original architects of the organization remain as actively committee to the organization now as they were 10 years ago. Consider Jeno Paulucci. Jeno was the driving force behind the establishment of NIAF and was named its first Chairman. Today 10 years later Jeno remains chairman of the board. Yet that only tells part of the story.

It neither accurately or adequately describes his essential role in the development and success of the foundation. He has lent enormous time and energy to the foundation and like himself has made it an overwhelming success. I also acknowledge the important work and ongoing contribution made by my dear friend and our colleague FRANK ANNUNZIO. He has been such an integral factor in the foundation and has especially worked at maintaining a strong liaison between the foundation and the Italian American Congressional Delegation. He has also given generously of his time over the years for various foundation functions and events.

A number of us in the Italian American congressional Delegation have been proud to work closely with the NIAF over its first decade. Among those most worthy of note are our esteemed colleagues, PETER RODINO and SILVIO CONTE. For my part, I have been proud to serve on the board of directors since 1977 and serve as chairman of the NIAF's public image committee and cochairman of its new Media Institute.

There are countless others who have been active and who rightfully share in the success it now enjoys after 10 years. Individuals such as Frank Stella, the effective current president of the foundation. In addition, Vincent Visceglia, vice president of administration, Donald Santarelli, secretary, Mario Noto, treasurer and the distinguished general counsel of the foundation, Arthur J. Gajarsa. In addition, the foundation has been helped tremendously by our former Secretary of Transportation and Ambassador to Italy the Honorable John Volpe who served as president of the NIAF. One of the most inspirational of all NIAF leaders was the late Msgr. Geno Baroni the first president of the foundation. Monsignor Baroni was a constant force in the foundation until his tragic death to cancer in 1984.

Over these past 10 years, the National Italian American Foundation and its successes have mirrored those of the Italian American community as a whole. The Italian American Foundation has been actively involved in numerous civic, charitable, and humanitarian activities both in the United States and in Italy. The foundation has played an active role in securing private aid to the victims of the two tragic earthquakes which struck Italy during this past decade. The foundation has provided scholarships and grants to students and has conducted several conferences for young Italian Americans. NIAF has worked to combat stereotyping and ridicule against Italian Americans by both the print and electronic media.

It is difficult in this type of statement to list all of the accomplishments of the National Italian American Foundation these past 10 years. That in itself is a good sign, for these successes have in fact been too many to list. Instead I submit for the RECORD a list of highlights as compiled by the foundation and published in their October-November 1985 newsletter. In addition, I will insert a message from Chairman Paulucci and President Stella entitled "A Look Into the Future."

The Italian American Foundation has a proud past and a bright future. In addition to those I recognized earlier, let me also pay tribute to the dedicated staff of the NIAF. Specifically I wish to compliment the executive director, Dr. Alfred M. Rotondaro, who has provided effective and enlightened leadership over these past 4 years. I also commend the work done by the deputy director, Frank Bonora, and director of legislative affairs, John Salamone.

At this point I wish to insert the NIAF materials.

DECADE IN REVIEW

1975

National Italian-American Foundation organized . . . Jeno F. Paulucci named first chairman, Mgr. Geno Baroni, president . . . Mario Noto, treasurer . . . Arthur J. Gajarsa, general counsel and Paul Asciolla, executive director. The board of directors are Joseph Alioto, Baroni, Dr. Rose Basile Green, Antonio M. Marinelli, Noto, Paulucci, John Spatuzza, Jack Valenti and John Volpe . . . Italian-American Congressional Delegation plays active role . . . 30 members of the House of Representatives and two senators . . .

1976

Baroni and Asciolla issue a "prospectus on the foundation" stressing the need for scholarships and fellowships for an Italian-American studies program . . . examining questions of defamation and responding quickly and effectively to such charges . . . conducting studies to determine the status of Italian-Americans . . . develop issues and areas of national and international concern as related to the federal government . . . assisting groups in developing and exercising their leadership potential through research, training, conferences and workshops . . . developing political leadership alternatives to those who seek to exploit the alienation of Italian-American working class neighborhoods and provide alternative voices of those who foment ethnic racial disharmony.

1977

. . . Margaret Constanza is named to the White House staff as ethnic affairs advisor . . . Joseph Califano named Secretary of Health, Education and Welfare . . . Geno Baroni named assistant secretary for Housing and Urban Development . . . Jeno Paulucci chosen as President Carter's envoy to survey Fruili earthquake relief . . . Robert Georgine, president of the AFL-CIO Building Trades, and Congressman Frank Annunzio named to NIAF board of directors . . . National Endowment for the Humanities awards a grant of $15,100 to the foundation to support a conference exploring the family values of Italian-Americans and other ethnic and racial groups . . . Sister Marchione begins to work to have a commemorative stamp honoring revolutionary hero Philip Mazzei . . . Paulucci honored for his contribution to ethnic heritage at the University of Santa Clara in San Francisco . . . New members elected to NIAF Board include Congressman Mario Biaggi, Judge Mario L. Clinco of California, Congressman Silvio O. Conte, Francesco Cordasco, educator from New Jersey, Congressman John Dent, Joseph J. Digange, banker from California, Congressmen Peter Rodino and Joseph Minish and Professor Luciano J. Iorizzo . . . Also Dr. Peter Sammartino, Rutherford, N.J., Donald E. Santarelli, Washington, D.C., Professor Jean Scarpaci, Towson, Md., John Severino, Hollywood, Calif. . . .

1978

Seven new board members named including S.J. (Sam) Angotti, Morgantown, W.Va., Angelo J. D'Agostino, Washington, D.C.; Ernest Lotito, Annandale, Va.; Mary L. Sfasciotti, Kenosha, Wis.; Thomas H. Trimarco, Boston, Mass.; Vincent Visceglia, Newark, N.J.; and James L. Coli, Chicago . . . A. Bartlett Giamatti elected president of Yale University . . . John Volpe named president of the foundation . . . Italy's highest civilian medal, the Grande Ufficiale dell'Ordine, has been awarded to Congressman Frank Annunzio . . . In a landmark decision, the U.S. Supreme Court upheld NIAF's position against quotas and for affirmative action for all Americans, including Italian-Americans . . . Dr. Edmund D. Pellegrino has been named president of Catholic University . . . White House reception held for Foundation hosted by President Carter . . . Joe Ventura named NIAF Executive Director.

1979

Paulucci named recipient of "The Cavalieri Dell Umanita" award in Italy for his continuing efforts to improve relations between Italians and Italian-Americans . . . NIAF and the Agnelli Foundation sponsored a confeence in Washington on "the Role of the American of Italian Heritage in the 1980's" with more than 400 people in attendance including Vice President Walter Mondale. . . Edward Galletti, California, was awarded the prestigious "Commendatore Award" from Italy . . . Benjamin Civiletti was named attorney general of the U.S. . . . NIFA received a grant of $41,919 to plan a series of miniconferences to be held in 10 cities across the U.S. . . . NIAF's Endowment Fund off a fast start with Vincent-Visceglia giving the first $10,000 . . . Steve Aiello named to ethnic affairs post at the White House . . . Congressman Annunzio introduce an anti-defamation bill that would put Congress on record in opposition to films and television or radio broadcasts which stereotypes, demean or degrade ethnic, racial or religious groups.

1980

NIAF sponsors conference on Italians in American before the Civil War . . . Foundation establishes an information/referral service to provide assistance to Italian-Americans seeking help with government related programs . . . Vincent Visceglia was honored as the Columbian Foundation's "Man of the Year." At the same time, the Visceglia Arts Center was dedicated at Caldwell College in Caldwell, N.J. . . . NIAF was awarded a $129,070 grant by the National Endowment for the Humanities to conduct a series of regional conferences on "Italian Americans: Their Culture and contributions" . . . Six regional vice presidents were appointed to NIAF to help coordinate regional program activities. The six are Judge John A. Gale, Florida; Dr. Rose Basile Green, Pennsylvania; Mrs. Adele Malone, Mass.; Raymond A. Polverini, Los Angeles, James A. Scatena, San Francisco and Frank D. Stella, Michigan . . . A "Grantsmanship Workshop" designed to help Italian-American organizations obtain federal funds for their programs and communities was sponsored by NIAF . . . Regional conferences for NIAF kicked off in Tampa and Cleveland . . . Bob Georgine honored for his contributions in the field of labor . . . NIAF receive an R.J. Reynolds Industries Graduate Legislative fellowship to establish a legislative intern program in the nation's capitol . . . NIAF's annual dinner attacts more than 2,500 people including President Carter as well as his GOP opponent Ronald Reagan . . . Frank Stella was named president of NIAF . . . Four more members of the Italian-American Community were named to NIAF's Board of Directors. they were Paul Alongi, Bloomfield, N.J.; Joseph Maseli, New Orleans; E. Howard Molisani, New York and Judge Frank J. Montemuro of Philadelphia . . . Jeno F. Paulucci was named by President Carter to survey the earthquake damage in southern Italy . . .

1981

Mr. and Mrs. Natale J. DeFlavia, Broomall, Pa. bequeathed one-third of their estate to NIAF to provide scholarships for needy Italian-American students . . . NIAF got involved in a baseball hassle when NIAF leaders demanded an explanation of the American League's refusal to allow Edward DeBartolo to buy the Chicago White Sox . . . NIAF was upset that the decision may have been based on "ethnic prejudice." . . . Fred Rotondaro was named executive director of the foundation . . . NIAF negotiated a meeting between President Reagan and 25 leaders of the Italian-American community . . . New board members named to NIAF were Sen. Pete V. Domenici, Lucy A. Falcone, Wash. D.C.; Benjamin L. Palumbo, Wash. D.C.; Michael J. Paulucci, Duluth, Minn.; and Gilbert Simonetti, New York . . . NIAF sponsors a conference on the "Italian Creative Influence in America" . . . NIAF establishes an organizational affiliation program to present a united front and provide increased cooperation on a national level on matters affecting the Italian-American community . . .

1982

NIAF sponsors conference on Garibaldi . . . Dr. Rose Green, a member of NIAF's board, was named chairperson on the National Advisory Council on Ethnic Heritage Studies . . . NIAF launched a series of international affairs breakfast forums . . . A public policy forum was launched by NIAF to publicize important issues relating to Italian-Americans . . . NIAF sets conference, "The Italian Americans: Preparing for 1992" . . . Lucile DeGeorge was named director of womens affairs for NIAF . . . Congressman Mario Biaggi is named chairman of NIAF's 'Public Image' committee . . . Vincent Visceglia elected vice president for administration for NIAF . . . A. Bartlett Giamatti, president of Yale, Lee A. Iacocca and Sophia Loren were honored by NIAF . . . More than $800,000 in cash and pledges raised by Edward DiLoretto, Endowment Fund Chairman . . . NIAF sponsors exhibit at the National Gallery in Washington honoring the 500th anniversary of the birth of Raphael . . . NIAF sponsors day care center in Lapio, Italy . . . Foundation awarded some 19 graduate and undergraduate scholarships during the year . . .

1983

Congressman Peter Rodino was the first recipient of NIAF's Fiorello La Guardia Public Service Award . . . Foundation establishes a scholarship program in honor of Elena Cornaro to give financial aid to qualified Italian-American woman scholars . . . NIAF sponsors conference on media featuring building a 'positive image' . . . Lisa R. Tucci was awarded an NIAF Amerito DiPietro prize for her essay on the meaning of Italian heritage . . . NIAF holds conference and dinner to pay homage to A.P. Giannini, founder of the Bank of America . . . NIAF joins in labor training program in Italian earthquake region . . . 23 students from 10 states receive a total of $15,000 in scholarship aid from NIAF . . . NIAF urges Francis Vigo stamp . . . Governor and Mrs. Cuomo of New York honored by NIAF . . . NIAF Executive Director testifies before U.S. Senate Judiciary Committee on behalf of Robert Destro who becomes the first Italian-American ever named to the U.S. Civil Service Commission . . . NIAF launches regional awards dinner program . . . University of Chicago Law Professor Antonin Scalia named to U.S. Circuit Court of Appeals for the District of Columbia, another first for an Italian-American.

1984

Gov. Cuomo of New York honored by NIAF at a special dinner . . . Geraldine A. Ferraro, a member of the foundation's board, was named vice president nominee on the Democratic ticket . . . Gian Carlo Menotti, one of the great opera composers and actor Daniel J. Travanti were honored at the NIAF annual dinner . . . President Reagan, Vice President George Bush, Democratic presidential nominee Walter Mondale and vice president Geraldine Ferraro spoke at the annual NIAF dinner . . . NIAF awards over $35,000 in scholarships and grants during the year . . . NIAF creates Media Institute to help the national media seek an accurate and authentic portrayal of the realities of Italian-American life . . . Msgr. Gene Baroni, the first NIAF president and one of the founders of the foundation, dies . . . Charles Marinaccio becomes first Italian American ever named to the Securities and Exchange Commission.

1985

NIAF sponsors Mezzogiorno conference in Genoa to help the economy of that area . . . NIAF holds first youth conference in New York City . . . NIAF establishes Italian-Heritage program . . . NIAF helps sponsor Academy Award documentary of the "The Stone Carver" . . . NIAF pushes Italy rediscovery program . . . Lord and Lady Forte of England honored by NIAF . . . NIAF sponsors US tour of the world famous Carabinieri Band as part of its '10th anniversary gala celebration . . . NIAF intensifies drive against ethnic stereotyping geared to comic strips, newspaper articles and recent films . . . NIAF president Frank Stella is elected president of Republic Heritage Council to battle ethnic stereotyping . . . NIAF acts to help elderly with a series of conferences . . . Rollie Massimino, coach of Villanova University's national championship basketball team, was honored at NIAF in Philadelphia.

A Look into the Future

(The editors of the Washington Newsletter asked NIAF Chairman Jeno F. Paulucci and President Frank D. Stella to put together some of their thoughts for the future regarding the activities of the foundation. Following is the response we received from Mr. Paulucci and Mr. Stella.)

To our members:

The accomplishments of the NIAF in the first ten years of our existence have been indeed impressive.

This has been due to the numerous men and women from across the nation who have supported our organization with their time, money, and creative ideas. We now look forward to the next decade of our existence—with particular attention to the events leading up to and culminating in 1991, the five hundredth anniversary of Columbus' discovery of America.

What are some of the projects we will undertake in the future?

Americans of Italian heritage have succeeded in the U.S. for a variety of reasons.

We have worked hard, we have faith in the future, and we work with the recognition that we must try to make life better for our children. With this background in mind, the NIAF will intensify its efforts in the next few years in the area of support for our young people.

We have undertaken an extensive scholarship program that this year will provide over $40,000 in scholarships and grants. But this is not enough; we are barely scratching the surface of the existing need. We want to expand our grants and scholarship program so we can help not merely a minority but a solid majority of those young people who need financial help for their education. We want also to assist the many scholars who are exploring avenues of Italian American life.

Our children cannot be proud of their heritage if they do not know what it is—and they will not know if we do not preserve it.

Very importantly, this work must be done in cooperation with the many Italian American organizations such as UNICO, Order of Sons of Italy in America, and other national and regional groups.

The day must end when Italian American groups compete instead of cooperate.

The NIAF, for instance, can support such outstanding projects as the mentor program of the National Organization of Italian American Women which puts young people in close touch with accomplished men and women in their professional fields. Such organizations also as the National Italian American Sports Hall of Fame have created a magnificent scholarship program and annually honors the many Americans of Italian heritage who because of their athletic success serve as role models for our young people.

The importance of our young people and of education is vital—so also is a recognition that Italian Americans must begin to form key networks that can be bridges between

those of us in the business, political, and other worlds.

Italian Americans are coming into our own politically.

We have had our first candidate for national office; we expect we will have others before the end of the decade and we will have also a Supreme Court justice.

But we cannot sit back and luxuriate in the success of a few—rather we must work to extend our influence not only through members of the House and Senate who are Italian in origin but through the eighty-plus Congressional members who have heavy Italian American constituencies in their districts. We must support the young qualified Italian Americans who are beginning their political careers.

Education . . . networking, politics . . . all of these are vital areas . . . And so also is the media. We wish to build on the fine beginning of our newly formed Media Institute so that it can work on a regular basis with the opinion makers of the movies, radio, television, and newspapers.

The Media Institute can and should be able to assist young journalists and scholars and filmmakers who need funds to present the truth of the Italian American experience . . .

And we must not forget our ancestral roots. The NIAF will work to establish a fund to assist the numerous cultural projects that can display with vivid light the close relations of Italy and the United States. Too often these projects fail to come to fruition because of a lack of funds. We will strive to correct this failure by educating Italian and American companies to a realization of the continuing importance of support for these programs.

These are just a few of the many projects we plan to initiate or expand in the years ahead . . . We invite your continued support and your comments.

SUSPENSION OF DEPORTATION OF SALVADORAN REFUGEES

HON. DENNIS M. HERTEL

OF MICHIGAN

IN THE HOUSE OF REPRESENTATIVES

Tuesday, November 12, 1985

Mr. HERTEL of Michigan. Mr. Speaker, I am proud to be the cosponsor of H.R. 822 as introduced by Congressman MOAKLEY on January 30, 1985. H.R. 822 would provide for the suspension of deportation of Salvadoran refugees until further study—also provided for—could be done on the situation in El Salvador. This study would investigate all of the aspects of the present circumstances of displaced Salvadoran persons, and would compare this situation to similar ones in the 15 countries where refugees are already offered temporary haven in the United States.

The situation in El Salvador is desperate. Since the beginning of the civil war in 1979, over 50,000 civilians have been murdered. Although the instances of death squad murders are down, reports of seemingly arbitrary bombings of civilians are on the rise. Over one-half million internally displaced citizens of El Salvador are forced to live in prison-like camps. It is unarguable that these people are in danger and that their rights are being restricted. When these desperate refugees flee to the United States, those who seek only temporary haven are immediately deported. Of those who apply for official political asylum, only about 2.5 percent are accepted.

The Refugee Act of 1980 states that aliens can be granted asylum on the grounds of "persecution or a well founded fear of persecution." The United States also has a tradition of granting temporary haven to refugees from certain unstable countries. At the present time, the United States offers this temporary haven to 15 countries, including Poland, Afghanistan, Uganda, and Ethiopia. It does not offer it to the unquestionably needy refugees of El Salvador.

H.R. 822 is desperately needed to facilitate the disposition of Salvadoran refugees in the United States. I respectfully request that my fellow Members of Congress do what they can to help with the passage of this bill as it goes through committee and onto the floor of the House of Representatives. Thank you for your consideration and assistance.

A TRIBUTE TO THE RIVERSIDE HIGH SCHOOL YOUTH FOR AMERICA ECOLOGY CLUB

HON. JOE KOLTER

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, November 12, 1985

Mr. KOLTER. Mr. Speaker, today I rise to pay tribute to all 126 members of the Riverside High School Youth for America Ecology Club in my Fourth District of Pennsylvania and the club's sponsor, Mr. John Novalesi.

On December 6 during the 32d annual meeting of Keep America Beautiful, the Riverside High School Youth for America Ecology Club will receive the second place award for its efforts to preserve and improve the environment. Receiving this award is a great accomplishment in its own right but it has added significance for this high school organization: the Riverside club will become the first high school group in the Nation to win five national awards in the 32-year history of Keep America Beautiful.

The Keep America Beautiful competition roused groups from across the Nation to submit their seven-page questionnaires and albums describing the nature and scope of their respective programs. The judges panel chose from among these honoring only the best organizations in the country. Riverside's 32-page album containing pictures and newspaper stories illustrated the excellence of their multifaceted program. Activities described in the album include the following political action in circulating a petition to include the construction of a bridge in the new appropriations bill: tornado assistance; construction of over 300 bluebird houses for distribution throughout the community; developing a nature trail behind Riverside High School; continuing a recycling project; establishing a high school "energy patrol" to check lights and doors at the high school; and operating a litter pick-up in Franklin, Marion, and North Sewickley townships.

The consistent work of the Riverside High School Youth for America Ecology Club to improve the environment deserves applause. Their efforts have bettered the quality of life in their community. Therefore, I request, Mr. Speaker, that this body join Keep America Beautiful in saluting the the Riverside High School Youth for America Ecology Club.

PERSONAL EXPLANATION

HON. WILLIAM E. DANNEMEYER

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, November 12, 1985

Mr. DANNEMEYER. Mr. Speaker, due to a longstanding commitment in my district I was not available for the session on Wednesday, November 6, 1985, and I subsequently missed seven recorded votes. If I had been present, I would have voted:

"Aye" on House Joint Resolution 36, to authorize a memorial to women who served in or with the armed services;

"Aye" on House Joint Resolution 142, to honor certain black Americans in the American Revolution;

"Aye" on H.R. 2205, to authorize the Korean War Memorial;

On the amendments to H.R. 6, the Water Resources Act of 1985, I would have voted:

"Nay" on the Edgar amendment to require cost-sharing for each element of the Mississippi River;

"Nay" on the Weaver amendment to deauthorize the Elk Creek Lake project;

On House Joint Resolution 372, to increase the debt limit, I would have noted:

"Aye" on the Mack motion to concur in the Senate amendment to the House amendment to the Senate amendment (balanced budget and deficit control); and

"Aye" on the Lott amendment to instruct the conferees to agree to a fixed schedule of deficit reduction in order to achieve a balanced budget by 1991.

TRIBUTE TO COUNTY OF SONOMA AND THE SONOMA COUNTY ENERGY COALITION

HON. DOUGLAS H. BOSCO

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, November 12, 1985

Mr. BOSCO. Mr. Speaker, I rise today to commend the county of Sonoma and the Sonoma County Energy Coalition, who last week received national recognition for their outstanding energy conservation project from the Department of Energy's National Awards Program for Energy Innovation. This awards program, now in its second year, is a cooperative Federal/State effort designed to identify and reward innovative conservation and renewable

energy achievements that hold promise for expanded use throughout the country.

Sonoma County and the Sonoma County Energy Coalition, located in my district, collaborated on "The Sonoma County Residential Conservation Service Plan." This award-winning plan was developed to provide residential conservation services to 15,000 low- and moderate-income households throughout Sonoma County. Conservation education and weatherization services were provided to these residents, who in the past have been largely underserved. The main focus of the plan has been to promote life-style changes in energy consumptive practices. In addition, an important aspect of this project has been its emphasis on community involvement and in particular, the mobilization of a diverse network of community volunteers to guide the project's development.

Mr. Speaker, it gives me great pleasure to extend my congratulations to both the county of Sonoma and the Sonoma County Energy Coalition for their exceptional work in promoting energy-saving practices to groups that heretofore have been neglected. I look forward to a greater application of this project in other regions as well.

TRIBUTE TO HUBBARD S. RUSSELL, JR.

HON. ROBERT J. LAGOMARSINO

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, November 12, 1985

Mr. LAGOMARSINO. Mr. Speaker, I would like to take this opportunity to pay tribute to my constituent, Mr. Hubbard S. Russell, Jr. Mr. Russell will retire as a trustee of Allan Hancock Joint Community College District on November 28, 1985, after serving for 22 years. He is the last charter member of the board of trustees and has served as board president since 1979.

As president of the Allan Hancock College Board of Trustees, Mr. Russell has seen the college become one of the 5 most efficiently run districts out of the 70 in the State. Under his leadership, graduation requirements have been strengthened, an honors program introduced, a staff development program initiated and an outstanding academic record has been achieved. The college district covers 3,000 square miles and serves over 16,000 students a year.

A graduate of UCLA, Mr. Russell has been an active member of the National Cattleman's Association since 1958 and from 1976–82 served as chairman of the national private land use committee.

As an active member of the California Cattleman's Association since 1958, Mr. Russell served as chairman of the convention committee from 1970–84 and as a member of the board of directors since 1970–80 and is currently chairman of the farm policy committee. He is also past president of the Santa Barbara County Cattleman's Association.

Mr. Russell and his wife Marie are parents of two children and have four grandchildren.

I wish them the best of everything in their retirement years.

A CONGRESSIONAL SALUTE TO ST. ANTHONY'S CROATIAN CATHOLIC CHURCH ON ITS 75TH ANNIVERSARY

HON. GLENN M. ANDERSON

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, November 12, 1985

Mr. ANDERSON. Mr. Speaker, on December 7 the Croatian community of greater Los Angeles will gather at the Hollywood Palladium to celebrate the 75th anniversary of St. Anthony's Croatian Catholic Church. I take this opportunity to congratulate St. Anthony's Church and its many parishioners on this special occasion.

At the turn of the 20th century, small groups of Croatians began to settle along the coast of southern California. With the attraction of the area's mild ocean breezes, many settled in the seaside community of San Pedro, which quickly became recognized as the hub of California's commercial fishing industry.

Since the Catholic faith has been, and continues to be, an integral part of the Croatian's daily life, the church has always been a natural gathering place. The dreams of those in the Croatian community of Los Angeles became a reality when the Most Reverend Bishop Thomas J. Conaty dedicated St. Anthony's and celebrated a solemn high mass on December 11, 1910.

Through the years, the Croatian community has continued to thrive in the Los Angeles basin. Today, the children and grandchildren of the original Croatian settlers are forging successful careers and helping make California such a special place to live. Their contributions and dedication to the community is a tribute to all Croatians.

As the Croatian community grows in Los Angeles and San Pedro, you can be sure that St. Anthony's will continue to be one of our area's most treasured places of worship.

Mr. Speaker, this 75th anniversary celebration is a fitting tribute to all those early Croatian pioneers who have the faith and courage to travel thousands of miles around the globe and build their own church and raise their families.

My wife, Lee, joins me in saluting St. Anthony's Croatian Catholic Church on this special occasion. We know that the Croatian people will continue to play an active role in the community and help us make the world a much better place.

MARY TSUKAMOTO DAY IN SACRAMENTO

HON. ROBERT T. MATSUI

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, November 12, 1985

Mr. MATSUI. Mr. Speaker, on October 26 a dinner gala was held in my district to celebrate the 50th anniversary of the founding of the Florin Chapter of the Japanese American Citizens League. The last 50 years have been a time of tremendous growth and rich history for the Florin JACL.

No one exemplifies the growth, maturity, and changes in the community better than Mary Tsukamoto. Most appropriately, Mary was honored at the dinner for her many contributions to the community as an educator, historian, church worker, and civil rights leader.

Talking with Mary, the last 50 years melt away. She paints so vivid a picture that you are able to feel, and understand, and envision the changes that have taken place.

She can tell you about the families who came to Florin in the 1920's and 1930's, more than 60 percent of whom were Japanese people who farmed the land. They raised strawberries and learned how to plant grapevines between the berry patches. Other Japanese worked in the basket factory and the cover factory.

When the Florin JACL was founded in 1935, racism and prejudice was prevalent. The Florin Elementary School was segregated from 1923 until 1939 when Mary and Al Tsukamoto, representing the Florin JACL, went before the school officials and asked them to integrate the classes.

And then the war and the internment. Those of us who were too young to remember are now in a position to champion the case for redress. Mary has been in the forefront of that cause for 40 years as a leader and as a role model.

Mr. Speaker, I ask you and all of my colleagues to join me in tribute and appreciation to Mary Tsukamoto, who has devoted her life to the pursuit of justice and service to the community.

ON VETERANS DAY, WE HONOR AND PRAISE OUR VETERANS

HON. WILLIAM O. LIPINSKI

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Tuesday, November 12, 1985

Mr. LIPINSKI. Mr. Speaker, it has been 40 years since the end of World War II. This makes yesterday, November 11, 1985, a very special Veterans Day for all those who fought to save Europe from Nazi Germany and Asia from Imperial Japan. I wish to express a personal thank you to all those men and women who made the great effort not only for America and our way of life, but also for all mankind.

November 11 is not only a day for us to pay tribute to the over 28 million surviving veterans of our country as well as those who are no longer with us, but to give thanks for the freedom and security which our servicemen have brought to this country. In how many countries of the world can citizens freely advance any idea, at any time, in any place? How many nations can boast of truly free elections? In how many countries is the dignity of the common man not only presumed, but guaranteed by the government? Unfortunately, the answer to all of these questions is, precious few.

We in the United States enjoy all of these freedoms, and more. However, we must remember that we owe the existence of our liberties to the men and women who have taken arms to defend America. Liberty may be a right, but it is by no means a certainty. We enjoy our freedom only because we have been willing to fight for it. Democracy is fragile, and we must defend it every day. For over 200 years, brave Americans have fought and sacrificed so that we may continue to speak freely, worship as we please, and publicly voice our opinions of government, without fear of retaliation.

On November 11, we praise our veterans for their efforts on behalf of liberty. We enjoy the benefits of freedom every day. If we publicly honor our veterans only 1 day of the year, let us pause for a moment each other day, and give thanks to those who have fought and struggled to ensure that Americans will always live in freedom.

CONSERVATIVE ELITES OUT OF TOUCH WITH AMERICA

HON. PATRICIA SCHROEDER

OF COLORADO

IN THE HOUSE OF REPRESENTATIVES

Tuesday, November 12, 1985

Mrs. SCHROEDER. Mr. Speaker, I'd like to bring your attention to the results of referenda held this past Tuesday in three small, conservative New England towns—Dover, NH; Derry NH; and Bristol, CT. The question posed to the voters in each town was essentially the same—"Should the 1973 decision of the Supreme Court in Roe against Wade regarding abortion be overturned?"

It seems that antiabortion forces selected the three towns for the referenda precisely because of their small town, conservative nature. They assumed, mistakenly, that men and women in such towns would support the extremist view that women have no right to control their own bodies. They believed, wrongfully, that conservatives share their misguided notion that it is the proper function of government to assert ownership rights over women's wombs by forcing a woman to continue an unwanted pregnancy. The referenda results show that the majority in each community supports the Supreme Court's ruling in Roe against Wade. In Dover, 65 percent of the voters support the Court's ruling, in Derry, 60 percent, and in Bristol, 56 percent.

The voters who went to the polls on Tuesday are sending a message to those of my colleagues who are intimidated and afraid of well-heeled antiabortion organizations with their barely hidden right-wing agendas. These organizations do not represent the majority of your constituents. They do not represent a majority of your conservative constituents, and they certainly do not represent a majority of your liberal constituents.

OPPOSITION TO THE ARMS SALE TO JORDAN

HON. NORMAN F. LENT

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Tuesday, November 12, 1985

Mr. LENT. Mr. Speaker, I offer my strong support for this joint resolution which opposes the proposed arms sale to Jordan until that country enters into meaningful peace negotiations with Israel.

As a cosponsor of a House joint resolution to block the Jordan arms sale, I am pleased by the Senate's action in overwhelmingly approving this similar legislation.

The fact remains that Israel is our most steadfast ally in the Middle East. The President's proposed arms sale to Jordan, without assurances as to that country's commitment to peace negotiations, would severely undermine Israel's security. Jordan must take a more active role in the peace process. Israel has stated its willingness to begin immediate direct negotiations with Jordan. To approve the proposed arms sale without such a commitment from Jordan would render Israel, the only true democracy in the Mideast, vulnerable to her enemies. I refuse to support such action. As one who has long recognized Israel's importance to the safety and security of this Nation, I will continue to do all I can to ensure that country's best interests are protected.

This legislation provides the incentive needed to get Jordan to the negotiating table with Israel. I urge my colleagues to support the resolution.

MAC-TYPE GUN: DESIGNED TO KILL PEOPLE

HON. ROBERT G. TORRICELLI

OF NEW JERSEY

IN THE HOUSE OF REPRESENTATIVES

Tuesday, November 12, 1985

Mr. TORRICELLI. Mr. Speaker, last spring, a young Missouri State Trooper was shot to death in a hail of gunfire from a powerful yet lightweight weapon. A year earlier, a popular talk show host in Denver was gunned down outside his home with a similar weapon.

Two unfortunate and tragic facts link these two crimes: The persons charged with these killings were part of a group of extreme right-wing survivalists and they were both killed with a lethal weapon, still a mystery to many law enforcement officials, and most of the public, the MAC-type machineguns.

For several years, both Federal and local law enforcement officials nationwide have fought a courageous yet silent battle against this deadly opponent. These MAC-type guns—over 30,000 in circulation—are known to be used by the most notorious elements—drug dealers, survivalists, motorcycle gangs. They are designed for no other purpose than to kill people in large numbers.

Law enforcement offcials fear them because they are easily concealable and because of the tremendous firepower.

Each day, police officials continue the brave struggle against this weapon. Each day, law enforcement officials, in responding to the most routine dispatches, put their life on the line, not knowing whether they will be confronted with a hail of gunfire from one of these weapons.

Ironically, not only must law enforcement officials defend against the danger posed by these guns, but now are forced to defend themselves against a barrage of vicious and unwarranted attacks by the very people who have manufactured these guns.

Recently, RPB Industries of Atlanta, GA, placed an advertisement in a publication called "Shotgun News," naming a number of Bureau of Alcohol, Tobacco and Firearms officials [BATF] and linking them to Hitler's dreaded Gestapo. These vicious and obscene allegations were made against these agents for one reason only: They were doing their job and investigating this company for crimes for which they are now under indictment.

Those crimes relate to the business of allegedly sellings pieces and parts from which MAC-guns and silencers for the guns can be assembled.

These advertisements of the RPB Industries are not only a slur on the Federal BATF agents who have attempted to do their best to protect themselves and the public from these weapons, but they also constitute an attack on this institution which funds and oversees their activities.

Indeed, the injury is so great that the agents named in this ad have taken the extraordinary action of retaining counsel and filing suit against those who have paid for it.

In doing so, these agents have attempted to rectify a grievous wrong. They have stood up against those who have not only sent into the mainstream of criminal commerce these deadly guns, but compounded their actions by attacking and villifying the Federal agents attempting to combat this threat.

I wish them every success in their suit and I ask my colleagues to join with me in rejecting these attacks on the BATF and offer support for their work in the future.

LEGISLATION TO REFORM THE FEDERAL COMPONENT OF THE UNEMPLOYMENT COMPENSATION SYSTEM

HON. WILLIAM F. CLINGER, JR.

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, November 12, 1985

Mr. CLINGER. Mr. Speaker, it is no secret that certain areas of this country are not participating in the economic recovery. The people of my district have told me in no uncertain terms that our area of Pennsylvania needs jobs. Many people living in these economically depressed pockets have, through no fault of their own, lost their jobs and have little chance of finding comparable work with another employer in the short term.

The Kittanning Leader-Times, a newspaper read by many of my constitutents, recently ran a fine editorial about the need to attract business and industry and pointed out that the survival of that area of Pennsylvania is at stake. I have committed myself to help bring those new employment opportunities to my district. But in the meantime we need to provide some assistance to the long-term unemployed.

Six months ago Congress voted to phase out the Federal Supplemental Compensation Program, the idea at the time being that the economic recovery made the program unnecessary. My constitutents would disagree. I disagree. I have cosponsored legislation introduced by my colleague from Ohio, Mr. PEASE, which would reform the Federal component of the unemployment compensation system. It is a bill worthy of your attention, and I strongly urge you go give this measure, and the problem of the long-term unemployed, the consideration it deserves.

VETERANS DAY OBSERVANCE

HON. TERRY L. BRUCE

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Tuesday, November 12, 1985

Mr. BRUCE. Mr. Speaker, I rise today to honor our veterans throughout this great country. Yesterday marked our 32d annual Veterans Day observance. There are 28 million living veterans in the United States. I am proud to represent 7,000 of these veterans. On this day, we recount their deeds and sacrifices and remember the more than 1 million who have given the ultimate sacrifice in defense of the freedoms and ideals on which this country was founded. We pay them our highest tribute.

Those of us who have lived through the ravages of war or have seen it, have a special responsibility to future generations. We are charged with remembering the destructive impact of war on the Nation, its participants. and their heroic deeds. I am not saying that we should live in the past or in the ugliness of war, but I am saying that we must never forget. A generation fortunate enough not to witness or experience the brutality of war can easily forget. Our future as a free nation depends on whether or not we meet that responsibility and work tirelessly for peace. That's why Veterans Day is so important.

More than 130 measures affecting veterans' benefits and services have been introduced in the House of Representatives during the first session of the 99th Congress. The Committee on Veterans' Affairs has reported legislation that affects a broad range of veterans' benefits, including health care, housing, compensation, education, job training, and insurance. The following represents some of the major legislation I am proud to say I voted for and helped pass for you in the House of Representatives.

H.R. 505. Veterans' Health Care Amendments of 1985. Authorizes funds to encourage research and treatment of diseases affecting veterans.

H.R. 2343. Veterans Compensation Benefits Amendments of 1985. Increases the maximum coverage under Serviceman's Group Life Insurance from $35,000 to $50,000.

H.R. 2344. Veterans' Housing and Memorial Affairs Amendments. Contains a sense of the Congress resolution reaffirming the strong opposition to the administration's proposal to raise the VA home loan origination fee.

H.R. 1408. Veterans' Employment Amendments of 1985. Extends the application deadline for participation in the Emergency Veterans' Job Training Program. It also makes improvements in the Vocational Readjustment Appointment Authority, under which Vietnam-era veterans are given special consideration when seeking Federal employment.

Veterans Day ensures that the memory of veterans' sacrifices endure and the dream of a peaceful world never dies. On November 11, I urge all Americans to join in remembrance.

SUPPORT FOR FEDERAL EXCISE TAX

HON. CARROLL HUBBARD, JR.

OF KENTUCKY

IN THE HOUSE OF REPRESENTATIVES

Tuesday, November 12, 1985

Mr. HUBBARD. Mr. Speaker, I received a thought-provoking letter from my constituent, L.M. Huff, executive director of the Green Valley Baptist Association in Henderson, KY, which I believe will be of interest to my colleagues.

As Congress continues to study tax reform proposals, L.M. Huff has written to me about his support for a Federal excise tax which, he believes, will be fair to individuals and corporations alike.

I urge my colleagues to read the views of L.M. Huff. His letter to me follows:

SEPTEMBER 18, 1985.

CONGRESSMAN HUBBARD: I support a Federal tax on all goods.

Let's go back to World War II. We had a Federal excise tax. It worked, and it could work again. We are in war and it is just as serious. Japan couldn't beat us by might, so they are trying to beat us by economics. We can beat the enemy if we share and share alike. Let's get on with a TAX where all pay as they go—this will remove the IRS and save three and one half billions of dollars per year and that is from now on.

Any state that has a sales tax is already set up to collect federal taxes. Let's stop this political footsey and get on with a plan so that no person or corporation can miss the joy of sharing in the total support.

Your friend,

L.M. HUFF,
Executive Director.

CYPRUS

HON. JULIAN C. DIXON

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, November 12, 1985

Mr. DIXON. Mr. Speaker, the Republic of Cyprus may be a small island, but strategically it is an important ally of the United States. As we move to finalize our foreign aid program for fiscal year 1986, I believe Members of Congress should keep in mind that Cyprus remains a troubled country divided between north and south—between Turkish Cypriots in the north that occupy about 40 percent of the island, yet comprise only 18 percent of the population, and the Greek Cypriots in the south.

I believe Congress should continue to review our foreign assistance levels to Greece, Turkey, and Cyprus, and encourage these governments, particularly Turkey, to move toward a negotiated settlement based on the fundamental principles of freedom and democracy.

Cyprus' history reflects a country torn by ethnic conflict. Eleven years ago, in a move that shocked the world, Turkish military forces invaded Cyprus, and, for years there was no urgency on the part of the Turkish Cypriots to reunite the island.

Today, there remain about 25,000 Turkish troops occupying Cyprus, and the U.N. peacekeeping force that was sent there in 1964 to preserve international peace and security remain stationed on the "green line" dividing the two zones. Despite the partitioning and the efforts of the Turkish Cypriots to establish their own government under Mr. Rauf Denktash, there is only one internationally recognized government—that of President Spyros Kyprianou who remains a close and loyal ally of the United States.

The unfortunate reality is that before there can be any resolution to the unsettled conditions in Cyprus, a series of complex problems will have to be addressed by both communities, including a withdrawal of foreign military occupying forces, a new constitutional agreement, and progress toward resolving the territorial rights issue. If there is to be a long-term solution and a unified Cyprus, all concerned parties will have to come to terms with these issues that would give a new ray of hope for an end to this tragic conflict.

The differences between the Turkish and Greek Cypriot communities are widespread, but with the recent initiative and diplomacy of U.N. Secretary General Javier Perez De Cuellar there are promising signs of a willingness on the part of the two communities to negotiate. This January, President Kyprianou and Mr. Denktash met in New York for a U.N. organized summit. Although the summit failed to bridge the fundamental roadblocks between the two sides, the meeting clearly signaled some progress toward a settlement.

As the Republic of Cyprus celebrates its 25th anniversary, the people of Cyprus and many Americans of Greek extraction can justifiably wonder how much longer it will be before they can truly rejoice in celebration of their independence and their freedom from military occupation.

I agree with my colleagues in Congress—a divided Cyprus is a weakened Cyprus; the talks must continue. We must continue to hold firm on a 7 to 10 ratio in foreign assistance, and condition aid to Greece and Turkey on their progress toward peace.

I am hopeful that Cyprus will not remain a divided state, and that the complex problems that have been festering over the past 11 years will be resolved. Without hope, there is only despair. We must remain hopeful there will be direct negotiations to break the impasse, and bring in a new decade for a unified Cyprus and peace in the region.

UNITED STATES MUST EXTEND VOLUNTARY DEPARTURE STATUS TO SALVADORANS

HON. DAVID E. BONIOR

OF MICHIGAN

IN THE HOUSE OF REPRESENTATIVES

Tuesday, November 12, 1985

Mr. BONIOR of Michigan. Mr. Speaker, since the election of President Duarte, we have all hoped for a strengthening of democracy and the prospects for peace in El Salvador. Yet, these hopes must not blind us to that country's continuing war and the suffering of its people.

Hundreds of thousands of Salvadorans have fled to neighboring countries or the United States, fearing for their safety. The recent kidnaping of the President's daughter, and attacks by the Honduran military on a Salvadoran refugee camp are graphic illustrations of how violence threatens the life of every Salvadoran.

Under such conditions, it is imperative for the United States to grant extended voluntary departure status to the Salvadorans who have sought refuge in our country. I commend Chairman MAZZOLI for the hearings he held on this legislation last week. And I urge my colleagues to support the Moakley bill to grant Salvadorans a temporary stay of deportation.

UNOBLIGATED HOUSING FUNDS

HON. MICKEY LELAND

OF TEXAS

IN THE HOUSE OF REPRESENTATIVES

Tuesday, November 12, 1985

Mr. LELAND. Mr. Speaker, I would like to take this time to raise a concern I have relating to unobligated housing funds held by the Department of Housing and Urban Development. My concern centers on how these funds would be treated under the Gramm-Rudman balanced budget amendment.

The Council of Large Public Housing Authorities has studied this situation and concluded that nearly $38 billion in funding held by HUD falls into the unobligated category. This amount represents housing assistance for more than 1 million Americans.

The Senate balanced-budget amendment makes clear that unobligated funds, along with normal appropriations accounts, would be subject to across-the-board spending cuts. The House-passed version exempts these funds.

The main impact of cutting HUD's unobligated funds would fall on the 1.1 million very low income elderly and family tenants who lease private housing with rental assistance from HUD through the local housing authority under section 8 programs. This popular program, which closely resembles the administration's voucher proposal, allows low-income people to rent private housing by paying a set percentage of their income in rent, with the balance paid by the Federal Government. This is an important program as it allows many people to escape the often horrendous conditions of public housing projects, while not losing Federal assistance.

Each housing unit authorized to receive a rental subsidy under this program has such funds appropriated on a 15-year schedule. HUD has chosen administratively to obligate funds only for the first 5 years and place the remainder in an uncommitted reserve. Funds in this reserve are then paid out in 5-year intervals. Thus, these funds that have been legislatively appropriated and committed to assistance of low-income tenants, nevertheless appear unobligated in the HUD ledgers.

Mr. Speaker, it is clear that to expose these unobligated HUD funds to the automatic sequestering mechanism of the Gramm-Rudman plan would result in the dislocation of hundreds of thousands of poor and elderly tenants. In this time when hundreds become homeless each day, we, as responsible legislators, should not lend a hand in forcing people into the streets. I urge my colleagues on the conference committee to pass the House version of the balanced-budget amendment and exempt HUD's unobligated funds from automatic cuts.

WASTE OILS ARE HAZARDOUS

HON. THOMAS J. DOWNEY

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Tuesday, November 12, 1985

Mr. DOWNEY of New York. Mr. Speaker, a critical question in the debate over the reauthorization of Superfund that we will soon consider on the House floor is who should pay to clean up abandoned and out-of-control toxic waste sites.

In 1980 we decided that the revenue for Superfund should come, to the extent possible, from those segments of industry and consumers most responsible for imposing risks arising from hazardous waste on society. This year we must significantly expand the scope and funding of Superfund but we must not abandon the "polluter must pay" philosophy for Superfund. The current taxes on chemical feedstocks and crude oil should be expanded and combined with a waste management tax and a share of general revenues to retain our original intent for the program.

In considering Superfund financing, it is important to remember who and what contributes to the toxic waste crisis facing this country today. One source of the problem is petroleum and its byproducts. Petroleum wastes including waste oil have been found at over 100 hazardous waste sites identified by EPA as candidates for Superfund cleanup. I urge my colleagues to read the attached article on the dangers of waste oil that recently appeared in the New York Times as they consider who should pay for Superfund.

[From the New York Times, Nov. 9, 1985]

EPA RESTRICTING USE OF WASTE OIL AS FUEL

(By Philp Shabecoff)

WASHINGTON, Nov. 8.—The Environmental Protection Agency announced restrictions today on the selling and burning of used oil containing contaminated waste. It said the use of such oil as fuel could cause cancer and other illnesses.

The rule, which will go into effect within the next two weeks, would ban the burning of all such oil containing more than specified levels of toxic chemicals and metals.

Some 500 million gallons of used oil burned each year in about 30,000 residential, institutional and commercial boilers. This oil amounts to less than 1 percent of the nation's fuel.

The burning of waste oil as fuel has been regarded as a particularly significant problem in large cities such as New York. Representative Bill Green, a Manhattan Republican, had pressed the environmental agency to have controls in place by this winter.

"In our city, especially in Manhattan, our problem is not waste in the ground but in the air," Mr. Green said today. He said the rules were needed "so we can avoid breathing poisons this winter."

Although the burning of waste oil contaminated by toxic substances has long been recognized as a health threat, the law on handling and disposing of toxic wastes allowed the continued use of such wastes as fuel supplements. Congress barred the practice last year; the rule issued today will put the Congressional ban into effect.

Also today, the environmental agency proposed what it said were the first Federal controls on the management of all used oil, including motor oil, lubricating oil, hydraulic fluids and metalworking oil. The agency is also proposing to list these used oils as hazardous wastes under the law on handling toxic waste, formally known as the Resource Conservation and Recovery Act.

Lee M. Thomas, Administrator of the agency, said the rule issued today would bring used oils under Federal control for the first time.

"E.P.A.'s ban on burning contaminated oil will reduce a major urban health risk, particularly in the Northeast and Midwest, where sale of contaminated oil for fuel has been a common practice," he said.

Mr. Thomas also said that the agency required people engaged in recycling used oil and those who burn it to notify the agency of their activities, "which will enable us to develop our first complete picture of the used oil recycling industry and to enforce our regulations.

The rule adopted today would bar the burning of waste oil containing more than five parts per million of arsenic, two parts per million of cadmium, 10 part per million of chromium, 100 parts per million of lead or 4,000 parts per million of halogens. The ban would also apply if the fuel's vapor ignites at less than 100 degrees Fahrenheit, a temperature at which incineration would fail to destroy many dangerous contaminants.

GROUP CALLS STANDARDS LAX

Robert V. Percival, a lawyer for the Environmental Defense Fund, a private group that often litigates on toxic waste issues, said that the cutoff point at which the hazardous substances may not be burned are set at levels that are "far too high and present too high a risk, particularly for people living in large cities."

It said it had determined that burning "contaminated used oil in boilers in urban areas may pose a cancer risk to urban residents."

"If the contaminated oil contains lead, an additional risk may be posed, especially to children," the statement added. "Studies indicate that lead adversely affects the development of children's nervous systems, as well as causing other toxic effects."

Representative Green commented that toxics in adulterated oil have been found to cause a wide range of health effects, including heart problems, brain damage and renal disease.

THE STRATEGIC DEFENSE INITIATIVE

HON. ROBERT K. DORNAN

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, November 12, 1985

Mr. DORNAN of California. Mr. Speaker, the strategic defense initiative [SDI] is vital to the long-term survival of freedom and democracy. The SDI offers the best hope to make nuclear weapons obsolete once and for all. The President has correctly stated that there are a number of technologies that have to be successfully addressed before the comprehensive strategic defense can be deployed.

In this vein, there are two problem areas that the mad-capped opponents of the President's SDI Program have been kind enough to point out—even if these problems are highlighted for the wrong reasons. The first concern is that the SDI Program does not address itself to air defense issues such as defense against aircraft or cruise missiles. This is true. But the SDI Program is not designed to perform this air defense mission.

However, air defense is a real concern. The United States does not have an active air defense in any sense of the term. At present, the United States and Canada dedicate only 340 interceptors to defend the two countries—exclusive of Alaska. This is 50 fewer than were deployed at Pearl Harbor on December 7, 1941. The U.S. Navy has more F-14 Tomcats to defend its 13 carrier battlegroups than the U.S. Air Force has planes, of all types, to protect the continental United States. The radar net that would be called upon to alert our interceptors has huge gaps. Its effectiveness is extremely limited.

It is this effectiveness that is disparaged by the mad-cappers in relation to the SDI Program. There are a number of approaches to resolving the problem of detection. In the short run we should build additional fixed and mobile radar systems tied to Norad, including the advance over the horizon backscatter [OTHB] radars. For the longer term the most promising solution is to pursue space-based detection systems. The Defense Advanced Research Program Agency's [DARPA] strategic air and cruise missile defense and integrated antisubmarine warfare projects are specifically directed toward achieving this goal. I urge my colleagues to support these programs and especially recommend to the Director of DARPA to set aside the funds necessary as outlined in the descriptive summary—PE62301 and PE62702E—for these projects in fiscal year 1986.

The second area of concern is software for the management of comprehensive SDI program. On March 23, 1983, the President called for an intensive and comprehensive effort to define a long-term research program. On March 23, 1983, the President called for an intensive and comprehensive effort to define a long-term research program. In order to develop and deploy a comprehensive strategic defense we need a software system so well developed that we have extremely high confidence that the system will work correctly when called upon. This is an Herculean task.

But not surprising, the opposition is woefully ill-informed about the extent of U.S. programs and ongoing research. There are over a dozen universities, working independently, involved in developing faster and more powerful programs. There are other groups involved in parallel programming. These programs are the most promising of the evolving software technologies and ones that will benefit commercial interests as well as support national security.

The problem to be solved deals with coding and debugging the millions of lines of instruction. This is not only time consuming but expensive. There is a potential solution that is also under consideration at DARPA. This is the automated software and hardware development program. This project would build an environment which would aid system designers in the life cycle maintenance of large complex systems through the use of automatic generation of ADA code. It is estimated by DARPA that such a program would increase productivity by a factor of up to 25.

I encourage the Director of DARPA to allocate the funding necessary to begin the 6-month demonstration of the usefulness of this unique approach.
